ELDORADO GIRL HONORED BY McMURRY COLLEGE.

Miss Ruth DeLong had the honor of being one of the two girls chosen by McMurry College to represent her school at the Methodist Young Peoples Convention held last week in Memphis Tennessee. About ten thousand young people of America attended this great convention and some of the greatest speakers of the world presented topics of vital interest to our American life. Miss Ruth has been doing excellent work in college as well as serving as class president, literary society president, and president of the girls' student council.

Miss Tillie Young another El Dorado girl has been elected secretary of the student council, all El Dorado are proud of the record that the home girls are making and are glad to know of the honors that have been bestowed upon them.

BALEW-TISDALE.

Saturday morning at 8:30 o'clock Mr. Louis Balew and Miss Lola Mae Tisdale were united in the Holy bonds of wedlock at the ranch home of the brides parents, Mr. and Mrs. V. G. Tisdale. Rev. J. C. Young officiating.

The bride is the oldest daughter of Mr. and Mrs. Tisdale and has been reared in this community, and by her sweet disposition has won for herself many warm friends.

The groom is a son of Mr. and Mrs. J. T. Balew who farm east of El Dorado and has been in our midst for about five years and is well and favorably known.

Only a few friends were invited to witness tying of the nuptial knot, and the happy young couple left immediately after the ceremony for a wedding tour of several counties, they go first to Rising Star, returning by way of Brownwood and San Saba, they will be at home in El Dorado after their return where the groom is working in a tilling Station.

The Success joins the many friends of the bride and groom in wishing for them a long and happy wedded life.

Mr. D. C. Hill has gone to Mineral Wells for a short stay, he has gone there for the benefit of his health, and his many friends wish that he may return much improved.

A. T. Wright, Editor and Proprietor.

SUBSCRIPTION RATE, ONE YEAR..... \$1.25.

Entered as Second Class matter July 5th, 1906, at the Post office at El Dorado, Texas, under Act of Congress of March 3rd 1879.

Friday, Jan. 8.

All local advertisements will be charged at rate of 5c per line each insertion, Display ads 20c per column inch for one insertion contract prices furnished upon application special obituarie and resolutions charged at rate of one cent per word.

A few more freezes like that recent one, will be quite beneficial to the Garages as some folks just can't think to drain their cars.

We had rather be right than wrong but we sometime think we are more wrong than right, but we may be wrong in thinking this, we don't know just how to find out.

The county officials were without fire at the Court house several days last week on account of the freeze, and no water, some mexican prisoners let all the water in the courthouse tank out and no wind to fill up the tank again, consequently they have had a cool reception at the County's Captol.

We see from the press that "Buck" Bailey is organizing a Football Team of his own in California, Buck recently played in a game between the West and the East in which his team won, this game was the largest ever pulled in the United States, and some 20,000 people witnessed the game. But we note also that our friend Bailey has attained the age of 40 years according to the press, and if he keeps on advancing in age as he has in the past few months and gains in athletic fields in power he will be a gain and pass old Mathnsala's age.

Lynch Davidson says that his friends will meet soon to nominate him as a candidate for governor, with Lynch Davidson and Ma in the running again the Klan will nominate another candidate and it will be Ma and Klan again.

Why destroy property, in celebrating New Year or Hall-ween. In order to celebrate Hall-ween and New Year, someone in El Dorado seems to have no fun unless they can go around town at night and up set all the toilets in the business section of town. Just what fun there is in this for them is beyond our foresight, as we fail to see it. This all occurred on Hall-ween night and again on New Years eve night. The prowlers or fun seekers went one better, they climbed on top of the E. W. Brooks Store and filled up his stove pipe, which caused considerable trouble the next morning in starting a fire and might have caused his nose with several others to burn. This kind of fun when you have to damage others to get it must be discouraged as it might lead up to some sure enough trouble. Those who have property fail to see the fun and might resent having their property damaged.

Evelyn Nesbit Thaw has gotten on the front pages of the Daily paper again, taken another dose of poison, this is the second attempt in the past five years, she had better look out she will take too much some time.

Ma will have another woman for an opponent, anyway we have two chances to get another woman governor.

Some folks can pay a \$150.00 Christmas bill but gripe themselves to death over a \$1.75 cent tax.

The new lights at the school building has been installed and are now ready for use.

The Blue Bird Says

There are few matters in this world so urgent that they cannot wait until the train gets by.

When an auto tries to imitate the hare, it frequently turns turtle.

Somebody ought to start manufacturing spare parts for pedestrians. It would be a profitable business.

Probably the increase in price of gasoline means a decrease in the number of funerals.

There are more than 13 million registered motor cars in the United States. You can figure your own chance to find a place to park.

Horsepower under the hood is not so important as horse sense behind the steering wheel.

Personally, we would feel safer on the road if automobiles had horse sense.

Lunacy is said to be on the increase. We thought so, judging by the popular songs.

Remember, Methuselah lived in the days when there were no automobiles.

The reckless driver must go, says a police judge. But why must he go so fast?

Copyright 1925, John D. Parsell.

Some folks seem to think that the city council should have already had electric lights all over town and water running like a river off the town section, but they haven't.

The City Council meets the second Tuesday in the month in regular session but may meet at request of the Mayor at anytime he might call.

If you want to buy desert now just call for Irish potatoes, the late freezes has put the prices sky high, and seem to be going higher.

Alderman L. M. Hoover drew number one tax receipt of El Dorado and Mayor Spencer drew number two, with A. T. Wright taking three, the city tax is now draw and must be paid before February first or else draw a penalty like state and county tax, so pay them before the last of the month, the city need the money, and it will be a saving to you also.

Well this is election year and should be a good one, the past year has been very prosperous and has likely sprouted several new officers seekers.

Dr. Looks phoned us Wednesday that he would be here for his regular appointment Friday and Saturday.

Phone us a news item.

For Sale, house and lot, lot 100x140 one block north of school house, 200 feet from Highway, 5 rooms, hall and gallery, good barn and corral, priced \$1,100. R. A. Evans Commission Co.

STAR Running-in-oil

You will find in the new running-in-oil STAR the many features you have always wanted in a windmill—one oiling a year—your choice of Timken Tapered Roller Bearings or "NO-OIL-EM" Bearings—two gears, two pinions and two pitmans—direct center lift to pump rod—crosshead, guides and pitmans bearings flooded with oil—a scientifically designed wheel with angle steel arms and braces and ball-bearing turn table.

The fans of this new Star are curved to give great efficiency in an 8 to 10 mile an hour wind. Plunger pump in crank case floods crosshead, guides and pitman bearings with oil, and tight cover keeps out dirt, rain or snow.

One filling of crank case with oil each year will save many trips up the tower. May be fitted on any tower.

The new STAR is the last word in Windmill construction. Come in and let us show you this mill. You will want to know about it whether you are needing a new mill right now, and we want you to know what a really fine windmill we have in this new Star.

West Texas Lumber Co.

Emergency Pantry Meets Home Need

By META H. GIVEN (Home Economist)

Efficiency and economy go hand and hand in the home as well as in the business world. The emergency pantry, latest innovation in the cuisine of the modern housewife is particularly indicative of the truth of this statement.

This new sort of pantry—it may just be a shelf in the regular larder—does away with that bugaboo of the home maker, the surprise guest. Every woman has had the experience of welcoming an unexpected visitor when supplies were at low ebb and has searched high and low to find something presentable to put on the table. The emergency shelf in the pantry does away with such worries in short order.

A can opener and—presto—a veritable banquet can be prepared in a few minutes. The housewife may have her choice of many excellent meats, corn, tomatoes, mushrooms. If she is short of milk or cream, a can of evaporated milk, which is simply fresh cow's milk sterilized in the can and with sixty per cent of the water removed will do the trick. In fact she may have two hundred or more savory dishes ready to her hand.

When the surprise guest does arrive the hostess naturally wishes to be hospitable. She doesn't want to be tied to the kitchen range half the afternoon. She wants to entertain as she has been entertained.

It isn't possible if she has to phone frantically for the butcher, the grocer and the baker.

But that's only one of the places where the emergency pantry comes in. Backed by a well-stocked emergency shelf, the wife can get together a splendid luncheon or dinner in a jiffy. The spontaneous wish that comes at the last moment to informally invite a few friends for lunch can be gratified at once with the aid of the new pantry.

Afternoon tea for the bridge club is an equally easy matter. A glass of preserves or jelly, a platter of bread and butter, tea, and a dish of cookies will meet the ordinary demands of the casual caller and a can of evaporated milk will answer the milk or cream need.

Mr. Paul Otts, our Jeweler will not be in El Dorado on his regular visit Saturday, as he and his wife expect to visit in Fort Worth this week-end, but will return there on each Saturday here after.

Chief Inspector Sounds Keynote to Purifying Nation's Milk Supply

Interior of a Milk Pasteurizing Plant.

At the 14th annual convention of the International Association of Dairy and Milk Inspectors held at Indianapolis, recently, leading authorities of the United States and Canada submitted interesting and informative papers relative to the purification of the nation's milk supply.

In the closing session of the series of meetings, Dr. Roy F. Leslie, Chief Meat and Dairy Inspector of Cleveland, Ohio, emphasized the great importance of co-operative measures by the producer in the production of clean milk.

"With co-operation on the part of the milk producers," said Dr. Leslie, "much can be done along this line that would otherwise be impossible." He then told of how the public was kept informed of steps taken to control the milk supply with a view to safeguarding the health of all who use milk and dairy products.

"In Cleveland," said Dr. Leslie, "more than 70% of the milk is sold at one or another of a system of chain stores where the customer is given an allowance of 2 cents on the purchase of each quart of milk."

The 2 cents allowed covers the cost of delivery in the home and represents a saving of about 12% to the consumer.

Milk in Cleveland must be sold within 36 hours of pasteurizing. Mr. J. V. Quigley, dairy adviser, Kansas City Consumers' League, Kansas City, Mo., followed with an account of the work of purifying the milk supply of that city.

He stated that milk produced in dairies where they follow all sanitary regulations such as clean stables, clipped udders and flanks of milk cows, thorough grooming and brushing of the animal before milking, and periodical tests for bacteria, brought to producers in the league 2 cents to 3 cents more per quart of milk than is received by those who were not members of the Kansas City Consumers' League.

Throughout the series of meetings, stress was laid upon the rapid strides being made towards a thorough and comprehensive inspection program of the milk supply of cities throughout the United States and Canada. It is certain that the results of this work are reflected to a great extent in the increased consumption of milk by the people of the United States, and this increased consumption is sure to be reflected in monetary advantages for both the producer and the distributor. High quality will increase milk consumption and high consumption of milk will keep the milk market steady.

Caloric Requirements of the Child

DIETITIANS declare that the average boy or girl of four years should receive about forty calories a pound of body weight per day. The average weight of a child of four years is forty pounds. Therefore the total caloric requirement would be approximately 1,600 calories. Calory is merely the name for a certain measure of heat derived from the burning of food.

Necessarily, the caloric requirement of the child is dependent on his temperament, since a child who plays hard and long requires more nourishment than one who leads a quieter life. Rate of growth also has a bearing on caloric requirements. The child who is growing rapidly should be given more food to meet his caloric needs than the boy or girl whose growth is normal.

Mothers know the daily diet should consist of the essential foodstuffs, protein, carbohydrates, fats, minerals and water. The important thing for her is to learn the foods that contain these essentials in a balanced diet. Below is a well-balanced menu for any child six years old compiled by an authority on home economics.

ONE DAY'S MENU FOR SIX-YEAR-OLD CHILD.

Breakfast. 6 stewed prunes120 calories 1/2 cupful cream of wheat 85 calories Served with half cream (6 tbsp.) and half evaporated milk140 calories 1 slice buttered toast150 calories 1 cup cocoa made with evaporated milk150 calories 645 calories

Luncheon at School. Baked potato and butter. 200 calories 1/2 cupful spinach 25 calories 1 baked apple (1 tbsp. sugar, 1/2 tsp. butter)200 calories glass milk150 calories 1 slice bread buttered with 1/2 tsp. butter100 calories 685 calories

Afternoon Luncheon at School. 1 orange100 calories

Dinner. 1 small piece broiled steak (2 1/4 x 2 1/2 x 3/4) 75 calories 1/2 cupful mashed potato100 calories 2-3 cupful lima bean soup made with evaporated milk 75 calories 1 glass milk, orange drink 150 calories 510 calories

Total1,840 calories Children often become wearied of drinking plain milk. Mixing their milk with fruit juices is a welcome change.

Following is the recipe for a refreshing milk drink: Mix 1/2 cupful orange juice, 1/4 cupful evaporated milk, three teaspoonfuls of sugar, 1/2 teaspoonful of lemon juice and a few grains of salt. Shake well in a fruit jar before serving.

How Butter Fat in Milk Is Broken Up

Do you know what the word
homogenization means?

Ninety-eight out
of 100 house-
wives to whom
the question re-
cently was put
admitted they
couldn't answer.
Can you?

But here it is
explained by Miss
Meta H. Given,
food authority do-
ing research
work at the Uni-
versity of Chi-
cago.

"Homogeniza-
tion," says Miss
Given, "is the
name of the pro-
cess which breaks
up butter fat in evaporated milk into
tiny particles so they blend evenly
with the solids. Homogenization
causes the butter fat globules to ad-
here to the albumin and the casein
of the milk. In the process, milk is
forced through countless numbers of
openings at a pressure of around 3-
500 pounds.

"In addition to preventing a cream
and skim milk line, this breaking up
of fat contributes to smoothness and
perfect blending of foods such as
cream sauces, soups, ice cream and
in baked products.

"It also has a digestive advantage
for those who have difficulty in as-
similating milk. Many pediatricians
recommend evaporated milk as a baby
food, although, like other substitutes
for the natural supply, it should not
be considered as a food complete in
itself. Addition of orange or tomato
juice, barley water or lime water are
important in providing adequate diet
for the infant.

"All authorities recognize that
normal mother's milk is the best food

for infants, but
this natural milk
is frequently in-
adequate in
quality and quan-
tity. Scientists
say cow's milk
is the best sub-
stitute. But cow's
milk must be
modified and sup-
plemented with
other foods. The
fat in mother's
milk is in homo-
geneous suspen-
sion and being
flocculent forms
small curds in
the stomach, but
the fat in cow's
milk is in relatively large globules,
forms large tough curds in the
stomach and is much harder to digest.
In evaporated milk the fat is broken
up by homogenization and the curds
settled until in size and digestibility
they resemble natural infant food."

**Housework Worth
\$900 a Year, but—**

Nine hundred dollars a year is the
value of the average housewife's
services in the
home, and statis-
tics show there
are 20,700,000
women engaged
in housework, ac-
cording to Mrs.
Leonora Z. Meder,
prominent Chi-
cago woman
lawyer and econ-
omist.

"The wife,"
said Mrs. Meder,
who was former-
ly commissioner
of public welfare of Chicago, "is an
executive, purchasing agent, budget
expert, and producer rolled into one.
The successful home maker studies
food values. She arranges her
budget so that the food she buys will
have all the necessary body building
qualities.

"The woman who would keep down
her food bill will do better to spend
her money on milk and green vegeta-
bles than on butter, though butter is
one of the best sources of the es-
sential food element, vitamin A. There
are butter substitutes, but nothing
can take the place of milk and vege-
tables.

"Milk, food experts say, is the most
nearly perfect food. Science solved
the problem by inventing evaporated
milk, which is simply fresh cow's
milk sterilized in cans and with sixty
per cent of the water removed. Be-
cause evaporated milk is of double
the richness of ordinary market milk,
many housewives dilute it half and
half with water for cooking purposes.
Keeping longer than ordinary milk,
there is no waste from souring. Then,
too, it is cheaper.

"Savings also can be made on meat.
Cheaper portions of beef skillfully
cooked are highly nutritious and often
better tasting than portions which
cost more. The shoulder, breast and
stew meat of lamb are excellent. Pork
shoulders, feet, tails, heart, spare ribs
and hocks are in the same category."

Cramped and Suffered

"My back and head would
ache, and I had to go to bed,"
says Mrs. W. L. Ennis, of
Worthville, Ky. "I just could
not stay up, for I would cramp
and suffer so. I was very
nervous. My children would
'get on my nerves.' It wasn't
a pleasure for me to try to go
anywhere, I felt so bad.
"My mother had taken

CARDUI

For Female Troubles

at one time, so she insisted
that I try it. I took four bot-
tles of Cardui, and if one
should see me now they
wouldn't think I had ever
been sick.

"I have gained twenty
pounds, and my cheeks are
rosy. I feel just fine. I am
regular and haven't the pain."
"Life is a pleasure. I can
do my work with ease. I
give Cardui the praise."

Cardui has relieved many
thousands of cases of pain and
female trouble, and should
help you, too.
Take Cardui.
