THE SUCCESS
 JUNE 12th, 1931.

The rain Tuesday night broke into the picnic at Christoval Wednesday. Many people did not go.

The Wednesday daily papers report much damage done by rain in Hall and Brisco Counties. Red Cross aid has been asked for, from 6 to 10 inches of rain fell and fields of grain around Memphis and Turkey were washed away and some 300 families were in need.

Rinnels County reports that they are harvesting the largest grain crop in the history of the county.

Well now since our additional paving of streets is about complete don't you think it is about the most wonderful work we have accomplished, some 30 blocks of pavement is down and we predict that is second to San Angelo for this section of Texas.

Eldorado is growing rapidly and her building of better homes and better business houses and more beautiful yards is not lacking.

With the splendid rains that we have had this spring and up-to-date, should make our beautiful yard contest less expensive as water bills are not to run so high, and a beautiful yard is worth the price anyway.

Keep your yard clean, your flowers blooming and the trees budding, and your home will be beautiful.

"THIS AND THAT"

By Jimmy

Cone Johnson, the well known highway commissioner, had a little hard luck last week. It appears he spoke out of turn—or at least insofar as some of the taxpayers viewed his rantings.

Everybody knows that Cone has been a politician about as long as Thomas Jefferson has been known as a Democrat. And he's dry enough to be a tourist guide in the Sahara Desert.

But Mr. Johnson played hooky at the last presidential election, and went Hoovercrat. He wasn't by himself, of course, but he was by himself when newspapermen interviewed him last week.

He gave out an interview in which he said Hoover meant well, but wasn't doing so good, and that if the Democrats would leave prohibition alone and make the economic issue paramount in the forthcoming controversy, he might even consider voting the ticket straight again.

His remarks didn't go over so big, it would seem, if what Steve Pinckney attorney and one of the few who stayed in line in '28 is an criterion.

"It is amusing to have the Hoovercrat now assume to tell the Democrats of the nation what they can and ought to do," Mr. Pinckney wrote the press of Houston.

To all of which we agree, except that it is not unusual. That's one reason the Democrats are where they are today—they listen to any and everybody. Hoover and the Republicans tell 'em all they will have full dinner pails if the Republicans stay in office, and it's not like a Democrat to be missing anything so promising as that.

"Mr. Johnson refers to Mr. Hoover as a 'good engineer, a good executive and 'clean and honest', but lacking the personality and ability for leadership, such as we know in this country as statesmanship. Those things were known about Mr. Hoover three years ago by everybody who opposed his election," said Mr. Pinckney.

Which would lead one to believe that Mr. Hoover is really nothing more than a Democrat gone astray.

"We wonder what Mr. Johnson would do if in 1932 the Democrats courageously declared for a change that would drive the bootlegger and racketeer from the country," Mr. Pinckney concluded.

There wouldn't be anything left to do but vote the Republican ticket, we suppose.

EDITORS AND PUBLISHERS MEET AT SAN ANGELO

Members of the Texas Press Association, editors and publishers of the state's newspapers, will meet in San Angelo June 11th, 12th and 13th.

While dollars and cents are poor gauges wherewith to measure the importance of the newspaper business, it is significant that the printing and publishing business ranks fifth among the state's manufacturing industries. Without newspapers, it is doubtful that Texas ever would have declared her independence from Mexico. Without newspapers, it is certain that the men who won that independence could never have been lured to the raw and unknown country beyond the Sabine. In Texas as elsewhere, newspapers were the instruments of empire builders. Their worth and their importance must be measured in terms of service rendered, or results achieved, rather than the dollar value of a finished product.

In the preservation of the commonwealth their predecessors helped to found, the editors and publishers of the Texas newspapers of today are confronted with a task quite as important as the one of a hundred years ago. It happens that newspapers are the substance that binds together the essential elements of a Democracy. They are the sentries of the public conscience. Through them, the people become informed upon the problems of the day; through them is moulded the opinion of the majority—an opinion which, expressed through the medium of the ballot, becomes the law of the state. The old Republics perished, because there were no newspapers for the dissemination of information, no editors to make a great group of people think to the same end upon a common problem. The new Republics will endure so long as our newspapers remain true to themselves and the interests of the people.

It is for reasons such as these that the annual convention of the Texas Press Association at San Angelo became an event of more than passing importance. San Angelo is to be congratulated; it entertains one of the most influential and powerful of all conventions that come to Texas.

ON TEXAS FARMS

By W. H. Darrow,
 Extension Service Editor

Many economists declare that increases in income are nearly always preceded by improved standards of living, the latter furnishing a powerful incentive to earn more money. On this basis Texas 4-H club girls are doing their bit to better farming by their wide-spread work in improving homes and premises. More than 100 Dallas county girls, for instance, have put new curtains in bedrooms, added new shades cleaned and varnished or painted the woodwork, provided reading and writing centers in their homes, and hung new pictures—to give only a partial list.

She traded 12 hens and a cock for an old building out of which she added a kitchen and sleeping porch to her home, and says she is going to continue until the entire house is made over. The lady is Mrs. Mary Brinke, of the Moffet Home Demonstration Club in Angelian county. The improved living room contest started her off, and in it she won first place in her county among those who spent more than \$50 in improvement.

To keep from losing faith in the word of a friend who told of big gains made by feeding hogs with a self feeder, S. F. Willard of Gonzales county tried the demonstration system himself and marketed 29 bushels of corn at \$1.15 per bushel through hogs that sold for six cents per pound.

Wheeler county farmers are going in for alfalfa with the county agent reporting 41 plots ranging in size from four to 75 acres prepared this spring for seeding next fall.

Wheat pasture made possible butterfat produced for 121-2 cents per pound feed cost in April in dairy demonstration herds in Lubbock county. Most demonstrators are planting seed for summer grazing with a few preparing to plant soy beans for hay.

Miss Estelle Johnson who has been attending Baylor University returned home this week.

We Do It

USED CARS AT BARGAINS
 We have a few used cars that we can make you some specials bargains in.

REPAIR WORK
 We have taken our repair shop back and still have Mr. Ray Jones in charge of it and can do you work that satisfies.

PAINT SHOP
 We can also paint that old car and make it look like new.
 All of our work is guaranteed.

Evans Motor Company

A WARNING WORTH HEEDING

Senator Borah of Idaho, nationally known for his progressive policies, has issued a public warning that the federal government is building a bureaucracy, which will demand permanent increases in expenditures and taxation unless stopped by "angry public opinion."

"Angry public opinion" will have to express itself in other ways than mere oral fault-finding with public officials, state legislatures and congress. The people have a check on taxation within their own hands. They can vote against men and measures that they know have increased or will increase taxes unnecessarily. If people fail to recognize their power and obligation in this matter and fail to support men who are working to hold down taxes and fail to vote against measures that they know will increase taxes, they will have only themselves to blame for a back-breaking load of taxation that they will have to pay annually if public levies continue to increase as they have during the past decade, out of all proportion to growth in population and wealth.

Buzzy Stokes was up from Sonora Wednesday shaking hands with friends and looking after business.

Max Leamon, who has been attending the University at Austin, returned home the first of the week.

WHY DODGE THE ISSUE

There can be no argument over the fact that prosperity of the railroad is essential to prosperity of the nation as a whole.

While there are other large and necessary methods of transporting passengers and freight, the railroads are the backbone of the whole transportation structure.

Another fact that cannot be argued is that income must be sufficient to pay wages, interest on stocks and bonds, taxes and upkeep.

Railroad revenues are not at the present time, and have not been for some time past, large enough to properly cover these expenses in spite of rigorous economy. Therefore, there seems to be several things left to do—increase freight and passenger traffic at present rates, or increase transportation rates, or reduce quality or service, or further cut operating expense by reducing wages from the presidents and higher executive officers right down the line, or combine a little of all four alternatives.

Drastic action will be necessary if the roads remain solvent and continue to render our nation the best and most efficient railroad service the world has ever known.

Mrs. W. L. Isaacs was in from the ranch Tuesday shopping and visiting.

Hop Cheatum was in from the farm Wednesday enjoying the rain.

"Just Shopping Around"

You are always welcome at our store whether you are ready for big bill of groceries or "Just Shopping Around." We, too, shop around in order to find the very best bargains for you. We have no delivery costs, no "Bad Accounts," low rent and large buying power—So it pays you to "Shop Around" in our store.

COWS PAY \$20 PER TON FOR HOME GROWN FEEDS

QUITMAN—In spite of low milk prices Jersey cows have turned home-grown bulky feed into profit and kept up the fertility of the soil for James F. Taylor, dairy herd demonstrator of East Point Community, Wood county.

As reported by James W. McGown, it brought \$20 per ton for the ground county agent, the ration for the first roughares after figuring \$5 per ton three months of the year consisted of for the grinding and counting the man 10 pounds daily of ground hegarl bun- ure worth the labor of caring for the dles. 6 pounds Bermuda hay, 5 pounds cows. Mr. Taylor states that the cows ground peanut vines including nuts, have given more milk during this and 2-1-2 pounds cottonseed meal period on this demonstration system They produced an average of 20 pound than ever before at the same time of milk per day and at market prices the year.

FEW DEMONSTRATORS

APPLY FOR RELIEF

SAN SABA. — Of 122 applicants for Federal seed loans in San Saba county the past spring only five had ever been enrolled as demonstrators by present or previous county or home demonstration agents, and only 34 had ever had any contact whatever with extension workers, a report of County Agent N. E. Scudder discloses. Twenty seven percent had no milk cows, 54 per cent had no hogs, 30 per cent practically no chickens, and 90 per cent

had almost nothing in the way of canned foods from the farm. A total of 111 applications was granted by the Federal Loan Board. They averaged \$99.70. Mr. and Mrs. V. G. Tisdale were visiting in the city from the ranch, east of town. Mrs. Oscar Roberts, of Colorado, Texas, has sent in a subscription to The Success this week. They at one time lived in Schleicher County and are well acquainted here.

MAKING THE FARM PAY

That "cooperation pays" is evidenced by the fact that the Dairy-men's League Cooperative Association of New York State handled a bigger percentage of its supply and surplus products for its farmer members during the past April than for any April since 1923. While the dairy outlook May first was not bright, nevertheless dairy and poultry farmers are in a better economic position than other farm industries. On April 15 dairy products were 27 points below prices of a year ago, fruits and vegetables 37, cotton 42, meat animals 40 and grain 35 points.

It looks as if scientific cooperation did pay in the dairy industry.

SILVER REVIVAL IMPERATIVE

Senator Borah of Idaho, chairman of the Committee on Foreign Relations in a recent address, asserted that the slump in the price of silver was an important contributing cause to the present world wide economic depression and blamed the governments of the leading powers for delay in taking steps to remedy the silver situation.

Mr. Borah emphasized that reduction in the value of silver was steadily reducing the purchasing power of an overwhelming portion of the world's population, lowering world trade and more than doubling indebtedness of the countries using silver.

He outlined in detail the dependency of many countries on silver as their basis of credit and said:

"The silver problem is one which requires governmental action. It cannot be solved or settled by resolutions or through the action of the citizens. Governments must deal with it. And it is somewhat difficult to understand the delay."

"Uncle" Sam Nicks, one of Schleicher or oldest settlers, was an interested visitor at the Nicks well Sunday, the well is on his son's, W. R. Nick's place. "Uncle Sam" has seen quite a good deal of change in his county, but kept a close watch on the latest development of oil wells. The day Sunday was spent in swabbing the standing fluid out of the well, so the caving on the bottom could be cleaned out.

Hugh McAngus was in from the farm Saturday, talking cheese and butter factory for Eldorado.

NEED MORE BOSTON TEA PARTIES

In its issue of May 9, the Saturday Evening Post rendered a real public service to the people of the United States in its straight-from-the-shoulder editorial criticizing the orgy of spending by members of legislative and tax disbursing bodies.

It pointed out that spending other people's money is a favorite pastime of politicians and that when they have cleaned out everything and everybody they do not stop but simply hunt for new ways to jack up old taxes or to find new things to tax. The people have stopped their wild spending but the politicians are still on a tax-disbursing spree.

"Ways and methods of spending and financing that would meet with the severest reprobation in the case of an individual, are considered perfectly sound procedure by the politicians," said the Post.

"Reckless and prodigal private and public spending have exactly the same finish."

"The public-improvement vote buying legislature is worse for the country than fire and pestilence."

A financial responsibility law with improvements to yachts, where the up keep is worse than the first cost. Such improvements bring a swarm of public servants who must be paid out of new taxes.

It hites England, Germany and Russia where paternalism and actual confiscation of property have caused tax loads and destruction of wealth which can and will wreck any government.

In conclusion, it says: "Our greatest need right now is fewer cocktail parties and more tea parties—of the Boston kind."

Another old timer seen at the oil well Sunday was C. C. West, should the Nicks well make a producer Mr. West has some valuable acreage which no doubt would yield production.

J. M. Pfleger was out from San Angelo watching the progress on the W. R. Nicks well.

Thomas Baker and wife were visiting and shopping in the city Saturday.

Roy Hudspeth and wife were guest of W. R. Nicks and family Saturday.

Arch Edmiston was in from the ranch Saturday visiting and trading.

WORKING AGAINST ACCIDENTS

The loss life caused by automobile accidents—32,500 in 1930—is well known. It is estimated that there are 35 non-fatal serious injuries due to automobiles, to each fatality.

According to Harry Tucker, Professor of Highway Engineering at North Carolina State College, specific measures for eliminating accidents can be directed along the following lines: Elimination of highway and railroad grade crossings; separation of grades for the most important highways as well as for streets; better highway design; further improvement in safety features of cars; more rigid control of pedestrian traffic; fixing the responsibility upon the individual motorist.

The Massachusetts experiment with compulsory insurance has not been a success, according to Eliot Wadsworth, Chairman of the Committee on Insurance of the House of Representatives of that state. He says that "the compulsory law has failed in providing what is most essential, namely, a motive to make drivers of automobiles more careful and considerate."

A financial responsibility law with a demerit rating similar to the law in force in Connecticut which provides for penalties in the form of 10, 25, and 50 per cent increases in the insurance rates for drivers who have accidents, and a 10 per cent reduction for a good record, is being looked upon with more favor. Under such a law the person having an accident would have to pay his legal liability or be refused the right to drive.

A number of states have at different times considered the Massachusetts' compulsory insurance idea but, profiting by its experience, have not taken the jump.

E. E. Willoughby was over from Brady this week visiting his sons Edward, Ray and Jim.

John Williams and family were in from the stockfarm Saturday.

Felix Susen was in from the stockfarm Saturday looking after business and meeting friends.

J. A. Whitten, Chairman of the State Livestock Sanitary Board, attended a meeting of the Board at Ft. Worth Saturday.

SCRAPS AND CUTTINGS

Yes, dear, more than one X at the end of his letter means that he is double crossing you.

"When in Rome did you do as the Romans do?"
"No—my wife was with me."

Mod.: "I'm vaccinated where it doesn't show."

Artist: "Did you take it in a capsule, baby?" —Rice Owl.

Novelist: "Unless my books sell I shall starve to death."

Publisher: "Excellent idea! That would advertise the work splendidly!"

She: "You pride yourself on being able to judge a woman's character by her clothes. What would be your verdict on my sister over there?"
"Insufficient evidence."

"Hey, Percy, you took the wrong medicine—you drank the horse liniment."

"Oh, dear me, what an ass I am!"

Club Servant: "A lady is in the lobby saying that her husband promised to come home early."

Several Card Players (jumping up hurriedly): "Excuse me, gentlemen."

Impatient Man (outside telephone box): "Can I help you to find the number you want?"

Young Woman (sweetly): "Oh, I don't want a number. I'm looking for a pretty name for my baby."

A gentleman slipped on the stair of the subway and started gliding to the bottom. Half way down he collided with a lady, knocking her off her feet, and the two continued the journey together. After they had reached the bottom, the lady, still dazed, continued to sit on the gentleman's chest. Looking up at her politely, he finally said: "Madam, I'm sorry, but this is as far as I go."

Conn Isaacs returned home last week with his degree from McMurry College.

Edward Ratliff returned this week from the Texas Tech at Lubbock.

J. F. Kinser was in from the ranch Saturday.

Safety Glass

Ford cars are now equipped with safety glass in all doors and windows at a small extra charge

\$15 for the Coupe, De Luxe Coupe, Sport Coupe or Convertible Cabriolet \$20 for the Tudor Sedan, Standard Sedan, De Luxe Sedan, Town Sedan or Victoria

THE Triplex safety glass windshield has always been an outstanding feature of the Model A Ford. By reducing the dangers of flying glass, it has saved many lives and prevented countless injuries in automobile collisions.

Now comes a further assurance of safety to every Ford owner... polished plate safety glass in ALL DOORS AND WINDOWS at slight additional cost.

The charge for this extra protection is unusually low because of large production and the development of new methods of manufacture. Simply tell the dealer when you buy the Ford that you want "safety plate glass in all doors and windows" and the car will be factory-equipped for you in that manner.

Today, as before, the safety glass windshield is furnished as standard equipment on all Ford cars without extra charge.

FORD OWNERS This announcement refers only to NEW CARS. Ford dealers are not in a position to install safety glass in the windows of your present Ford at the above prices.

THE SUCCESS
 JUNE 12th, 1931.

There seems to be a right smart kick, to getting around an oil well, or rather some of our citizens are caught on the job quite often.

It looks now like the rail roads will soon make store door deliveries. They are asking for this privilege from our railroad commission and The Success hopes that the commission won't be too dumb to grant it.

An unusual thing happened in Texas last week, when J. B. McCasland, who was tried at Austin for his part in the Sherman Negro burning and the burning of the court house, was convicted. McCasland 19, was the first one tried for the offense, and the jury assessed his punishment at two years in the pen. The case was moved from Sherman to Austin. The first conviction in Texas for lynching a negro after an assault on a white woman.

In the balling out of the fluid in the W. R. Nicks well it is estimated that about 70 per cent was water, that is with every 10 barrels swabbed there was 7 of water and three of oil, this squib has reference to the original strike when the hole was open, read the front page for the latest development.

Another question we want settled is 'is it against the law to set a trot line in Schleicher County, using gold fish for bait.' Clyde Galbreath says its a 5 year penitentiary offense, and Sam Oglesby says its not, so we don't know what to do, but for the present we will go to Sunday School on Sunday and fish after the dispute is settled.

Everything must have a beginning, do not think because only 15 people attended the meeting Saturday night for the purpose of discussing a cheese factory, and did nothing definitely, that nothing was accomplished. Everything begins small and some times you think they don't begin at all. But later will take on real life and become a real thing. Thus has all the developments of our town and community came about. There is no county in Texas more adapted to the Dairy industry than is Schleicher and some figure day a small cheese and butter factory would be a paying investment in our community and will in all probability be built. It takes years to make a success out of any business, because you must win the confidence of the public that you are capable of accomplishing the thing you have undertaken, and then everyone wants to help to keep the thing a moving. So lets not drop the idea of having a cheese factory, lets have one.

Quite a difference in the big new gin in Eldorado today, than the one first built by our citizens when the old Eldorado Gin was first built, nothing scarcely in sight for encouragement when the thing was first begun, but today, Eldorado and Schleicher County has three up-to-date gins and others will come as times roll on.

BUREAU OF BUSINESS RESEARCH OF UNIVERSITY IS BUSY

Austin, Texas, June 1.—Best efforts of the Bureau of Business Research of The University of Texas have been pledged to the work of furthering the Statewide industrial development campaign of Progressive Texans, Inc., according to Dr. A. B. Cox, director of the Bureau.

Speaking at the first gathering of the Statewide executive committee of Progressive Texans, Inc., Dr. Cox described the organization as being an instrument designed to make industry more profitable and told the directors and a large group of business men gathered with them, that the Bureau of Business Research and the development body are closely interlocked. "Texas has remained a bright spot on the prosperity map of the United States because of the rapid development of its natural resources," Dr. Cox said. "Now, however, the time has come when we must work along different lines.

"No state can be permanently prosperous that depends on the sale of its raw, exhaustible natural resources. New methods must be employed, among them industrial development. The Bureau of Business Research, cooperating with Progressive Texans, Inc., is ready to attack a number of sides of this problem. It has studied the resources, location, etc., and is ready and able to aid in the direction of Progressive Texans' efforts to make industry more profitable.

"If industries now established in Texas become more prosperous, other industries will come in. We are interested in seeing the organization developed and made successful. We have been agricultural-minded because agriculture has been our big source of wealth, and we have before us a big educational problem in making Texas people think in terms of industry."

THE "HIGH COST" ROAD WASTE

The need of scientific investigation of possible road materials by any state or county planning highway development cannot be over-emphasized.

"Political roads" have cost millions of dollars. Roads that do not serve sufficient people to justify themselves require excessive upkeep costs, high type roads costing 30 or 40 thousand dollars a mile where a \$5,000 a mile road would do—few states have escaped such waste.

At present, with the farm-to-market road movement receiving more than ordinary support, it should be the aim of every community to demand the utmost return for every dollar spent. In recent years waterproof surfacing materials have been perfected to use on local road bases, that give remarkably good, year-round service at an amazingly low cost. Modern construction methods and economy in secondary road building should make it possible to provide almost all rural areas continuous year-round contact with the outside world in the comparatively near future.

The taxpayers must give this subject intelligent consideration.

E. N. Edmiston was among the ranch people that visited Eldorado Saturday.

W. J. Luedcke went to Austin and Lockhart Saturday, where he visited relatives at Lockhart and brought his daughter, Miss Garnett home. She has been in the State University this year. They returned home Monday.

THE ROAD TO AUTOMOBILE SAFETY

It is to be hoped that during 1931 more states will go in for "Save a Life" motor vehicles inspection campaigns such as those conducted in ten states in 1930.

This movement is something more than an appeal to automobile owners to see that their machines are in good condition. Usually the campaign is backed up by a law making inspection of brakes, headlights, steering mechanism and horns, obligatory. During 1930, in the ten states 3,500,000 cars were examined and over a million had defective brakes, 2,000,000 had unsafe headlights and 219,000 had defective steering.

The ill-conditioned car causes accidents. The newspapers are filled with stories of cars which suddenly swerve from their courses to collide with other cars or trees or to leave the road; of drivers being blinded by glaring headlights and running into disaster, and so on. There is no room on our highways for cars which are not mechanically safe, or for reckless and irresponsible drivers.

Last year the "Save a Life" campaigns produced splendid results in the ten states where they were conducted. Making the movement nationwide would be a fine way of beginning a real fight against highway accidents.

TAX DEFLATION

"Forces are gathering for the next period of prosperity," says The Insurance Field, editorially. "When a firm takes inventory it generally slows down on everything else until the process of itemization is finished. For eighteen months the whole world has been taking inventory of itself, and all industry has slowed down while undergoing the most searching of scrutiny from all directions.

"In this microscopic analysis of costs and expenses, the influence of taxation should not escape expert attention. Why not deflate taxation along with other outgo? Why not seize the psychological moment to show how much business expense is due to excessive cost of government, and the extent to which excessive cost of government grows out of governmental interference and competition with private business?

"Take a state, for example, with ten billions of private tangible wealth one billion of income and \$100,000,000 of net annual private profits. Taxes, to defray cost of government, total \$25,000,000—which is one-fourth of entire net annual profit. Now, suppose that state to become infected with the virus of governmental invasion. Its cities convert their gas, electric, water and street railway corporations into municipally owned public utilities. The state establishes governmentally operated funds for insurance, and takes control of water power development. Result: The total of private tangible wealth is reduced to nine billions, the gross income of that state's private citizens falls to 900 millions, the net annual profit to \$90,000,000—and the taxes (more being needed to operate all these units of governmentally competing business) have to go up to \$35,000,000. That means a rate of nearly 39 per cent on private profits!

"The people, who once had a free balance of \$75,000,000 a year above the cost of living and being governed,

now have only \$55,000,000 left. What looks like an expropriation of only ten extra millions if the two tax totals be compared, turns out, in effect to be a governmental charge of twenty millions. Worse, it falls upon smaller private properties and fewer people.

"In that 'confiscation' of \$20,000,000 by government from private affairs resides the germ of unemployment, and the microbe of a lower living standard for American industry and American wage-earners.

"Approximately just that is what has been going on slowly but surely in America, and will keep going on unless and until stopped. Such a movement will not stop itself—the maw of government goes on swallowing to the bitter end."

THE "BREAKING DOWN PROCESS"

Violation of the prohibition law is so flagrant in this country that "any boob can see it," said George L. Baker, dry mayor of Portland, Oregon, in New York City.

"Enforcement is the most trying work of municipal, state and federal authorities," Mayor Baker said, "because people who are ordinarily strong for general enforcement of all laws and are good Americans under ordinary conditions, violate the prohibition laws and contribute to the breaking down of other laws. They feel that their personal liberties are being restricted."

Our tendency to legislate on every phase of human liberty has augmented the "breaking down process" of respect for law by both young and old, rich and poor. Unnecessarily restrictive legislation always brings law violation, and continual law violation brings disrespect for law.

Proposals for anti-gun laws deny a private citizen the right to own or possess small arms, are among the perennial samples of restrictive legislation that would make law-breakers out of otherwise law-abiding citizens. This nation must curb its tendency to substitute law for character or we can look for more law-breaking instead of less.

W. M. Holland, who has interest in the W. R. Nicks well was out from San Angelo Saturday and Sunday looking the situation over and keeping in touch with the development of the well.

We Do Not Want a -Mushroom Growth!

Most things that grow rapidly are of short duration. Compare the mushroom with the oak.

Producers of wool and mohair should not expect their National Wool Marketing Corporation to spring to success overnight.

It is to be firmly founded we must build it slowly.

Join this association! Give it the benefit of your experience, ideas and support! Help build it into a powerful organization which will be capable of obtaining for the grower a fair price for his product.

PAINS QUIT COMING

"When I was a girl, I suffered periodically with terrible pains in my back and sides. Often I would bend almost double with the intense pain. This would last for hours and I could get no relief.

"I tried almost everything that was recommended to me, but found nothing that would help until I began taking Cardui. My mother thought it would be good for me, so she got a bottle of Cardui and started me taking it. I soon improved. The bad spells quit coming. I was soon in normal health."

—Mrs. Jewel Harris,
 Willsboro, Texas.

CARDUI Helps Women to Health

Take Theoford's Black-Draught for Constipation, Indigestion, and Biliousness.

Pleases the Most Particular

Everyone has experienced that little feeling of nervousness when entertaining certain particular guests—the sort who "notice things;" the ones who are a bit fussy about the flavor of their coffee, and the way it is served.

When you entertain your "particular" guest, just plug in your gleaming Electric Percolator—you'll be surprised at your confidence—the little flourish and the smug little smile with which you pour. You'll receive the congratulations just a little complacently, for you knew success was assured—the electrical way.

Are you making the fullest use of your Electric Percolator? . . . The surety of always perfect coffee—always faultlessly served? There's not a chance of anything going wrong when you make your coffee in one of the delightfully convenient and attractive Electric Percolators.

"A Good Place To Trade"

Miss Elizabeth Hinyard, of San Angelo, was visiting friends in Eldorado Tuesday.

J. P. Beck and sons, George A. and D. C. of the Rio Grande Valley, but formerly of Cooke County, were in Eldorado Tuesday, and incidentally we found the low down on C. B. Reagan, these gentlemen knew Carl while he was just a shirt-tail lad and before he acquired the fishing habit. But we will keep the information a secret if Carl will promise to help his wife do the house work.

Miss Lucile McWhorter visited her sister Mrs. Parrish in San Angelo the first of this week.

STATE INSPECTORS IN CERTIFIED SEED WORK NOMINATED BY BOARD

AUSTIN, Tex., June 9.—Five experienced agronomists were nominated by the state plant board at its recent meeting here to make inspections this season of crops of breeders and growers qualified to operate under the State Seed Certification program.

Necessity for employing especially qualified inspectors was emphasized by R. V. Miller, chief of certification work, who pointed out that upon these inspections and determinations the commissioner of agriculture bases his approval or disapproval of the acreages of breeders seeking state certification. Field inspection is the backbone of the certification program, Miller declared.

H. J. Bower, professor of agronomy at Texas Technological College, Lubbock, was nominated to make inspections of sorghums and small grains. J. S. Mogford, professor of agronomy at A. and M. College, who has assisted in the work since its inauguration, Cody Leutz, Austwell, a former temporary field man; T. H. Richmond, Kyle, and C. R. Owen, Magnolia, Ark. both of whom have had practical experience in cotton breeding, were nominated as cotton inspectors.

Through their experience, these men are not only fully qualified to make the required routine inspections but are capable of offering valuable constructive suggestions to breeders they visit and otherwise assist in the breeding programs of those attempting to raise the standards of Texas seed, Miller said.

The inspection season will open July 1.

J. D. Smelser, of San Saba, 22 years of age, was drowned Saturday in the Colorado River, making the fourth person drowned in the same place. Young Smelser was buried in San Saba Sunday.

W. T. Conner, was down town Wednesday wearing smiles over the good rain.

H. M. Freund was a business visitor in the city Monday.

MEETING OF COTTON GROUP DIRECTORS IS CALLED FOR JUNE 15

COLLEGE STATION, Tex., June 10.—Directors of the Texas division of the Association for the Increased Use of Cotton have been called to meet here June 15, to elect active officers and perfect plans for a sustained use-more-cotton campaign in Texas.

Directors were named at the organization meeting held in Houston during that city's cotton festival, at which J. E. McDonald, commissioner of agriculture and vice-president of the national association, was instructed to call the second meeting.

In issuing the call, McDonald emphasized the need for a restoration of agricultural prosperity. "If the proper emphasis is placed on the use of cotton," he said, "within a few years America would consume its entire production, thereby filling a gap caused by the loss of world markets for American cotton."

"We believe you will agree that the barometer of prosperity in America is agriculture, and that by re-establishing this important industry we can rapidly return our people to a state of prosperity and happiness."

BUSY DAYS AHEAD

"Brethren, we must do something to remedy de status quo," said a negro preacher to his congregation.

"Brudder Jones, what am de status quo?" asked a member.

"Dat, my budder," said the preacher, "am Latin for de mess we's in."

A rookie in the cavalry was told to report to the lieutenant.

"Private Rooney," said the officer, "take my horse down and have 'him shod."

For three hours the lieutenant waited for his horse. Then, impatiently he sent for Rooney.

"Private Rooney," he said, "where is the horse I told you to have shod?" "Omgosh!" gasped the private, growing pale around the gills, "Omgosh! Did you say SHOD?"

Miss Bina Sue Martin was shopping in the city Monday from the Pat Martin ranch in the Rudd neighborhood.

MOHAIR FAVORITE AUTO UPHOLSTERY FABRIC

CAR'S INTERIOR ATTRACTS WOMEN

Upholstery May Enhance Comfort, Smartness and Ultimate Value of Car.

WHEN it comes to selecting the family automobile, a good basis of procedure is that adopted by the sight-weary American tourist who said to his partner when they came to the next important cathedral: "You do the inside and I'll do the outside." The average woman is quite content to have her husband concern himself with the body of the car, the wheelbase and general mechanics, provided she may have something to say about the inside. The car's clothing, as its upholstery may well be called, is equally important with the rest of the car, for upon it depends much of the comfort, smartness, beauty and ultimate value of the car.

In choosing the upholstery for the interior, a number of distinct features should be considered—good appearance, smart design, pleasing color, wearing quality, riding comfort, cleanliness and economy. The only material that can be depended on to embrace these important features in one fabric is velvet mohair, otherwise known as velmo, and made from the lustrous fleece of the Angora goat. Because of its original snowy whiteness, mohair can be dyed any shade, however subtle. Its lustrous sheen and soft, silky texture leave nothing to be desired in the way of beauty and luxurious appearance, while the long wearing quality of pile mohair, as contrasted with that of flat fabrics, is undisputed. A velmo upholstered car will be fresh and inviting long after the rest of the car has lost its good appearance or even given itself up to the infirmities of age. Because of its smooth surface of individual mohair fibres, discernible only under a microscope, dirt does not readily adhere to nor penetrate them, and the material

is easily cleaned with a whiteshroom, or by vacuum. Actual grease or dirt spots are removed by washing with pure soap and warm water.

Easy riding, an important feature when taking long trips, is assured with mohair velvet because there is no slipping and sliding about, as with smooth fabrics, and each fibre of the pile fabric acts as a resilient spring to absorb shocks. It is easier on the clothing, too, as the reduced friction avoids rubbing and subsequent shininess.

Added to these advantages is the additional one that they all add materially to the trade-in value of the car when the time comes to get a new one. In fact, it has been conservatively estimated that anywhere from fifty to two hundred dollars' difference can be looked for in a car whose upholstery is in perfect condition and inviting to the eye.

Offer Prize for Oldest Piece of Mohair

Have you a mohair-covered chair or sofa in your home? If so, you may be \$250 the richer for it!

This paper is in receipt of a message from the Household Science Institute, Chicago, asking for help in locating the oldest piece of mohair-upholstered furniture in the United States. The style of the sought-for furniture, its use or non-use at the present time are not important, providing it is in good condition. Its owner will be awarded \$250, and the piece itself will be exhibited with other old-time furniture during the World's Fair in Chicago in 1933.

Back of the Institute's offer is the desire of Grace Vail Gray, its director, to ascertain the longevity of mohair. It is claimed that unless deliberately injured no instance has as yet been found of a mohair wearing through.

Readers who feel that they have something of interest should communicate with Mrs. Gray at the Household Science Institute, 7 South Dearborn Street, Chicago, giving the history of the piece in mind.

ELDORADO HARDWARE COMPANY

Good Quality — Priced Low

THE PEOPLE FINALLY PAY

PRIOR to the crash of the New York stock market which initiated the present depression, it was said of the average American that his income was not sufficient to meet his expense account. The income has been reduced in some cases wiped out. What was true of state governments—the purchaser takes five hundred or a million. The loss sustained by the government and legislators are looking about for new tax sources. Nearly all are seized upon those in plainest view. There is no doubt that much property is even yet escaping taxation. Taxes should be levied the people finally pay it. The people must decrease their demands upon state governments if taxes even remain at present levels. Post Register.

THE LITTLE FELLOW LOSES

The small country printer is the principal sufferer from government stamping, return-addressed envelope Government envelopes with return addresses printed on them, are sold in some cases wiped out. What was true of state governments—the purchaser takes five hundred or a million. The loss sustained by the government and legislators are looking about for new tax sources. Nearly all are seized upon those in plainest view. There is no doubt that much property is even yet escaping taxation. Taxes should be levied the people finally pay it. The people must decrease their demands upon state governments if taxes even remain at present levels. Post Register.

"TWISTING"

The public is being warned that in certain parts of the country persons purporting to be "life insurance experts" are indulging in a systematic campaign of "twisting". In other words, such a person will approach a life insurance policyholder with a proposition that he drop a present policy and take in its place another form of contract in some other company, presumably for the sake of saving money.

Don't be misled by such alluring tales. No policyholder in any established legal reserve life insurance company can drop or exchange an existing legal reserve policy without loss to him. The person who recommends such a change is doing it solely for personal profit.

If you are approached by such a "twister," you will be protecting yourself by communicating immediately with your company or the insurance commissioner of your state. "Twisting" is prohibited by law in many states because it is harmful to the interest of the policyholder.

A DEPENDABLE INDUSTRY

Capital invested in public utility companies in the United States during last year amounted to \$1,275,000,000 despite decline in general business according to Annual Public Utility Survey made by Bonbright and Co., Inc. The survey shows total capital investment in utilities of nearly \$28,000,000,000 at beginning of 1931.

The electric light and power industry accounted for the largest gains and the greatest investment, due to current annual increase of \$700,000,000 in invested capital to a grand total of \$11,800,000,000 in 1930. This compares with total investments of about \$5,250,000,000 in electric railroads, \$5,250,000,000 in manufacturing and natural gas businesses, \$4,950,000,000 in telephone and telegraph companies and about \$900,000,000 in privately owned water supplies.

These figures prove the substantial character, dependability and depression-proof qualities of our utility industry.

UNIVERSITY OF TEXAS GETS PHOTO OF MIER PRISONERS

AUSTIN, Texas, June 8.—A photograph of the tomb of the Mier prisoners at LaGrange has been presented to the University of Texas library, according to Mrs. Mattie Austin Hatcher, archivist. This spot is of historical importance since it contains the remains of prisoners taken in the Mier campaign of time, a photograph will be the sole record of its existence. Mrs. Hatcher pointed out. The picture was taken by L. A. Carter and was given to the University library by Mr. Carter and Miss Jesse Lois Watson of Cheapside.

F. R. Keele, of San Angelo, was in Eldorado Tuesday on business.

B. E. Moore was in the city Wednesday.

Everything in fruit and vegetables that the Market affords.
In our market we have milk fat calf meat, Raised at home, Butchered at home.

Louis Schneider Wins 500 Mile Race

Louis Schneider, Indianapolis youth, with his mechanic, Jigger Johnson, just before and just after he rode to fame and a \$20,000 pot of gold in the 500-mile Speedway Classic May 30.

No man has ever won two years consecutively, but Schneider is the twelfth consecutive winner on Firestone Tires, and to express his gratitude for his safety and victory he sent Harvey S. Firestone the following telegram from the track:

"I have just won the five hundred mile Indianapolis race on Six Hundred Twenty Firestone Gum

Dipped Tires. It was a most difficult and gruelling test for tires due to a wet, slippery track from frequent showers. Safety at high speed was of greatest importance and my Firestone Tires enabled me to make an average speed of 96.629 miles per hour. I have always used Firestone Tires in all my racing, for I have great confidence in their safety and dependability and I want to thank you for the part Firestone Balloons played in my victory today, for I had no tire failures and changed but one tire, purely a precautionary measure, and all my tires were in fine condition at the finish of the race."

HOW TAXES ARE INCREASED

Muscle Shoals may be a time-worn topic to discuss but it is one of those political experiments that pile up the government overhead and create permanent, increased taxes for the people to pay. The more such experiments we have, the higher taxes go.

At Muscle Shoals, according to Edwin Gruhl of the North American Company, the government spent more than \$68,000,000 on two nitrate plants involving processes which are now obsolete. It spent \$56,000,000 for the Wilson Dam which is capable of producing less than 100,000 horsepower under present conditions. To remedy this lack of capacity, it is now proposed to spend \$83,000,000 more for dams and improvements, bringing the total investment to \$207,000,000.

On the credit side of the Muscle Shoals ledger is an item of \$2,600,000, the total receipts to the government from the sale of power between September, 1925, and June, 1929. Against this must be charged direct operating expense of \$750,000. Thus the return to the government in four years was less than \$2,000,000 on a direct investment of \$56,000,000—less than one per cent per year.

A NEW MILESTONE FOR CIVILIZATION

Within the near future 1,000,000 farms will be receiving electric service.

The program includes the construction of 330,000 miles of rural electrification service lines at a cost of \$500,000,000 and a great expenditure for additional equipment and facilities. In addition, it is said that with a million farmers using power, purchase of \$1,000,000,000 worth of electric machinery and appliances will be necessary to make the investment in rural lines profit the farmer and the industry.

The farm electrification movement is comparable, in both scope and importance, to the electrification of industry a few decades ago. It means that the farmer will be definitely placed on the same basis as modern industries—here evil will be able to do more work at a lower cost, and in less time. Electricity will give him more leisure and comforts, all the main advantages of city life with the peculiarly rural advantages of uncongested space and healthier living conditions. Farm electrification marks a milestone in the steady march of American civilization.

ON TEXAS FARMS

By W. H. Darrow, Extension Service Editor

Two acres of beets planted in October by A. M. Stone of Petronilla community, Nueces county, completely fed 110 hogs, and furnished excellent feed for 40 dairy cows and calves, 15 sheep and four mules during April. A total of 3,000 pounds of beets were fed and Mr. Stone said he had enough left for another 30 days.

Mitchell county 4-H club boys have demonstrated that they can get from 80 to 368 pounds more of milo maize heads per acre from pure line seed than from ordinary seed.

Thirty-five acres of alfalfa planted in February 1928 have made \$1350 from November to March, which was worth 50 cents per head per month to him, he says, and then took them off to cut a 11-2 ton-per-acre hay crop in April worth \$30 per acre after counting out baling costs. More hay crops are coming.

By feeding a good ration and hav-

ROY BEAN OPINION IRONICALLY QUOTED BY HIGH COURT

SAN ANTONIO, Texas, May 7.—The late Justice of the Peace Roy Bean of Langtry, "the law west of the Pecos," at last has been quoted by an appellate court, even if the question was used ironically.

The Fourth Court of Appeals Wednesday referred to a court holding attributed to Bean in a pistol carrying case but used it to show the fallaciousness of an argument in the case before the court.

The case came up from Sutton County and affirmed a decision enjoining Ben F. Meckel from closing a road which had been in use thirty or forty years. It was held that a road used by the public that long had become a public highway through long usage and prescription and could not be closed.

In referring to some of the arguments the court said it was reminded of the noted "pistol toting from a western court" in which it was held that if a man was standing still he was not carrying a pistol and if he was moving he was traveling and had a right to carry it.

Lawyers said the authority quoted was the famous Justice of the Peace Roy Bean, "the law west of the Pecos."—Texas Tax Journal.

CHECKS BARRED FOR CIGARETTE TAX

AUSTIN, Texas, May 29.—Charley Lockhart, State Treasurer, said Thursday he would accept no personal checks in payment of the cigarette tax and that all remittances for stamps must be in the form of bank draft, money order or express order. He said it will be up to the retailers to purchase and affix the stamps on all cigarettes unsold when the law becomes effective Aug. 21. Stocks acquired after that time will be stamped either by the manufacturer or the wholesaler, under the terms of the act. The large tobacco concerns and several Texas wholesalers have been furnished copies of the new law. Mr. Lockhart called attention to the heavy penalties for selling unstamped cigarettes.

The stamps will all be the same color and design. The State seal will be the background of the design and the color still is to be selected. Bids to supply the stamps will be opened by the Board of Control June 9 and already a number of requests have been received for the specifications. The prices tentatively suggested have ranged from \$25,000 to \$60,000, depending on the quality of paper and number of stamps.—Dallas News.

N. E. Nance, of San Angelo, and Martin W. Moses, of Austin, were in Eldorado Thursday visiting their friend O. F. Priest, local representative of the Acme Life Insurance Co.

ing good pasturage, four Coryell county dairy herd demonstrators have found that they can produce butterfat for 12 cents per pound feed-cost. Their ration, including grinding, costs \$1.10 per hundred and is made up of 200 pounds ground corn cob and husk, 100 pounds ground oats, 100 pounds cotton seed meal, and six pounds each of lime and salt.

Thirty-seven Lynn county home demonstration club women have made 494 pounds of American cheese worth 40 cents per pound on the local market. It cost them about 15 1-2 cents per pound with milk valued at 12 cents per gallon and labor at 25 cents per hour.
