Schleicher's Leading And Most Widely Distributed Newspaper

VOL. XXXVI

Eldorado, Schleicher County, Texas, Friday, May 1, 1936

No. 18

On The DIVIDE

A clip of 1156 pounds from 102 head of sheep was sold last week by Robert Nixon at a price of 27 1-2 cents.

Tom Russell moved five truck loads of calves to his ranch near Bronte last week.

The Texas Sheep and Goat Raisers' Association recently voted in favor of growers contributing one-thirtieth of one cent a pound on wool and mohair to the Associated Wool Industries of New York. This fund will be used for advertising and promotion of commodities produced by livestock growers.

J. C. Johnson recently marked and dehorned 15 calves using a special dehorning instrument so he could compare this method with other methods he has been using.

Two terrace lines were run recently for Ward Parks of the Bailey Ranch community. Mr. Parks plans to try to contour his rows for next year and save as much of the rainfall as possible.

Cotton growers in the Ft. McKavett neighborhood held a meeting last Friday in the Meyer school house for the purpose of having the new cotton program explained.

W. J. Steward, Edwin Jackson, Clyde Keeney, S. L. Stanford, and Jack Halbert have been holding night school at the courthouse this past week to better acquaint themselves with the soil conservation program.

LOCALS

Eldorado Well Represented in San Antonio Celebrations

Mr. and Mrs. L. M. Hoover and daughter returned from San Antonio Saturday after witnessing the pageants of interest as well as historical sports of the city. Mrs. Billie Eaton, Mrs. Hank Irby, Mrs. Noel Wilkinson and Miss Annie Florence Page remained until Monday. Mrs. Jimmie West accompanied by Miss Pauline West also attended, as well as Mrs. O. E. Conner, Mrs. A. B. White and Mrs. E. W. Brooks.

Rev. A. J. Quinn and family accompanied by Dorothy Jarrett were in Menard Tuesday attending a church function, looking to the interest of the coming Menard Encampment, which takes place in June.

Mr. Geo. Long has her mother of Quanah, Texas, with her for a visit of several weeks.

O. B. Page of San Angelo was a business visitor in Eldorado and Sonora, Tuesday.

Bud Ellis of San Angelo visited in Eldorado and Sonora Sunday and Monday.

A. K. Bailey was reported to be very ill this week.

P. S. Connell returned Thursday from Junction where he attended a two-day conference of the San Angelo District of the Methodist Church.

Old age may be honorable, but aside from that, it is nothing to brag about.

Clean-Up Committee Still Working at Job

Another meeting Monday night at the Eldo Hotel indicated that the cleaning up of Eldorado is eminent.

Members of the committee have been working at the job and have succeeded in cleaning up a larger part of the town. Several vacant lots have been cleaned up and others will no doubt be cleared of papers and unsightly tin cans and paper before the week ends.

This week the city will be divided into four zones and inspections will follow. Written reports will be made on the premises in these zones. Get your yards cleaned up before the inspection starts. That means that the Editor is compelled to get home early today and get out the lawn mower.

SCHLEICHER COUNTY WELL ADVERTISED

Mention was made in the April Issue of "Livestock Markets," official organ of John Clay Commission Company, of the record established by Schleicher County at the Southwestern Exposition this year.

The following paragraph is an excerpt taken from the "Market":

Edgar Sauer, Eldorado, Schleicher county, Texas exhibited the champion carload of lambs. These averaged 106 pounds and sold through our firm at \$12.25 to the Safeway Stores, Dallas. Truett Stanford and R. J. Alexander, Eldorado, each had one carload of lambs which sold at \$9; the Schleicher county 4-H Club, one car at \$9.35 and Geo. Williams, Eldorado, one car at \$9.25.

In connection with the story, "Livestock Markets" also published a picture of Edgar Sauer's carlot of lambs which brought \$12.25 per cwt.; weight 106 lbs.

CHILDREN'S DAY SUNDAY SCHOOL

The annual "Children's Day" will be observed in the Presbyterian Sunday School on Sunday at 10:00 A. M. A special program on Foreign Missions has been arranged, the subject of which is "The Difference in China". Besides recitations and songs by the children there will be interesting information about education, and medical work in China. The pastor will give a brief map-talk as to the location of the Presbyterian missions in that country. The offering received will be used for mission work.

CENTENNIAL PROGRAM AT SONORA HI SCHOOL

Oscar J. Fox, nationally known composer, and Betty Wilson, soprano, of San Antonio will be presented in a Centennial program Wednesday, May 6, 8:15 p. M. in the Sonora High School auditorium.

A small admission charge will be made (50c & 25c) and the program will be sponsored by the Sonora Music Club. Texas songs composed and played by Mr. Fox include many cowboy songs.

Mrs. J. L. Ratliff is visiting her parents, Mr. and Mrs. T. J. Harrison of Dallas, this week.

Financial Assistance Extended to Farmers

San Antonio, April 30—Widening the scope of financial assistance the federal government is extending to Texas farmers, regulations of the Emergency Crop and Feed Loan office have been amended to permit farmers who are not being actively assisted by the Resettlement Administration to apply for Emergency Crop loans, it has been announced by H. P. Drought, state director of the National Emergency Council for Texas.

The regulations provide that no more than \$200 may be loaned to any one farmer and preference will be given to farmers whose cash requirements are small.

Effect of the change will be to extend to farmers listed as "inactive clients" of the Resettlement Administration the same opportunity to apply for Emergency Crop loans as other eligible farmers. It was pointed out, however, that standard clients of the Resettlements Administration, or farmers who are receiving grants or have received grants from that agency since December 31, 1935, and those employed on Works Progress Administration projects are ineligible to receive the loans.

Applications for emergency crop loans may be made to the county crop loan committee already set up in most counties. Loans are disbursed through the regional offices located at Dallas.

PRESBYTERIAN CHURCH

Sunday School at 10:00
Morning Worship at 11:00
Evening Worship at 8:00

The pupils of the Sunday School will give a special Foreign Mission program this Sunday at the Sunday School hour. The subject will be "The Difference in China". The offering received will be used for mission work.

At the hour of morning worship pastor will preach on the subject "Do Not Faint, But Pray." He impressed it on their minds with a parable showing how reasonable it is to expect God to hear the petitions of his people. All men sooner or later come to discouraging times, and should find help in this teaching of Jesus. The pastor will preach at 8:00 P. M. and the subject will be announced on the bulletin board. A cordial welcome awaits all
N. P. Wilkinson

Ira Wood Returns to Take Over Humble

Ira Wood, former wholesale distributor for Gulf products here returned to Eldorado last week to assume management of Humble Oil & Refining Company's wholesale plant, replacing J. C. Carr. Retailing Humble products locally will be the Eldorado Motor Company and Rock Stations No. 1

Mr. Carr, with offices at the Cash Service Station which has been leased from Mrs. J. N. Davis, will retail Phillips Petroleum merchandise through the Cash Service Station, Burk's Service Station and Bryant's Service Station.

S. L. Stanford carried Mrs. Stanford to Sulphur Springs this week for medical treatment.

State Highway Dept. Will Improve Ground Donated by Tom Jones

Park Will Be Layed Out And Sponsored By Woman's Club

Through the efforts of the Eldorado Womans Club a park will be built about two miles north of town on the west side and joining the State highway. Work will begin immediately.

Highway engineers Taylor of Sonora, and Winn of San Angelo were here this week conferring with members of the club in the interest of the project.

Tom Jones, ranchman, who lives north of town gave the plot of ground for the park, which will be for the benefit of the local citizens as well as the traveling public. Tables, built of native stone, grills for cooking, and plenty of seats will add to the comforts of camping.

This park will fill a long felt need for a city park. And many an evening one will find Eldorado citizens enjoying a little outing among the flowers and trees.

J. C. CARR TAKES OVER PHILLIPS 66 PRODUCTS

J. C. Carr, former distributor of Humble Gas & Oil products here, has accepted the agency for Phillips 66 gas and oils.

Three stations will handle the Phillips products in Eldorado, the Cash Service Station, Burk Service Station, and Bryant Service Station.

The gasoline will be hauled here direct from the oil fields by two trucks which will be on the road every day.

Mr. Carr is well known here and has enjoyed a good volume of business from his many customers, many of whom will continue to buy their gas and oil products from him. His office will be located at the Cash Service Station.

MRS. FORREST RUNGE ENTERTAINS

In an all-day meeting combining business and social functions the Cliff Demonstration Club met April 28th at the home of Mrs. Forrest Runge.

Mrs. Laura Baugh and daughter, Miss Hayden Baugh, were honored with a miscellaneous shower by the club members and visitors. A covered dish luncheon was served. A business meeting was conducted by Mrs. Will O'Harrow. A mattress making demonstration was conducted by Miss Lora Farnsworth, county Home Demonstration agent.

In attendance: Mrs. Laura Baugh, Miss Hayden Baugh, Mrs. Alvin Baucom, Mrs. Joe Tisdale, Mrs. Clifford Jones, Mrs. A. D. Harvey, Mrs. W. H. McClatchey, Mrs. Frank Newman, Mrs. Will C'Harrow, Miss Tom Smith, Mrs. Robert Milligan, Mrs. Blaine Sammons, Mrs. Clint Pincson, Mrs. John Rae, Miss Agnes Rae, Miss Lora Farnsworth and the hostess.

NOTICE

Plans have been made to have a meeting of Cotton Producers of Schleicher County, Saturday, May 2, at 2:30 P. M., at the Court House. The purpose of this meeting is to elect two Alternate Committeemen. This is necessary due to the fact that two of the Committeemen have resigned.

Figures-Facts of Wool & Mohair Production

Here are some very interesting figure-facts relative to the production of wool and mohair.

There was produced in the United States in 1934,—338,675,406 pounds of wool. The State of Texas produced 52,564,478 pounds of this, or approximately eighteen and one-quarter per cent of the nation's entire wool clip.

For the same year there was produced in the United States 12,818,512 pounds of mohair with Texas producing 10,348,838 pounds of this or approximately eighty per cent.

The West South Central section of the United States, which includes Texas, Arkansas, Oklahoma and Louisiana, is the largest mohair producing area; the production for this section for 1934 being 10,431,976 pounds.

The next largest producing area is the Mountain section which has a total production of 1,559,230 pounds with the State of Arizona ranking first with a total production of 700,077 pounds.

In the production of wool, the Mountain section, composed of the states of Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah and Nevada, ranks first with a total production of 142,241,707 pounds. The state of Montana took the lead in that area with a production (See No. 1 Last Page)

Eldorado Players Will Show Black Eyed Susan

Sponsored by the P.-T. A. and directed by Miss Laura Doughti of Greenville, Ga., Wayne P. Sewell's newest three act comedy, "Black Eyed Susan", will be presented by Eldorado players on Friday May 1st at eight-fifteen at the Eldorado High School Auditorium, the director had known here this week. The hit of the season in plays considered for home talent production, the comedy is meeting enthusiastic audience in every town or city in which it has been presented.

The play was written for lovers of good clean fun, and plenty of it is assured in the story and the hilarious scenes that take place.

The plot is woven around five old maids who are trying to get a husband. Black Eyed Susan helps them by running an ad in the paper for an unmarried man as gardener.

Applicants many

From the many applicants received Susan lets each old maid choose the man she likes best, then writes the bachelor to come the next week for a personal (See No. 2, Last Page)

MR. AND MRS. B. K. CHEEK HAVE REUNION

Last week end the Cheek home extended hospitality to their children, grand children and some friends. On Saturday Mr. and Mrs. Roy Davidson and two children, Tommie Aleene and Walter Roy of Barnhart, Norton Cheek and wife of Vanderpool, and Kenneth Cheek and wife and baby, Billie Kenneth of Eldorado. On Sunday the children were joined by the Sample twins, Joy and Jolly and Corinne Luedecke, for the day.

Committeemen Ready To Help Farmers

All farmers, including those who share croppers, tenants, operators, or owners of farms in Schleicher county, now have available the services of community and county committee and county agricultural agents to assist them in preparing work sheets under the new National Agricultural Conservation Program, says C. Snell, county agricultural agent.

Committeemen now are helping to fill out a work sheet and are aiding individual farmers in planning their farming operations so as to conserve and build their soil and qualify for grants.

A farmer is under no obligation to fill out a work sheet nor to perform in line with the program, but he may have the advantage of learning how his farming operations could be adjusted to qualify. However, a farmer must fill out a work sheet if he is to be eligible to apply for a grant.

The program is designed to benefit all persons engaged in farming including share-croppers, tenants, operators, and owners. Each can contribute to the program by familiarizing himself with the conditions and by engaging in a soil building on the land which he, himself, farms.

Local committeemen will aid each farmer in determining his soil depleting acreage base, and necessary and proper practices in order to qualify for payments.

"As the Government is sharing expense of improving the fertility of their farms," said Mr. Snell, "farmers should be prepared to furnish committeemen with the necessary information and to cooperate in every way possible."

\$15,472 LOANED SCHLEICHER CO. HOME OWNERS

San Antonio, April 30.—Home owners in Schleicher county have received loans, for refinancing purposes, from the Home Owners' Loan Corporation, amounting to \$15,472, as of January 2, 1936, according to an announcement made by H. P. Drought, State Director of the National Emergency Council for Texas. This total represents 9 individual loans to home owners.

The total amount of loans closed in Texas by the Home Owners' Loan Corporation as of January 2, 1936, was \$101,823,418, representing 43,741 individual loans. Six hundred and fifty-nine applications were pending on the above date.

As of March 26, 1936, 1,000,794 loans, amounting to \$3,031,168,924 had been closed by the Home Owners' Loan Corporation throughout the United States. The average loan amounted to \$3,030. On March 26, 1936, 17,963 loan requests remained on file with the Corporation.

NOTICE

P.-T. A. meets the first Tuesday instead of third Tuesday. Mrs. Thomas Head of San Angelo will install officers.

Mrs. W. M. Bearce is visiting her daughter in Abilene this week.

EDITORIAL

Better is a dinner of herbs where love is, than a stalled ox and hatred therewith.—Proverbs 15:17.

The United States Government is justified in viewing the extensive preparation for war by European nations who defaulted on their debts to this country in the same light that a creditor views a debtor who repudiates his obligations and then appears the next day with a new automobile.

It is a singular fact that few of the leaders of this country have been appreciated during their life time. True appraisal has not come until long after they have passed from the scene of action. What is true of the leaders is also true of the things they tried to do. Many of the things that Washington and Lincoln tried to do were bitterly condemned at the time as were the men. Even the foremost leaders and thinkers of their day were in many instances aligned against them. What was true then is true today. We seem incapable of impartial judgement. It will require a new generation before the works of the leadership of today can be impartially appraised. The reason is that time proves the false and the true. With the lapse of time that which is untrue and unsound is washed out and only the true and sound remains.

Our prediction is that the income tax brackets will be steadily lowered until no income will escape the payment of income taxes. It has been true of other sources of taxes that levies were steadily increased until the limit was reached. When it has become no longer possible to secure more taxes from one source, a new source is opened up. There will be no let up. We predict that in time all sources of revenue will be worked to the limit. The property tax in most localities has been increased all the traffic will bear. When this point was reached a gas tax was introduced, and then an income tax. The limit has not been reached on these yet but if we have patience and wait it will be. There is, as a Mark Twain said about the weather, considerable talk about reducing taxes, but nothing is ever done about it.

We believe that one of the finest pieces of work done in any community is that done by the Boy Scout leader in the community. It is unfortunate that the scout age is set at twelve years. We have always believed that the present day American youth are ready for the scout program earlier, and should be under the influence of the scout master longer. The scout program is one of the finest programs ever devised for young men, but fine as the program is, it all depends upon its being administered by a scout master who has the leadership qualities and the qualities of mind and heart that make of him and ideal leader of boys.

THE PHILOSOPHER'S STONE

To figure up as many ideas as they have done in Washington some one must have dug up the philosophers' stone.

This old stone was possessed of miraculous powers. You rubbed it a few times and whatever you wanted popped out of thin air.

It was much like Aladdin's magic lamp, except you just rubbed the lamp and made your wish, while one had to think harder to do the stone stunt.

When the billions shall have been spent and payday comes around, with its awful tax-burden, a lot of us will be surprised to learn again that we will have to work our way out of trouble—that we cannot spend our way out.

HUMOGRAPHS

How do you like the senate?
Too noisy. A man can't sleep any more.

What do you think of—the say the old age pension?
I think it's fine. They ought to think it over.

They are, Senator. They're debating on it now.

They are? Well, now what do you think of that?
How do you feel about the liquor question?
That depends if it's the real stuff.

I suppose a man of your station is a deep reader.
You bet. I'm reading "Treasure Island," now.

Do you think Canada will soon become the 49th state?
What do you mean WILL be, isn't it one now?
No, senator; it's a territory.
See! No one ever tips me off to anything!

What is your chief objection to the government, sir?
They ought to fire the janitor, he's swept up several important items of mine, without putting them back in the desk.

He may be a menace to the government to keep in such a position, senator.

Menace? He's public enemy number one! I know very well he is, because right after I lost those passes to the Baer-Lewis fight, six of the boys saw him showing off in the press box!

Other than firing the janitor, do you have any other suggestions whereby we might improve the government, senator?
Yes, make Senator Beetle-brow buy a new pipe!

Are you in favor of inflation?
No, it makes everything go sky high.

How is that, sir? What are the mathematical reasons?
How should I know? Don't you ever read the papers.

Yes, but some papers do not tell the strict truth.
Let's not talk shop.

WHAT WE THINK

When fellows as smart as the members of the Congress of the United States are supposed to be can't tell what the law of the land is, what chance has the plain plug citizen got of keeping out of trouble.

I've got a stomach that has never failed me yet, in fact I am proud of it. I think I can perform most anything it would be called upon to do except to have its owner be publicity director to build up some small bore politician to the size of a presidential candidate.

We do not know whether the method now being followed will get the country out of the depression or whether it is gotten out it will stay out, but we do feel convinced that something must have been radically wrong somewhere else we would never have gone into such a tail spin. We have the feeling also, that until the real cause is discovered and checked, the country will not be safe for long from a repetition of the present unpleasantness.

ENTHUSIASM

In all the attributes of man there is none quite so contagious and autogenous as enthusiasm, not the dumb enthusiasm of a fanatic, but the open-eyed enthusiasm of a man or purpose.

Just the other day such a man walked upon me, a man with both the courage of his convictions and the courage of his convictions, and long after he was gone I felt his presence.

It is the lot of men to be made in different molds, one man's spiritual cup is dry, another's overflows.

One man is hot, another cold, but unto each is given the power to kindle his inner spark.

There is nothing in all the world more beautiful than a soul on fire with great purpose—nothing quite so real as a man who takes each day as it comes, along as a glorious venture, and makes the most of it.

WHAT'S A BILLION

Washington speaks of a billion here and a billion there as mere trifles—there have been only a billion minutes since the birth of Christ.

The federal government is already thirty-one and one half billions in the hole and that does not include the public indebtedness of cities, counties and states.

By June 30, 1937 the Roosevelt administration shall have expended over thirty-two billion dollars.

That is an amount equal to \$6.00 a minute since the dawn of history—10,000 years ago.

It would be interesting to have some smart professor figure out how long it will take to pay it back—the sins of the fathers are visited upon their children to third and fourth generation—perhaps to the thirtieth and fortieth.

The government is planning on buying several million acres of land and taking it out of production. Why not buy up the land along the river courses that periodically overflow each spring and fall and give it back to the river, from which in most instances it should never have been taken? The saving would soon pay for the cost of the land and put the project in the self liquidating class.

Unless the federal government takes extensive steps soon for setting aside forest reserve and retreats for wild life, the next twenty-five years will see it disappear completely from this continent. The automobile and the pump gun have furnished too much competition.

We saw a young woman yesterday who had carefully trimmed finger nails which were dyed a most brilliant red. This of course is supposed to be ultra fashionable and right down to now. The effect in this instance was rather marred by the fact that the young woman's hands needed soap and water badly. The combination or ensemble, or whatever it should be called, showed elements of clashing incongruity.

Modern teaching is the best:

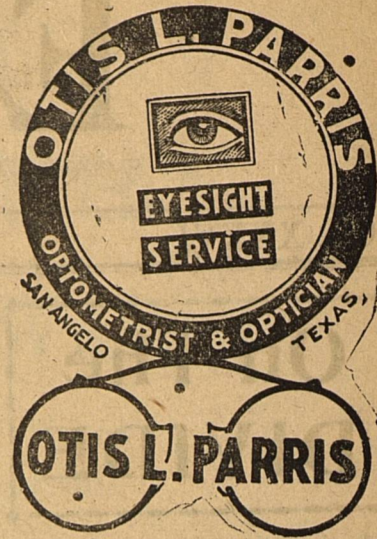

Recently, a law student at Stanford University came home to cast his first ballot—and signed his name to it.

The idea of the shelter belt is not original with the United States. Several of the European countries have had shelter belts for years.

The same opportunities may make a hero of one man and a fool of another.

"Love is like an onion, we taste it with delight; but when it's gone we wonder—what ever made us bite."

How Cardui Helps Women To Build Up

Cardui stimulates the appetite and improves digestion, helping women to get more strength from the food they eat. As nourishment is improved, strength is built up, certain functional pains go away and women praise Cardui for helping them back to good health. . . Mrs. C. E. Radtke, of Hinton, W. Va., writes: "After the birth of my last baby, I did not seem to get my strength back. I took Cardui again and was soon sound and well. I have given it to my daughters and recommend it to other ladies." . . Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician.

NEWS OF THE WEEK

TWO GREAT PROJECTS DIE

Washington, D. C.—Gloom reigned from Main to Florida when announcement was made of the death of two huge New Deal projects through denial of further relief funds. Maine lost the \$36,000,000 power scheme harnessing the tides of Passamaquoddy Bay. Florida saw the dream of a \$125,000,000 trans-state canal connecting the Atlantic and Gulf of Mexico.

Old Church Gets Respite

Gloucester, Mass.—Started in a log-cabin in 1633, the First Parish Church is housed in a building 108 years old. The question of abandoning was put to a vote of 42 parishioners. Because "modern youth lacks interest in religion", a majority decided that no other course was open, but voted to reconsider the matter again in September.

Chinese Art In Peril

Gibraltar — Carrying \$50,000,000 worth of borrowed art back to China, the steamer Ranpura grounded on a sand bar in the Bay of Algeiras. After Admiralty tugs had unloaded 300 tons, the liner was pulled off. The directors of Burlington House, London, who borrowed the collection for exhibition, were glad they had hired Chinese specialists to pack the treasures scientifically for their journey home.

A Deluge For Rats

Berkeley, Cal.—An old law just unearthed gives the City Clerk power to order all residents to fill their bath tubs, then pull the plugs at a given moment. The resulting deluge was supposed to flush out sewer rats.

Chemists Reveal Discoveries

Kansas City, Mo.—Two thousand scientists gathered for the 91st meeting of the American Chemical Society heard of the new wonders of science. One of them gave promise that sulphur injections might relieve arthritis, discovered from a study of finger-nail parings. Another described a cheap method of extracting inositol from watery by-product of corn-starch. Mixed with nitric acid, it becomes an explosive comparable to nitro-glycerine.

Picked Wrong Car

Napoleon, Ohio—When Harry Waxler succeeded in breaking jail, his first idea was to get as far away as possible. Thumbing a ride on the highway, he landed straight back in jail. The car he signalled was that of Sheriff Geo. Bowerman.

\$50,000 Exposition Hall of Religion

It's a long way from the "gospel riders" of early Texas, who carried a pistol in their holster and a rifle in their lap as they rode around their "circuit," to the \$50,000 Hall of Religion now being built on the grounds of the Texas Centennial Exposition, the \$25,000,000 World's Fair which opens in Dallas June 6. Religious lore of Texas over a period of 400 years will be housed in the building, which is being sponsored and built by stockholders of the Lone Star Gas Company. From the top of the building's 75-foot tower "The Eternal Flame of Life" will burn from the Exposition's opening until its close, November 29.

School Punishment Upheld

Highland Falls, N. Y. —Irritated at the disobedience of 11-year-old Frances Sanders, her school teacher, Mrs. Carrie M. Hynie, cracked her sharply over the knuckles with a ruler. The girl's parents protested before 600 villagers, succeeded in having the teacher suspended. On review by Dr. Frank P. Graves, New York State Commissioner of Education, it was held that "as a matter of law, the teacher has the same power to punish a pupil as the parent." Mrs. Hynie goes back to her Fort Montgomery Public School; Miss Sanders is studying with the Franciscan Sisters at a local parochial school.

Fly Leaves Its Mark

Sacramento, Cal.—For a week local relief officials sweated over their books. Every test they tried showed accounts out of balance by 6 cents. Finally a gimlet-eyed bookkeeper found the answer: a fly had lost a leg at the top of a figure "4", transforming the digit into a "7".

Bankers In Dilemma

Brothers, Wall Street bankers, faced a quandary in their recent offering of an industrial stock, which, so they informed dealers they intended to "support" in the market at the opening price of \$47.25. But market manipulation or control of stock prices is illegal under the Securities Exchange Act of 1934. Appealed to in the matter, Judge John J. Burns, SEC's general counsel, said no rule had yet been laid down defining legal and illegal support of shares; that bankers could go ahead with their support so long as the investing public were kept informed of their transactions.

Orange Daisy Deadly Enemy to House Fly

Strange as it may seem, a beautiful red daisy closely related to our common field daisy with its orange disc center and white petals (she loves me, she loves me not) is the deadliest enemy of house fly, mosquitoes, moths and other perennial pests. Contact with this colorful field flower instantly gives the insects a nervous breakdown (no fooling!) and within a few seconds, unable to forage for food or water, they starve to death.

"Pyrethrum," scientists call the deadly daisy essence, which they now use as a powerful killing constituent in insect spray. And today, when flies, roaches, moths or whatnots get on the harassed housewife's nerves she goes them one better. She flies for the spray gun and gives the flies a swift and deadly case of nervous prostration.

It was a Jugo-Slavish hausfrau who accidentally discovered the insect-killing power of the pyrethrum daisy when she picks a bouquet of the bright red flowers and put them on the table in the house. Later she noticed a great number of dead insects around the withered bouquet. Subse-

quently, small European manufacturers ground the flowers into a fine powder and distributed it about the continent as a dust to be blown at insects by means of small bellows. More recently, daisy growing has become an agricultural industry in various countries and the Gulf Oil Corp. of Penna-Gulf Refining Co. imports vast quantities of the death dealing yellow dust for use in its insect sprays.

According to Dr. William A. Simanto, entomologist of Gulf's Research laboratories, the killing action of pyrethrum is very rapid, when mixed in proper quantities with an especially refined hydro-

carbon carrier and sprayed as a fine mist into a room or cupboard. When the fine mist comes in contact with an insect, it penetrates into the insect's nervous system, destroying the nerve cells, causing paralysis. Within a few seconds death results from starvation. The organs and functions of insects bodies are decidedly different in many respects from those of the human body and those of animals and birds. Hence pyrethrum, so deadly to flies, mosquitoes, roaches, moths and other insects and their larvae, has no effect on human beings or their pets.

So if the dog or the cat or 'the old man' gets on the housewife's nerves, the Gulspray gun won't do much good. **TYPEWRITER RIBBONS at the Success Office.**

THERE ARE OUTSTANDING ADVANTAGES IN ATTENDING A SCHOOL IN DALLAS THIS YEAR

The greatest educational World's fair ever held in this country will be in operation in Dallas from June the 6th to Nov. 29th. There are enough special events listed to have a special event day almost every day the Centennial Exposition will be in operation. To get the full educational advantages of these special event days, one should be in Dallas so they may attend upon the days most important to them.

Twenty-five millions of dollars are being spent in the construction of this great historic affair. It is estimated that ten to twelve millions of people will visit this great educational exposition. It is estimated these visitors will spend in Dallas approximately two hundred and fifty million dollars. The spending of two hundred and seventy-five millions of dollars in construction and by visitors will cause a wide expansion in business of every kind in Dallas and cause many firms to open. All of this great business expansion will necessitate the employment of hundreds of bookkeepers, accountants, stenographers, and secretaries.

Byrne Commercial College of Dallas has set its placement quota for this year at four hundred graduates. It invites all ambitious young men and women who would like to be one of the four hundred Byrne graduates to be placed in a good position to write the College for particulars as to courses, payment plan, earning board, etc. adv.

Mr. and Mrs. G. C. Crosby visited relatives in Eden last week end.

RURAL TEXAS IS STUDY FOR WOMAN'S CLUB

With "Rural Texas" as the subject for discussion, the Woman's Club met Tuesday at the home of Mrs. T. K. Jones.

Mrs. N. P. Wilkinson was program leader, and asked for current events as roll call answers. Mrs. J. B. Edens gave some statistics on farm life in Texas, and a survey of the occupations of the people of rural Texas. Mrs. Aubrey Baugh compared economic conditions among country people in Texas today with those of 100 years ago. Educational conditions in rural Texas were by Mrs. E. C. Hill. Mrs. Baugh conducted the fiction drill.

Following the program, the club discussed plans for a highway park with Mr. Taylor and Mr. Wynn of the Highway Department. Mr. T. K. Jones has donated a plot of land to be used.

The Woman's Club is sponsoring the project.

Mrs. H. E. Lynn was elected to active membership to the club.

Members present other than the hostess were: Mesdames D. E. DeLong, W. E. Eaton, J. B. Edens, Aubrey Baugh, D. C. Hill, H. D. Irby, E. C. Hill, W. N. Ramsay, V. G. Tisdale, N. P. Wilkinson, A. J. Atkins, Preston Bailey, W. L. McWhorter, and Mrs. W. T. Whitten. Mrs. Wiley Ratliff and Mrs. John J. Roberts were guests.

Genevieve Ramsey who was expected home from the Shannon Hospital last week end did not arrive until Tuesday, not due to new complications, but merely as a precaution for her safety.

Genevieve is resting well and improving rapidly.

Laxative combination folks know is trustworthy

The confidence thousands of parents have in good, old reliable, powdered Theford's Black-Draught has prompted them to get the new Syrup of Black-Draught for their children. The grown folks stick to the powdered Black-Draught; the youngsters probably will prefer it when they outgrow their childish love of sweets. Mrs. G. W. Adams, of Murray, Ky., writes: "I have used Theford's Black-Draught (powder) about thirteen years, taking it for biliousness. Black-Draught acts well and I am always pleased with the results. I wanted a good, reliable laxative for my children. I have found Syrup of Black-Draught to be just that."

Soil Conservation Program Prevents Erosion; Rebuilds Soil

College Station—"Every cultivated crop takes a definite amount of original plant food out of the soil, and the necessary cultivation of such crop exposes the land to erosion. This results not only in additional fertility losses, but also in losses of soil," says Jack Shelton, vice director and state agent of the Extension Service.

"Some crops deplete the fertility of the soil more than others and expose the land to a greater amount of erosion. It is the purpose of the new Soil Conservation Act to put part of the land formerly devoted to such soil depleting crops into crops which will prevent erosion and will rebuild the fertility of the land to insure a stable supply of foods and fibres in the future.

"A brief review of figures determined the Agricultural Experiment Station over a period of nine years shows clearly the extent of soil erosion.

"Land with a two percent slope when planted in cotton showed an average soil loss of 7.96 tons per acre per year. Land in milo lost 3.93 tons of soil. Land in buffalo grass lost 1.56 tons.

"These figures show that aside from the plant food used by the crop, farmers of the state pay more than two times as much washed away soil for a crop of milo. Similarly, they pay more than five times as much for a crop of buffalo grass.

"The importance of crops in the conservation of moisture was also demonstrated at the Spur, where it was found that the cotton plot lost 2.83 inches of water in run-off; milo lost 1.76 inches; and the buffalo grass lost 1.03 inches.

"These results were obtained at the Substation near Spur in Dickens county, located in the Rolling Plains region of Northwest Texas. The soil on which this work was done is Miles clay loam and the results are considered as directly applicable to parts of 44 counties and approximately 14,000,000 acres of land of the Miles and Abilene and related series, and indirectly applicable to all of the sub-humid portion of Texas.

"Crops and practices which are best for preventing erosion in Texas and for rebuilding the fertility of the soil have been recommended to the regional director of the Soil Conservation Service by the State Conservation and Domestic Allotment Board which has been meeting recently at College Station. These crops and practices will be announced as soon as they have received the approval of the regional director.

"To qualify for payments under the new program, the farmer must take land from soil depleting crops and plant it in soil building and soil conserving crops or must use certain soil building practices on the land.

"Generally speaking, it will be necessary to have at least one acre of soil conserving or soil building crops to every five acres of soil depleting crops in the base acreage. This means that a farmer who has 100 acres of soil depleting crops in his base must have planted on his farm in 1936 at least 20 acres of conserving and building crops to participate in the program," Shelton said.

NEW SOIL PROGRAM IS REAL FARM AID

College Station — Not how much money can be gotten out of the new agricultural program, but how much will it help improve sound farming is the fundamental question to be asked, according to A. L. Smith, who has charge for the Extension Service of putting into action plans made under the Soil Conservation and Domestic Allotment Act.

He suggests that every farmer map out his fields as he would like to farm them—to make the farm cropping plan that he knows would hold and build up the land, and which he has not used because of lack of money. "When that is done let each farmer investigate the new AAA soil conservation program to see how it fits. In most cases farmers will be surprised at how closely the new program fits their own plans," he adds.

To farmers who apply for them, after completing the program of approved soil conserving and soil building practices, grants of money will be made later in the year because of soil conservation and sustained farm buying power are of vital importance to the Nation. For this reason the Government teams up with the farmer to help finance the job of making American farms secure, Smith points out.

Farmers whose farm plans for 1936 conform to the flexible soil conserving program may be paid at the rate of 5 cents per pound for the normal lint cotton yield on land shifted from this soil depleting crop to some crop or use that protects and restores the soil. Not more than 35 per cent of the base acreage of cotton may be shifted to form the basis of a payment, and that only if the total in the county does not exceed 25 per cent.

J.T.A.C. Presenting Centennial Pageant

Stephenville, Texas, April 20—How La Salle, crossing Texas in search of his lost fort, was murdered by his own men;

How the Spanish, laying claim to Texas, kept in mind always the conservation of the Indians as well as the acquisition of territory for their monarch;

How Stephen F. Austin and other early heroes worked and fought for the freedom of the empire;

How Texas has grown, in wealth, in power, and in prestige, during her 100 years as republic and state—

These are the developments to be portrayed in the Centennial pageant at John Tarleton College Saturday evening, May 16, as part of the annual Parents' Day program. The pageant will reach its climax in the World War scenes. The final will depict the sources of Texas' wealth and beauty, with homage paid to Princess Texas and her consort Prince Renown.

Governor James V. Allred, President T. O. Walton of Texas A.&M. College, and members of the A.&M. Board of Directors are expected to be among the guests for the Parents' Day celebration and the pageant. Governor Allred will address students and visitors at a program scheduled for 10 o'clock in the morning. The senior program and presentation of the senior gift, a portrait of Dean J. Thomas Davis, will be included in the day's activities.

SOAP BUBBLES PAVED THE WAY FOR NEW OIL

Ponca City, Okla., April 30—A staid English physicist who did not consider it below his dignity to blow soap bubbles paved the way for discovery of the principle which makes modern motor oils the best automobile lubricants science has known, it was revealed at the laboratories of the Continental Oil Company today.

The hero of the story is Sir William Bragg, who by 1925 had blown several million bubbles and observed that on each one, as it was about to burst, there appeared a dark spot which looked like a thin black film on the airy, iridescent surface. After many disheartening failures he actually photographed the spot by X-ray diffraction and found it consisted of a layer only two molecules in thickness at the point where the bubble was about to rupture.

The mystery of the ability of this infinitely delicate film to resist breaking after the thicker soap solution had been pulled away was explained by the amazing X-ray evidence that the double layers of molecules were regimented, with each molecule in upright position and all bound together by the force of their inter-molecular attraction.

Putting down his bubble pipe, Sir William took up a medicine dropper and tried dropping oils on water in basins. He discovered that mineral oil had a tendency to spread itself out thinly over the surface of the water, making varied patterns of various size, and—air and current conditions being static—of uniform shape, the shape being a circle. The entire film formed a unit which resisted efforts to break its unity.

Again Sir William brought his photographic genius into play and discovered that on the water, as on the bubble surfaces, something more than accident was

bringing the oil particles together.

Sir William reasoned that the soap bubble molecules and the oil particles huddled together because of some mutual magnetic or quasimagnetic attraction, but practical application of the phenomenon was to await results of dramatic laboratory experiments destined to be conducted eight years later, 4,500 miles away in the American oil fields.

The early 1930's saw a trend toward high-powered automobile motors which under certain conditions could not be adequately lubricated by mineral oils. From the executive offices of the oil companies the orders went down to the laboratory chiefs to develop a lubricant which would do the job. Technicians of one company started experimenting in one direction, technicians of another company in another, and so on, looking for alloy oils. It so happened that Bert H. Lincoln and L. L. Davis, chemists for Continental, had read of Sir William's curious observations, so they started in where Sir William left off, to find some substance which would make mineral oil behave that way. It would be a triumph, they felt, if oil molecules could be made to stand erect in solid phalanxes on friction surfaces as they did on soap-bubble films.

The rest of the story is now a matter of history to the oil industry—how Lincoln and Davis, after tinkering with more than a thousand known organic compounds in the animal and vegetable oil families, finally took to synthesizing esters, building their own long-chain carbon molecule which for reasons best known to physico-chemists stand erect with two chlorine-atom feet apparently in themselves, literally buried in the energy layer of a metal surface.

Wendell Hall, the composer of the song "It Ain't Goin' to Rain No More," has made nearly \$100,000 from the song. Hall was only 25 years old when he wrote the song.

BUILDS 27 MILES OF CONTOURS

Brady—Twenty-seven miles of level contours fifteen inches high were recently built in a 450 acre pasture by Charlie White, a rancher of McCulloch county. The contours were graded up with road machinery with a drop of one foot between contours. The fresh ridges were sown to a mixture of oats, sudan grass and Italian rye. This 450 acre pasture was a part of 1,280 acres of farm and pasture land terraced or con-

toured in McCulloch county during March under the direction of county agent, James D. Prewitt.

SELF CULTURE CLUB OBSERVED TEXAS DAY

Members of the Self-Culture Club observed Texas Day with a luncheon and program in the basement of the Baptist Church recently. Lunch was served in buffet style and the table was appropriately decorated with roses and blue bonnets. The place cards and napkins bore the Texas Centennial seal and plate favors were blue bonnets.

After lunch, a short business session was held and it was decided to sponsor a picture show at the local Theater, Monday and Tuesday. Proceeds of the picture, "The Crusaders" was to go to the benefit of the local Girl Scouts.

Mrs. Palmer West opened the afternoon's program on Texas Art with a paper on Painters, Early and Modern. Mrs. Thorpe Parker followed this with a discussion on Promoting Art. She opened and closed her piece with appropriate poems by Native Texans. Mrs. Geo. Williams gave a paper on Sculpture and Sculptors. This was followed by a short parliamentary drill by Miss John Alexander.

Mrs. Reuben Dickens read a paper on Missions, their Purpose and Success and also a short sketch regarding the Rose Window at the Mission St. Jose. Mrs. Joab Campbell discussed the Shrine of San Jacinto.

At the close of the program, the songs "Texas, Our Texas" and "Beautiful Texas" were sung in unison.

Members present were Mrs. Gordie Alexander, Mrs. Jim Williams, Mrs. Dickens, Mrs. Williams Mrs. Bill McSwain, Miss Chris Enochs, Mrs. West, Mrs. Campbell, Miss Alexander, Mrs. A. J. Quinn, Mrs. Parker and Mrs. Wiley Ratliff, a new member. Guests were Mrs. Sam Jones and Mrs. Tom Alexander.

interview. Then the fun begins. All the applicants seem to be affected in some way. One having a terrible cold, also the "itch", who is none other than Rev. A. J. Quinn; while Prof. Harkin Catch and the absent minded Prof. is Rev. N. P. Wilkinson, who plays opposite Mrs. DeLong. Still another hiccough, one stuttering when excited. Nothing, however, keeps love at once. Black Eyed Susan comes to life and loves her Uncle Ed, the negro gardener, is carried away by haunts. Besides the comedy and romance that keeps the audience in an uproar from the first to last, they are several lovely choruses in the show. Forty pretty girls in beautiful costumes dance and sing snappy music written especially for the play.
The full cast as selected will be announced next week.
