City Council, Officials Discuss Hospital

"We're really pleased you're trying to get the hospital open and are very receptive to your proposals," Gray County Judge Carl Kennedy told the McLean City Council regular session July 11.

Kennedy and county commissioner Ted Simmons met with the council to resolve any misunderstandings between the commissioners' court and the council concerning the reopening of the McLean Hospital.

"If you're planning to sell or sub-lease the hospital, the county, as owner, needs to be involved because of our accountability to the people of Gray County," said Kennedy. "There are a few things we must check out, such as any restrictions there may be and the feasibility of leasing and sub-leasing the hospital from HCA. Most importantly, we have to be sure that whatever contract is signed, the people of Gray County will be protected," Judge Kennedy told the city fathers.

the impression that the court was favorable. However, the council received a letter from the court, and it is our understanding that the County Commission does not want to relinquish control of the hospital or its contracts. We really need to know where we stand, so that, if possible, we may actively pursue

the opening of the hospital," Thomas said. Kennedy told the council he was sorry for any misunderstandings the letter had caused. "We wanted to go on record to let you know we're pleased and willing to help. We must, at the same time, proceed with caution, to make sure everyone involved is pro-

ected," he said. The council voted unanimously to actively pursue the leasing and/or reopening of the hospital. In other business, the council voted to reject a bid from Butch Turpen for \$60 to lease the city owned 30-acre landfill. Mayor Terry told the aldermen that the city's

lawyer, Don Lane, had stated the city was not obligated to pay toward an employee's insurance if it was not with the city-retained Commercial Travellers Co. Terry explained that it was city policy to pay \$15 toward the city-approved policy for each employee and Chester Bohlar, who is not covered by Commer-

cial Travellers, wanted to know if the city would pay \$15 towards his private insurance policy. Councilmen also voted unanimously to terminate the contract for a gas well with Stahlco of Amarillo due to inactivity. The council discussed the garbage rates currently in practice and asked city secretary

Stella Lee to research the current ordinance. Councilmen tabled the matter until the next session. Aldermen voted to pay current bills and discussed attending the Texas Municipal League meeting to be held in Amarillo, July 21.

Those present for the lengthy session were Mayor Terry, city councilmen Thomas, Loyd Bybee, W. A. Bentley, June Suggs and Jim Barker; Stella Lee, Bob Glenn, Judge Carl Kennedy, Ted Simmons, Jeanette Fish, Maggie Johnston, Linda Haynes and Kathy Carter.

COACH SHERI HAYNES present Most Valuable Player trophy to Misty Magee, as Sam Haynes presents a Most Valuable Player trophy to Jeff

Parker. Also pictured in the center is Anna Anderson, who assisted with the week-long McLean Basketball Camp. (Photo by Linda Haynes)

Misty Magee, Jeff Parker Named Most Valuable

Misty Magee and Jeff Parker were presented trophies as the Most Valuable Players of the McLean Basketball Camp Friday night. The presentation was made by coach Sheri Haynes during a demonstration of skills at the McLean gymnasium. Ribbons were presented to other winners in various contests. The winner of the Hot Shot contest was Jeff Parker, with second place going to Misty Magee. Winner

of the fourth and fifth grade division of the free throw contest was David Johnson with Tanner Hess, second. Winner in the sixth, seventh, and eighth grade division was Jeff Parker, with Chris Seay, second. In the HORSE contest, Donald Harris was first and Erik Anderson was second in the boys' division. Misty Magee was first and Diana Hallum was second in the girls' division. In the One on One

contest, Jeff Parker was first in the boys' division, and Erik Anderson was second. In the girls' division, Misty Magee was first and Linda Reid was second. During the closing exercises for the week-long camp, the 27 campers demonstrated ball handling and agility skills. Assisting Miss Haynes in the camp were Anna Anderson of Lockney and Sam D. Haynes of McLean.

Firemen Battle Huge Blaze Tuesday

McLean firemen were joined by firefighters from Lefors, Shamrock, Pampa, Wheeler, and Mobeetie to fight a huge grass fire north of McLean. The local firemen were called to the

scene about 10 miles north of McLean near the Pampa highway about 12:15 and battled the blaze until 5 p.m. According to fireman Glen Curry, about a section of land was des-

troyed in the blaze. A grass fire in the same area last summer destroyed several hundred acres of grass land. No further details about the fire were available at presstime.

ANGIE WILSON WAS recently elected to head a youth group which includes teenagers from eight states. (Photo by Linda Haynes)

McLean Teenager To Head 8-State Methodist Group

Angie Wilson was elected the president of the South Central Jurisdictional Youth Team of the United Methodist Church during a meeting in Shreveport, La., last week. Miss Wilson, the 17-year-old daughter of the Rev. and Mrs. Billie Wilson of McLean, will serve as the youth delegate on the jurisdictional council on ministries and chair the meetings for jurisdictional youth groups. The organization serves Methodist youth groups in eight states: Texas, Oklahoma, Nebraska, Kansas, New Mexico, Arkansas, Louisiana, and Missouri. Miss Wilson said that South Central group will host the nationwide Spiritual Life Rally in August

of 1984 in Kansas City, Kansas. This meeting, presided over by the McLean teenager, will draw more than 5,000 young people from across the United States. Miss Wilson said that the group is currently conducting contract negotiations for an appearance by Alan Alda at the 1984 meeting. At the Shreveport meeting, Miss Wilson, and Gregg Mann of McLean were among the 268 youngsters who attended youth training classes. Mann is the vice-president of the Pampa District of the Methodist Church. Both Mann and Miss Wilson will be seniors at McLean High School this fall. In addition to her new job, Miss Wilson is the YSF chairman for the

Pampa district and was re-elected president of the Northwest Texas Conference of the Council on Youth Ministries. The Rev. Wilson is serving his second year as the pastor of the First United Methodist Church in McLean. Miss Wilson attended two years of high school in Silverton. She plans to attend McMurray College next year and major in pre-med.

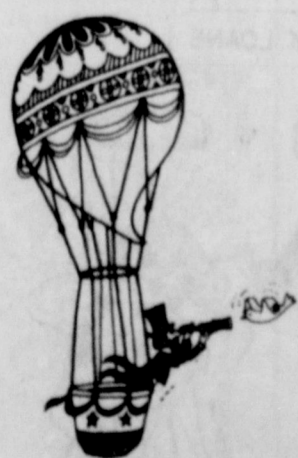

Conservation Tillage Field Day Set For July 21-22 In Pampa

Approximately fifteen Chemical and Implement Manufacturing Companies will be on the Program of the Conservation Tillage Field Day Scheduled July 21-22 at M.K. Brown Civic Center. This two day conference is aimed at helping farmers to become better informed of the most economical methods, most effective herbicides, and best suitable tillage equipment to use in carrying out a sound eco-

nomical conservation tillage system. The event is being sponsored by the Gray County Soil and Water Conservation District, Soil Conservation Service, Agricultural Research Service (ARS) and Texas Agricultural Extension Service (TAEX). Activities will begin at M. K. Brown Civic Center July 21 at 8 a.m. with registration and opening of booths and displays. The program will begin at 9 a.m. and will conclude

about 4:30. The Field Demonstrations on July 22 will begin at 8 a.m. and should be completed by noon. Highlights of the first days event will include talks by Area Farmers Roman Friemel of Groom, and Jerry Artho of Wildorado; along with Dr. Paul Unger, Soil Scientist with ARS Leon New, Irrigation Specialist with TAEX, and Ray Sammons Computer Specialist out of Amarillo. The afternoon session

on July 21 will involve fifteen Chemical and Equipment Manufacturing Companies explaining their products. Numerous companies will have booths and company representatives present in M. K. Brown lobby to bring you their latest in product lines. There will be an equipment display set up on the parking lot. A Bar-B-Que meal, compliments of all the See FIELD DAY, Page 10

from the distaff side

Recently a parent came to the local school board meeting to ask about the status of discipline. After the meeting, I began to wonder how any of us can judge the quality of discipline in our school. If you talk to certain parents, you would swear that discipline does not exist. If you talk to certain teachers, you would think that the situation is perfect. It seems to depend on to whom you listen, and it depends on your own perspective.

Eddie Mac Stewart sent me a newspaper article from the July 5 Mid County Chronicle, in Jefferson County, which

gives some answers to that dilemma. James V. Walton, alcohol education coordinator for the Texas PTA, at a recent seminar on teenage alcohol-abuse cited some instances of a breakdown of discipline in the schools. In Central Texas two students were dismissed, according to school policy, for using alcohol at school. The next day their parents went before the school board to have the policy changed. In the Austin area, a child was sent home for dyeing her hair blue. Her mother protested. A city in Central Texas refused to enforce violations of min-

or liquor laws in a club's parking lot. When the PTA approached the city council, city officials said they could not enforce them because the kids would tear the town up. A junior-senior prom was held in a large Texas city unchaperoned. Students were brought in limousines and left alone overnight. When questioned, school officials said half the students would not attend the prom if it were heavily chaperoned. According to Walton, these incidents preach a loud message to our youngsters. We are saying that rules have no meaning, and that they can be changed on a

whim. We are also saying that rule breakers suffer no consequences. He suggests several things that parents can do to remedy lax discipline in schools. He says we should get involved and find out what is really happening. Get together with other parents who feel the same way you do. Support no-nonsense policies within the school. Become an assertive parent. Walton says, "We're seeing over and over again that what worked in 1920 and 1940 still works in 1983. That's discipline, limit setting and responsibility - all those kinds of things work. We just have to find a way to do it in 1983."

We can take an objective look at our schools, by applying these standards. Are rule breakers effectively punished? Do irate parents exert undue pressure on administrators and the school board for special favors for their children? Do parents support the administration when policy rules are enforced? Do teachers support the policies of the school, or do they slip around to their select friends to slice up the school administration over every disagreement? You should be able to tell from your answers to these questions about the discipline in the McLean schools. If you are satisfied, then tell a school

board member or one of the administrators that you are. And if you feel that there are problems that still need to be solved, investigate, find the truth, listen to several viewpoints, and then get involved to try to improve the situation.

Now Is The Time To Protest

By Linda Haynes

Now is the time to protest! You should have received your reappraisal notice last week for property in the McLean School District. If you feel that the value set on your property is too high, or too high in comparison to your neighbors, then you must protest now! Complaining when the tax notices are sent out is too late.

Enclosed with your appraisal notice is a protest form. You should fill out that form and mail it to the Pampa office of the Gray County Appraiser. You will be notified of a hearing date when you can appear before the Appraisal Review Board (the equalization board) to protest your taxes.

After looking at the print-out of the houses and land for the McLean School District, I am convinced that many of the dollar amounts placed on property are inequitable. (The appraisal print-out is public record, and can be viewed at the Appraisal Office by any taxpayer.) The value on my own home tripled, while the value on some homes of comparable size, construction, and age is considerably less.

The most puzzling part of the reappraisal is the market value set on native grass land. I can accept the fact that the value on houses in McLean was too

low. (In 1981, the state said McLean houses were assessed at about 45% of market value.) I also can accept the fact that a fairly new brick home with about 2500 square feet should be assessed at about \$50,000. At today's prices, that's not too outrageous.

But can you believe that the fair market value of a section (640 acres) of land is \$21,000? In some cases, the value is even less. I'm sure that I could offer any landowner in Gray County that amount for 640 acres, and be laughed off the place.

What this means to you as the taxpayer, is that if the value of your home is raised, and the value of the land is raised, then your tax rate will be lowered so that you will be paying about the same amount of taxes as you did last year. However, if your appraisal on your home is double what it was last year, and the market value and the ag value on ranch and farm land around here is less than it was last year...the homeowner is going to get stuck with a larger share of the taxes.

Please don't postpone investigating the facts. If you feel that your appraisal is unfair, you must protest now. Two months from now will be too late.

The amethyst was worn by the ancient Romans who believed it would prevent intoxication.

The largest crabs in the world live off the coast of Japan. They stand 3 feet high and often weigh as much as 30 lbs.

SOCIAL WORK CERTIFICATION

AUSTIN—The Texas Legislature has approved legislation which calls for changes in the state's social work certification process.

The new measure allows the Texas Department of Human Resources to consider experience and degrees which are closely related to social work when a person applies for social work certification.

Under the new provision, a person can become a Certified Social Worker, which is the highest level of certification, if he or she has a Ph.D. or master's degree in a social work related field and two years of experience. In addition, an individual can qualify as a Certified Social Worker if he or she has a bachelor's degree in social work or a related field and five years of experience, or a bachelor's degree in any field and ten years of experience. Previously, a person applying for Certified Social Worker status was required to have a Ph.D. or master's degree in social work.

To become certified as a social worker, which is the second highest degree of certification, a person will now be eligible if he or she has at least an associate's degree and ten years of experience or a high school diploma and fifteen years of experience. Previously,

a person would be considered for Social Worker Certification only if he or she had a bachelor's degree in social work.

The new provisions included in the Social Work Certification process will only be in effect until 1985. After that time, the standards for certification will revert back to the original educational requirements, and the "grandfathering" period will be over.

The grandfather clause is necessary to protect those workers who are highly respected in the field of social work and who are extremely competent despite the fact they may not have a Ph.D. or a master's degree. We believe the grandfather clause is important to allow for certification of those individuals who have worked in the field of social work for ten, twenty, thirty years or more and contribute a great deal towards understanding and responsibilities of child care.

We believe this legislation is significant to Boys Ranch and Girlstown as well as to many other child care facilities around the state.

If you have questions or comments about the certification process, you can contact us by writing, Senator Bill Sarpalius, P.O. Box 12068, Austin, Texas 78711.

Senator Lloyd Bentsen

Watching Washington

There aren't nearly enough qualified teachers in math and the sciences to ensure that America's children learn all they need to know about these important subjects.

Studies show that as many as half of all math and science teachers in U.S. grade schools and high schools are not certified in those subjects. Last year, 43 states reported serious shortages of math teachers and 42 reported shortages in such sciences as physics.

This growing problem, which has occurred at the same time nations like the Soviet Union and Japan have poured extraordinary national resources into science and math education, has resulted in a steady erosion of our preeminence in these fields.

Our best students can still compete with the best abroad, but that top crust is a thin one with little support beneath it. I chaired a recent Joint Economic Committee hearing in an effort to better define the scope of the problem and learn what is being done to combat it. According to testimony by Betty Pyle, president of the Texas Classroom Teachers Association, the problem in our state is serious indeed.

Not even one chemistry teacher has been graduated from a Texas college for two years. Only 20 new math teachers earned a degree in our state last year, and 13 of those accepted high-paying jobs at private businesses.

At the hearing we did learn of one hopeful success story. The Houston Independent School District, which in 1978 had vacancies in 47 secondary math and science teaching positions, now has only two vacancies in math and one in science.

Houston Superintendent Billy R. Reagan and the Board of Education saw the handwriting on the wall back in 1978 when they learned that nearly 6,000 of their students didn't have certified math or science instructors. A large number of their graduates has received nearly all their high school instruction in these courses from substitute teachers.

The Houston school officials were caught in a double-bind. Industry and business were luring their qualified math and science teachers away with higher pay while, at the same time, their students needed increased instruction in math and the sciences in order to compete for high paying jobs in the modern world.

The Houston solution was a four-part "Second Mile Plan" to attract teachers to subject areas where critical shortages exist and to hold on to them. The plan includes incentive pay, a district-sponsored teacher retraining program, a part-time/teaching partners program, and an increase in base salary.

What works for Houston, of course, won't necessarily work everywhere. There is, in fact, disagreement in Houston over various aspects of it. But there is no denying that the "Second Mile Plan" has helped reduce the math and science teacher shortage there and more than half of the district's teachers think it should be continued.

It is an innovative approach to solving a serious problem, and we need as many as we can muster. I have introduced legislation which would provide a one-time \$1,000 tax credit as a bonus to teachers who gain certification in math or science instruction any time between 1984 and 1987.

Our nation's ability to provide an adequate national defense, and to retain leadership in emerging technologies and the jobs they create, depends on a technically-oriented workforce.

Both of these national objectives are in jeopardy if our students continue to be shortchanged because of math and science teacher shortages.

Consumers Swarm Farmers Markets

AUSTIN—Skeptics said it couldn't be done, but with assistance from the Texas Department of Agriculture, four new farmers markets have opened in the past two weeks.

Consumers are buying fresh tomatoes, peaches, melons, corn and such specialty items as honey and herbs direct from the farmers who produced them in Waco, Vernon, Grayson County and Tyler, according to Texas Department of Agriculture farmers market expert John Vleck. In Grayson County, Vleck said, they could even buy corn-fed frozen beef.

Shoppers quickly bought up all of the products offered at each of the markets, surprising both farmers and organizers with the enthusiastic response. Not surprisingly, more and more farmers are participating in the markets.

About a dozen farmers tried to meet the demand of around 1,000 consumers on the first day of the Waco market, Vleck said, with the unexpected response creating a traffic jam—a situation that Waco authorities have since corrected.

By the time the Tyler farmers market opened on July 7, more than 40 farmers turned out to meet the demand of a flock of shoppers that starting arriving at 7 a.m. "It was like a festival," Vleck said, "with some of the

prettiest fruits and vegetables I've seen anywhere."

Texas Agriculture Commissioner Jim Hightower, who promised to develop farmers markets as one method of helping farmers gain a larger share of the food dollar, hired Vleck to assist in the operation of farmers markets across the state.

The early success of these first new farmers markets will be important to building farmer confidence in future markets, Vleck believes. "I think a lot of farmers were skeptical about the fact that the consumer demand is out there," he said. "The greatest thing that the markets have shown is that the consumers are hungry for fresh produce and they will swarm whatever trucks are there."

Both the variety and freshness of the offerings seem to be important to the consumers at the markets. "You don't just have one kind of squash," he said. "You've got yellow squash, zucchini, and acorn squash. You've got bell peppers, banana peppers, and jalapeno peppers."

The markets will continue on a regular schedule through the growing seasons, Vleck said, and he will continue to help with recruiting more farmers, with management concerns and in expanding consumer support.

THEN and NOW!

The world's first frostless household refrigerator made its debut just 25 years ago.

Then: Until this labor-saving machine came on the scene, homemakers had to contend with removing frozen food and defrosting their refrigerators with pans of hot water in the freezer. As the frost melted, messy puddles formed inside and outside the unit. The first frost-free, from Frigidaire, introduced another first—the polyurethane foam that was to set new standards for the entire refrigeration industry. Because it's twice as effective as an insulator, this Frigi-Foam insulation made possible the popular "thin wall" design on contemporary refrigerator cabinets.

Now: On this 25th anniversary, there's another first. A new Frost-Proof unit cuts energy consumption by more than half. Engineers report that the new 16-cubic-foot frostless model actually used 51

percent less electricity compared to a 1958 model, even though it has two feet more capacity.

It's energy saving, so the new refrigerator saves dollars, too. Based on Department of Energy and industry standards, it costs only \$73 per year to operate, compared to \$151 for the 1958 unit. The new

model literally pays for itself.

The 1983 model has some other new features, as well... a meter-miser compressor, automatic ice cube maker, adjustable cantilevered shelves

"NAME AND ADDRESS? I KNEW IT. I KNEW THERE'D BE A LOT OF RED TAPE!"

Penurious Marbles Discovers Inexpensive Vacations At Home

With the arrival of summer, it is natural to think of vacations. Unfortunately, if you are like most of the rest of us poor suckers who have just been through tax season, the latest rise in inflation, and the monthly grocery bill, you are too strapped for funds to think about going anywhere that costs more than \$1.98 a day. Therefore, it behooves me to list ways in which you can still take a break without actually breaking yourself, so to speak.

Let's say that you and your brood have dreamed of spending a day or two at a large amusement park, riding the rides, enjoying the thrill of the roller coaster, the tilt-a-whirl, the spook house. Okay, here's what you do. First, three weeks before vacation time, quit dusting the house. Lay out dead flies to attract spiders which will spin very interesting webs in the most appropriate corners of your home. This preparation costs you nothing, unless you are forced to buy the dead flies. (If you are the type of person who has to buy dead flies, then it's no wonder you can't afford to take a vacation. You

should be ashamed of yourself.)

To put the finishing touches on your spook house, quit paying your utility bill. This will provide proper darkness for the thrill-packed time you have planned. Then, immediately prior to allowing the family to enter the spook house, tell old dad about the overdraft notices you have been hiding from him all summer. The accompanying screams and groans will send chills up and down the spines of all who enter there.

If the spook house isn't enough, there is another inexpensive way to excite members of your family. If you feel like splurging, buy a length of rope at your favorite hardware store. If you'd rather save your funds for something wonderful, like a pound of popcorn, undo the clothesline and use that. With a few simple knots, tie the aforementioned rope around the waist of the first thrill-seeker who comes your way. Then, when he least expects it, twirl him around and around until his face turns blue and his eyes look kind of bulgy. By the time you have finished with him he'll have developed an amazing dizziness, accompanied by an in-

credible fear of heights. He also will probably be a bit nauseous, a feeling which accompanies the best of the rides at Six Flags, so don't let him have any of your popcorn.

There are other cheap vacations that you can enjoy. You might consider white water rafting. In this case you force the family to sit in a small wading pool, and have a friend throw buckets of water and small rocks at them. If

you're in the mood to squander, you might invest in a live trout just for the heck of it. It is great fun, while being pummeled with water and rocks, to try coping with the problem of a fish wiggling around in your t-shirt.

Study finds that people consider pets family members

COLLEGE STATION — Women have more difficulty deciding to euthanize the family's terminally ill pet, but are called on more frequently to handle such details and are more likely to feel guilty about it, suggests a Texas A&M University study.

The research, carried out for a master's thesis by veterinary student Vicki Bailey of Spring, offers some of the first documentation that many people feel pets are members of the family and not just four-legged companions.

COLLEGE STATION — Women have more difficulty deciding to euthanize the family's terminally ill pet, but are called on more frequently to handle such details and are more likely to feel guilty about it, suggests a Texas A&M University study.

The research, carried out for a master's thesis by veterinary student Vicki Bailey of Spring, offers some of the first documentation that many people feel pets are members of the family and not just four-legged companions.

Cheap at-home camping is a bit more complicated than I like, but if you're an outdoor nut, pitch a tent in the backyard, dress the dog in a bear suit, and dig a latrine. Forget the insect repellent, and you're all set.

My favorite cheapo vacation is called *Stranded On a Desert Island*. This consists of taking the phone off the hook, disconnecting the doorbell, and painting seascapes on the inside of the venetian blinds. Not only do I have the peace and quiet which is so very much appreciated at vacation time, I also have the satisfaction of knowing I'm driving Ma Bell crazy. What could be sweeter?

Young Buried At Quanah

Robert Harris Young died at 11 a.m., Saturday, in his home in McLean. Services were at 10 a.m. Monday in the Dozier Church of Christ with Joe Dukes, officiating.

Young, 81, moved to McLean from Samnorwood in 1976. He married Vela Corcoran in Amarillo, Jan. 25, 1978. He was a retired farmer and a member of Dozier

Church of Christ.

Survivors include his wife; two sons, Elzie (Sonny) Young and James Eugene Young, both of Amarillo; one daughter, Doris Marie Burt of Denver, Colo.; one brother, Mahlon Young of Wilcox, Ariz.; two sisters, Minnie Scott of Tony, Ala., Ethel Gray of Borger; six grandchildren and 10 great-grandchildren.

The refrigerator was invented in 1803 by Thomas Moore of Baltimore, Maryland. It consisted of two boxes, one inside the other, separated by insulating material.

Resident's' Granddaughter Wins Title In Contest

Jill Kristen Winegeart, six-year-old daughter of Mr. and Mrs. Travis Winegeart, Jr., of Borger, and granddaughter of Mr. and Mrs. Travis Winegeart, Sr., of McLean and Mrs. Mrs. James Stephens of Borger, won best six-year-old in state cinderella girl pageant.

Also this year she won West Texas Cinderella.

While at state she won first in TV commercial and second in duet modeling and partywear.

This year at Borger she won first in sportsweat.

streetwear, song and dance, and third in partywear, sleepwear at International Modeling And Talent Association. In 1981, Jill was Little Miss Borger, first alternate to Little Miss Amarillo, and first alternate in

the Lubbock Regal Pageant, and Regal Little Miss Photogenic.

In the Texas State International modeling and talent association, she was the cameo girl. In the Texas State Cinderella Girl pageant, she was best four year old.

NEW ARRIVAL

Mr. and Mrs. Tim Fitch are the parents of a daughter, Misty Renee, born July 12 at Coronado Community Hospital in Pampa. She weighed 6 lbs., 12 oz.

Grandparents are Dr. and Mrs. Ralph Thomas of Plainview and Dr. and Mrs. James F. Fitch of McAllen. Great-grandparents are Mrs. E. W. Odomo of Plainview and Mr. and Mrs. Jack Thomas of Hot Springs, Ark.

Former Resident Buried Here

Melvin V. Bailey, 59, died Monday.

Services were Tuesday in Carmichael-Whatley Colonial Chapel with the Rev. Claude Cone, pastor of First Baptist Church, and the Rev. Bob Parker, pastor of the Village Park Baptist Church in Amarillo, officiating.

Burial will be in Hillcrest Cemetery in McLean.

Bailey was born in McLean and was a 1941 graduate of McLean High School. He attended Draughan's Business College in Oklahoma City and served with the U.S. Navy during World War II. He was employed by

Cabot Corp. for 32 years and then with Ingersoll Rand. He was a member of First Baptist Church and the Pampa Optimist Club. He married Mary Ann Morris in 1946 in San Francisco.

Survivors include his wife; three sons, George Bailey of Amarillo, Brent Bailey and Brian Bailey, both of the home; a daughter, Nancy Peters of Tacoma, Wash.; his mother, Mrs. Lorena Bailey of McLean; three brothers, Jack Bailey of Pampa, Charles Bailey of Miami, and Vestal Bailey of McLean; a sister, Jan Johnson of McLean; and five grandchildren.

Arthur Dwyer Dies Monday

Arthur James Dwyer, 76, died Monday.

Services were Wednesday in the Church of Christ with Allen Green, minister, officiating.

Dwyer was born in McLean and had lived 13406 79001 13406 79001 13406 79001

here all his life. He was a retired service station operator. He married the former Dorothy Bench in 1978 in McLean.

Survivors include his wife, Dorothy; two sons, Arthur James Dwyer II of Pampa and Jerry Don Dwyer of Canyon; and two grandchildren.

FACTS & FIGURES

The average price in the United States for safe, clean drinking water is only \$1.03 per thousand gallons, about ten gallons for a penny.

TIME-SAVING SHORTCUTS

DRYERS
Although the primary purpose of a clothes dryer is to dry clothes, according to home economists from Whirlpool Corporation, it can help you do some other things, too. You can remove creases from rumpled (but not soiled) garments by simply letting the dryer do the pressing.

Store foods of the same type (such as cheeses) together in the refrigerator. Make a special corner for leftovers. That way, you'll be sure to use them before they spoil.

Alanreed Briefs

The Alanreed Homemaker's Club met July 13 in the home of Lena Carter with seven members and one visitor present. The meeting began with a covered-dish luncheon with Anita Bruce, Lena Carter, Mary Davis, Lucy Goldston, Onie Gibson, Sophia Hutchison, Polly Harrison, and Nicki Dewebber participating. After lunch a business session was held with president Anita Bruce presiding. Roll call was "My favorite flower," and the scripture from Isaiah was read by Onie Gibson. Discussion of plans to make a tour of the Panhandle museum soon were made, and after some visiting, the

meeting was adjourned. Mr. and Mrs. L.T. Goldston were in Amarillo on Wednesday. Larry and Michael Smith visited their aunt

and uncle, the W.H. Davises Wednesday. They are the sons of the late Jennie (Terbush) Smith.

Anita Bruce and Nicki Dewebber were in Pampa Friday. Brenda McLain visited

in Spearman with the Don Horns this week. Don is Brenda's brother. Charley Don Vineyard

visited here Friday with his grandmother, Onie Gibson. Mr. and Mrs. Willis

May of Panhandle spent the weekend here at the W.H. Davises, and they worked on their house. The R.L. Leeders had daughter Sharon and her

family from Clarendon visiting during the weekend. Visiting with Jewel Warner last week were Glen Reynold and Debbie Reeves of Odessa.

LIBRARY NOTES

by Sam Henson

Whitetail Hunting by Jim Dawson
This brand-new book by Jim Dawson should be immensely popular with neophyte deer hunters, and will even prove itself valuable to those who have hunted the whitetail for many years.

Jim Dawson is an experienced deer hunter, and certainly speaks from

experience when he shares with the reader many knowledgeable tricks and insights which will make your deer hunt more pleasurable and more successful.

This book is not simply a "how-to" manual on deer hunting, nor is it a collection of hunting tales, but it does encompass both of these as-

pects of hunting, as well as present zoological and biological facts about the deer and how these facts can assist the hunter. "Whitetail Hunting" also covers the use of dogs, winter hunting, first aid, the significance of habitat changes on deer population, the usefulness of topographical maps, "buck fever" and how to cure it, and how to

tell quickly if the buck that has been spotted is one for the record books. In addition, "Whitetail Hunting" tells of the history of whitetail deer hunting in America, discusses gun types and applicability, and gives the hunter tips on how to practice his shooting to meet unexpected developments in the field, as well as reading deer

signs, using camouflage, how to build stands, calling the deer, shot placement, how to track wounded deer, camping techniques and many other facts of use on your hunting trip.

If you are a hunter, you will find this volume useful in your deer hunting endeavors, and it is now available at Lovett Memorial Library.

In The Kitchen

by Linda Maynes

If we happen to be in Amarillo at lunchtime, our favorite place to eat is Crystal's Confectionery. It was at this exotically-decorated place that I was first introduced to Fried Zucchini. Since it is a particularly tasty dish, I have experimented with various coatings, and finally arrived at the following recipe. This tastes very much like the delicacy from Crystal's.

- Fried Zucchini A La Crystals**
- 1 large zucchini
 - 1 egg
 - 1/2 cup milk
 - garlic salt
 - coarse-ground pepper
 - flour
 - oil
- Cut ends off zucchini.

Slice zucchini lengthwise, removing seeded center. Cut each slice into small (about 1/4 inch by 1 inch) slices.

Break egg over slices. Add milk. Stir thoroughly. Let set about five minutes at room temperature. Drain milk and egg. Salt liberally with garlic salt. Sprinkle with coarse pepper.

Add enough flour to cover slices. Toss, until each slice is coated. Fry in hot oil in deep-fat fryer. Remove from oil when slices begin to brown. Serve with a bottled buttermilk dressing for dipping, or with a hot sauce like Picante.

SUN AND SKIN CANCER

With nearly 400,000 new cases each year, skin cancer is the most common form of cancer in the United States. Fortunately, it's usually curable.

Its cause is often long-term exposure to solar radiation which causes cumulative damage to the skin. This may include the triggering of skin cancer. If you have fair skin and red or blond hair, you are more vulnerable to sunburn and skin cancer than persons with dark skin, eyes and hair.

Skin tumors may be benign (non-cancerous), precancerous (capable of developing into cancer if untreated) or malignant (cancerous). The most common precancerous lesions are red, scaly patches that appear on sun-damaged areas such as the face. They are called actinic, solar, or senile keratoses.

The three basic types of skin cancer are:
• **Basal cell carcinoma.** This is the most common skin cancer. These cancers usually appear as small, pearly nodules on the head, neck, cheeks, back or arms.
• **Squamous cell cancer.** Appearing as nodules or red, scaly plaques, squamous cell cancer most often develops on the face, lips, mouth and ears. Squamous cell carcinoma may spread to distant areas through lymph channels.
• **Melanoma.** Most serious but relatively rare, melanoma is very apt to spread. Melanoma most often ap-

Early diagnosis and protection from excessive sun exposure is essential in fighting skin cancer.

pears as irregular dark brown or black mole-like growths on the upper back, torso and lower legs, as well as the head and neck.

A dermatologist will be able to identify the type of skin cancer, and offer a variety of treatments. Most can be performed in the dermatologist's office.

• **Surgery.** Removal of precancerous or cancerous lesions.

• **Topical chemotherapy.** Application of drugs or chemicals directly to the skin.

• **Systemic chemotherapy.** Use of oral or intravenous tumor-killing drugs.

• **Electrodesiccation and curettage.** Removal of the bulk of the tumor with a surgical instrument, followed by destruction of remaining lesion with a high frequency current.

• **Cryosurgery.** Destruction of the lesion by freezing with liquid nitrogen.

• **X-ray therapy.** Today, 95 percent of all skin cancer patients are cured after treatment, and dermatologists hope to increase this rate.

Amarillo Business Review

TRI CITY ENTERPRISES

It is the opinion of most anyone in a five state area who has had the TRI CITY ENTERPRISES handle their roofing, remodeling and concrete work that there is no more qualified contractor anywhere! Located at 706 Derr in Berger, phone 274-2404 for estimates, this is one contractor with the ability and equipment to get the job done and done right! A 100 percent guarantee backs the work. "If you aren't happy they aren't happy!"

This organization is noted for their fair prices and business like policies. They urge anyone considering expert work to contact them for a referral list of satisfied customers. Their work is their best recommendation!

GARY'S HEATING & AIR CONDITIONING

Gary Ward - Andell Edwards
Owners & Operators

Gary Ward and Andell Edwards are proud to announce that they now have in stock the Amanna Energy Command Furnace -- one of the newest and most energy efficient innovations in the heating and cooling industry in many years. This unit is 95% energy efficient as opposed to 65% efficiency in most units. Through the incorporation of one of their units, many dollars can be saved on your fuel bills and in a reasonable amount of time, these savings 35 to 40% will play for the cost of the unit. It also provides you with hot water at a savings of 40 to 50%, and has a guarantee of 15 years, versus the usual 5 year warranty. In the summer months you can relax as the Amanna Energy Command Furnace slashes your cooling cost up to 25%. This furnace can easily be adapted to propane.

At GARY'S HEATING & AIR CONDITIONING, this motto is, "When it's from us, it's the very BEST!" and with their introduction of the Amanna Energy Command Furnace, you can see they live up to their word! For your convenience, they accept collect calls and give free estimates.

The editors of this 1983 Summer Business Review recommend GARY'S HEATING & AIR CONDITIONING located at 705 S. Bryan in Amarillo, phone 373-2537 for great service and outstanding products!

The Scientists Tell Me...

Resource Efficient Plants Offer Carefree Landscaping For Home Gardeners And Landscape Architects, Study Says

By Robert L. Haney
TAES Science Writer

The landscape architect and home gardener alike can take advantage of a new series of ornamental plants, selected not only for their beauty and desirability, but also because of their low requirements for water, fertilizer, pesticides and maintenance, according to Dr. Al Turgeon, resident director of research of the Texas A&M University Research and Extension Center at Dallas.

"These resource efficient plants should be especially welcome at a time when homeowners and landscapers are trying to cut both wastage and costs of water, labor, fertilizer, pesticides, and other landscape maintenance items," Turgeon said.

"The new plants' development is based on a conviction shared by a number of Texas Agricultural Experiment Station (TAES) horticulturists that we should take advantage of the beauty and inherent strengths of our State's wild flowers, shrubs, and other native plants.

"These 'native Texans' are a hardy lot, that nature has evolved during millions of years with resistance to drought, diseases, insects, cold, heat, and other adversities. Our scientists have targeted their research to develop new landscape plants, with the 'native Texans' as a basis, which incorporate their hardiness and resource efficiency.

"TAES scientists, over a period of several years, have selected a number of these plants with high potential for landscape use in the State, tested them for areas of adaptation, and developed methods of propagating them."

This research is developing new landscape plants that are beautiful, hardy, and easy to care for, with minimal demands for water, fertilizer, insecticides, etc. Turgeon has named them the TAM-REP series for Texas A&M Resource Efficient Plants.

"White Cloud™ Cenizo is among the first of several REP (Resource Efficient Plants) to be released by the

Texas Agricultural Experiment Station to the wholesale nursery growers for multiplication and distribution for the public use.

Cenizo (Texas Silverleaf) is a native to Texas, growing in the Rio Grande Plains, southern Trans-Pecos, and sparingly in the Edwards Plateau, according to Benny Simpson, research scientist in ornamental horticulture at Texas A&M University Research and Extension Center at Dallas.

It's not a true sage but is in the same plant family as the penstemon, snapdragon, and Indian Paintbrush. Popular names for this plant include Cenizo, Ceniza, Senisa, Texas Silverleaf, Barometer Bush, Liar Bush, Ash Bush, Texas Ranger, Purple Sage, and Texas Rain Sage. If you want to look it up, its scientific name is *Lencophyllum frutescens* (Berl.) I.M. Johnston.

White Cloud is a cenizo that will grow 8-foot high but height can be controlled, Simpson says, by shearing. Its glistening white flowers are large and free-blooming against the gray background of the leaves. Due to its two neutral colors, White Cloud will blend with almost any landscape color scheme.

White Cloud's primary adaptation is to USDA Plant Hardiness Zones 10a, 9a, 9b and 8b where generally there is little damage from freeze. It is also widely planted in Zones 8a and 7b but faces the possibility of freeze damage.

If you don't know which zone you live in, the approximate range of average annual minimum temperatures are: Zone 10a = 35° - 30°F; 9b = 30° - 25°F; 9a = 25° - 20°F; 8b = 20° - 15°F; 8a = 15° - 10°F; and 7b = 10° - 5°F.

White Cloud Cenizo's energy requirements, in terms of water and fertilizer, are low for its area of adaptation. Insects and diseases have not been major problems except for the cotton root rot (Texas root rot) fungus. All cenizos are extremely susceptible to this disease.

"Green Cloud™ Cenizo is another of the new race of

ornamental plants developed by TAES. It was first selected by Norman Maxwell of our Weslaco Research Center.

It has the same scientific and popular names as the 'White Cloud' cenizo, is the same height, and is adapted to the same areas. However, its leaves are green instead of gray and its flowers are purple-violet instead of white.

When grown outdoors, 'Green Cloud' is capable of multiple flowering periods following rains and/or periods of high humidity, although there is usually only one major display in late August to early September.

'Silver Cloud™' is another resource-efficient plant release of the Experiment Station. It's a small cenizo, usually less than 3 feet in height. Leaves are small, rounded, and covered with silvery hairs, giving the cultivar its name. The plant grows to a dense, rounded bush requiring little shearing to maintain its dwarf form. Its flowers are a rich purple-violet and it's sometimes called Violet Silverleaf.

'Silver Cloud' has the same range of temperature adaptation as 'White Cloud' and 'Green Cloud'. It is suited to alkaline, well draining soils of the arid to semi-arid areas of Texas and the Southwest. Field tests at Dallas also indicate the variety grows well on blackland soils with alkaline characteristics.

When grown outdoors, Silver Cloud is capable of multiple flowering periods following rains and/or periods of high humidity, although there is usually only one major display in late August through early October.

'Mount Emory™' Mountain Sage is another of the new

race of resource efficient ornamental plants released to the Texas nursery industry by the Experiment Station. It is also called Royal Sage; its scientific name is *Salvia regia* Cav.

Mountain Sage, native to Texas, was found in the Chisos Mountains of the Big Bend National Park, growing in dappled shade at altitudes generally over 5000 feet. It's a true sage and the leaves when crushed emit a typical sage fragrance.

The brilliant vermilion-red flowers are ornamental and blooms occur from late August to mid-November, with prime flowering occurring in September and October.

'Mount Emory' is a tall shrub, about 8-foot high, with leaves about 2 inches long and wide, with a glossy bright green color on the upper surface.

It is one of the few plants in full bloom on the hummingbirds migration routes to tropical areas, and the sage's bright-red tubular flowers attract several species of the birds.

In its natural state, mountain sage usually is found growing in lightly shaded areas. When provided shade from the afternoon sun, 'Mount Emory Mountain Sage' will be adapted to USDA Plant Hardiness Zones 10a, 9a, 9b, 8b and 8a. Generally there will be no freezing in 7b but damage will occur some years in 7a.

The approximate range of average annual minimum temperatures for these zones were listed earlier in this column, in information about 'White Cloud', with the exception of 7a which has an average annual minimum temperature of 5° to 0°F.

Notice this indicates that 'Mount Emory' Mountain Sage is considerably more cold resistant than any cenizo, with the sage able to stand cold approaching 0°F.

'Mount Emory' is adapted to both slightly alkaline and slightly acid well-draining soils of the arid to semiarid areas of Texas and the Southwest.

Brother Of Local Women Dies Recently

Robert James Franke, 53, died July 13 in La Puente, Calif. He is survived by his mother, Eva Franke of Thomas Nursing Center; sisters Ginger Morilla, Doris Reborn, Betty Lopez, Lois Myers of McLean, Mabel Erola of Kansas, and Edna Scrogam of California; and brothers Ed Franke, Harold Franke of Pampa, Charles, Loyd and Clarence Franke of California.

Texas A&M students to raise \$25,000 to sponsor children

COLLEGE STATION — Texas A&M University students have pledged to raise \$25,000 to sponsor an entire village of Colombian children through the Christian Children's Fund (CCF), CCF National Chairperson Sally Struthers announced recently during a two-day visit to the campus.

Struthers was invited to Texas A&M after the 2,300-member Corps of Cadets last year "adopted" five children through the organization.

"These resource-efficient plants are only the first of a number of 'native Texans' that we plan to introduce during the next few years, to the gardening public of Texas," Simpson said.

"If widely adopted for homes, industrial sites, public buildings and the like, these

plants could result in an annual savings of millions of dollars that would be spent on conventional plants for water, labor, and fertilizer maintenance," Simpson concluded.

Places Drawn For Ladder Tournament

Places have been drawn for the annual Lions Ladder Tournament at the McLean Golf Course, according to tournament chairman John M. Haynes. Players may challenge golfers above them on the ladder to move up. The tournament continues through August.

Matches will start anytime after Sunday, July 24. "If a golfer wants to play and his name is not on the list, he can call me through Aug. 5," Haynes said. No new names will be added after that date. Listed on the ladder are the following: 1. Roger King, 2. Thacker

Haynes, 3. Sam A. Haynes, 4. Neil Middleton, 5. Casper Smith, 6. Doyal Billingsley, 7. E. J. Windom, Jr., 8. Ed Patman, 9. Alvin Danner, 10. Buck Lee, 11. John M. Haynes, 12. Wayne Carter, 13. David Haynes and 14. Morse Haynes.

Next to the sun and the moon, the planet Venus is the brightest object in the sky.

Amarillo Business Review

YELLOW CAB CO. OF AMARILLO

"The Most Modern Cabs To Serve You Better"
L.R. Segler - President

Need to be there on time? Call a dependable YELLOW CAB and sit back and relax! Dispatched from 911 W. 5th St. in Amarillo and available throughout the area at key locations like the airport, the YELLOW CAB CO. OF AMARILLO will take you where you want to go quickly and economically. Their clean, modern units and skilled courteous drivers are only a phone call away from any point in the city. Just call 374-5242 or 376-8211 for fast, friendly service!

The YELLOW CAB CO. OF AMARILLO will do a lot more than just take you to your destination. They'll be happy to pick up a prescription for you, deliver an order of takeout food to your home or perform most any service where the best transportation is needed. The editors of the 1983 Summer Business Review recommend the YELLOW CAB CO. OF AMARILLO to all of our readers. It's a better way to travel!

TRI CITY FENCE

Larry Tucker - Owner

For residential, commercial, or ranch site fence contracting, call TRI CITY FENCE at 274-2404 in Borger.

This contractor is well recognized for his high standards of work and ability to complete the job in the time allotted.

No matter what type of fence you need, this contractor has had previous experience with it and can assure you of a first rate job at the lowest price possible.

He has only fully qualified men to assist him in his work and they use only the latest approved methods of installing your particular type of fence.

The reputation of this contractor speaks for itself when you stop to consider the ever-increasing number of people he is fence contracting for. We the editors of the 1983 Summer Business Review, suggest to our readers that they contact the TRI CITY FENCE for a job they know will be done properly because they fully guarantee their work and stand behind it 100%!

BRANDING IRON MOTOR COMPANY

Glen Turner & Ronnie Smith - Owner

For many years now, automobile dealers have considered the "used car" business a sideline to selling new models. The friendly guys down at BRANDING IRON MOTOR COMPANY at 4247 S. Georgia in Amarillo, phone 352-8742 totally reject this theory! They specialize in used cars and, right now, they're dealing with a lower profit margin than anyone in an all-out effort to help their customers beat the current economic crunch by offering great deals on good, used cars and trucks.

The kind of business that this respected firm does is the main reason for their large "family" of repeat customers. People return again and again when they need transportation because they know that integrity, quality and value are passwords at this fine used car dealer.

So, buy the safe way! Stop in at BRANDING IRON MOTOR COMPANY and look over the tremendous values in quality used automobiles. The editors of this 1983 Summer Business Review recommend this fine firm for better cars AND better values!

ST. ANTHONY'S HOSPITAL

John J. Buckley, Jr. - President

ST. ANTHONY'S HOSPITAL of Amarillo is a vital part of the health care delivery system in this section of Texas.

Established in 1901 by the Sisters of Charity of the Incarnate Word, this 326-bed not-for-profit institution was the first hospital established in the Panhandle.

This family oriented facility offers personalized health care center on each individual patient's needs, in its endeavor to be sensitive and responsive to the complex and continually changing demands of modern health care, ST. ANTHONY'S HOSPITAL has been successful in providing a mix of services tailored to community requirements.

Accredited by the Joint Commission for Accreditation of Hospitals for the high quality of care it renders, this hospital continuously strives to improve itself. Its success goes much deeper than the bricks and mortar. It goes much further than the sophisticated equipment. It depends upon the training, dedication, and untiring contributions of a group of people working together.

Each employee feels a great deal of pride in knowing that he or she is part of an ongoing health care success story in which the commitment to providing compassionate service according to the highest medical standards is fundamental.

ST. ANTHONY'S HOSPITAL is located at 735 North Polk in Amarillo, phone 376-4411.

The editors of this 1983 Summer Business Review would like to take this opportunity to commend this hospital for its fine service to the people of this area.

ten days ago, is recovering from his injuries, but says he is still not worth much when it comes to helping with the farm work.

†††
McLean will cross bats with one of the strongest teams in the Panhandle today (Friday) when they meet the Amarillo Grays on the local diamond. The Amarillo team is reported as being in the class with the Gassers who are leading the league. McLean, however, is putting the best team on the grounds the local fans have seen in action in years, and a tough game is promised. McLean will start the following line-up: CF-Close, George; LF-Close, Oscar; RF-Bidwell; 1st-Carlton; 2nd-Cooke; SS-Rice; 3rd-Bodenhamer; C-Bowen; P-Biggers.

†††
W. L. Haynes has received a card from J. W. Kibler, who is on a fishing trip in Arkansas, in which Mr. Kibler states that the fish are so vicious that he has to stand behind a tree to bait his hook.

70 YEARS AGO...

A. G. Richardson, Ed.
At a recent meeting of the town council the resignation of W. J. Pennington as marshal was accepted and John A. Montgomery appointed to take his place for the unexpired term. Mr. Montgomery has been regularly installed and

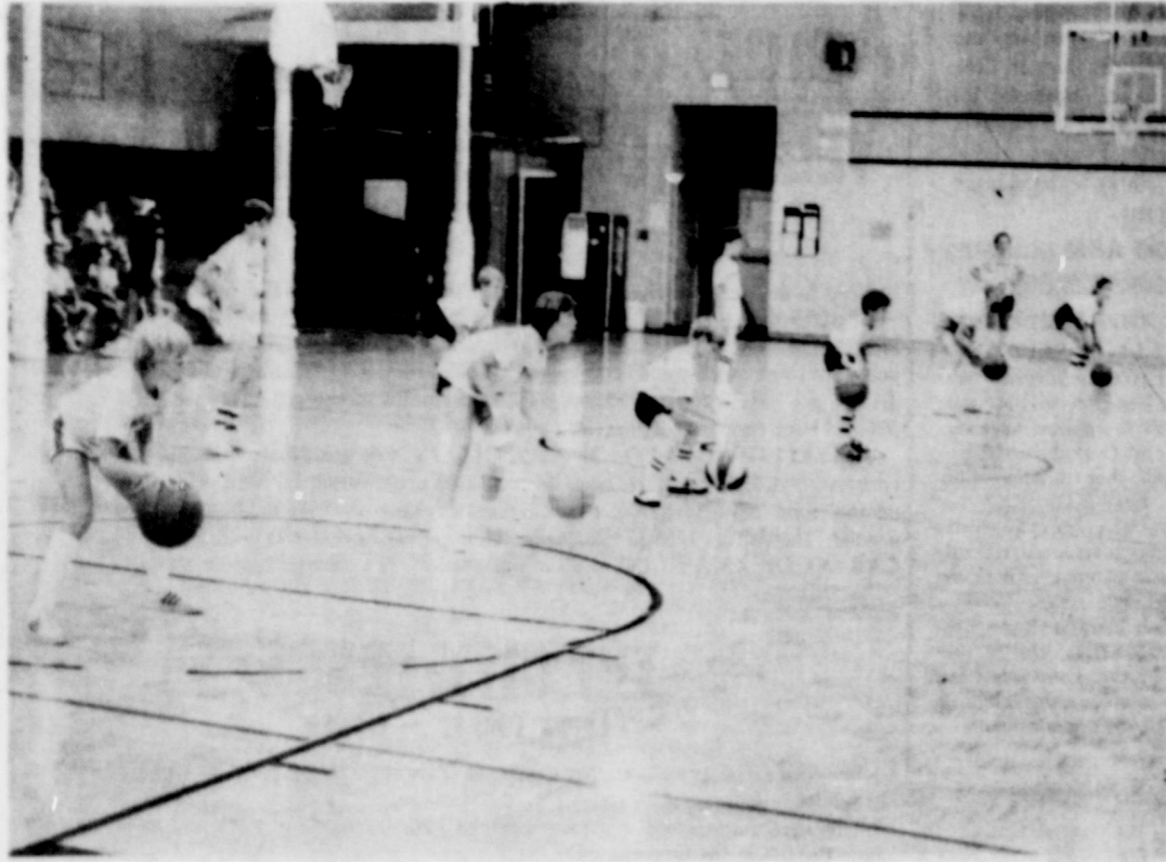

will hereafter be responsible for the city's behavior.

†††
The number of horses on the farms and ranges of Texas has decreased 99,364 head during the past ten years, and the automobile is said to be responsible for those conditions. An argument in favor of "Dobbin" is that his value has increased 164 per cent during this period while the average value of an automobile has depreciated \$887. Those horse has practically held his own in Gray County although our records show a large increase in cars in this country. We have in Gray county 2,632 horses according to the latest census reports, and their total value is given at \$254,235.

†††
Adv...I have purchased a public service car and it is ready for use at all hours...Watkins Livestock Barn.

money saving ideas

ENERGY SAVER: INSULATION

How much will you pay to air-condition your home this summer? Probably more than last year, say energy experts, because of the way electricity prices continue to soar. One way that you can lower energy bills—and inside temperatures—is with insulation.

Insulation can help keep heat from entering your home when it's hot out. That keeps the house cooler—and you can use the air conditioner less.

It's also more economical to buy insulation in the summertime than during the winter months. Many retail outlets sponsor insulation or home improvement sales in the "off season." If you install the insulation yourself, you stand to save even more.

The best place to start drivers education gets high marks from recent survey

COLLEGE STATION — In Texas, driver education apparently ranks up there with Mom, baseball and apple pie, according to the results of a survey conducted by the Texas A&M University Safety Education Program.

Of 180 Department of Public Safety licensing officers, high school principals, parents, students and average citizens questioned, almost 100 percent of them supported driver education, said Dr. Maurice Dennis, director of the Safety Education Program which conducted the survey for the Texas Driver and Traffic Education Association.

"Driver education has recently come under a number of attacks," said Dennis, "but in this survey people are saying it's a program they believe in." Costs are borne more and more by parents. The state currently reimburses the school system \$12.50 per student, while the cost to the school is \$136.00," he said. "And some of the kids who need driver education the most are unable to take it because of the cost involved."

Dennis said a campaign called "Help 200,000" (the number of young people in Texas who reach driving age each year) is trying to influence the state legislature to take a look at driver education — not only to put more money into the program, but also to raise standards and mandate improvements.

insulating, say experts of Owens-Corning Fiberglas Corporation, a leading building materials manufacturer, is the attic. It's the area that's responsible for up to 33 percent of the home's total heat gain—or, in the winter months, heat loss, according to the U.S. Department of Energy. The DOE also says walls account for another 33 percent and windows/doors, 24 percent. If you're a do-it-yourselfer you'll probably choose glass fiber batts. They're the most reliable

Insulation can help keep heat from entering your home when it's hot out. That means you can use less air conditioning.

in performance and easiest to install. Here are some other tips to help you fight high summer energy bills.

- Caulking and weatherstripping doors and windows can help you keep cooler in summer and reduce electrical demands significantly.
- Clean the internal coils on an air conditioner with a damp rag or soft brush. Follow with vacuuming. Foam filters should be washed or changed at least once a month. Place air conditioning window units on the north side of the house or in the shade.

Three McLean Girls Return From Month-Long Tour Of Germany, Italy, The Netherlands, France And England

THESE THREE McLEAN girls recently returned from several weeks in Europe on a study program. Shown on the day they left the United States are Stefanie Houdyshell, Robbin Skinner, and Anna Jean Lamb. [Photo Courtesy of Anna Jean Lamb]

Three McLean girls returned recently from a once-in-a-lifetime trip to Europe. Stefanie Houdyshell, Robbin Skinner,

and Anna Jean Lamb travelled from June 8 until July 5 with the American Institute For Foreign Study.

Sponsor on the trip was Leta Olson of Pampa. Both Miss Houdyshell and Miss Skinner are 1983 graduates of Mc-

Lean High School. Miss Lamb will be a senior at MHS this fall. The group left Dallas June 8 and flew to Am-

sterdam. They visited Cologne, Heidelberg, Munich and Berchtesgaden in Germany; Salzburg, Austria; Venice,

Assisi, Rome and Florence, and Pisa, Italy; Leysin, Switzerland; Paris, France; and London, England.

NURSING CENTER NEWS

Willie Williams is still in the Coronado Hospital in Pampa. We wish her a speedy recovery.

Sunday, Brother Green of the Church of Christ was here to conduct services.

Monday residents playing Bingo were Buck

Henley, Ruth Kemp, Annie Eudey, Haze Mackie, Leon Burch, Bill Shaffer, Kittie Hesse, Maggie Morris, Bob Ford, Earl Tolleson, Inez Fields, Ruby Cook, Ruby Bidwell and Alma Fandal. Our volunteers were Loree Barker, Ruby Boyd, Lena Bailey, Bertha Smith, Onie Gibson and Juanita Smith.

Bananas were furnished by our local Lions club.

Tuesday morning the residents worked in crafts. In the afternoon residents playing dominoes were Haze Mackey, Alma Fandal, Lula Sheegog, Ruby Bidwell, Annie Eudey, Inez Fields, Buck Henley, Earl Tolleson, P. L. Ledgerwood and Leon Burch. Our helpers were

Lena Bailey, Onie Gibson and Pearl Graham.

Wednesday members of the Church of Christ were here for a Bible Study.

Thursday was our birthday party for the month of July. Those celebrating their birthdays were Haze Mackie, Billy Joe Washburn, Opal Reeves, Mable Solomon

and Mary Howel. Our entertainment was furnished by Creed and Wanda Lamb. Cakes were furnished by Cecil Fields, Annie Reeves and Isabelle Cousins. Ladies serving Ginger Morilla, Fern Boyd, Mrs. J. T. Trew, and Pauline Miller.

Buck Henley's out-of-town visitor was "Snook-

ie" Hinton Langford of San Antonio.

Maggie Morris' visitors were her son and daughter-in-law, Mr. and Mrs. Robert Morris and daughters Cathy and Jeannie, all of Lubbock.

Friday, Martha Parker was here with her excellent movies.

McLean Briefs

The family reunion of the W. M. Winegeart was July in Pampa.

Among those attending were Mr. and Mrs. Travis Winegeart, Sr., of McLean; Mr. and Mrs. Loyd Parker of Dalhart; Mr. and Mrs. Travis Winegeart, Jr., Denise, Willie, Jill and Jacey; Mr. and Mrs. Larry Davis, Chris and Shannon of Tucson, Ariz.; Mr. and Mrs. Larry Garmon, Greg and Monty of Perryton; Mrs. Wayne Vick, Michael, Jessie and Jason of Futch; Mr. and Mrs. Troy Mitchell of Oklahoma City, Okla.; Mr. and Mrs. Bill Lindsey, DeJon, Diana, and Daniella of Wellington; Frank Lindsey, Jr., and Bobbie of Hedley; Mr. and Mrs. Carl Cisca, Deann and Carla of Dalhart; Joyce Seller and Angie of Dallas; Ellena Dupuis and Michelle of Amarillo;

Van Nelson and ViJon and Carla Ann of Austin. Several family members from Pampa also attended.

Sam D. Haynes and Morse Haynes won first place in the first flight of the Clarendon Country Club's Men's Partnership tournament last weekend. David and John M. Haynes also participated in the tournament.

Chris Evans returned to his home in Lubbock Saturday. He had spent the week with his grandparents, Mr. and Mrs. Sam A. Haynes. He accompanied his aunt Sally Haynes back to Lubbock.

Kim Beavers recently returned from two and one-half weeks in the Monte Vista area of Col-

orado. She visited her grandparents and went fishing. She is the daughter of Mr. and Mrs. Bruce Beavers.

Star Fondren of Santa Anna, Calif., is visiting with relatives in McLean.

Randy Abigt has taken Mark McCarty, Tuffy Sanders, Johnny Mangum, Keith Garrison and Dale Cole to Pan Fork Baptist Camp this week.

Greta Thompson of Wheeler was a McLean visitor on Monday.

Mr. and Mrs. Allen Wilson, parents of Dorris Windom have recently moved to McLean from Amarillo. They are former residents who are coming back home.

Ted and Jean Longino

have gone to Nashville, Tenn., to visit their grandson John and his parents, Mr. and Mrs. Bob Longino.

Bonnie Fabian has returned from Galveston where she has been looking after her granddaughter, Amelia Fabian. The child's mother, Mrs. Sondra Fabian, is recovering from surgery.

Marty Cable was injured last week by a piece of metal which the lawnmower flung up from the ground. Several stitches were required to close the wound. At last report she was improving, but still has to stay off her feet.

Judy Easton has been in Shamrock Hospital recovering from a head injury which resulted from

a fall at her home last week.

Mrs. Brad Parker, Derek, Mindy and Carrie of Canyon are visiting with her parents, Mr. and Mrs. R. L. Brown and also with the R. C. Parkers for a few days while Brad is attending a DPS school in Austin.

Howard, Davie and Dale Gipson are in Creede, Colo., for a few days of fishing. They will be joined by Mr. and Mrs. Keith Gipson of Trinidad, Colo.

Kenneth, Michele, Matthew and Kristen of Pampa spent the weekend with her parents, Mr.

and Mrs. R. C. Parker.

Doyle Lee has returned home after spending ten days in Colorado.

Mr. and Mrs. John McClellan of Wilmore, Texas visited with Buck and Stella Lee on Saturday.

Story time for pre-schoolers will be held on Wed. morning July 27 at 10:30 instead of Tuesday next week.

Mr. and Mrs. O. K. Lee and son of Pampa visited his mother, Mrs. Maggie Lee, on Sunday.

Gifted And Talented Institute Draws 69 Students To WT

A week at the West Texas State University Gifted and Talented Institute has given 69 area elementary and junior high school students the opportunity to experience creativity in several areas through individualized attention.

WTSU's program of academic offerings to area children who have been identified by school districts as gifted and talented has been conducted through the academic year on Saturday. This is the first year for the students to spend a week on campus. The students participated in daily classes in English, science, creative dramatics, art, music and physical education. They lived in a campus residential hall and ate meals at the dining hall. They

interacted with WTSU students attending the first summer session.

Each student received a certificate which included a comment concerning each child, said Mary Jane Reeves, who coordinates the program. WTSU's Program has been funded through a grant by the Rockwell

Fund Inc., of Houston.

She said that faculty members visited with parents at the banquet which concluded the week about various talents exhibited by the students.

WTSU plans to continue the Saturday sessions during the fall

Arizona is now our leading cotton growing state, followed by California.

Crawford new TPA president

John Crawford, publisher of the Wood County Democrat at Quitman, was elected president of the Texas Press Association at its 104th annual convention in Austin June 25, succeeding T. H. (Hal) Cunningham, Llano News publisher.

Crawford has been in the newspaper business since February 1952 when he graduated from East Texas State University and worked a short stint as reporter-photographer for the Vernon Daily Record.

While still in college, Crawford married the former Mary Roach of Bonham, and they have two children: Sue, now Mrs. Sterling Procter of Dallas and mother of their two granddaughters, Kinome, 5, and Anna, 3; and a son, Bill who graduated from ETSU in 1982 and does light construction contracting in Dallas. Mrs. Procter is a Boston University graduate and a professional musician, as is her husband.

From Vernon Crawford moved to The Denison Herald, a 15,000 circulation Harte-Hanks daily, where he was introduced to one of the early Fairchild plastic engravers and later the Photo-Lathe which was a combination of a big Sears lathe and electronics.

In 1965 Crawford became editor of the Garland Daily News which was printed offset. However, the

John Crawford

Linotypes and Ludlows still set the type with page proofs pulled and sent to the camera room. Pictures were screened and stripped in offset.

In 1966 Crawford returned to The Denison Herald as city editor.

When Editor Claud Easterly retired in the fall of 1972, Crawford was named editor, just in time for a record-breaking conversion to offset done in 30 days from the decision. The Herald built a new pressroom, installed a five-unit Goss Urbanite press and cold type equipment, trained employees and printed its first offset edition in those 30 days.

In the fall of 1982 the Crawfords acquired a half interest in the Wood County

Democrat from Howard (Woody) and Fern Woodall when their son and daughter-in-law, Bill and Mary Ann Woodall, decided to move to the Pacific Northwest, later buying a paper at Stayton, Ore.

The Crawfords moved to a county seat city of 1,983 and a 3,600-circulation weekly from a city of 25,000 and 15,000-circulation daily.

Mary took over the business side as co-publisher and business manager with reporting and advertising sales on the side, plus typesetting, paste-up and all the other et ceteras that go with a weekly newspaper.

Both John and Mary have been active in the press associations. He was President of the North and East Texas Press Association in 1976-77 and has been on the TPA board since 1975. She served as secretary of the NETPA from 1980 to 1983.

Crawford was born at Trenton, in Fannin County, and graduated from Trenton High School. He received a Lone Star Farmer degree, and continued his education at North Texas Agricultural College, now the University of Texas at Arlington, enlisting in the Air Force after a year of college.

After three years as an Air Force photographer, he returned to college under the GI bill.

Crawford has served as Denison Kiwanis Club president, Band Parents Club president, a Little League coach, Cub Scout committee chairman, Boy Scout leader, chairman of various Chamber of Commerce committees, and as chairman of the Texoma Regional Alcohol and Drug Abuse Advisory Committee. He was named Boss of the Year by the Business and Professional Women chapter in Denison in 1979 and received the annual award from the Red River Area chapter of Phi Delta Kappa for his contribution to education in 1974.

He taught a beginning journalism course as an adjunct professor at Austin College, Sherman, in 1981.

Professional honors include the Sam C. Holloway plaque from the North and East Texas Press Association in 1981 and the photo sweepstakes plaque for the top news picture in the Texas Associated Press Managing Editors contest in 1972.

Crawford said he will never regret taking his first newspaper job because it put him into a career which has been filled with headaches and problems familiar to all newspaper people, but more than offset by the satisfaction of producing the best community newspaper possible every week—and trying to make it better next week.

It is against the law when riding a bicycle in Denver, Colorado, to lift your feet higher than the front wheel.

Showcase Seasonal Fruits On A Chocolate Cake

Here's a cake that takes advantage of the abundance of the season's fresh fruits—strawberries, blueberries, grapes and peaches. Use this combination or mix and match your favorite fruits to make this colorful, easy-to-prepare dessert that looks like you fused.

Start with velvety, chocolate cake layers made with versatile unsweetened cocoa. These can be made ahead and frozen until ready to use. Using cocoa ensures a fine-textured, moist cake that freezes well, and because cocoa is the most concentrated kind of chocolate, the flavor will be extra rich and chocolatey. You'll also save preparation time since you measure cocoa right from the can—no time-consuming melting as with solid chocolate squares and no messy, scorched pan to clean.

Spoon a tangy citrus sauce and sweetened fresh fruit between the layers and on top and you've got an easy but impressive dessert to serve family and guests.

SUMMER FRUITCAKE

- | | |
|-----------------------------|-------------------------------|
| 3/4 cup Hershey's Cocoa | 1 teaspoon baking soda |
| 1/2 cup sugar | 1 teaspoon salt |
| 1/2 cup water | 2/3 cup milk |
| 1/4 cup shortening | Citrus Filling (recipe below) |
| 1/2 cup butter or margarine | Sweetened fresh fruit: |
| 1-1/4 cups sugar | 1-1/4 cups each: straw- |
| 1 teaspoon vanilla | berries, sliced peaches, |
| 3 eggs | blueberries or cherries |
| 1-1/3 cups un sifted all- | 1/2 cup green grapes |
| purpose flour | |

Combine cocoa and 1/2 cup sugar in a saucepan; add water and shortening. Cook and stir constantly over low heat until shortening is melted and sugar is dissolved. Remove from heat; cool. Cream butter or margarine with 1-1/4 cups sugar and vanilla in large mixer bowl. Add egg, one at a time, beating after each addition. Blend in chocolate mixture. Combine flour, baking soda and salt; add alternately with milk to creamed mixture. Pour into two greased and floured 9-inch cake pans. Bake at 350° for 35 to 40 minutes or until cake tester inserted in center comes out clean. Cool 10 minutes; remove from pans. Cool completely. With serrated knife, carefully slice each cake layer in half horizontally to make four thin layers. Place 1 layer on serving plate; spoon about 1/3 cup citrus filling onto layer. Top with 1 cup sliced sweetened fruit. Reserve remaining for top layer. Top with second layer; repeat with filling and fruit until all layers are stacked. Arrange remaining 3/4 cup of fruit in decorative design on top layer. Top with any remaining glaze. Garnish with grapes.

Citrus Filling

- | | |
|--------------------------|--------------------------------|
| 1 cup sugar | 1/4 cup water |
| 1/4 teaspoon salt | 1 tablespoon butter |
| 3 tablespoons cornstarch | 1 teaspoon grated orange rind |
| 1 cup orange juice | 1/2 teaspoon grated lemon rind |
| 1/4 cup lemon juice | |

Combine first 5 ingredients and water in saucepan. Cook over medium heat, stirring constantly, until mixture boils. Boil and stir 1 minute. Remove from heat; stir in remaining ingredients. Chill. About 2/3 cup filling.

QUICK QUIZ

Are you a fountain of knowledge about water? Taking this little true-false test can help you tell.

- Water is the least expensive commodity. True False?
- Water is free. True False?
- Most water systems plan on large rate increases in the near future. True False?

ANSWERS: 1 True, 2 False, 3 True.
 1. Water is the least expensive commodity. True.
 2. Water is free. False.
 3. Most water systems plan on large rate increases in the near future. True.

Company Warns of Safety Hazards For Small Children

With the peak of the driving season here, you'll want your child to be going places with you in the car. To keep the ride pleasant and safe, here are some travel tips courtesy of Questor Juvenile Furniture Company, leaders in the juvenile furniture industry and developers of an educational child car safety program called "Safe Passage".

—Make a firm rule: every one rides buckled up or the car doesn't go.

—When driving alone with

an infant, place the safety car seat (facing backwards) in the front with you. The baby will be happier, and you won't be distracted.

—If someone else is driving, ride in the back with your infant. The back seat is safer.

—Never tend to a crying baby while driving or take a baby out of its seat while the car is moving. Find a safe place to stop.

—Don't allow a child to have anything like a lollipop

or popsicle. A bump or a swerve could jam the stick down the throat.

—Sharp or heavy objects should not be loose in the car. They can be deadly in a crash.

—If a toddler must ride in a car without a safety seat, use the lap belt worn low and as snug as possible.

A lap belt is no substitute for a safety seat if the baby is too young to sit up alone.

For a free informative pamphlet on child car safety send a stamped, self-addressed envelope to: "Safe Passage Program," Questor Juvenile Furniture Company, 1801 Commerce, Piqua, Ohio 45356.

"THEN IT'S AGREED, GENTLEMEN... WE'LL SECURE FROM THE UNION, THEN APPLY FOR FOREIGN AID!"

A TECHNICAL EDUCATION

The good news for the non-college-bound student is the advancement opportunities available in consumer electronics.

What courses will best contribute to success in this growing field?

Specifically, one should sign up for math, basic electricity and basic electronics, as well as courses in the language and use of calculators and computers. Technical courses are also valuable in that they develop both manual dexterity and machine tool know-how, point out the electronics experts at the Electronic Industries Association.

Also, drafting courses will develop an appreciation of spatial relationships, physical characteristics and logical procedures. It's also advisable that after class one participate in a school science or radio club.
