Lung Diseases Rank 2nd In Children Diseases

Of diseases killing children, lung diseases rank second only to cancer. They affect millions of children across the United States and include cystic fibrosis, asthma, chronic bronchitis and bronchiectasis.

"Because of the seriousness of these conditions, all parents should be aware of the signs of lung-damaging diseases in children," stressed Dr. Charles M. Laurent, President of the Lone Star Chapter of the Cystic Fibrosis Foundation.

Signs of children's lung-damaging diseases include recurrent wheezing; persistent coughing with excessive mucus; pneumonitis more than once; excessive appetite with poor weight gain; and clubbing (enlargement of fingertips).

Additional signs for cystic fibrosis, the most serious lung disease, are salty taste to the skin, nasal polps and persistent, bulky diarrhea.

Mr. Laurent said that any child with one or more of these signs should be examined by his or her physician or at a Cystic Fibrosis Center specializing in the diagnosis and care of children with lung-damaging diseases.

In Texas, Cystic Fibrosis Centers are located in Houston, Dallas and San Antonio. Funds to support these research and care programs are raised through the Foundation's annual "Kiss A Baby Campaign."

RODERIC FABIAN

Roderic Fabian Enrolls In Medical School

Two hundred and six prospective physicians comprise the freshman medical school class this fall at the University of Texas Medical Branch.

The student from McLean is Roderic H. Fabian, son of Dr. and Mrs. H. F. Fabian of McLean.

He is a graduate of McLean High School and holds a B.A. degree in Chemistry from McMurry College.

These future doctors will work through four information-packed years and rotate through every medical department before selecting their specialty and receiving M. D. degrees. Depending upon the student's wishes and medical faculty evaluation, a choice of graduating in three years or of entering a fourth year track program is now available at the Medical Branch.

Microwave Cooking Course Offered

As part of the Amarillo College Community Service program, a microwave cooking course is being offered for the first time.

The course will start Sept. 28 and continue for five consecutive Tuesday nights from 7:30 to 9:30 p.m.

Mrs. Mildred Prince of 1401 S. Van Buren will teach the class which will meet in the Reddi Room of the Southwestern Public Service Building at 6th and Tyler. Mrs. Prince hopes to limit the course to 20 students.

The course is set up to cover a certain topic each Tuesday. "First, we will go over cooking equipment and breakfast preparation. On our second meeting, lunches and snacks will be dis-

'With All Readiness of Mind'

'Now these were more noble than those in Thessalonica, in that they received the word with all readiness of mind, examining the scriptures daily, whether these things were so' (Acts 17:11). Paul and Silas had come from Phillippi to Thessalonica and then on to Berea. There were not many of the Jews in Thessalonica who responded favorably to the preaching of the gospel. (Acts 17:1-9) It seems that the response was much more favorable in Berea. There nobility exceeded that of the Thessalonians because of (1) their readiness of mind to the proclamation of the Word, and (2) their examination of the Scriptures to see if Paul's preaching complied with that of the prophets.

Readiness of mind means simply an INTENSE AND HONEST INTEREST in the Word of God. Evidently they did not immediately, with the prejudiced minds, shed the Word as the proverbial "water off a duck's back" attitude so often manifested. And how often is the case that people form prejudiced ideas before the Word is ever preached! Every one ought to come to a study of God's Word with an open mind as well as an open Bible!

The result of the "readiness of mind" and the compulsion to examine the Scriptures prompted many to believe in Berea, Acts 17:12. But it also caused the opposing Jews in Thessalonica to come down and stir up prejudice against the preaching of Paul and Silas.

The pattern of opposition to the truth hasn't changed much. How often we hear such prejudiced statements as "Those people think they are the only ones going to heaven"; "They are just a bunch of Bible-quoting fanatics"; "I would hate to be so narrow-minded"; etc. Sad to say, such false misrepresentations generally obtain the desired result, that is, causing people to refrain from hearing any more truth.

But thanks be to God that there have always been a few with the 'readiness of mind' to listen openly and honestly as the Bereans did, to the truth of God. Such are always of a mind to accept ONLY that which can be upheld by the Scriptures.

"Enter ye in at the strait gate: for wide is the gate, and broad is the way, that leadeth to destruction, and MANY THERE BE WHICH GO IN THERE-AT: because strait is the gate, and narrow is the way, which leadeth unto life, and FEW THERE BE THAT FIND IT." (Matt. 7:13-14)

A stocker Cattle Short Course will be held Sept. 28 and 30 in Pampa at the courthouse annex meeting room starting at 7:30 p.m. each evening. On Tuesday, Sept. 28, the program will cover buying and marketing of stocker cattle, market outlook and profit possibilities. The speakers will be Dayton Barkley, Gruver, who is an order buyer for Vann-Roach, Dr. Ernest Davis, Extension livestock marketing specialist, Texas A&M University will be the other speaker.

The meeting on Sept. 30 will cover processing, care and management of stocker cattle and projected budgets on stocker cattle. Dr. Gene Cope and Dr. John McNeill, both Extension Service specialists, will present the program on Sept. 30.

Mark these dates on your calendar and plan to attend if you are interested in having stocker cattle this year.

The latest USDA Cattle on Feed report for the seven major feeding states estimate there are 6,432,000 head on feed September 1, up 8 percent from last year's record low number, but still 6 percent less than the same date in 1974 and 4 percent below last month's number.

August placements of cattle on feed totaled 1,404,000 head, 10 percent more than last year and 22 percent above last month. Marketings totaled 1,586,000 head, 31 percent more than 1975 and 6 percent above last July.

According to USDA's Foreign Agriculture Circular issued Sept. 9, the 1976 USSR total grain crop is currently forecast at 205 million metric tons. This is an increase of 10 million tons above the previous forecast issued August 11 and approximates the official plan level for the year.

The main reason for the 10 million ton in-

crease is the improved outlook for the harvest of spring wheat and barley in the eastern regions of the USSR.

Information available as of Sept. 1 indicates that the State will likely purchase 80-90 million tons of grain from the 1976 crop. Such an amount would be close to the record of 90.5 million tons purchased in 1973.

Anyone interested in planting a wheat variety demonstration should call me, 669-7429. I have some wheat seed of 15 different wheat varieties. Some of these varieties are still experimental and not yet commercially available.

However many of the varieties. I will be glad to assist you in sowing some of these varieties. If you are interested. I would like to put these in fields that border well traveled roads where farmers can observe their progress throughout the growing season. It will only take about two hours to plant 6 or 7 different varieties.

70 Attend Birthday Party

Mrs. Callie Haynes was honored with a party on her 90th birthday Sept 10 at the home of Mr. and Mrs. Frank Rodgers in Amarillo. Co-hostesses for the occasion were Mrs. Robert Barnett of Weatherford, Okla. and Mrs. Christ Keen, Amarillo.

The serving table was covered with a linen cloth embroidered by the honoree and featured garlands of two shades of pink roses. The same two shades of pink was used in the decorating on the two tier birthday cake which served as a centerpiece. Punch, coffee and cake were served by Mrs. Mabel Hoffman of Weatherford, Okla., Mrs. Gladys Smith of McLean and Mrs. LaEuna Caldwell of Amarillo.

Seventy guests registered and many more called or sent cards.

Mr. and Mrs. John B. Rice and Mr. and Mrs. E. J. Windom Jr. have just returned from a trip to Dorado Beach, St. Thomas and old San Juan Puerto Rico.

Nuts For You (But Not Many) . . . Wheat Planting Progresses . . . Sheep, Lambs on Feed Show Increase.

A 60 per cent reduction in the Texas pecan crop for this year is forecast by the Texas Crop and Livestock Reporting Service.

The crop is now estimated at 27,000,000 pounds as of September 1. This compares with 68,000,000 pounds produced last year.

Texas is expected to account for about 25 per cent of the total U.S. pecan production compared with 28 per cent last year.

Nationwide, the pecan crop will be more than half below that of a year ago. A crop of 112,600,000 pounds is estimated; that is 54 per cent under 1975.

TEXAS FARMERS are busy planting and harvesting crops. Wheat planting has progressed rapidly on the Plains and other northern sections of the state.

Further south, cotton harvest is active. Sorghum harvesting is also active on the Low and High Plains.

Rice harvesting is nearly complete.

Corn harvest is active throughout the state and production is estimated at a record 161,000,000 bushels. This is 42 per cent above the previous high set last year.

Yield per harvested acre is expected to reach a record, too, of 115 bushels.

Cotton production for the state this year is 3,130,000 bales, down 8 per cent from the August 1 forecast. This, however, is still 31 per cent more than a year ago.

Yield is estimated at 334 pounds per acre, down 29 pounds from a month ago. It is, however, 41 pounds per acre more than the state average. Harvested acres estimate is unchanged at 4,500,000.

American-Pima cotton for Texas is forecast at 9,200 bales. This is unchanged from last month but is 19 per cent below a year ago. Yield is estimated at 421 pounds per acre which is a whopping increase of 82 per cent compared to 1975.

Peanut harvest in Texas is considerably behind the rate of last year. More than 10 per cent of the crop has been gathered, but a year ago about 25 per cent of the crop had been harvested.

Yield estimates are set at 1,600 pounds per acre, up 5 per cent from last year.

SHEEP AND LAMB FEEDING in Texas is on the increase. Texas drylot sheep feeders with a capacity of 2,000 head or more had 67,000 sheep and lambs on feed for slaughter as of September 1.

This is 8 per cent above the same month a year ago, but is 16 per cent below last month.

Current intentions to market the 67,000 head are: September 35,000; October 24,000; and November 6,000; another 2,000 will be marketed at a later date.

October and November intentions are incomplete since additional lambs could be placed on feed and marketed during those months.

Band Marches In Parade

by Maridale Glass
 Monday, September 20, the McLean Tiger Band marched in the annual Tri-State fair parade in Amarillo. Though most of the band had never street-marched before, the band did a good job. It was totally overcast and cool which made perfect marching weather. The band went to the fair after the parade and stayed until 4:00. They arrived home around 6 o'clock.

Fr. Initiation Next Week

by Dave Jefferson
 Freshman initiation will be held Monday and Tuesday. Monday, freshmen are to wear women's housecoats, house shoes, hair rollers, black front two teeth, and wear hair net. Tuesday, freshmen girls are to dress as male movie stars, and boys are to dress as female movie stars. Freshmen will give an individual cheer before being sold at the slave sale. Freshmen must carry seniors' books during the two days of the initiation.

Students Have Pep Rally

by Teresa Mounce
 Last Friday evening, the McLean students held their pep rally at the practice field at 6. This enabled more people to attend. Miss Jacque Gillispie awarded the spirit stick to the Tiger football team, considering how hard they had worked all that week. Senior Tiger Kirk Merrell and Mr. Smith were the feature speakers. After the pep rally the Tigers left to go to Lefors with several members of the pep club following them out of town. The Tiger caravan, consisting of the pep club bus, band bus, and several people from McLean, left the high school parking lot at 6:45.

Fellowship

Adult Courses Remain Open

Nine courses remain open to students in the Adult Vocational Education program offered by Amarillo College. These classes have been postponed due to low enrollment, according to Clair Mayes, supervisor of AVED, and students will not miss any sessions if they enroll now. Classes that are open in the business secretarial area are business letter writing. This 15-week class will meet Wednesdays from 7 to 10 p.m. beginning Sept. 22 in Room 307 of the Business Occupations Building. A charm and personal development course will be offered in two sessions. Both classes will begin Wednesday, Sept. 22, the first from 1 to

4 p.m. and the other from 6:30 to 9:30 p.m. The course lasts 15 weeks and will meet in the Women's Gym. Commercial gift wrapping will begin Sept. 21 in Room 311 of the Technology Building. The seven-week course will meet Tuesdays from 7 to 10 p.m. A 15-week class in stenograph speed writing will be held Mondays from 7 to 10 p.m. beginning Sept. 20 will meet in Room 310 of the Business Building. Three classes are open in the technical, electronics-shop field. Major appliance repair will be held from 7 to 10 p.m. on Mondays in Room 101 of Building C. The 15-week class

gins Sept. 20. Blueprint reading will be taught Wednesday from 7 to 10 p.m. in Room 108 of the Engineering Building. The course which begins Sept. 22 will continue 15 weeks. A 15-week class in motor control, AC DC fundamentals, will be held Thursdays from 7 to 10 p.m. beginning Sept. 23. This course will be held in Room 115B of Building C at the West campus. Anyone interested in these courses may contact the registrar's office in the Administration Building on the Washington Street campus. Additional information may be obtained by calling Building C.

Southwestern Bell, in accordance
with the rules of the Public Utility
Commission of Texas, hereby gives
notice of the company's intent to im-
plement a new schedule of telephone
rates in Texas effective October 7,
1976.
It is expected that the requested
rate schedule will furnish an 18 per-
cent increase in the company's intra-
state gross revenues.
A complete copy of the new rate
schedule is on file with the Public
Utility Commission at Austin, Texas,
and with each affected municipality,
and is available for inspection in each

Green Potatoes
Aren't For Eating

Steer away from green
potatoes—they may taste
bitter and even be poi-
sonous to some people.

Solanin, an alkaloid
found in the green por-
tions, is responsible for
this. Greening of pota-
toes is caused by ex-
posure to natural or arti-
ficial light. Sometimes
only the skin is affect-
ed, but greening may
penetrate the flesh.

Home gardeners
should discard green pota-
toes harvested from
their gardens. Healthy
homegrown and com-
mercially grown pota-
toes should be stored
in a dark place away
from sunlight or arti-
ficial light to prevent
greening.

Proper storage can
prevent greening and
keep baking potatoes ed-
ible for several months,
and new potatoes for sev-
eral weeks. Don't wash

potatoes before storing.
The dampness increase
the likelihood of decay.
Use any cracked or
bruised potatoes first.

Store potatoes in a
cool (45 to 50 degrees
F., if possible), dark
place with good ven-
tilation. Potatoes stored
at 70 to 80 degrees F.
should be used within a
week or two because this
higher temperature of-
ten causes sprouting and
shriveling.

Consumers should
avoid purchasing badly
sprouted or shriveled
potatoes or potatoes with
irregular or knob-
shaped growths because
they are likely to cause
a good bit of waste.

Irises For Spring
Landscape

The thrifty homeowner
can take steps to get a
jump on the springland-
scape by planting beard-
ed irises now, says Joe
VanZandt, county agent
with the Texas Agricul-
tural Extension Service.

Irises provide a strik-
ing addition to a garden
or landscape with a mini-
mum of care and ex-
pense.

Most types of irises
should be dug up and
split every three to five
years after the first
planting. Rhizomes
(thickened underground
stems) should be separ-
ated and replanted only
if clean and disease free.
Divide healthy rhizomes
with a sharp knife and
replace in the soil.

Plant rhizomes 12 to
18 inches apart to pre-
vent any disease trans-
fer or intertwining
among plants. The best
garden bed for this type
of ornamental plant is a
well drained, richly or-
ganic soil.

Irises need little up-
keep. Trim back foliage
only to remove diseased
material or when trans-
planting, cut back the
foliage about one-third
of its original height.

Water the flower bed
generously every 10 to
14 days and add a ferti-
lizer high in phosphorus
after the plants flower
in the spring.
