NUMBER 27

## Beef Referendum Registration Sets Unexpected High Mark

AUSTIN—Interest in the national beef referendum is running high, according to Agriculture Commissioner Reagan V. Brown, with a total of 46,000 cattle owners across the state registering to vote in the upcoming referendum.

Brown said he felt the large turn-out was in response to calls from industry spokesmen for Texas cattle producers, as the major cattle-producing state in the nation, "to make

their wishes known." "This is a very high registration mark," he commented. "As a result, I feel sure when the final vote is in, we will have a decision accurately depicting a broad base of producers' opinions."

Under the provisions of the referendum to establish a marketplace assessment of cattle, at least one-half of all registered cattle owners in the country must cast a vote concerning the referendum before the results can be validated, while two-thirds of those must favor the referendum for it to pass.

The registration period ended June 17, with voting scheduled between July 5 and July 15.

"Any of those who registered may request an absentee ballot," Brown explained, "which will be mailed by July 5. Ballots must be postmarked by July 15 to be counted."

Brown said he believed the beef check-off system would "provide an opportunity for cattlemen to rebuild confidence in the industry." He reminded producers that they would be able to request and receive reimbursement for the mandatory assessment.

Monies assessed through the program would be earmarked for use by a board composed of producers for research, producer and consumer information and promotion to improve, maintain and develop markets for cattle, beef and beef products.

## Lodge To Have Installation

The McLean Lodge # 8889 will hold an open lodge meeting for installation of officers on July 14 at 7:30 p.m.

The public is invited to attend. Refreshments will be served.

## 4-H'ers Tune Up To Save Fuel

CHICAGO—You don't have to be a fully qualified mechanic to realize that "sick" engines waste fuel. That's one reason young people in the national 4-H petroleum power program are zeroing in on inefficient engines. They know that proper care and operation of tractors and small engines pays off in better performance, fewer repairs and conserved energy.

4-H members 9-19 learn by doing as they maintain and adjust engines and improve their safe and efficient operating skills. Under the supervision of the Cooperative Extension Service, 4-H'ers also develop an understanding and appreciation for the problems of production,

WHEAT HARVEST—Against a backdrop of a clear, summer sky, this combine makes its way through one of Texas wheat fields. The Texas Department of Agriculture estimates this year's crop at some 110 million bushels -- 6.6 million more than harvested last year.

## '77 Wheat Crop Is Predicted To Exceed Last Year's Total

AUSTIN—Increased yields per acre boosted this year's Texas wheat crop over totals for last year, even though some 300,000 fewer acres were in production, according to Agriculture Commissioner Reagan V. Brown.

Total production this year is expected to yield 110 million bushels, according to Texas Crop and Livestock Reporting Service statistics, Brown said. This is 6.6 million more bushels than harvested in 1976 due to the yield increase of three bushels per acre.

Total acreage this year is 4,400,000.

Harvest began in mid-May in South Texas and is now underway in the Southern Low Plains.

"Good rains during April and May provided needed

moisture and allowed remaining dryland stands to reach full maturity," Brown said. "Scattered hail hit the High and Low Plains, but overall crop prospects are excellent."

"If prices for farmers were excellent too, this large crop would surely send Texas over the top in cash receipts," he commented, "but the average price in Texas last month was down to \$2.10 a bushel."

## Sr. Citizens News

The senior citizens will play dominoes on Thursday instead of Friday at their hall on Main Street.

The senior citizens will serve a ham dinner on July 12 at their building on Main street.

## We Need A Pretty Face

Want to see your children featured in our local paper? Well you can! All children, brought by parent or guardian, will be photographed for a feature to be run soon. Simply make your appointment by calling Judy Finley 779-2157.

All photos will be published and there's NO CHARGE or obligation!

This is for all ages and GROUPS too!

If you've been wanting a nice family portrait we can do that for you also--just call the above number.

Only the kids will be published.

## State Campsites To Be Reserved In 17 States

Reservations will be accepted on weekends for campsites at 17 state parks starting June 26 and running through September 4.

Texas Parks and Wildlife Commissioners on June 24 approved a plan for the reservation of 1,624 campsites at 17 state parks scattered about the state.

Department parks director Paul Schlimper said for a \$2 non-refundable reservation fee a site may be reserved for Fridays and Saturdays only and then only for use at a specific park.

Schlimper said the reservation fee was in addition to the usual entrance and facility use fees.

"The reservation system as approved by the Parks and Wildlife Commission," said Schlinger, "is experimental and generally includes those parks with heavy demand for campsites on summer weekends."

"Such a reservation system has become necessary because of increased visitation in state parks during the summer. Visitors to parks drive long distances only to find no campsites available to them when they arrive. A reservation system could prevent them from being turned away and also keep visitation within capacities of the park."

Depending on how the system works it could be expanded to other parks at a later date.

**Has A Point**  
Sign on an out-of-town church bulletin board: "seven days without prayer makes one weak."  
-Times, Dallas.

## Preservation Clinic To Be Held At Senior Citizens Hall

There will be a preservation clinic Thursday, July 14 at 10:00 in the McLean Senior Citizens, Young-at-Heart Club, 112 North Main. The clinic is free and will be conducted by Mrs. Elaine Houston County Extension Agent.

It will feature information on selecting quality fruits and vegetables, canning, freezing, making jelly and pickle making.

We will also be testing pressure canners at the clinic. If you have not had your pressure canner tested in several years it needs to be tested. It will not take long and could mean the difference in whether you have a successful or unsuccessful canning experience. There will be a variety of bulletins and handouts on preservation for those attending. The public is invited to attend.

## Equalization Boards To Meet

The McLean Schools will hold their Board of Equalization meeting on July 12 beginning at 7 p.m.

All interested persons are invited to attend.

The Alanreed School will meet with the oil companies on July 12 at the school house. On July 13 the board will meet with the property owners on July 13.

## McLean Boys Will Help In Fund Drive

A group of McLean boys will be making a cancer drive on July 12. Please have your contribution ready for them.

The boys will have identifications.

## Make Home Canning Safe

Give particular attention to scientifically developed processes for safe home canning, says a food technologist with the Texas Agricultural Extension Service. A food's natural acidity is one factor affecting canning. High-acid foods such as tomatoes can be successfully heat processed in a boiling water bath while string beans (low in acid) must be processed in a pressure canner at high temperature. Natural acid foods have the ability to inhibit or prevent the growth of many microorganisms which produce spoilage and disease.

## Meador Installs Officers At Hedley

Former District Governor Boyd Meador was called on to install new officers at Hedley last Thursday. Lion Don Tarter is president for a second straight year; Lion Meador told the Ladies' night crowd that there are Lions clubs in 149 nations and geographical locations throughout the world. Many of the clubs in Mexico are directly the result of Lions donations, he said. The evening also included singing and an excellent meal.

## Officers Elect New International President

—Joseph M. McLoughlin of Stamford, Connecticut, elected President of the International Association of Lions Clubs at the organization's 60th Annual Convention in New Orleans, Louisiana. The International Association of Lions Clubs is the world's largest service organization with over 14 million members representing 149 nations and geographic areas. President McLoughlin's theme for his year in office is "Internationalism: PEOPLE BRINGING FOR PEOPLE." Representative of the basic philosophy of all Lions, who, as a group, have pledged themselves to meeting the needs of the handicapped, the elderly and the underprivileged in their communities around the world. A member of the Spring-Field, Connecticut Lions Club since 1957, McLoughlin is the president of a lumber company and the president of a real estate development firm.

A new set of rules establishing uniform health requirements for places serving food may soon benefit both the dining public and restaurant owners, according to the Texas Department of Health Resources.

"The proposed rules would give restaurant owners in Texas a standard guide to sanitary practices," said James M. Doughty, Jr., Director of Food and Drug Division for TDHR. "Recent studies have shown that food-borne illnesses and diseases are a health problem. Another purpose of the new rules, therefore is to reduce such outbreaks to protect the consumer from adulterated and insanitary food," Doughty said.

"The Department has been holding a series of public hearings across the state about proposed regulations dealing with food service sanitation," said Doughty.

Each city in Texas establishes health standards by local ordinances for places that serve food. The local ordinances cover food serving operations, the food servers, the serving equipment and utensils the examination of the food and the sanitation of the eating establishment. These local ordinances often differ quite a bit from one city to another. The new proposed rules on food service sanitation would give all the cities the same common set of regulations from which they could draw up their ordinances.

"We have a lot of chain-type restaurants in the state today selling hamburgers, chicken, fish and other things. They can be in one city and then find sanitation requirements for the same kind of eating place totally different in another city. The chains would like to have the rules governing such things as building plans, lighting, ventilation and storage to be the same for the entire state. We hope that the proposed rules on food service

sanitation will make inspections statewide more uniform," said Doughty.

After the public hearing are held, the proposed regulations will be submitted to the Board of Health Resources. If the board approves them, the new rules will become official regulations 90 days later. The proposed measures are patterned after food serving regulations of the Federal Food and Drug Administration.

Under the new food service proposals, whenever an inspection is made of an eating establishment, the findings will be recorded on a special inspection form. The original of the form will be given to the owner and will summarize the new regulations. The various requirements for proper food service sanitation will have different point values. The score of the restaurant will be the number of points accumulated from violations subtracted from 100.

When the score is less than 60, the establishment must begin correcting its violations within 48 hours. One or more reinspections will be conducted at reasonable time intervals to assure that the proper action is being taken.

If an imminent health hazard exists, such as a sewage backup, or the complete lack of sanitization or refrigeration, the restaurant must stop serving food immediately. It can't begin again until authorized to do so by the local health authority. Penalties for violations can be imposed under the Texas Food, Drug and Cosmetic Act.

While the cities are responsible for the sanitation of the places that serve food, the Department of Health Resources is chiefly responsible for the sanitation of the businesses that manufacture food. "The bakery or the bottling company, any place that manufactures food or beverage—that's where we spend our time," said Doughty. "We are also interested in the transportation of food, and in the wholesaler. We concentrate a lot of effort in warehouse inspections, looking into protection of food there."

### CHUCKLE CORNER

"I REVISED MY WORK PROGRAM... NO SUPPER ON WASHDAYS!"

## More Meat for Consumers Is Goal of New Legume Research

By Robert L. Haney  
TAES Science Writer

More pounds of meat for Texas consumers is an ultimate goal of research getting underway with legumes for semi-arid grasslands of the state.

Agronomists and range scientists with the Texas Agricultural Experiment Station have been interested for some time in the possibilities of using nitrogen-producing legumes to boost range and pasture grass production in the state's semi-arid areas.

That interest may soon pay off with answers now that the U.S. Department of Agriculture's Cooperative State Research Service has provided a three-year grant to support such Experiment Station studies. Most of the work will be done at Beeville and Brady, with laboratory research at College Station.

The investigation will try to identify legume plants (native and introduced, and annual and perennial) that can be grown under dryland conditions. Also targeted are moisture and temperature conditions for nitrogen fixation and establishment of legumes in existing grass stands.

One of the researchers, Dr. E. C. Holt of the Texas A&M University Soil and Crop Sciences Department, says the legume's ability to fix nitrogen in the soil is well known to farmers and ranchers. This natural system, along with use of commercial fertilizer, has been standard pasture practice for many years in East Texas, the humid prairie and portions of Central Texas where rainfall is more cooperative.

Besides Holt, other Experiment Station scientists involved in the research are Dr. Marshall Haferkamp of the Range Science Department and Dr. Richard Rominger, crop physiologist with the Experiment Station at Beeville.

Use of legumes and com-

mercial fertilizers on pastures and ranges in Texas' drier regions has been limited because of the lack of adapted varieties, the larger land areas, the scarcity and high cost of fertilizers. And of course, moisture is needed to make chemical fertilizer go into solution to become available to plants.

Such introduced grasses as Klein, Buffel, Bermuda and Blue Panicgrass will increase forage production, but they also may require extra nitrogen for sustained production.

"So a more economical nitrogen source is needed for increasing semi-arid grassland production, not only for native grasslands, but also for introduced grass plantings. Legumes are a potential source of nitrogen which require minimum inputs of energy," Holt says.

He adds that legumes do not necessarily grow at the same time as warm season grasses. Therefore, adapted legumes could increase total forage production, extend the grazing season, improve forage quality and reduce supplemental feed costs.

Growing legumes in semi-arid regions to give grass its nitrogen boost can be done. Fact is, it's being done in Australia and Southern California, and the practice is converting low producing lands into highly productive pastures, Holt says.

The thing to do now in Texas is to develop legumes to fit Texas conditions. And that is the main purpose of the USDA grant. What works for Australia and California probably won't do the job in Texas because of different type soils and growing seasons.

Holt says work will be done with reseeding annual as well as perennial legumes to use in perennial grass stands which predominate in Texas. However, he says results are not expected to be as spectacular as they have been in Australia and California.

"Our native perennial grasses are more productive than those of Australia and California, so the levels of expected increase from introduction of legumes would be less," the agronomist explains.

If the Experiment Station research is successful, West Texas livestockmen may someday see a welcome greening of pastures and ranges through the use of nature's own nitrogen factories — legumes. It will be the cheapest and easiest way to produce more pounds of beef and other meats per acre for consumers.

The U.S. produces about one-half million tons of nails a year. As many as 1,200 different shapes and sizes, according to World Book Encyclopedia.

### Mary Martha Class Has Meeting

The Mary Martha Sunday School class of the First Baptist Church met for their monthly social and meeting in the home of Mrs. Bea Lester on Saturday, June 25.

The opening prayer was offered by Mrs. Howard Williams. Mrs. Lore Barker, president, presided over the meeting and took care of the class business.

The inspiring devotion was brought by Mrs. Louise Dickinson. Mrs. Howard Williams was in charge of the fun and guessing game which were enjoyed by all.

There were no birthday girls for the month of June so the cakes were the compliments of Mrs. Verna Hudgins and Mrs. Bea Lester, the hostesses.

The refreshments were served to Lore Barker, Louise Dickinson, Clara Hupp, Verna Hudgins, Gladys Smith, Lilly Williams, Paul Miller, Lucille Cullis, Essie Howard, Jessa Watson, Ellen Roby and Bea Lester.

## News From ALAN REED

Mr. and Mrs. Willis May of Panhandle held family reunion in their home Friday for her parents, Mr. and Mrs. H. Davis of Alan. Attending were their children, Mr. and Mrs. Gene Heckler of Antonio, Mr. and Mrs. Forrest Brents, and Mrs. John Davis of Amarillo. Grandchildren attending were Betty, Nancy and Leisa Davis, Ross Davis of Amarillo, Dale and Don May of Panhandle. Visiting the W. H. Davis Sunday were Mrs. Corbin of Groom and Mrs. James Breit of Wellington, Mr. and Mrs. Hartley Davis and Mr. and Mrs. Gene Heckler visited Nettie and Mrs. Leeda in Pampa Friday morning.

Visiting in church today was Mr. and Mrs. Terry Phillips and the son of our pastor so visiting in church today was Carl and Polly Harrison was in Pampa on Friday.

Virginia Dalton of McLean and Lena Carter in Clarendon Friday evening to attend Joe Lyn Leather's wife Formway wedding.

Polly Harrison accompanied Mr. and Mrs. Stafford to Amarillo on Saturday where Stafford caught a flight to Liberia. Virginia Dalton and Lena Carter were in Pampa Thursday to take B. Carter to X-ray Highland General Hospital after he suffered a fall.

Mrs. Dale Burch and daughter and granddaughter of White Deer visited the J. A. Hills and at McLean Vera Young Friday. Linda Daniels is visiting in Dumas with her

**TEENS ATTEND 4-H LEADER LAB.** Young leaders from Gray County 4-H clubs participated in the District 1 4-H Teen Leader Lab last week at Clarendon. Site of the three day workshop was Clarendon College. Those attending from Gray County were (left to right): Berklee Brainard; Beth Smitherman, daughter of Mr. and Mrs. Tony Smitherman of McLean; Sally Brainard, and Lisa Adair.

sister and family. Lena Carter accompanied the Jerry Carter's of Pampa to Dallas and other points down state.

### GREENHOUSE VEGETABLE GROWERS MET.

The 14th Annual Texas Greenhouse Vegetable Conference at Texas A&M University, July 17-19- will feature information on the latest production techniques and ideas as well as special presentations on energy conservation directed toward energy self-sufficiency. Producers will also have an opportunity to apply for a private pesticide applicator's license, notes a horticulturist with the Texas Agricultural Extension Service.

### Shamrock Eastern Have Installation

James Reneau and Louise Reneau were installed Saturday, June 11 as Worthy Patron and Worthy Matron of the Shamrock Chapter No. 384, Order of the Eastern Star, in Masonic Lodge Hall.

"God's Universal Children, Many Races and Many Colors" was the theme chosen by the couple.

Installing officers were Grace Hanna, installing officer; Mildred Gierhart, installing marshall, Bonnie Dodson, installing chaplain; June Close, installing organist; Zell Williams, secretary pro-tem.

Officers installed included: Louise Reneau, Worthy Matron; James Reneau, Worthy Patron; Brenda Hofmann, associate matron; Fred Hofmann, associate patron; Virginia Clay, secretary; Vera K. Chaffin, treasurer; Bernice Collinsworth, conductress; Betty Winslett, associate conductress; Kathy Bunch, chaplain; Imogene Rankin, Marshhall; Fran Featherston, Organist; Katherine Palmer, Adah; Ida Gandy, Ruth; Pauline Harrison, Esther; Grace Hanner, Martha; Patty Avant, Electa; Zee Collinsworth, Warden; and John Glasscock, Sentinel.

A reception was held following the installation.

The Eastern Star meets every third Tuesday, once a month.

### Real Problem

A serious impediment to marriage is the difficulty of supporting the government and a wife on one income.

## Registration For Summer Term Is Scheduled

Regular registration for the second summer term will be conducted July 11 in the Amarillo College Union Building on the Washington Street campus. Classes begin July 12.

Surnames beginning with A through D will register from 9 to 9:30 a.m.; E through H from 9:30 to 10 a.m.; I through N from 10 to 10:30 a.m.; O through S from 10:30 to 11 a.m. and T through Z from 11 to 11:30 a.m.

Late registrants may report between 11:30 am and noon, while evening college students may enroll between 7 and 8 p.m.

Various courses in chemistry, economics, English, government history, home economics, humanities, mathematics, microbiology, physical education, physics, psychology, reading sociology and zoology will be offered by the College of Arts and Sciences.

The School of Biomedical Arts and Sciences will offer a course in nursing.

Accounting, chemical technology, computer information systems, electronics, and law enforcement will be offered by the School of Technology.

Late registration and schedule changes may be accomplished until July 14 at the registrar's office in the Administration Building on the Washington Street campus. Complete and detailed schedules of course offerings may be picked up there.

## Antelope Herds Scanned

The annual Panhandle antelope survey has been conducted during June and figures compiled by Texas Parks and Wildlife Department biologists show a stable antelope population.

"A total of 2,059 antelope were counted as aerial transects were flown over nine counties from the northeast to the southwest parts of the Panhandle," said David Dvorak, project wildlife biologist.

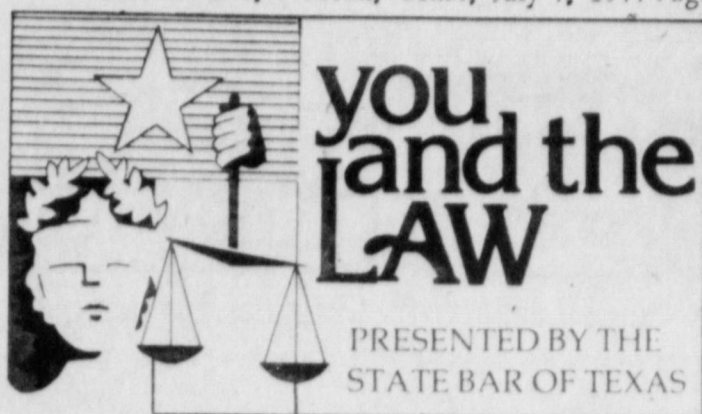

"Most of the range was in excellent condition with plenty of green grass but, the southern part of Oldham county is dry," Dvorak continued.

Upon completion of the survey and final reports are made to Austin headquarters, permits will be designated for ranches with a harvestable surplus of antelope.

Last year, 269 permits were issued and 157 antelope were harvested in the Panhandle.

This survey has been conducted over similar areas since the early 1960's giving P&WD biologists a chance to compare yearly fluctuations of the antelope population in northwest Texas.

Early predictions suggest a seasons similar to 1976 with adequate permits and animals.

**Q: My daughter's been dating a boy for three years. Now she's decided to marry him. Can my daughter get married without my permission?**

**A: A person who is 18 years old or older does not need a parent's consent to marry. If the person is 14-17 years old, the parent's consent is required. In the event the parents are divorced, the parent who was given custody of the child must give permission before the child may marry.**

**Q: My two grandchildren are living with my ex-husband and his wife as the result of a divorce custody suit. The children cry to be with their mother, but the court says, "No". Isn't there anything that can be done to make these children happy?**

**A: The test the courts apply in awarding custody of a child is the child's "best interests". Even though the court earlier refused to award custody of your grandchildren to their mother, she could now ask the court to change the award and give her custody on the basis of "changed circumstances". This requires proving that continued custody of the children with your "ex" and his wife is injurious to the children's welfare, and a change to the mother's custody would be a positive improvement for them.**

**Q: Last weekend I was arrested for felony possession of marijuana. The search warrant stated that I was the owner of the house to be searched. That's not true—it belongs to my parents. Should the police have**

**shown the warrant to my parents before searching the place? In other words, was it an illegal search?**

**A: The constitutional protection against unlawful searches and seizures protects only against unreasonable search and seizure. What's an unreasonable search and seizure? It depends on the circumstance. Generally, the Code of Criminal Procedure says that a search warrant must describe the place to be searched and the item to be seized. It is served on the person who has charge of the place to be searched, after being given notice of the purpose of the search. In your case, your lawyer may want to raise these questions at the proper time.**

**Q: We're planning to sell our home. If we find a buyer who wants to assume our mortgage, instead of arranging for a new mortgage, could our mortgage company come back to us for payment of the mortgage if the buyer can't make the monthly payments?**

**A: Yes, any time you sell your home by having someone assume the balance of your mortgage, the mortgage company retains the right to look to you for the monthly payments if the buyer fails to meet them. To protect yourself in a sale of this type, the contract between you and the buyer should be written to include provisions allowing you to have title to the home returned to you in the event the buyer defaults; then, you would resume responsibility for paying off the mortgage.**

## We Need More Grandpas

- Junior bit the meter man . . .
- Junior hit the cook.
- Junior's anti-social now . . . (according to the book).
- Junior smashed the clock and lamp;
- Junior hacked the tree; (Destructive trends are treated in chapters II and III).
- Junior threw his milk at mom;
- Junior screamed for more; (Notes on self-assertion is found in chapter IV).
- Junior tossed his shoes and socks out into the rain; (Negation, that is normal, disregard the strain.)
- Junior set Dad's shirt on fire, whittled Grandpa's pine. (That's to gain attention-- see page 89).
- Grandpa seized a slipper, and yanked Junior 'cross his knee. (he's read nothing but the Bible since 1893).
- Who spares his rod hates his son, but he who disciplines him diligently," (Prov. 13:24).

## Consumer Scene

### Home Laundry--Or Chemical Engineering?

Doing the laundry was once a relatively simple — though back-breaking — chore. The introduction of the wringer washer and detergents made things easier.

With today's automatic washers and dryers, doing the laundry is a snap, physically. However, with all the laundry additives needed to handle today's synthetics, knits, blends and permanent press fabrics, washday has become more complicated.

To help unconfuse matters, here's a short course in the basics of laundry additives from the Consumers Institute of General Electric and Hotpoint.

**Phosphate Detergents:** The most commonly used laundry additive, detergents based on phosphates, soften the water, reduce redeposition of dirt and emulsify oily and greasy soils. Many detergent makers have been reducing the phosphate content of their products. This may require the use of more detergent to get the same cleaning results as in the past, particularly in hard-water areas.

**Non-Phosphate Detergents:** Powdered non-phosphate detergents use various chemicals as substitutes for phosphates and, in general, do not clean as well. In hard water, powdered detergents containing high levels of sodium carbonate tend to create limestone-like deposits in automatic

washers which can lead to early failures. Unbuilt, non-phosphate liquid products also are available, but do not clean as well as phosphate-based detergents.

**Soap:** It can do a good job in soft water, but only a small percentage of U.S. households are lucky enough to have soft water. In general, soap used in water with even low levels of hardness produces a "curd" which results in cleaning performance that is unsatisfactory to modern homemakers.

**Water Softeners:** They'll improve cleanability, enable you to use soap, or allow the use of less detergent. But they will add to the cost of laundering.

**Pre-Soaks:** These products usually contain enzymes — inanimate chemicals — which help break down certain difficult soils to simplify removal.

**Bleach:** Liquid chlorine bleach is the most widely used, although various dry oxygen bleaches also are available. Chlorine bleach will deactivate enzymes, so should not be added at the same time with enzyme pre-soaks. Oxygen bleaches are compatible with enzyme products. Bleaches remove some soils and stains that enzymes won't, and have the added advantage of disinfecting and deodorizing.

**Fabric Softeners:** Concentrated and diluted types added to the rinse cycle help "relax" and soften fabrics and reduce static electricity that may be generated by tumble drying.

**Pre-Wash Sprays:** Applied directly to clothes before washing, these new additives help loosen ground-in dirt and stubborn stains. They generally contain no enzymes, phosphates or bleach. Use according to manufacturer's instructions.

In short, be aware of the additives you use in your washer and understand their characteristics. Used properly, they can improve your laundering results.

### Melons Good Market Buy

AUSTIN -- Texas watermelon and cantaloupe are one of the best buys on the market right now, according to Agriculture Commissioner Reagan V. Brown.

"Supplies are abundant," Brown explained, "due to transportation problems which have hampered Texas producers from marketing their melons out of state. While we hate to see our farmers shut out of the higher priced out-of-state markets, the Texas consumer can cash in on a good summertime buy."

Brown also said Texas onions were more plentiful than earlier anticipated. "Preliminary estimates indicated that this year's harvest would be very limited, but the crop has come in increasingly strong," he noted.

The Texas Crop and Livestock Reporting Service said needed rains had been falling in the East Texas area, where vegetables had begun to show signs of heat and drought damage.

Reports show other crops making good progress.

**Northwest Harvests Are Not Good**

Texas migrant workers who are thinking of going to the Northwest for the harvests there had better think twice this year.

That is the word from Milton G. Klein, director of the Idaho Department of Health and Welfare.

Klein told Texas Welfare Commissioner Raymond W. Vowell that Idaho is expecting a severe drought this summer.

"This will have a serious effect upon the number of agriculture jobs which will be available in the State of Idaho," said Klein.

"We are already receiving reports that a higher than usual number of migrant laborers are coming to Idaho thinking that work will be available here. Actually, there will be much less work available in Idaho than there is normally."

"I think it is our duty to inform migrant laborers that work is not available in this state to save them the expense of making the trip to Idaho. To do so would simply serve to further deplete the limited resources which many of these people have," Klein concluded.

Vowell said that Texas State Welfare Department staff throughout the state will be notified so they can advise migrant workers on their families who receive Texas Welfare services of the situation in Idaho.

**CONSUMERS NEWS**

Fresh vegetable supplies will increase and prices on many will drop in the next few weeks, according to Mrs. Gwendolyn Clyatt, consumer marketing information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

Her food buying summary for the week includes several budget items.

**FRESH VEGETABLES**-Most economical items include yellow, zucchini and white squash, corn purple hull peas, okra, cucumbers and snap beans. Also, cabbage, green onions, carrots, and potatoes--as well as head lettuce and mustard greens.

**FRESH FRUITS**-Budget buys include oranges, bananas, peaches, plums, cantaloupe and watermelon. Other soft fruits--including nectarines, grapes, apricots and Bing cherries--are available in varying amounts and price ranges, so choose according to the food budget.

**PORK**-Pork prices are trending upward as usual at this time of year, although slab-bacon has economy prices. Frankfurters are good choices in spite of higher prices.

**POULTRY**-Whole turkeys have reasonable prices and turkey parts offer some bargains.

Egg prices are up slightly. The egg market is unsettled, being somewhat affected by high temperatures.

**BEEF**-Check food ads specials on rib and sirloin steaks, chuck cuts, corned beef, stew beef, ground beef and liver.

**CONSUMER WATCHWORDS**: Take advantage of lower prices on less tender beef cuts during the cookout season--make them tender by marinating and/or long, slow cooking.

You can make your hosiery last longer by wearing rubber or light gloves when you put on your nylons if your hands are callused or your nails split.

# NEWS

\*\*\* County \*\*\*  
**Agricultural Agents**  
 Texas A. & M. College  
 Extension Service

Homeowners need to be on the alert for bagworms. I have had several calls recently about severe infestations of bagworms. Some of these heavy infestations can strip a tree very quickly and can cause death of the tree in a year or two.

Control of the bagworms while they are small is much easier and tree damage will be slight. Foliar applications of Sevin, Malathion or Dazinon give good control. Make sure you cover all tree foliage when you spray. If only a few are present, you may prefer to pick them off by hand, just be sure to destroy the bagworms after picking them off. Double check in a few days to insure that you didn't miss any as repeat applications may be needed.

### SICKNESS

I have heard of suspected cases of sleeping sickness in horses in the area recently. As much rain and subsequent mosquito infestations this summer, we can expect additional sleeping sickness in horses unless owners follow a vaccination program.

Horse owners are urged to vaccinate for sleeping sickness or equine encephalitis. Effective vaccines are available but they are effective for only one year, so re-vaccination is needed each year.

Vaccines are available that combine tetanus with Eastern, Western and Venezuelan equine encephalitis. To be protected against the Eastern and Western strains of encephalitis require that two shots are received annually.

**BEEF REFERENDUM**  
 Cattlemen who registered last month for the beef referendum need to vote July 5-15 in the local ASCS office. There were about 150 who registered last month in Gray County.

Fifty percent of those who registered must vote and two thirds of those voting must approve for beef referendum to pass on a nationwide basis.

**SHRUB CULTIVATION**  
 A common misconception deals with keeping shrubbery borders or foundations plantings weed-free by cultivation. There is no advantage in regular cultivation around shrubbery and if anything, this practice can be quite damaging.

Even when carefully digging around established ornamentals such as Zazleas, Boxwood, Taxus, Rhododendrons and Holly, the fine surface roots can be severely injured. Also infrequent cultivation once or twice yearly is not necessary to scratch in fertilizer applications.

To keep weeds down and at the same time keep plants healthy, use an organic mulch such as

grass clippings which will provide other advantages over non-mulched cultivated surfaces.

### HAZARDS OF LARGE ROUND BALS

Large round balers are proving to be a useful addition to many farm and ranch machine sheds. However, operators should be aware of the hazards associated with their use.

Recently, a Texas farmer was injured when he lifted a big round bale too high with his front-end loader and the bale rolled down the arms of the loader onto the driver. In another mishap, a Kentucky farmer did not escape with injuries but was crushed and died from a similar accident. Remember, a round bale weighs from 800 to 1500 pounds.

These tragedies and others might have been prevented through the use of recommended work procedures regarding big round bales.

--When possible, use a rear-mounted bale transport device.

--Keep the load low and the speed slow if a front end loader is used to transport heavy round bales.

--Ballast the rear of the tractor to improve traction and stability when using a front mounted loader.

--Don't raise the bale high enough on a front-end loader to see underneath--the next thing under the bale may be you.

--Watch for bystanders when operating baler gates

--Stay away from moving parts.

--Shut off power before servicing or unclogging machinery.

--Keep all shields and protective guards in place.

--Discharge bales on level ground whenever possible, to prevent rolling.

### TEXAS 4-H CONGRESS

Some 600 Texas 4-H youth will be learning about "Oceans of Opportunity" at the 1977 Texas 4-H Congress, July 19-22, at Corpus Christi. The youth will be learning what the sea is all about--the role that it plays in our livelihood, points out a 4-H and youth specialist with the Texas Agricultural Extension Service. Youth will hear several keynote speakers and will participate in 17 different tours in and around the Corpus Christi area.

### Just Once

Just once we'd like to see a waiter courageous enough to place the check on the table face up.

## McLean Boy Scouts Visit Fort Sill

A group of boy scouts from Troop #425, along with their leader Neal Middleton, visited Ft. Sill, Okla. on June 23 and 24.

Those attending were Spooky Smith, Craig Morris, David Lindsey, Michael Reynolds and Allen Patman.

While there they stayed with the 299th Engineer Bat. The trip included a tour of all Police Operation, Provost Marshall Office, M. P. Station, M.P. Traffic Section and an exhibition by the military police dogs.

The boys received instruction on helicopters, artillery pieces, witnessed firing of artillery and complete tour of old post.

### Vocational Training

More than 17,000 public secondary schools in the Nation now offer vocational training. Most junior and community colleges include vocational courses as well as academic subjects in their curriculum. Formal job preparation is offered also by privately operated business and trade schools, private employers, local unions, and employer associations.

## Former Resident Witness For Christ

Richard Rodgers, son of Netta Pearl Rodgers of Bushland, formerly of Kellerville, has decided to share his Christian witness through rodeo events.

He has been raised on farms and ranches and feels he can identify with cowboys.

Rodgers and Doug Kirk, son of Mrs. Ruth Boles of McLean, plan to team up for Jesus in ministering to rodeo riders.

He plans to work with nonactive Christians as well as non-Christians. "Men who have been ostracized or hurt by their church can be witnessed to and brought back to the church," said Rodgers. "They need their confidence in the church restored."

The idea for a rodeo ministry came through a bull riding challenge from a non-Christian.

"I decided to ride for Jesus," said the evangelist. "I was scared but God was with me."

For his first ride, Rodgers had a special shirt prepared with the inscription "Bullriders Need Jesus 4-15-66 on the back. The date is when he became a Christian."

A graduate of Wayland Baptist College, Rodgers is working on a master's degree in counseling at west Texas State.

The evangelist mentioned pool halls and bars as areas needing Christian witnesses. "If we remember why we were

He puts down three and carries one. What is it?

## Accident Control

When driving in rain, reduce your speed, put your headlights on low beam and allow more room for stopping since water can lift accumulated oil from pavement and cause slick areas says the Texas Agricultural Extension Service.

Solar heat is seldom installed in existing homes because of the prohibitive cost and the weight of solar hardware, reports Sue Young, housing and home furnishings specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

## PUBLIC NOTICE

### CONTRACTORS' NOTICE OF TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for constructing 9.671 miles of Lime Stab. Subgr. ASB & Conc. Pavement from Gray Co. Line to 0.5 Mi. E. of Gray Co. Line from Donley Co. Line to Donley Co. Line, from Gray Co. Line to Gray Co. Line, from 1.0 Mi. W. of Alanreed to Donley Co. Line on Highway No. IH 40, covered by I 40-1 (90) 125 in Donley & Gray County, will be received at the State Department of Highways and Public Transportation, Austin until 9:00 A.M., July 26, 1977 and then publicly opened and read. THIS CONTRACT IS SUBJECT TO THE WORK HOUS ACT OF 1962, PL-87-581 AND IMPLEMENTING REGULATIONS. The State Department of Highways and Public Transportation, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252) and the Regulations of the U. S. Department of Transportation (45 C.F.R., Part 8), issued pursuant to such Act, hereby notifies all bidders that it will affirmatively insure that the contract entered into pursuant to this advertisement will be awarded to the lowest responsible bidder without discrimination on the ground of race, color, or national origin and further that it will affirmatively insure that in any contract entered into pursuant to this advertisement, minority business enterprises will be afforded full opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color or national origin in consideration for an award. Plans and specifications including minimum wage rates as provided by Law are available at the office of T.F. Kelley, Resident Engineer, Pampa, Texas and State Department of Highways and Public Transportation, Austin. Usual rights reserved. 27-2c

## PUBLIC NOTICE

### NOTICE OF BOARD OF EQUALIZATION MEET.

In obedience to an order of the Board of Equalization, regularly convened and sitting, notice is hereby given that said Board of Equalization will be in session at its regular meeting place in the town of Pampa, Texas, Gray County Texas at 9 a.m. beginning on Monday, the 11th day of July, 1977, and from day to day thereafter, for the purpose of determining, fixing and equalizing the value of any and all taxable property situated in Gray County, Texas, until such values have finally been determined for taxable purposes for the year 1977, and any and all persons interested or having business with said Board are hereby notified to be present. Wanda Carter County Clerk Gray County, Texas

## PUBLIC NOTICE

### NOTICE OF BOARD OF EQUALIZATION MEETING FOR THE CITY OF McLEAN

Notice is hereby given that the City Council of the City of McLean will be sitting as the Board of Equalization at its regular meeting place in the City of McLean, Gray County, Texas at 7:00 o'clock p.m., on the 15th day of July, 1977, for the purpose of determining, fixing, and equalizing the value of any and all taxable property situated in the said City of McLean, until such values have finally been determined for taxable purposes for the year 1977, and any and all persons interested, or having business with said Board are hereby notified to be present. Witness my hand this 6th day of July, 1977. Mrs. Stella Lee City Secretary 27-2c

In a recent year more than 14,000 manufacturers, wholesalers, retailers and other establishments were inspected by the Food and Drug Division. About 570,000 pounds of food were ordered withdrawn from the market because they were unfit to be eaten.

In addition to this routine inspection and regulatory program, the Food and Drug Division has a special responsibility in the case of any natural or man-made disaster. Food and Drug inspectors are part of the Texas Department of Health Resources' disaster team to make sure that salvaged foods and drugs are safe for use.

## Irritating Insects Can Be Deadly

Bees, wasps and spiders send many people running. But a small percent of the population should run for their lives, the Texas Medical Association says.

Estimates show about 2% or 3% of the population is hypersensitive to insect stings and bites. The hypersensitive reactions are more serious than the usual pain, itching and swelling around a bite site. Check with a physician if a victim has any reactions other than localized problems. Or if there is a severe local reaction on the face and neck, some doctors recommend administration of drugs to prevent more serious reactions.

Hypersensitive reactions to insect bites can include headache, vomiting, diarrhea, a feeling of heat throughout the body, itching all over the body, breathing difficulty and anaphylactic shock. This last condition can occur in the very small percentage of people hypersensitive to insect venom. It may be fatal. Anaphylactic shock symptoms can include weakness, faintness and pale, cold clammy skin.

Many severe reactions occur within about two weeks after a sting, sometimes hypersensitive reactions hit people who never have had major problems with insect bites previously.

Most reactions to insect bites are caused by ants, bees, wasps, hornets and spiders. However, some people have hypersensitive reactions to lice, flies, bed bugs and other insects. Bees seem to be the most common offender. Bees also have the distinction of being one of the few insects to leave the stinger in the victim. Attached to the stinger is a venom sac that can keep pumping venom into a victim for awhile. The best way to remove the stinger is to gently scrape across it with a fingernail or knife edge or carefully pull it out with tweezers so more venom will not be injected.

Treatment for bee and other insect stings also may include applying cold compresses to slow venom absorption and reduce swelling. Calamine lotion often can relieve itching. Other lotions may be used but victims need to be careful not to apply anything that will further irritate the skin.

The majority of insect bites and stings can be taken care of with such simple treatment but it is important to remember more serious reactions could be a life and death situation if a person does not get immediate medical attention.

Constant talkers are not communicating they are being rude, says Dorothy Taylor, family life education specialist with the Texas Agricultural Extension Service, The Texas A&M University System.
