## TRAIL DUST

By DOUGLAS MEADOR

Life uses the dust over and over again, while some hands would hurry the cycle. The brown pups paid for the crime of being unwanted, thin skulls crushed and a dangling eye; blood frozen on small, brown noses. Cold earth grinds more slowly than the hot stones of summer, thus the chilled wind blows little rivers in soft hair, ere silence and the winter night. Tiny feet pattering on the stairway of eternity seeking a sanctuary of mercy.

While politics are making strange bedfellows, chances are they may be keeping others from sleeping at all.

One of my contemporaries could win for himself some hearty gratitude if he would desist in referring to my newspaper plant as an "ulcer factory."

The true master of any situation will be aware of the power embraced in disciplined silence.

Sometimes I become so confused I don't know the direction the "go getters" went.

The observation is too old to supply any particular service, but Cupid could prevent a vast amount of confusion if he would refrain from hunting on other people's property.

Thrift has a noble purpose but it is not without limitations. The country is filled with tragic examples of people who have saved too long ever again to spend money with satisfaction. The possession of money has defeated its value and they might as well have stones hoarded away. They have become slaves of thrift from which there is but one emancipation, the grave. Prudent spending with a comfortable amount kept intact for eventualities, is the policy of those who would use money as a servant.

# New Water System In Operation

WATER SYSTEM IN OPERATION - Standing from left to right are Potter Bowles of Burkburnett whose Construction Company submitted the low bid on the new water system, Algie Groves, resident project representative for the Water District and L. B. (Bundy) Campbell, member of the Water Board. They were all present Friday, when the water system was set into operation.

The switch was thrown Friday at the City water wells, setting into operation the new automatic water system for Matador. The new water supply line extends from a site eight miles south of Matador and one mile east of Roaring Springs, to the city reservoir in northeast Matador.

The Matador water system dates to 1928, when the city wells replaced private windmill-operated wells at nearly every residence and place of business in town.

Freddie Welling, president of the Water District Board which embraces the area within the Matador City limits, turned the switch to start the water flow into the two ground storage reservoirs. Others present for the occasion were Mayor Kirby Campbell, Algie Groves, L. B. Campbell, Larry Hoyle, Billy Wason, and Ronnie Christian, members of the Water District Board; Johnny (Sonny) Jackson, City Waterworks Superintendent, and W. L. Holt and Tony Gonzalez, maintenance employees. Tribune representatives present were Mrs. Charlie (Mary) Renfro and Mrs. Douglas (Lila) Meador.

The new system gives Matador a supply of 250,000 gallons of available water in the storage tanks and water tower. In addition, there are two other storage tanks, one located at Buzz airport and the other at the well site.

According to Algie Groves, resident project representative for the Water District, 49,250 ft. (9.32 miles) of pipe were laid including 22,850 ft. of 10 inch pipe, 25,960 of 8 inch and 440 of 6 inch.

The two wells at the well site pump 400 gallons per minute per pump, at a depth of 106 feet. Well No. 1 is equipped with 25 HP motor and No. 2 with a 15 HP motor. At the pump station in the same vicinity, two pumps equipped with 60 HP motors, each pump 700 gallons per minute.

An interesting aspect of the operation is that the top of the ground storage tank at the airport is 300 feet higher than the top of the reservoir in Matador. Few people realize that Matador has a lower elevation than its neighbor, Roaring Springs, to the south.

Much of the success of the completed project is due to the efforts of L. B. Campbell, serving as City Consultant to the water board, a spokesman for the city declared. "He gave not only his time, but made several trips to Austin at his own expense to negotiate with the Water Development Board, who had purchased the water bonds when they were voted in May of 1975."

The issuance of \$284,000 in bonds was voted for a new water system after Mayor Kirby Campbell received a letter from the State Health Department, warning that nitrate levels in the water system then in use were slightly over the acceptable mark and could be harmful to infants. In December of 1975, the city received a \$100,000 grant from the Department of Housing and Urban Development (HUD) to be used with the \$284,000 in bonds. The grant had been approved in August, but the following months were required for legal procedures before clearance could be granted.

Bids were accepted May 5, 1977 at a meeting of the Matador Water District and a contract let for construction of the new water line. Of a total of five bids received, low bid was submitted by Potter Bowles Construction of Burkburnett in the amount of \$269,026.01 for the construction of line, pumps, pump station reservoir and other necessary facilities.

Earlier, the Water District had purchased 121 acres for the new well site, from Mance King of Texarkana, Tex., in order to obtain the water rights.

A work order was issued in early August of last year to begin construction on the new water system and the first delivery of pipe arrived August 30. Water Board members earlier had anticipated that the new water system would be in operation by Sept. 1. However, construction was delayed when engineers had to comply with further requirements by HUD, and a new deadline was set for December 1.

The work was completed December 28 and now awaits final approval by the State Health Department, Water Development Board and engineering firm of Biggs-Matthews of Wichita Falls.

Edmond Patton Sheridan was born November 26, 1900 at Stephenville, and came to Motley County as a small child with his parents, the late Mr. and Mrs. John H. Sheridan. He grew to manhood here and was married July 9, 1924 to the former Ethel Jackson, in Roaring Springs. They had made their home here since that time.

## Governor Briscoe Approves Criminal Justice Grant

AUSTIN -- Governor Dolph Briscoe has approved a criminal justice grant for radio equipment in the South Plains Association of Governments region, including the Motley County Sheriff's Office.

The grant, for \$55,982, was among 83 approved statewide by Governor Dolph Briscoe from Law Enforcement Assistance Administration (LEAA) funds under the Crime Control Act of 1976.

From page 1

The following is an excerpt from an article in "Texas Parade" concerning my efforts in the school finance matter: Before the ink had dried on House Bill 1126, Clayton Put Massey in charge of a committee to seek a better way of financing school and local property taxes-cum-state aid. It listened sympathetically to people like Motley County Judge Forrest Campbell who pointed out that people - not acres - pay taxes. You can't land rich and dollar poor. Under HB1126, Campbell said, Harris County residents paid eight-tenths of one percent of their net income toward their LFA. But those of Motley County paid 5.39 percent. On top of that, Harris County's per capita income was twice Motley County's.

"You expect us to pay a seven times greater share of the Local Fund Assignment with only half the income. And we think that is a very unfair arrangement," Campbell said.

The above mentioned inequity was corrected in Senate Bill No. 1 during the 1977 Special Session.

My political philosophy can be stated very simply: We have more Federal Government than we can pay for - and more Federal Bureaucracy than we can stand. Strong, responsible "grass roots" local government is our last line of defense. I have spent nearly all my years here in Motley County. I care very deeply for this land and its people. Your vote and influence will be greatly appreciated. Forrest Campbell.

## Cotton Report

Trading was again moderate this week as growers continue to accept bids on about 25 percent of their offerings. Prices were generally steady with mixed lots containing mostly 32 and shorter staple cotton selling for 43.00 to 44.00 cents per pound. Lots predominating in 33 and longer staples brought 46.00 to 47.00 cents. Growers continued to receive 62.00 to 67.00 dollars per ton for cottonseed at most gin points.

About 31,000 samples were classed at Memphis this week, bringing the season's total to 291,000. The office closed on January 6 last year with a total of 203,000 classed.

Light spotted grades made up 72 percent of the total, while white accounted for 22 percent and spotted grades made up six percent. The predominant grades were 32 with 40 percent and 42 with 28 percent. About two-thirds stapled 32 and one-third stapled 31. Micronaire readings were in the desirable range of 3.5 - 4.9 on 85 percent of the total tested. Nine percent miked 3.4 and lower and six percent miked 5.0 and higher. Average pressley for the week was 83,000 pounds per square inch.

Families give children memories with each generation teaching different traditions, says Dorothy Taylor, family life education specialist with the Texas Agricultural Extension Service.

For instance, today's teens know about puffed cereal, go-carts and jeans - for breakfast, for fun and for fad clothing. Alongside that, older generations can teach them about cornmeal mush, snipe hunting and white socks with penny loafers, she adds.

Make a "healthy" New Year's resolution - to get more exercise, advises Carla Shearer, health education specialist with the Texas Agricultural Service.

Do not cover turbine attic vents during winter months, cautions Glenda Moore, housing and home furnishings specialist with the Texas Agricultural Extension Service.

Movement of attic air is necessary to remove unwanted moisture and prevent damage to insulation, she explains.

Serve cooked foods hot - 140 degrees F. - to prevent food poisoning by Clostridium perfringens, warns Frances Reasonover, foods and nutrition specialist with the Texas Agricultural Extension Service.

**SAVE \$100's EVEN \$1,000's**

We're bargaining beyond our usual good deals on new John Deere 2-W-D Tractors and Combines—through January

Good deals are everyday business at our store. But now through January 31, the deals will be extra big—on 40- to 180-hp tractors and self-propelled combines. How big? \$100's, even \$1,000's bigger. For good reasons. We want to encourage early orders—both on the few models in stock and for models ordered to customer specifications from the tractor and combine factories. Because when you order early, we can figure your trade-in at top value, knowing we'll have it in time to sell before the next work season. Early ordering also helps to substantially raise the amount you'll save, by eliminating the expense of carrying a machine in stock at high interest rates.

Order now—and no finance charges will be imposed from now until March 1 on tractors... from now until the next season of use in our area on combines. So take your choice—

at bigger than usual savings on:

- 40-hp 2040, 50-hp 2240, 60-hp 2440, 70-hp 2640, and 80-hp 2840 Tractors

Psychologists have pointed out that children and grandparents often understand each other better than they do the parents in between. This, they say, is good since young people need to know about the past and how it affected their own families; and older people need to know that their lives mean something to future generations.

**CARD OF THANKS**  
 Words cannot express the deep and heartfelt appreciation for the wonderful and quick action of Roaring Springs and Matador Fire Departments and others who helped put out the fire of our burning house on Wednesday, Dec. 21, 1977. A special thanks to Mr. Meason who passed by our house moments after the fire started and went quickly to summon help.  
 I never in my wildest dreams expected such wonderful help and concern from so many people in our desperate need.  
 Thanks a billion! May God bless each of you for your help and concern.  
 The J. B. Davis Family (1)

**CARD OF THANKS**  
 I want to thank all my friends and relatives who have been so nice to me, those from Matador, Roaring Springs and Lubbock, who have helped so much while I was away and since I've been home. Thanks for the prayers, and cards and for the food brought to us since I have returned home. May God bless each of you.  
 Hattie Marshall (1)
