TRAIL DUST

By
DOUGLAS MEADOR

Spring always reminds me of a beautiful and wholesome young wife who knows a secret so wonderful the world deserves to share it.

Some memories remain too long, and as rocks in a garden retard the growth of subsequent plantings. The impression has been with me since early childhood of an area in Kansas where the land was torn and destroyed in the recovery of shallow coal. Man's greed was there as an epitaph written in the violated soil. It was a naked, hurt land that cried with shame; so many snows have melted, so many springs. Perhaps the grass and flowers have returned to carpet the feet of children playing in the wake of warm rain.

A man who studies figures is not necessarily a mathematician. He may be an engineer attempting to evaluate the danger of curves.

Child psychology can not be applied with any accessory of a safety razor.

It would be a mild satisfaction to know some of the people to whom I may extend pity, are not pitying me.

Destiny assigns each individual one all-important trait which shapes every act and thought throughout a lifetime. It is attitude.

It is ironic that loud talk seldom has any significance.

When the essence of life is simmered low and thick, its sweetness will be governed by the amount of love and faith among the original ingredients.

Coins in the pocket in these days merely indicates that the owner of the pocket may have previously possessed folding money.

Motley County 4-H Food Show Set

Interested 4-H'ers will focus on foods when the Motley County 4-H Food Show gets underway March 27 at the school cafeteria, with 38 youths competing in senior and junior divisions.

Local youths will prepare main dishes, side dishes, breads and desserts or snacks and beverages as they choose one of the four entry classes for competition.

Judging will begin at 10:00 a.m. followed by the awards presentation and tasting tea. The public is invited to attend.

The Motley County Food Show is sponsored by the Texas Agricultural Extension Service, the Texas A&M University System and the Morrison Milling Company, Denton.

PRaise THAT DESCRIBES EFFORTS IS MORE HELPFUL THAN PRAISE THAT DESCRIBES CHARACTER. PSYCHOLOGISTS POINT OUT, WHEN YOU TELL YOUR TEENAGE SON, FOR EXAMPLE, THAT HE'S ALWAYS SO GOOD AND GENEROUS YOU PUT HIM UNDER AN OBLIGATION TO LIVE UP TO THAT ALL THE TIME. **RELAXING** WITH HIM OVER A REFRESHING CUP OF HOT TEA AND A SNACK AFTER CLASS IS A GOOD TIME TO PRAISE HIS LATEST ACCOMPLISHMENT.

Mechanization under the Research and Technology Working Group. Each project area is administered by project coordinators, who are responsible for substantive matters within their area.

Other background information as compiled by the Foreign Agricultural Service (FAS) of USDA and presented by Mr. Cross, states that the primary objectives for the U. S. Side, under the agreement "are to establish a regular exchange of economic information on production, utilization and foreign trade of grains, oilseeds and other major agricultural commodities; to establish contacts with a wide range of Soviet institutions and individuals; to expand the exchange visits of scientists and specialists to study agricultural economics and research and technology and to establish areas for mutual cooperation; and through the exchange of persons on sabbaticals for long-term study in universities and laboratories."

"The life of the Agricultural Agreement is five years from the date of signing," Mr. Cross said. "It will be renewed for five years in June of this year and for successive five-year periods thereafter, unless either side notifies the other of its intent to terminate six months prior to expiration of a five-year period."

In concluding his remarks, Mr. Cross showed slides made in and around Moscow where his team was taken on tours and which illustrated the agricultural progress being made in that section of the USSR. Also shown were several scenes made in London and Copenhagen. The final slide was of the Capitol in Washington, which, Mr. Cross declared "was the best sight of all."

Garden Club Meets

Mrs. J. D. Craven was hostess to the Matador Garden Club for the meeting on Monday, March 20. Mrs. W. W. Clements, president, presided at the business session.

Plans were made to begin spring cleaning and care of the Pioneer Memorial Park. Plans were also made to put new plants in the flower boxes in the downtown area.

Also discussed was the tentative date for a spring flower arrangement display. This date is set for Saturday, April 29, subject to change because of weather conditions.

Mrs. C. D. Garrison acted as program chairman, and the program topic was "Clay Mining Cap." Mrs.

W. F. Jacobs presented a most interesting discussion on the art of making eating and cooking utensils from clay as was done in the primitive times. She displayed a piece of pottery made recently by persons in Pennsylvania who have revived this ancient art. Pictures showing the different steps and techniques were also shown.

Roll call was answered by those present in naming their favorite "Old-Time Craft." Garden Hint for the meeting was to "prepare flower beds."

Present, in addition to those mentioned were: Mesdames Ted Elliott, Edgar Lee, W. N. Pipkin, and Eldred Seigler.

Following the luncheon, Mrs. Genie Bethard called the meeting to order. Mrs. Stella Tilson read the minutes and gave the treasurers report. Mrs. Bethard reported on the Monday night meeting held at the Senior Citizen's building in Roaring Springs. The subject of the meeting was ERA. It was reported that the ERA is using the "Equal pay for equal work" as a cover to get voters for their cause, and that everyone, both men and women, should study all the goals that the ERA is presenting. Members were encouraged to support the Anita Bryant movement.

Human hair provides warmth and protects the skin, out did you know that it is also used to predict the weather? According to The World Book Encyclopedia, meteorologists use a device called a hair hygrometer, which measures relative humidity through the changing length of hair as its absorption of moisture increases or decreases.

CONSUMER FOOD NEWS. COLLEGE STATION -

Grapefruit and root vegetables offer economy prices this week at Texas grocery markets.

Other features include canned tomatoes, tomato products, tuna and corn, reports Mrs. Gwendolyn Clyatt, a consumer marketing information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

Prices and supplies on other items are as follows: FRESH FRUITS - Moderate prices appear on oranges, apples, pears, pineapples, and strawberries.

FRESH VEGETABLES - Root vegetables at low prices include onions, turnips, potatoes, carrots and rutabagas.

Moderate-price vegetables include cabbage, cooking greens and broccoli.

BEEF - Prices are changing, but most are trending upward. A few specials include chuck roasts and steaks, round and sirloin steaks and beef liver.

PORK - Prices continue at higher levels than expected, and specials are scarce. By doing careful comparison shopping, consumers can find reasonable prices on Boston butt roasts, quarterloin cut into chops, loin-end roasts, smoked picnics and some brands of bacon.

POULTRY - Fryer chicken prices are up slightly, and specials are dwindling although some are available on whole birds and mixed parts.

Plentiful egg supplies make omelets an economical dish.

CONSUMER Watchwords: Although ham and lamb are Easter-menu traditions, now turkey is added to the list. For economy, if turkey is this year's choice, buy a large enough bird to provide leftovers. When buying, allow 1 1/2 pounds per serving.

SAVE ENERGY MONEY. COLLEGE STATION -

When oven roasting and baking, practice energy-saving methods, says Dr. Carolyn McKinney, family resource management specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

The specialist suggests several energy saving techniques.

When roasting large items, avoid preheating the oven - it is unnecessary and wastes several minutes of heat.

When baking cakes, pies or cookies, preheat the oven - out have pans ready to go in as soon as the preheat temperature is reached.

Then, resist the temptation to "peek." A 20 per cent heat loss occurs each time the oven door is open.

This wastes energy and also increases baking time. Plan to bake several items requiring the same temperature at the same time.

Then, use "leftover" oven heat to crisp crackers, dry bread crumbs, or warm other food, she adds.

Three good reasons why Glenn Conrad is vitally interested in legislation which affects our schools and teachers

Glenn believes that education is one of the most important problems facing the next session of the Texas legislature. School administrators must be assured of funds to provide quality education for our children, and allocations must be made in advance so that proper planning can be accomplished.

Furthermore, Glenn believes that school financing must come from a more equitable tax structure and that this can be done without an additional burden on property owners.

We need a common-sense, down-to-earth man to represent us in Austin, someone who will stand up for the best interests of all of us. Glenn Conrad is that kind of man. He is working hard to meet and talk with everyone he possibly can in the 66th District, and he'll work just as hard to get the things done you need done in the statehouse.

Deadline To Register Motor Vehicles, April 1

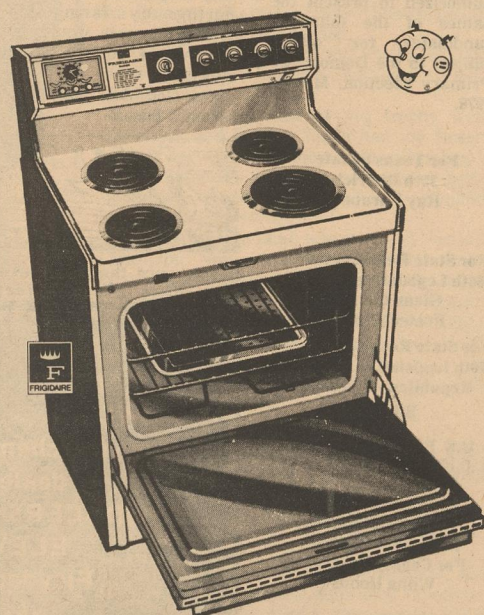

AUSTIN - The April 1 deadline for registering motor vehicles is a Saturday, and many county tax offices will be closed, a state highway official reminds Texans. Whether tax assessor-collectors keep their offices open April 1 is up to them, said director Bob Townsley of the motor vehicle division. Local peace officers may arrest any motorist driving with an expired validation sticker on April 2, Townsley said. The state gets no revenue from fines for driving without a proper license registration, he said.
