

DR. GERALD W. THOMAS

## College dean appointed to NMSU presidency

Dr. Gerald W. Thomas, Dean of Tech's College of Agriculture Sciences, Monday was named President of New Mexico State University.

Thomas, who has headed the university agricultural programs since 1958, will assume his duties August 1.

"Gerald Thomas is one of those rare educators who makes a total commitment of time and talent not only to his students and faculty but to his university and his community," Dr. Grover E. Murray, Tech president, said. "We deeply regret losing him, but I feel a tremendous amount of pride for Texas Tech that the New Mexico State University Board of Regents shares our respect and admiration for Dr. Thomas and has invited him to head the institution."

The College of Agricultural Sciences, one of the original divisions of education at Tech, has made great strides during Thomas' tenure. New courses of instruction at both the undergraduate and graduate level have been added, including the first doctoral program for a non-land grant institution in the state.

"I WANT TO EXPRESS my appreciation to the students and faculty for their tremendous cooperation during my stay at Texas Tech," Dr. Thomas said. "It has been the most pleasant relationship of my career."

"The people of Lubbock and West Texas have been invaluable in assisting us in our agricultural progress over the 12 years I have been associated with the university," Dr. Thomas said. "This environment of close cooperation between the university and the community in this area can, I am certain, lead to further advancement in research and development in the agricultural sciences."

"Too, in the variety of programs in which agricultural sciences have become involved, there has developed a close relationship with the other colleges and departments at Texas Tech. We have achieved a spirit of cooperation that is vital in providing our students a thorough education."

"During my consideration of the presidency at New Mexico State, I visited Dr. Murray several times regarding the position and the future of agricultural sciences at Texas Tech," Thomas said.

"There is no doubt in my mind that Texas Tech will continue to move ahead in all aspects of its agricultural program to serve the people of West Texas and the state. The administration is keenly aware of the university's responsibility of leadership in this area and will continue toward quality development of worthwhile educational programs and research."

MURRAY SAID A committee is being organized to begin an intensive search to fill the deanship vacancy left by Dr. Thomas.

"We will miss Dr. Thomas at Texas Tech, not only because of his academic contributions," Murray said, "but because of his involvement in activities which have helped make our university strong."

Murray cited Thomas' recent work on behalf of the International Center for Arid

and Semi-Arid Land Studies. He is working with officials in Algeria to tie Tech with the North African republic in programs of technical assistance and academic exchange.

This year, Thomas is serving as president of the Southwest Alliance for Latin America, an organization of 13 universities dedicated to improving life in that part of the hemisphere through education and research. He also is serving as chairman of the agricultural committee for the

## Killion elected member of top pro organization

Dean Killion, director of bands at Tech, has received notification of his election to membership in the American Bandmasters Association, top professional band honorary in the U.S.

He was one of five nominees tapped by the fraternity at its annual meeting held at Ohio State University. Candidates, whose names are placed in nomination by a sponsor, are not advised in advance that they are being considered for membership.

ABA was founded in the 1920's by Edwin Franco Goldman, director of the Goldman Band of New York City. Most of its 130 members are U.S. musicians with only one from Britain, Sir Vivian Dunn of the British Marine Band, and two from Canada. John Philip Sousa was a charter member of ABA and its first honorary vice president.

Killion joined the Tech faculty in 1959. Under his leadership the Tech band program has become one of the largest and most diverse in the nation, featuring a marching band, a concert band, varsity and stage bands.

## Filing deadline drawing near in WRC race

Applications for Women's Residence Council elections on Tuesday March 24 can be filed in the housing office through Tuesday, March 7.

Applications for president, vice president, secretary-treasurer and judiciary chairman are available in the dorm offices.

Candidates for president and vice president must be a junior or senior, have had a 2.5 gpa last semester and maintain a 2.0 while in office, and have previously been a member of WRC. Candidates must live in a dorm now and next year.

Secretary-treasurer and judiciary chairman candidates should have previously been on WRC, served as a dorm legislator or been on the dorm advisory council. Grade point requirements are the same as for president and vice president.

## Administration officials file reply to Catalyst court suit

Tech officials Monday filed a reply to the recent Catalyst suit in the U.S. District Court.

They replied they feel they have the right to restrict the sale and distribution of printed matter containing lewd language which has no literary value.

## Senate elections join with speaker choices

Elections for the Student Senate will be Wednesday. There are 68 students running in seven schools for 17 places.

Polls will be in the Union, Ad Building, BA Building, English Building, FL&M Building, and C&ME Building all day and in all dormitory lobbies from 5:30 to 6:30 p.m.

The ballots will also contain a referendum which will allow students to give their opinions on which speakers they would prefer to hear in the 1970-71 University Speakers Series. It will have the names of 12 speakers and 12 special events being considered by the Union.

There are four senators running for reelection — Cameo Jones, A&S; Dennis N. Graham, A&S; Garry Kelly, Graduate

School; and John (O.J.) Simpson, BA. There are 25 students running for five places in the College of Arts and Sciences. They are:

Tommy Kline, Cameo Jones, Lou Ann Adams, David Ammons, Pam Bryan, Cathy Crutchfield, Leslie Ann Daniel, Linda DeMasters, Rob Fairly, Grant R. Foreman, William Goddykoontz, Dennis N. Graham, Rick Hurst, Rob King, Jim Lynch, Mary Ann McMahan.

Liz McNeill, Lera Nettles, Roger Settler, Kathleen Shannon, Sue Smith, Denise Westbrook, Jane Whitfill, Doug Williams and Larry Wharton.

Candidates for the two Senate places in the College of Engineering are Gary Wood, David Barr, Peppy Bratton and Tom Powers.

The Graduate School, which has two vacant seats, has only three students running — Mike Cary, Garry Kelly and Gary Lambert.

The College of Business Administration has 17 students running for four places:

George H. Ellis, John (O.J.) Simpson, Larry Adams, Robin Anderson, Richard Ballenger, Dale Buckner, Robin Cash, Marjorie A. Cope, Elata Ely, Bob Hartley, Jamie Katherine Hough, Joe Kelsey, Randy Raimond, John E. Sample, Cruley Stacy, Chuck Wagborne and Bill Zimmerman.

Candidates for the seat in the College of Agriculture are Bill Price, Steve Rogers and Freddie J. Williams.

Seven students have applied for the two positions in the College of Education:

Patti Crosby, Diane E. Effenberger, Hank Fletcher, Debbie Houghton, Belinda Leftwich, Sherrie Melinder, Susie Miller and Gayle Lane.

Co-eds running for office in the College of Home Economics are Beth Ryan, Janie Barrett, Vicki Boone, Cindy Conway, Molly Gallagher, Sandy Korona, Dian Zimmerman and Diane Range.

The people being considered for the University Speaker Series are:

Julian Bond, Black political leader; Sen. Edward Brooke, Dr. Athelstan Spilhaus, oceanographer and geophysicist; Dr. Mina Rees, mathematician; Dr. Gilbert F. White, geographer; Dr. Frederick E. Smith, zoologist and ecologist; Isaac Asimov, scientist and science-fiction writer.

Abe Fortas, former U.S. Supreme Court Justice; Sir Ederton Richardson, Jamaican ambassador to the U.S.; Walter Orr Roberts, atmospheric researcher; and Dr. Abel Wolman, sanitary engineer.

## Active groups aiding students

# Committee system examined

By MIKE HOGAN  
Staff Writer

No grades for required physical education courses, obtaining matching funds for the National Defense Student Loan Program (NDSL) and bookdrops situated over the campus — these are a few of the student oriented proposals which have emerged from some of the most active university committees.

The Courses and Curricula Committee, responsible for the current proposal to give no grades for required physical education courses, is charged to make just such proposals.

This committee advises and makes recommendations to the Vice President for Academic Affairs on matters relating to courses and curricula. It is composed of five faculty and two student members.

The proposal, introduced by student member Tom Stennis, was sent to Dr. S. M. Kennedy, academic vice president. Kennedy referred the proposal to the Ad Hoc Committee of the Faculty Council. The Ad Hoc Committee is still studying the pass-fail system that the students have been hearing about for over a year, but no action has been taken on it.

THE PHYSICAL education proposal may be doomed also if it remains in the Ad Hoc Committee as long as the pass-fail system has.

Another committee which is looking out for the student is the Student Financial Aid Committee. It is responsible for getting Tech back in full swing with the federal governments program of NDSL. This program is the best one for the student. A student may borrow more money and he has a longer time to pay it back.

"We are exploring ways to get funds to match the federal government's money," said Frank J. Imke, chairman.

THIS COMMITTEE is also looking into the problem that was caused when the Student Financial Aid office did not receive all the money it requested for the College Work Study Program.

Screening applicants for financial aid and recommending policies governing financial assistance to students are a few of their time consuming jobs.

Also working very actively for the benefit of the student is the Library Committee. The most significant proposal to date is recommending that bookdrops be placed over the campus.

By placing bookdrops over the campus, a student would not have to come all the way over to the main library to turn in his books.

If this committee could get some finances, we could have more action instead of proposals. "Because of a lack of funds, we can't do anything," said Janet Waffle, student member.

regulation prohibiting the sale of the printed matter is a reasonable regulation. It does not deprive The Catalyst of any constitutional rights.

The Channing Club, sponsoring organization of The Catalyst, filed suit on Feb. 13. The suit was filed against the Tech Board of Regents for an amount exceeding \$15,000.

The complaint, filed by Catalyst attorney Tom Griffith, deals with the right of Tech Administrators to ban The Catalyst.

The civil action by the Channing Club called for an injunction to restrain Tech administrators from infringing upon the rights of The Catalyst under the First, Sixth, Ninth and Fourteenth Amendments of the U.S. Constitution.

The complaint also asked for an injunction to restrain Tech administrators from making and enforcing order, rules and regulations which infringe upon the rights and freedoms of The

Catalyst under the same amendments.

THE AMENDMENTS listed deal with the freedom of press, rights to speedy trial and knowledge of charges and the abridging of freedoms.

Griffith was contacted and asked what further action The Catalyst has taken. He had no comment. When asked if he had a statement concerning Monday's reply, he said, "No comment."

Defendants listed on the complaint are; the Tech Board of Regents; Retha Martin, chairman of the board; Dr. Grover E. Murray, Tech president; Dr. Glenn E. Barnett, executive vice president; Dr. Owen L. Caskey, vice president of student affairs and Dr. Dale Zinn, chairman of the solicitations committee.

The complaint also stated that all defendants are being sued in both their individual and official capacities.

## Over 700 delegates due for housing convention

By TOM DOWNS  
Staff Writer

Over 700 student delegates from 125 colleges will start arriving today for the National Association of College and University Residence Halls (NACURH) convention.

"They will continue arriving until 12 noon Wednesday, the deadline for registration," said Bill Scott, arrival committee chairman.

Katie Upshaw, convention co-chairman said, "So far our biggest problem has been underestimating the number of delegates. Until about two weeks ago we had planned on about 600 delegates. We now expect about 700."

Tech's main benefit from the convention, besides national publicity, will be from meeting new people and exchanging ideas about mutual problems," she said. "The Mens Residence Council is considering changing its visitation policy. This is one of the main discussion topics of convention."

## Positions open on annual staff

Applications are now being taken for students interested in a position on the La Ventana.

Positions open are that of co-editor, magazine editor and art editor. Applications may be picked up in room 102 of the Journalism Building from 8 a.m. until noon and from 1-5 p.m. daily. Deadline for turning in application is 5 p.m. Monday.

"ANOTHER IMPORTANT area is the elimination of freshman womens dormitories next year. Some schools have already dealt with this problem, so we may be able to anticipate our own difficulties from their mistakes," she said.

"A \$45 registration fee for each delegate will cover the cost of the convention. Any money left over will be sent to the NACURH treasury," Miss Upshaw said.

Dr. Grover E. Murray, Tech president, and state senator H. J. (Doc) Blanchard will begin the convention Wednesday with opening addresses.

Wednesday night at 8:30 Murdough Hall will sponsor a casino and floor show in the Tech Union Ballroom. Packets of play money will be used for the casino games of blackjack, dice and roulette.

A HOOTENANNY featuring Tech talent is scheduled for the delegates at 9:30 Thursday night.

Friday afternoon at 3:00 the Tech Rodeo Association will put on a rodeo for the delegates in Dub Parks Memorial Arena. There will be a barbecue for the delegates after the rodeo in the Livestock Pavilion. The Tech Union will sponsor an all-school western dance that night.

A banquet and dance will close the convention Saturday night. Earl Nightingale, from the internationally syndicated radio show "Our Changing World," will speak at the banquet.

The Women's Residence Council has extended women's dorm hours Wednesday and Thursday nights for the NACURH convention.

Dorm closing hour for both days will be 12:30 a.m.

administration can save money by not having to pay a concert master.

THE ADMISSION and Retention Committee has not made any significant proposals as yet, but it is studying an area admission requirement which affects all students entering Tech for the first time.

"Last year this committee concerned itself with retention policies, but this year we are placing our emphasis on admission requirements," said Dr. W. G. Cain, chairman.

This committee is especially studying admission requirements in regard to transfer students, incoming freshmen and foreign students.

"We will assemble admission requirements from other comparable schools in Texas and in the Southwest and compare them with Tech's," Cain said.

A survey will also be taken among students and faculty to find what changes and what problems they have with admission requirements.

The Admission and Retention Committee, composed of six faculty and three students, is responsible for making such studies and recommending general university-wide policies regarding admission and retention.

# Editorial Vote for fee raise

As much as we hate the thought of it, we students are going to have to shell out more money if we expect to get the services we want.

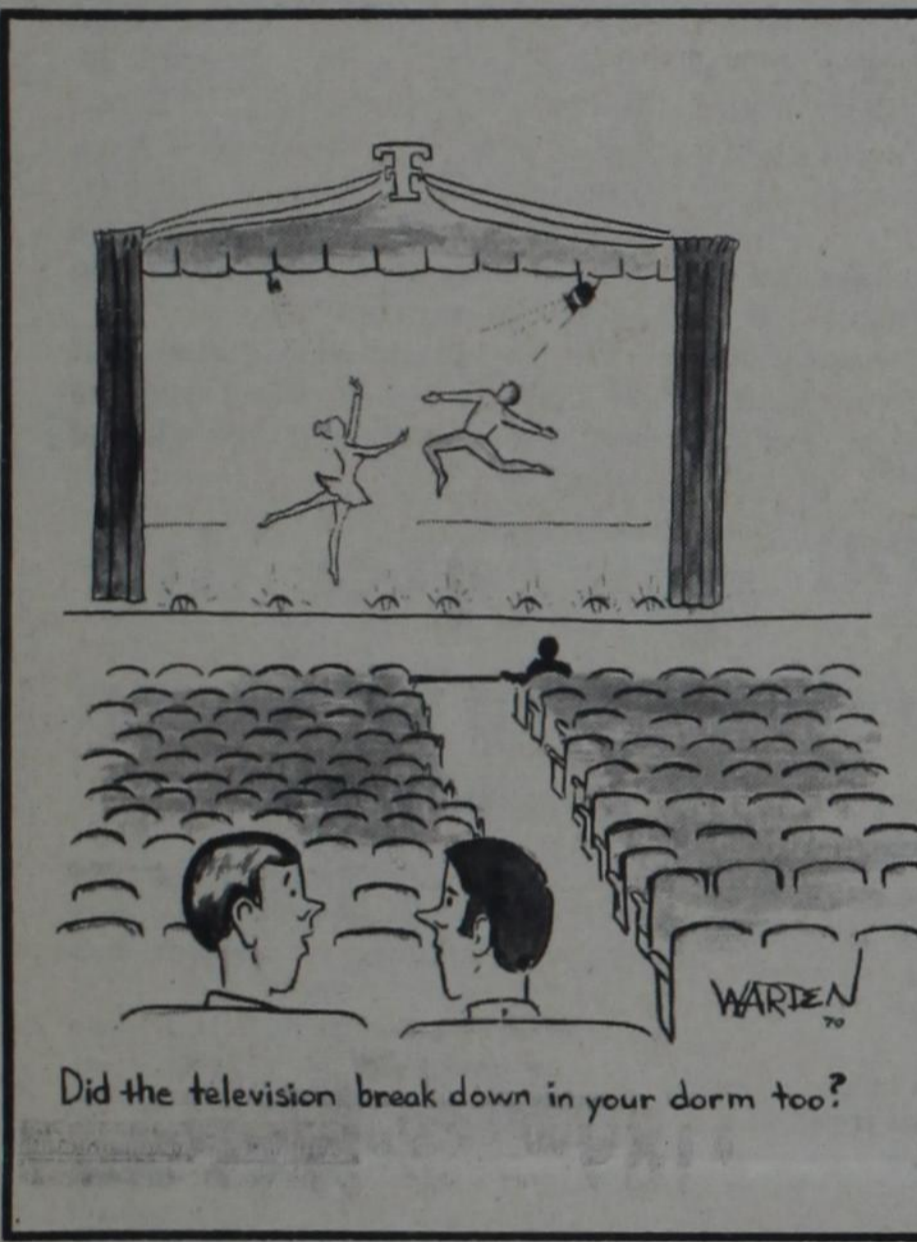

Before we go into a lengthy support of a \$12 raise in student service fees, however, one other suggestion should be presented. Dr. William H. Duvall, assistant dean of student life, proposed student service fees on a pro rata basis for part-time students. Duvall suggested that a student association committee look into the feasibility and desirability of such charges for part-time students.

Duvall's suggestion would call for part-time students to pay the student service fee in an amount proportionate to the number of hours they take. In that state, the fee would be levied on the same basis as the building use fee. The idea has some merit, as a supplement to the \$12 increase which will be up for student body approval Wednesday.

That proposal should gain general support, because it's no trouble for students to look around campus and see areas which desperately need more money.

If intramural facilities are ever to be drastically improved, it's up to students to do the work. More and more, we see the need for a counseling center to aid students in personal problems which may or may not require further medical attention. These indeed are student services. Student money must be available to lay the groundwork for improvement.

Since Wednesday's election will provide students with the opportunity to say whether they intend to pay more money for the services they want, it's appropriate that students shall, on the same ballot, elect many of the people who will be responsible for the spending of that money. The two propositions are inseparable.

# Letters To The Editor Do you women want to wear the pants?

For the life of me I cannot understand why women want to be man's "equal."

Socially they are the goddesses of the pedestal—men open doors for them, men help them with their chairs, men offer their arms to them and aid them when footing is difficult, etc. Why would any woman want to give up all of these things to become the equal of a man?

What is the woman asking for? Does she want to go to the Saturday night poker party, drink beer, smoke cigars and b.s. with

the "boys?" Does she want to be the professional equal of man — what man wants to hold hands with or kiss "one of the boys?"

Why get married? If women are perfectly equal to men then they don't need men, except to have children (but children will be a tremendous burden on the professional and social equality) and you don't have to be married just to have a child. (Try a test tube.)

Does equality say that men no longer have to pay for the whims of the women? Does the woman want to pay her way from now on

or better yet pay for herself and her date — if she has one? Why send her a dozen roses, save yourself \$12, and let her buy them herself if she wants flowers. Why change a tire for a woman; better yet let your date change your tire since she has not paid for her share of the gas.

Why did man not free himself from the shackles of the woman

before now? Why, because woman was put here to be loved and cherished. Man only RESPECTS, not loves, his equal. Why trade in your goddess costume for the costume of man? Do you really want to wear the pants? I sincerely hope not.

Charles E. Burton  
102 Waco

## You've come a long way

Dear Miss Preston (in reply to your letter printed Monday):

Why do women have hours? Because men make the rules. If you find it not to be the best method, then it can be changed.

Why are women intimidated by fashion? Why do they allow themselves to be? No one forces them.

Why do women have to get married? They don't, do they? I have yet to see one who was married at gun-point. For that matter, why do men have to get married?

Why do women have to have children? I can think of no one

## Too late?

I have just returned from fighting my way through wind and sand to the Housing Office to pay my monthly room fee, only to be turned away by one of the Texas Tech's stick-to-the-rules employees.

It was 4:02 when I got there, and the woman was standing at the door. Naturally I waited politely for to come out before I entered. At 4:04 she opened the door, but only a crack, and said, "We close at 4:00." Then she closed the door, looked at me through the glass, locked the door, and held up four fingers.

If Tech students have to live on campus and eat the junk they serve in the dorm, why can't the Housing Office treat us with the respect due any person who can survive dorm food and dorm life? I think they should take a long hard look at Bell Telephone, whose motto is "We may be the only phone company in town, but we try not to act like it."

It's no wonder the apartment managers are doing such good business when we have such excellent diplomats to deal with on the campus.

Cynthia Chandler  
112 Wall Hall

## Referendum is vital

On the ballot in the Senate election to be held on Wednesday, there is a student referendum which is vital to our university and deserves your utmost concern and attention. Its subject is raising the Student Service Fee \$12.00. Through this potential \$216,000, many necessary improvements can be made for our university.

The funds will be allotted specifically for Psychological Counseling, improving the Health Clinic, expanding Intramural Facilities, and expanding the Union Facilities. This is financially the only way these improvements, benefiting all the

students, can be made. You can be assured that these funds will be returned specifically to students through the vast improvements which will be made in these services.

Texas Tech has the lowest fee of any university of a comparable size, and due to its growth and growing needs, the fee must be increased.

Participate responsibly in the Senate election. Show your interest and concern. Student government can only be effective through your interest.

Barbee Anderson  
Arts and Sciences Senator  
307 Weeks

## Legalize abortion

Overpopulation should be the concern of every college student, since ours is the next reproducing generation.

Obviously, the way to curb population is through technological advances in contraceptives. But what about

## Unfriendly?

Last Wednesday night (February 25) while attending the discussion on racial problems on the Tech campus I was appalled at the number of people that said that the student body was so unfriendly. The main reason why I like Tech so much is because I feel it is friendly. When walking around the campus, I smile and speak to everyone, and usually they respond in the same way.

Granted, some of them do stare holes through me, or give me a look like, "You crazy broad"; but, as far as I've seen, these people are in the minority. This campus will be only as friendly as the students make it; so quit the complaining, try a little harder, and smile a lot more often.

every potential mother should have a choice. In Texas, however, there is no choice.

the already pregnant mother? She needs help too, and badly.

We, the members of the Population Awareness Committee of the University of Houston, firmly believe that

If you believe abortion could be a second choice, write to your state legislator. A new bill is being introduced in the legislature later this spring, asking for reforms to current Texas abortion laws. Texas needs reform; there were about 50,000 known illegal abortions in 1969.

While you are writing your legislature, send our U of H committee a postcard, so that we will be able to measure the response.

If you were pregnant, what could you do?

Ronny White

Mark Drumwright

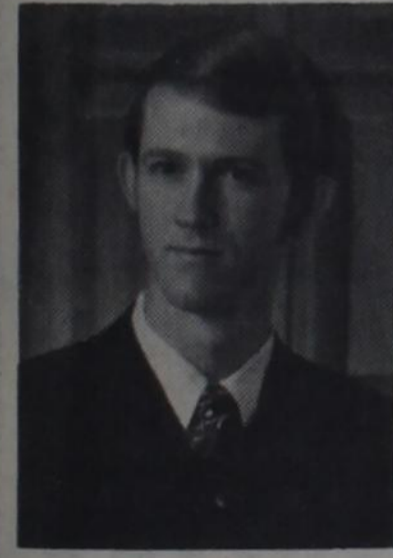

Jerry Haggard

Danny King

Sammy Smith

Terry Cantrell

Ron Merrin

## Agricultural Sciences

### Bill Price

I want to represent the viewpoint of the students in the School of Agriculture. My qualifications are my desire and willingness to work.

My function, as your senator, will be to act as an arm in which your ideas and beliefs could be put into practice, and the needs of our school obtained.

A platform is not needed, but a recognition of the problems that need to be solved, not only in the University, but mainly in the School of Agriculture. These goals for our school can only be obtained through hard work and devotion, which I would do, if I am elected your senator.

### Freddie Williams

I would like to work for the following:

Better facilities for the College of Agriculture.

A Better image for ag students. More ag academic recruiting.

Better agriculture representation.

These are only a few of the ideas that I propose to work for, although work is my main platform. I want to work for the College of Agriculture.

## Arts and Sciences

### Lou Ann Adams

Many times student government becomes so immersed in the intricacies of solving problems, that it neglects to consider situations from the view point of students.

The projects which it chooses to undertake should be in areas which affect the over-all good of the student body.

For example, a long range study on University planning, incorporating such aspects as physical facilities, parking and traffic regulation and the direction of progressive policy for the future; consideration of legal counseling not only for the entire Student Association, but also for

individual students and student groups; the feasibility of setting up a cooperative bookstore operation and direct progress towards building a student union which can effectively accommodate the need of a university community of 19,000 students.

Above all else though, students should be allowed more voice and participation in matters which directly affect them as students on this campus.

### David Ammons

In order to reach its fullest potential, the Student Senate must dedicate itself to the best interests of the students of Tech and to the continual development of the educational environment and facilities of this university. In seeking a position to the senate from the College of Arts and Sciences, I have outlined some of the steps I think should be taken in this direction:

—Large-scale student participation must be included in the establishment of the Western Information Network at Tech.

—Greater responsibility should be delegated to all-campus committees with revised and more fully defined charges.

—Intensified committee work should be instituted by the senate, especially concerning improvement of intramural facilities, the campus parking problem, stadium seating and expansion and the replacement of the expensive and inefficient teacher evaluation program.

—The possibilities of a student representative on the Board of Regents should be explored.

—Union expansion and improvement should receive high priority.

—The senate should act to help strengthen the currently weak Ex-Students' Association and incorporate that organization to a greater extent in academic recruiting.

### Cathy Crutchfield

As a candidate for Arts and Sciences senator, I include the following points in my platform:

More student body involvement in the student government through committees.

Extension of academic recruiting.

Better distribution of student funds to include more student organizations.

Enforcement of Senate attendance rules.

If I am elected as a senator for Arts and Sciences, I propose to get the above done to the best of my ability.

### Leslie Daniel

As a candidate for senator in the College of Arts and Sciences, I hope to bring the student body closer to the Senate by keeping them informed of the actions of the Senate. I also propose the following platform:

A student and faculty representative on the Board of Regents.

Academic Recruiting.

Continuation of athletic recruiting.

Fewer restrictions on men's and women's dormitories.

Optimal meal tickets.

Advance placement for graduating high school seniors.

Abolishment of teacher evaluation.

### Linda Demasters

If elected, I will try to enact legislation concerning a student audit of all financial statements, with no forced residence on campus, improved dorm facilities and optional meal tickets. I will work toward student and faculty representation on the Board of Regents, student involvement in academic recruitment and more student parking with more paved parking areas.

With your support, I will try to accomplish all the goals stated in my platform as a student senator in Arts and Sciences.

### Rob Fairly

One of the most exciting experiences I have enjoyed here at Texas Tech has been the tremendous show of interest and backing of our teams. However, we have another somewhat obscure team that needs our spirit behind them. The people that will compose our student government team will need our support. They will also need the qualities of interest and sincere concern. Both of these I possess.

I feel, as do many people, that there are several problem areas that need to be investigated. Although I have many of the same idealistic proposals all people interested in Tech have, I do feel there are certain overlooked "common" problems. These "common" problems include the student seating at football games and communication between students and administration. There has been a lot of talk and no action.

I propose the bookstore could be operated as a co-op business benefiting the individual student. With these ideas for the solution of "common" problems along with ideas for the solution of long-standing problems such as parking, I pledge to do my best to see that the programs benefiting Tech and its students are carried out. I'm hoping to be YOUR representative in OUR student government.

### William Goodykoontz

It's time for constructive change. It's time for new people, new discussion, and new, meaningful action. I will strive to: (1) create a Council for Ecological Studies of students and faculty; (2) maintain a resident psychologist on campus 24 hours per day; (3) work for curriculum revision, i.e. courses in urban studies, theories of protest, the history of American involvement overseas, etc.; (4) initiate a program of off-campus study much like that at Yale; (5) convert Coleman Hall into a coeducational dorm; (6) hire an attorney for the students; (7) promote free speech anywhere on campus; (8) organize student committees to help devise demanding, up-to-date course material; (9) create a National Affairs Conference of students and faculty; (10) re-create the Texas Tech Free University.

I would hope to bridge the communication gap that now exists on campus; I will represent you and your ideas. Let's work for constructive change; let's create a university.

### Dennis Graham

Having served in the Senate for a year and having been in contact with the problems of students, as individuals and as a whole, I have settled on the following points of action which, if re-elected, I would like to pursue. I am urging a complete revision of the Code of Student Affairs using the code published by the American Bar

Association as a model. This revision would result in giving the students of Tech the same rights as any U.S. citizen (which, in many cases, the students do not have presently). In the same line with student rights, I also support the idea of free legal counsel for any and all students.

I also feel that dorm regulations are long overdue for a change. Such changes as coed visitation and relaxed hours for women's dorms have been initiated on other campuses and should be established at Tech.

Finally, I wish to voice my support of the allocation of part of the student services for improvement of the Union, Intramural, Counseling and Infirmary services. A vote on these issues are on an upcoming ballot and I urge everyone to vote for this change.

### Rick Hurst

I would take it upon myself to decrease the "accountability gap" between the student and his senator by publishing the senators': (1) voting record; (2) stand on issues; and (3) phone number and address in the student directory. Also it would be desirable to have one time per month, in addition to Senate meetings, that the senators would be responsible to their constituency for a question and answer session.

As head of Tech's Academic Recruiting team, I am in an advantageous position to expand this aspect of Senate work. As a member of the Union Leadership Board, I am well aware of the need for Union expansion, and I am well acquainted with its processes so that I can work for this goal.

I feel there is a great need to do ground work on the eventual end of giving more than \$3 of the \$23 student fee directly to the Student Association and thus increase its power.

### Cameo Jones

There has been so much criticism of the present Senate, I'm hesitant to tell you that I'm running for re-election, but I don't agree with all that has been said. I feel that Tech student government is operating efficiently and effectively. I am not blind to its faults, but recognize them and hope to eliminate them.

My main interest in aiding my constituents is in the area of academic reform. I intend to help in following up on plans for non-mandatory class attendance, the pass-fail system, credit-by-examination and optional finals. As soon as the new session starts, I wish to instigate action on my bill for optional finals by circulating petitions in the dorms and in campus organizations. If optional finals were approved by the faculty, you would be able to concentrate on the finals in the courses in which you are weak and not jeopardize your good grades.

As a dorm resident, I am also interested in liberalizing regulations, if not eliminating them altogether.

### Jim Lynch

Student government can attain power at Tech only through a united student effort. There are several items which I consider especially important.

They are: (1.) I will work for a liberalization of the current housing rules including visitation in both men's and women's dorms. (2.) More efficient seating plans in Jones Stadium and Municipal Coliseum. (3.) An effective teacher evaluation program. (4.) An effective pre-registration system. (5.) Expansion of Student Union facilities. I believe student government can make a marked difference at Tech. I ask for your support.

### Liz McNeill

As candidate for Student Senate in the School of Arts and Sciences, I plan to do something about many of the problems on the Tech campus.

To begin with, if I am elected, I plan to have the activities of the student government published regularly. One of the major problems within the student body is the fact that the students are uninformed and therefore have little voice in governmental matters. Hopefully, this program of regular publication will help to relieve the general apathy of many members of the student body.

I feel that Tech has been backward in its failure to have adopted a system of pass-fail on elective courses. This system would enable the student to take an elective course without the risk of lowering his grade average. An elective course without the risk of lowering his grade average.

As a final point, I wish to stress the need for student involvement

in planning academic programs. Each student has individual needs which should be expressed.

In conclusion, I wish to say that if elected, I will do my best to fulfill these aims and work toward the betterment of student government.

### Roger Settler

Roger Settler, candidate for Arts and Sciences senator, proposes as his platform, work in the following areas:

Complete restructuring of the Student Senate. Investigation Committees with mixed Senate and non-Senate members.

Uniform list of student requests should be presented to the Administration each month in writing.

Administration should be taken to court in drastic circumstances, when all means of persuasion have failed.

Student Association president, Faculty Council president should appoint members of All-College Committees.

Complete public audit of all University expenditures.

Increased academic, athletic recruiting of minority groups; seminars and workshops on race relations.

Student and faculty representation on Board of Regents.

Expansion of intramural facilities.

Senate sponsorship of draft counseling.

Begin a student-owned and operated co-op.

Code of Fair Practices for Lubbock businesses, some regulation of apartment rent and property deposit.

Immediate construction of new parking lots.

Optional meal tickets; improvement of dormitories.

No mandatory class attendance; credit by examination; pass-fail in all schools; undergraduate seminars.

### Sue Smith

If elected to the Senate, I would like to see a program started to do serious investigation into allowing dorm residents optional meal tickets. Also in the area of dormitories, I think the Senate could make aware the problems and the true situation of the dorms and work toward updating dorm regulations.

I would also like the opportunity to work toward giving clubs in the area of Arts and Sciences more direct representation to the Senate. I also think Senators from A&S can help their College in getting more speakers to come to the campus whose fields would be of interest to students in the College of A&S.

Another area I am interested in is the parking problem for off-campus students. I would like to see more work done on present facilities and study made into expansion.

### Denise Westbrook

With so many inadequacies, apathy and lack of communication on campus, I have chosen to run for the Student Senate to help alleviate these problems.

In my platform I propose that each senator during his term of office should publish an article in The University Daily concerning his views on student activities.

I think a box should be placed in the senate office, in which students can place questions concerning the workings of the administration. The answers to these questions could be published in The University Daily or a monthly pamphlet.

I believe a pass-fail system should be tried and evaluated by at least one school.

## Raider Roundup

INTERNATIONAL CLUB  
The International Club will have a general meeting in the Blue Room of the Union at 7:30 p.m. today. A movie on Lebanon will be shown. Wednesday there will be a free coffee hour, 2:30-4:30 p.m., in the Blue Room. Dr. Vallahan will play the flute.

IEEE  
IEEE will meet today at 7:30 p.m. in the Architectural Auditorium. Erie Mote, Tech junior, will present a paper.

CHRISTIAN SCIENCE ASSOCIATION  
The Christian Science Association will meet today at 7:15 p.m. in the Anniversary Room of the SUB. All interested persons are invited.

TAU BETA PHI  
The Tau Beta Phi spring smoker will be Sunday at 2 p.m. in the Mesa Room of the SUB.

WOMEN'S LIBERATION GROUP  
The Women's Liberation Group will discuss Lubbock politics Wednesday at 8 p.m. in the Wesley Foundation. The meeting is open to the public.

GERMAN CLUB  
The German Club will meet today in the Mesa Room of the SUB. Robert Goff, Tech senior, will show slides on Germany.

The inadequate facilities in the Health Center, such as the 34 beds to accommodate 20,000 students, should be increased to meet the conditions.

Money must be appropriated for the expansion of Union recreation and meeting rooms. Dorm hours should be abolished and left to the discretion of the students.

Additional seating for students should be constructed in Jones Stadium. A system should be devised, whereas students could purchase meal tickets individually, if they desire.

I believe a computerized pre-registration program should be put into effect by Spring 1971.

### Larry Wharton

Probably one of the largest underlying problems here at Tech is the stable and even declining enrollment of undergraduates. Because of this, the academic recruiting must be strengthened. I am presently in charge of recruiting in the Lubbock area for the Senate.

Through recruiting long range problems will be solved. One of these solutions will be the abolition of mandatory residence. Also, there will, of course, be more money, for expansion.

With past experience in freshman council as president pro-tem, and attendance of Senate meetings, I was able to determine some problems and possible solutions here at Tech.

### Jane Whitfill

I am in favor of promoting the academic recruiting program at Tech. We must draw new students with high scholastic averages. If we would expand our program and make Tech more attractive academic-wise, the level of the entire system would go higher.

I also feel that the Tech Bookstore should be run more

like a cooperative, with wholesale prices. I do not believe that a state-supported school should receive money from the profits of our bookstore.

Other areas of controversy in which I am interested are the pass-fail system, the increasing parking problem and the issue concerning optional meal tickets.

### Doug Williams

I believe that the residence hall system is the largest single detriment there is to Tech. As I have been deeply involved in residence hall government for the past two years, I feel that I will be able to carry further proposals I have been working on: women's visitation in men's dorms and optional hours with parental permission in women's dorms.

I believe that a pass-fail system could be successfully implemented at Tech and would be beneficial to the student body.

Our administration receives a rather large amount of money from vending machine companies that the students support. At most universities this money is returned to the students rather than to the administration. I feel the students at Tech should receive the return on the vending machines that they support.

Because I feel that experience is of major importance in a candidate's qualifications, I would like to cite the positions I have held in the past or am presently holding at Texas Tech: president, Men's Residence Council, 69-70; president, Coleman Men's Hall, 68-69; chairman, Residence Hall Commission, 69-70; vice-president, Honors Council, 70-71; Advisory Council for Student Affairs, 70; Student Association President's Cabinet, 69-70; ex-officio student senator, 69-70.

# Gerald Meyers joins cage staff

Gerald Meyers, head basketball coach at Houston Baptist College and a former Red Raider cage star, has been named assistant varsity coach and head freshman coach at Tech, Athletic Director J.T. King announced Monday.

King said the appointment was made upon the recommendation of Bob Bass, head basketball coach. Meyers, an All-Southwest Conference basketball guard who starred for Tech from 1957-59, will assume his duties immediately.

"We feel Gerald will be a definite asset to our basketball program and Texas Tech University," Bass said. "He has already proven himself to be an excellent basketball coach in high school and at the college level. Gerald will be on the job immediately to help us in our critical recruiting period."

Before taking his present position at Houston Baptist, Meyers was head coach at Monterey High School in Lubbock

where he set an eight-year record as the city's winningest cage coach. His teams compiled a record of 150 wins against only 50 losses and were in the state finals in 1962 and 1965. His record at the young Houston school the past three years was 32-43.

"I'm certainly looking forward to working with a fine coach like Bob Bass," Meyers said. "It's also nice to be returning home to Texas Tech and Lubbock."

Meyers was Tech's first All-Southwest Conference performer in any sport. He was named to the United Press Little Man All-America first team and was an All-NCAA District Six selection. Meyers also was ranked second nationally in free throw shooting for the 1957-58 season.

Meyers, a native of Borger, was known as an outstanding defensive performer and ball hawk during his playing days at Tech.

CHRIS SCHACHT

# Diver undefeated in season play

By MIKE McMAHAN Sports Staff

Chris Schacht is a determined man. Overcoming an injury from last year, he is now the only undefeated diver in Southwest Conference swimming competition.

Schacht has a winning streak of 15 meets going into the SWC championships next week in Dallas. This streak includes a victory in the SMU meet over supposedly the best in the conference in Cal Locke, who has been a friend of Schacht's the past four years.

Schacht hails from Irving, Tex. which is a suburb of Dallas. He was one of three outstanding high school divers in the Dallas-Fort Worth area with the other two being Locke and Mike Malone.

**THE THREE BECAME** good friends and faced each other constantly in diving meets. The trio was broken up, however when Malone was killed in an auto accident in Fort Worth two years ago.

As Schacht's high school had no organized swimming team he had to get coaching from former SMU champ Ron Smith. Smith was instrumental in shaping Schacht's style, a style which most SWC divers use today.

Chris started his diving at the age of 13 which is considered late among many coaches, but because of his excellent instruction he became one of the top schoolboy divers in the state.

In a two year span he finished second and third in the Texas Invitational Swim Meet. Both years he finished behind Locke. It was in the second meet Head Swimming Coach Jim McNally offered Schacht a scholarship at Tech.

"I HAD SEEN CHRIS several times," said McNally, "and was quite impressed with him." In his senior year, the Texas

Invitational was held in Lubbock and after the meet I asked him to come to Tech."

"We have good diving facilities here at Tech," said McNally and that was probably one of the reasons Chris decided to come." Tech has a deep diving area of fourteen feet which looks good to any diver who can dive without fear of having to pull out of it too soon.

As a freshman Schacht was the number two diver behind Bill Jones who graduated last year. Schacht injured his back late in the season and was barely strong enough to compete in the SWC championship. He finished fourth and seventh which was way off his usual standards. Nevertheless, McNally sent him to the NCAA championships with Jones. "The experience that Chris got in the national event helped him a lot with this season," said McNally.

**LAST SUMMER SCHACHT** went to a national diving school conducted in Braeder, Fla. by Don Kimbele former NCAA champ for Michigan. By the time this year's swimming season had begun Schacht had coaching from two of the best divers in the country, and competed in the NCAA championships, quite a list of accomplishments for a diver starting his sophomore year.

"Chris works harder than anyone I have ever seen," said McNally. He works out for hours every day, even when the rest of the team has finished workouts. His work has proved worthwhile as he has gone undefeated this year against some of the better divers around. He has got to be the favorite in the conference meet next week."

After the meet the season will be over for most of the swimmers but not for Schacht as the NCAA championships will again be coming up, and after that back to Florida for more coaching.

Diving lasts all year for Chris Schacht.

# Techsans to face Baylor and Texas in first of six SWC meets Saturday

The Tech tracksters will be preparing the rest of the week for their first Southwest Conference meet to be here in Lubbock Saturday afternoon.

The meet will be the first of a series of six track meet dates set aside for SWC competition only. In the meet Saturday Tech will face Baylor and Texas in a triangular meet. Other SWC action will take place in Dallas

and College Station in similar triangular competition.

The Techsans just returned from Laredo Sunday after competing in the Border Olympics, where Texas A&M took top honors scoring 69½ points. Texas was second with 52½. Strong winds and incliment weather made the times and efforts look like something out of a high school meet. Tech was able

to take only one first in the meet with freshman Ken Ford taking the honors in the broad jump.

Ford's jump measured 21 feet 10½ inches which was more than a foot better than anyone else. The broad jumpers were running directly into a 45 mile an hour wind during the competition.

"The weather was rough on all of our boys," said Head Track Coach Vernon Hilliard. "Our pole vaulters could hardly get off the ground because of the winds."

The Raiders will face stiff competition in both the Texas and Baylor squads as they both have several top competitors in the conference especially Texas. For Texas Dave Morton native of Cohoma will be hard to beat in the quarter mile. Morton is the defending SWC champ in the event. Another SWC champ for the Longhorns will be Mike Mosley who is the defending champion in the half mile.

The Bears have Peter Morales returning who is currently the SWC record holder in the three mile. Morales' record time is 14.08.

"We'll have a tough time with both teams," said Hilliard. "Our team is composed of mostly juniors and sophomores and freshmen and for some this is their first season competing for us. We need experience under pressure badly."

Hilliard said the events to watch out for would be the hurdles, sprint relay, broad jump, and the pole vault. "We have a good chance to take these events," said Hilliard. In Laredo we were very close in the sprint relay and without the wind we could have been tough in the pole vault."

Hilliard had another comment to say on the meet also, "This is our first big meet of the year. As in football and basketball, track also needs the student support. I would deeply appreciate a fine student showing at the meet, and it would help our boys' spirit tremendously."

# Techsans break even on baseball road series

Tech baseballers, just off a six game road trip that saw them break even with the competition, are beginning preparation for their first home stand this weekend against the University of Texas at E. Paso.

The Raiders won their first game of the trip 15-10 over Hardin-Simmons and then dropped a 3-0 decision to Pan American before coming back to record 4-2 and 6-4 victories over the same club.

Pan Am knocked off Tech in the final two contests 6-4 and 6-0 to even the Raider ledger at 3-3. Two other games were scheduled for the trip, with Trinity University and St. Mary's, but both games were rained out.

"WE LOOKED pretty good on the road," Kal Segrist, Tech baseball coach said, "especially considering all the injuries and sick players we had."

Before the Raiders even left town two starters from last year's club were unable to make the trip due to injuries sustained in practice.

Regular right fielder Don McKee and third baseman Johnny Owens will both probably be out

another week Segrist said. McKee injured a leg and Owens is out with a collar bone fracture.

**JERRY BALLARD**, who replaced Owens at third, was spiked on the arm in the third game of the series and was out for the remainder of the trip. Ballard had to have 20 stitches in the arm and is also a doubtful starter for the UTEP games.

Catcher Max Martin and center fielder Randy Walker also missed contests against Pan American. Martin received a cut between his eyes when he struck a pole while chasing a foul ball and Walker came down with a severe sore throat.

"We tried several different things with the lineup since people were hurt and I did a little experimenting to see how the hitting would be affected," Segrist said.

"We got some good relief pitching from Mike Muschalek, Bob Guerin and Gilbert Vasquez." Muschalek was the winning pitcher in the first two games played but was tagged for the loss in the last Pan Am contest.
