Tech Sets Record With Big Enrollment

FIRST ENROLLMENT IN TECH SETS RECORD FOR COLLEGES AS NUMBER APPROACHES 800 MARK

COLLEGE OF LIBERAL ARTS IS GIVEN PREFERENCE BY STUDENTS; BOYS COMPRISE 75 PER CENT OF ENROLLMENT

The enrollment in the Texas Technological College has broken all records for enrollments for the first year in the history of educational institutions in the South early in the week, and according to the last report given out by the Registrar, E. L. Dohoney, early today the number had climbed to 770, with a few "stragglers" still coming in. This number has been a surprise to many, but is in keeping with the prediction made by Dr. Horn a year ago that somewhere between 500 and 1,000 students would be enrolled in the Tech ready for the first year of work.

According to the records in Mr. Dohoney's office, the College of Liberal Arts is leading the others by a substantial number, with the College of Engineering second; Home Economics third, and Agriculture fourth. This is surprising in view of the fact that approximately seventy-five per cent of the enrollment is made up of boys, which is believed to be one of the most unusual conditions ever existing in a Panhandle-Plains institution of learning, and which is a good indication that the public in general is not yet acquainted with the field of work covered by the Texas Tech.

Visiting speakers throughout the week have commented upon the unusually large enrollment and have elaborated in their praise of the start the institution has received, and have predicted an increasing enrollment each year.

Amon G. Carter of the Star-Telegram, Chairman of the Board of Directors, stated in an address before the Chamber of Commerce luncheon in Lubbock Wednesday that "no college in the United States at the opening has shown such a great enrollment as the Tech," adding that with the vast domain it has to serve, 30,000 students would be accommodated in the future.

D. A. Shirley, Registrar of the West Texas State Teachers College at Canyon, attended the first student assembly here Thursday and expressed his belief that the enrollment would reach the 1,000 mark within the next week, basing his remarks upon conditions true to the Teachers College, and this section.

According to Registrar Dohoney, students have enrolled from the states of Oklahoma, New Mexico, California, Indiana, Georgia, and one from Old Mexico. The state of Texas is represented from as far south as San Antonio and Houston, and as far east as Palestine. The fact that the Texas Tech is the only school of its nature in the Southwest probably accounts for many of the out-of-the-state students, while some have been attracted by climatic conditions.

College transfers not only come from state institutions, but many have been transferred from other states. These college transfers number about 200 and will comprise the sophomore class.

Classes have been met since Thursday and class work is already under way in some courses, while assignments have been made in others. A great deal of time will be required to eliminate conflicts and permit the students to become acquainted with their work. In the meantime matriculation duties continue and many members of the faculty have been well employed with these duties alone. By the latter part of next week everything will be running smoothly and the great educational training of the Texas Tech will be well under way.

MILITARY SCIENCE ATTRACTIVE TO BOYS

Lieut. Hugh Killen, instructor in Military Science, states that he expects at least 100 cadets out by the first of next week to take advantage of this branch of training which is being offered in the Tech. The exact number who have reported is not known, but much enthusiasm is being created in this form of physical education and the fact that the uniform is conservative is making this course very attractive.

The cadet uniforms have been selected and Lieut. Killen was busy Friday afternoon making measurements for the orders of made-to-measure uniforms which will be ordered immediately. The clothing is specified and the cadets have been cautioned against buying anything without the approval of the instructor.

The first drill will be held Friday afternoon at 4:00 o'clock and will be repeated three hours per week.

College Band Is Introduced At Grid Battle Here Today

The College band consisting of about twenty members, under the direction of Professor Wagborne, instructor of music of the college, made its initial bow to the public this afternoon at the football game where it urged the warriors on to battle to the time of stirring tunes. Despite the fact that the band had had only two rehearsals before its appearance, it made a very commendable presentation, and it was very evident that it is a splendid organization in the making.

With about fifteen musicians present Mr. Wagborne went through the first rehearsal in the music room of the Administration Building Thursday afternoon. Another meeting was held last night at which eighteen were present for the rehearsal preparatory to the debut today.

According to Professor Wagborne, there is at the present time prospects for a fifty or sixty piece college band and as soon as matriculation is over and these musicians can be assembled, the body will be organized. It is very probable that enough of this member will be from the military unit that a military band can also be organized.

As yet there has been no fund raised for the purchasing of uniforms, but it is understood that Mr. Wagborne has a plan in mind whereby the finance can be secured, in part at least. When the plan is made public it is expected that it will be liberally supported by the student body since uniforms are an essential equipment for the band.

The professor has requested that all students who have school songs, whether original or songs from which suggestions can be obtained, to submit same to him at the earliest date convenient.

PROMINENT MEN ADDRESS CROWDS FORMAL OPENING

THREE NAMES ADDED TO CORNERSTONE AT CEREMONY

The formal opening of the Texas Technological college was held Wednesday afternoon at four o'clock in front of the Administration Building, and was a pronounced success from every point of view. The affair was much more than a formal ceremony in that it was an impressive revelation of the wonderful future of the institution, as pointed out by men who are prominent in the affairs of Texas.

Amon G. Carter acting as chairman, opened the program with a short address in which he discussed the college in general, laying stress to the laying of the cornerstone in December, and stated that there was an audience of 8,000 at that time. After a brief discussion of the possibilities of the school, he introduced Dean J. M. Gordon who offered a prayer.

Upon being introduced as the next speaker, Adjutant General Mark McGee addressed the people in behalf of Governor Miriam A. Ferguson, stating that he was authorized to say in behalf of the faculty, college officials and other prominent men associated with the institution. The invocation was given by the Rev. Grandbury, after which Dr. Horn introduced the first speaker, Dr. J. A. Hill, referring to him as a co-worker and neighbor.

By way of introduction to his address, Dr. Hill recounted the great amount of time and money spent to make the Tech a reality, stating that a greater appropriation had been made for it in its initial session than any institution in the entire state. The four fundamental principles of the modern college were outlined by the speaker as follows: First, to assist in every way possible the choice of vocations for the students; second, to help the student in the proper use of leisure time, both in college work and in every day life; third, training the youth in the proper control of physical appetites; fourth, to create in the youth a safe interpretation of life and religion. These were discussed in Dr. Hill's usual conservative manner.

Dr. Evans, the second speaker, stated that education, and especially a technological education, was a prerequisite to the carrying on of the commerce of the world, and cited two illustrations to prove the assertion. He expressed great elation over the number that has been enrolled in the col-

Pep Squad Gets Hot When Matadors Battle Indians

"Fite, Tech, Fite!" "Fite, Tech, Fite!" rang out across the gridiron this afternoon from the Tech rooting stands, where J. D. Carroll, Yell Leader, was putting his seven hundred lusty lunged cohorts through every act to be found in the "Rah, Rah" book. Not only did the rooting section yell long and loud, but it went wild, hilariously, literally charging the atmosphere with the "Old School Spirit." Even the most celebrated Matadors of Spain itself never received a more hearty ovation than did our own "Bull Fighters," the wearers of the Scarlet and Black, when they trotted on the field for the first time this afternoon.

One of those "Shirt Tail Parades" has been planned, and will probably be pulled tonight, and in case three or four hundred fellows come dashing madly through the business section whooping and yelling and with part of their garments disarranged, the natives need not be alarmed.

The first cheer to come from the student body of the Tech was led by Coach Freeland at the first student assembly Thursday morning, when at this time called a pep meeting for Thursday night. This meeting, which was held from the platform erected in front of the Administration building, was sponsored by a committee composed of Dr. Jackson, Dr. Stangel and Miss Gilkerson, and enthusiastic talks were made by President Horn and Coach Freeland.

At another rally last night a number of yells and songs were learned and tryouts were made for a yell leader. The honor was conferred on J. D. (Slim) Carroll, of Cisco.

FIRST ASSEMBLY OF STUDENTS IS WELL ATTENDED

COLLEGE PRESIDENTS SPEAK BRIGHT FUTURE FOR TECH

The first assembly of the student body of the Texas Tech was held at 10:00 o'clock Thursday morning, with a good representation of the more than 700 students then enrolled present. This first gathering of the students was addressed by Dr. W. M. W. Spalwn, president of the University of Texas; President J. A. Hill of the West Texas State Teachers College at Canyon, and Dr. C. E. Evans, president of the State Teachers College at San Marcos, brother of Prof. Evans of the Tech faculty, all of whom spoke of the unusually large enrollment and the bright future of the institution.

The student and visitors assembled around the improvised platform erected in front of the massive administration building, but due to threatening weather were forced to resort to the cloisters on the south side of the building.

Dr. Horn was in charge of the meeting and was accompanied to the platform by the visiting speakers, members of the faculty, college officials and other prominent men associated with the institution. The invocation was given by the Rev. Grandbury, after which Dr. Horn introduced the first speaker, Dr. J. A. Hill, referring to him as a co-worker and neighbor.

By way of introduction to his address, Dr. Hill recounted the great amount of time and money spent to make the Tech a reality, stating that a greater appropriation had been made for it in its initial session than any institution in the entire state. The four fundamental principles of the modern college were outlined by the speaker as follows: First, to assist in every way possible the choice of vocations for the students; second, to help the student in the proper use of leisure time, both in college work and in every day life; third, training the youth in the proper control of physical appetites; fourth, to create in the youth a safe interpretation of life and religion. These were discussed in Dr. Hill's usual conservative manner.

Dr. Evans, the second speaker, stated that education, and especially a technological education, was a prerequisite to the carrying on of the commerce of the world, and cited two illustrations to prove the assertion. He expressed great elation over the number that has been enrolled in the col-

FINAL WHISTLE CHEATS TECH MATADORS OUT OF BRILLIANT FIELD GOAL FROM 30 YARD LINE

CROWDS ATTENDING FIRST GAME ON MATADOR SCHEDULE ESTIMATED AT 10,000; INTEREST IS INTENSE

The select men of the 137 who reported to Coach Freeland's camp two weeks ago were seen in action on the gridiron at the Fair grounds this afternoon, and the first chapter was written in the great history of the Matadors when these wearers of the scarlet and black held the Indians from McMurry college, Abilene, to a scoreless tie. The final whistle came at an inopportune time for the Matadors and cheated them out of a pretty field goal from the toe of Archibald, after a spirited battle for supremacy of the grid.

The fighting Matadors put up a stone wall of defense and the line was practically impenetrable. Although they appeared weakest on the offensive, they gained 222 yards against 96 by the Indians, proving themselves masters of the game. They met with little success in passing, but showed improvement in their aerial attacks in the last half of the game. Individuality seemed to be absent from the players and every man who had the privilege of representing the Tech in this first game proved himself worthy of the honor.

Intense interest was shown on the sidelines and the crowds estimated at 10,000, were often brought to their feet when brilliant gains were made by either team. Bright scarlet and black banners marked the bleachers occupied by the Tech rooters, and much pep demonstrated throughout the game. President Horn occupied a seat with the pep squad.

Following is the game play by play:

RUTH STANGEL IS FIRST CHILD BORN AT TECH

Baby Ruth, two-weeks-old daughter of Mr. and Mrs. W. L. Stangel, has the distinction of being the first child born in Lubbock to parents associated with the Texas Tech. Ruth weighed 8 1-2 pounds at birth and, according to her parents, is a robust, healthy baby girl. She made her appearance Sept. 16, soon after Mr. and Mrs. Stangel came to Lubbock.

Ruth's father is Professor of Animal Husbandry, and was formerly associated with A. & M. College. She was given her mother's name. The college officials, faculty and student body are proud of her.

lege, saying that only nine of the twenty-six institutions of higher learning of the state this year were opening with an enrollment in excess of 700.

Dr. Spalwn, the last speaker to be introduced, reviewed briefly the history of Oxford University, one of the oldest schools in the world, and drew a parallel of this college and the Tech, the newest of educational institutions. Dr. Spalwn spoke complimentary of the faculty, stating that twenty-seven of the forty-five hold Masters degrees, and that seven have Doctors degrees, assuring instruction of the highest type.

He stated that all elements of a great college are combined in the Tech, naming the campus, the buildings, the student body, the faculty, and the leader, in the person of Dr. Paul W. Horn, who is recognized as one of the leading educators of the nation.

A little "pep" was shown in the meeting when Coach Freeland was introduced and announced a pep meeting for Thursday night.

DR. AND MRS. HORN TO RECEIVE STUDES

President Horn and his wife are tendering a reception tonight at the Administration Building to which the entire student body is invited as their guests. The social will begin at eight o'clock and will be held in the rotundas and the archways on the first floor.

The affair is being given for the purpose of enabling the students to become acquainted with each other and with the faculty, and is the first entertainment to be offered to the students as a whole. This get-together will probably mark the beginning of many lasting friendships, and Dr. Horn and wife are to be commended on their thoughtfulness in behalf of the students.

An Englishman has combined a photograph and telephone in a device to ascertain the depth of water in distant reservoirs.

Matadors kick off and McMurry returns 15 yards. McMurry around left end 1 yard, three passes net 20 yards and a fumble gives Matadors the ball. Wilson goes for 6 yards around right end; Nicholas goes through the line for 6 yards and first down; Alford makes 3 yards through right tackle; Nicholas makes 5 yards and first down; Alford goes around left end for 5 yards; Nicholas 1 1/2 through center; Alford carries the bag around left end for 6 yards and first down; Matadors get 25-yard penalty; 5 yards by Nicholas leaves 15 to go; Wilson skirts left end for a gain of 2 yards; Nicholas goes through center for 2 yards; Alford bucks through line for 1 yard, fourth down 10 to 9 field kick is blocked and Indians recover on 15 yard line; time out, Abilene punts and Hamilton returned ball 20 yards; Wilson pushes through left tackle for 4 yards and first down; Nicholas held for no gain; Alford punts out of bounds; Indians return punt out of bounds; Tech ball first down; Alford goes around left end 5 yards; Nicklaus makes no gain through line; Wilson through right tackle 2 yards. Fourth attempt at field goal falls short and Indians carry ball back to 20-yard line. McMurry punts out of bounds at 40-yard line. Tech time out for water; Nicklaus goes through right tackle for 1 yard. Quarter up; Tech ball on 40-yard line and first down. Score 0-0.

Second Quarter: Matadors punt to 40-yard line and ball returned 10 yards. Indians punt out of bounds on 43-yard line. Nicklaus through right tackle for 1 yard. Alford makes incomplete pass to Nicklaus; Wilson makes fluke pass to Hamilton. Fourth down and 9 1/2 yards to go. Alford

Continued on page four.

Students Served By Parlor Type Of Street Bus

Operation of a bus service from the city to the college was begun Sept. 15, immediately after the contract was granted to the Red Ball Stage Line. Thus far only one bus has been put in operation and it is probable that it will continue serving the demand. It is a 21-passenger parlor type car, built on the order of a street car with an entrance at the front and an emergency exit at the rear. The machine was driven through from the factory at Lima, Ohio, and the bus company experienced some difficulty in getting the machine at the opportune time.

A schedule has been arranged which will enable students to arrive at the college immediately before class periods, and something like fifteen minutes will be given them to make preparations to leave the buildings after classes, inasmuch as the round trip is made every thirty minutes. Students and faculty members are granted a fare of 5c each way and the general public is taxed one dime.

Some changes may be made in the schedule as it now stands, but it is probable that the permanent schedule will be announced within the next few days.

Since paying for their books, some of the students in the Tech are ready to take the bankrupt law. Many first month allowances have been invested in this way and some have written back home for money already.

"We do not have many of the joy-riding, roll-stock type of students enrolled in the Tech,"—Dr. Horn.

The "sallyport" at the Administration building was put to the test Thursday morning when the norther blew up. A suction was created that plays havoc with skirts and makes Oxford Bags stand alone. Just a reminder of what it will be like this winter when a sure-enough norther hits. O-o-o-o!

According to the drivers, the students are already creating the habit of leaving their belongings on the Tech bus. It is a common occurrence for a bareheaded jelly-bean to forget his headgear and most every other personal article has been found, including garters—and you know the boys "roll their own" these days.

Some of the boys are using the bus to get acquainted by climbing on and riding until they meet some fair dame. Often it requires several round trips. Now girls, isn't that "perfectly awful?" You think so? Well, we saw some of the girls doing it too.

Trying to make the rush during matriculation was very much like visiting a French Market on "fish day." If one escaped without loss of "life or limb" he was fortunate indeed. We slimes milled around not knowing whether we were riding or walking.

Financial difficulties are meeting with much discussion on the part of the students. One fish remarked that he lacked only the dome on the court house having the city paid for.

You think that Tech crowd didn't have the "old pep" at the game today? Leader J. D. Carroll went through all the antics of a contortionist and met with good support from the crowd. All that noise almost created another earth tremor recently experienced in the Panhandle, and if canned would last the god of thunder a lifetime.

Had you noticed that sickly appearance of some of the studes as they come from the class rooms? No wonder! These assignments would wilt the most ambitious. We don't mind, however. We haven't anything to do but work.

Some of the college "stags" have been trying to relieve the situation by attending the Elk dances, all tugged out in college bars. It is understood that the Elks are inclining college dances in their program for the winter.

One collegiate was quite humiliated because the city police insisted that he pay the neat sum of \$24.75 for the privilege of driving down the sidewalk. Another instance where a fellow bought something he could not eat. Better keep to the pavement after this.

You need not read the above items. They're all "bull" anyway.

It is well known, of course, that in the favorite sport of Spain and Old Mexico the "toreador" is an assistant to the "matador" or bull fighter—so when the name Matador was suggested in keeping with the Spanish architecture and design of the college buildings, nothing seemed more appropriate as a name for the student publication than The Toreador. And we might add that it is our intention to have the name retain its full meaning, for we expect it to be one of the strongest supporters of the Tech Matadors. Therefore, when The Toreador announces that the Matadors are ready to "kill" you may depend upon it.

Did you pay the student activity fee? Did you know that it included a subscription to The Toreador, which alone is worth \$1.50, half the entire fee?

All student activities are covered by this fee and it is simply a business proposition to pay it. The \$3 paid in a lump sum if spread out over several athletic events will soon amount to more than double that amount. It is understood that a majority of the students have paid the fee and no doubt the entire enrollment will soon belong to that list.

VIENNA.—Convicted of murdering a Balkan desperado, which she regarded as a patriotic act, a tubercular Macedonian girl must fast yearly on the anniversary of the murder. She has been sentenced to eight years in prison.

Blind persons are being taught to make radio sets with the aid of diagrams with embossed lines and inscriptions in Braille characters.

TOO MANY STAGS; BOYS OUTNUMBER GIRLS 3 TO 1

More girls! Too many "stags!" This is a common lament about the college campus and the boys' dormitories. According to the records in the registrar's office, the proportion is about 3 to 1 in favor of the boys—or maybe against the boys—anyway they are in the majority. Already you can hear rumors of "stag" parties, dances, etc., or predictions that such will be necessary.

Of course, the courses in engineering and agriculture may have something to do with it, but it is probable that the story has spread abroad that Panhandle schools are always "infected" with too many girls. This condition usually exists and this fact might have offered some attraction to the large number of boys.

Like Gen. Pershing, boys, we're here. What are we going to do about it.

Hark Ye Scribes Editors Issue S. O. S. To Get Assistance

Hark, ye scribes! Ye Editors are paging U. B. Helpful!

We were tempted to call this sheet "Prescription" because it was so hard to fill.

Getting out a new paper in a new school, under new surroundings, and meeting new classes, with new assignments every day is no easy task.

The above statement is especially true when the matter is left up to only two slimes.

Doubly so when those two students have only three days in which to interview persons busy with the enrollment of more than 750 students; and solicit advertising from merchants who are attending the fair.

And if it had not been for the undaunted nerve of us, and the courtesy shown us, we could not have made the little showing we have.

We have pecked the typewriter each night until the wee small hours when the machines would grow inefficient and refuse to work longer.

So, the S. O. S. call.

On Monday afternoon at 4:00 o'clock in room 207, a meeting will be held for the benefit of those who are interested in literary work and more especially those who have had newspaper experience.

This invitation isn't confined to boys alone, for we need some ambitious damsels as well. Be there! We need you!

NOTICE TO CADETS.

The cadet uniform has been selected, complete with cap, belt and leggings, and costs \$48. \$15 is required on deposit before the order is mailed, because the uniforms are made to measure.

We do not know the exact number of cadets signed up, but we are confident that the 100 mark will be reached this week.

Lieut. H. Killen.

THE TOREADOR

Advertising rates, 25c per column inch.
Subscription rates covered by student activity fee. To persons not in school, \$1.50 per school year within Lubbock county; elsewhere \$2.00 per school year.

SALUTATORY AND APOLOGIES

In publishing the initial number of the Toreador, we feel that we should apologize for the crudeness in arrangement, the ungrammatical composition, and the mark of hurriedness which is spread across the entire sheet. It is the old, old story of waiting until the last moment. However, the delay this time could not be prevented and we have made an honest effort during the three days we have divided between the work and the duties of matriculating and meeting classes. Being unorganized, we have worked without outside assistance, and the task of putting out a student publication is no little job. Never-the-less, we have gathered within these four pages a lot of information which will be of interest to the student body and faculty, and a number of announcements which we feel sure you cannot afford to overlook.

The Toreador is strictly a student publication and its columns are open at all times to any class of news or any announcement suggested by any student or faculty member. It is our desire to make the publication one of interest to every student and faculty member and to do so we must have the co-operation of all. It is your publication and we are your agents. Assist us in making it worth while.

In beginning the publication of The Toreador, it is our intention to co-operate with the student publications of Texas and adjoining states, and the newspapers of the Panhandle in keeping the public informed. Our bit in this great work will be, chiefly, to tell them of the great School of Technology, and the accomplishments of this newest of educational institutions. We are going to boost, but not boast, being conservative in our statements at all times.

It is not our intention to enter the field of competition with the local newspapers, for our publication is of a different nature, for a different purpose, and will reach an almost entirely different class of readers. We expect to co-operate with the local papers in boosting for Lubbock and feel sure that we will receive their co-operation in return.

In summary, we are for the student body and the Matadors first of all; but we expect to co-operate with every other publication in service to the public, and work for the interest of all organized movements in behalf of Lubbock and the Texas Tech.

LUBBOCK AND THE TEXAS TECH.

Yesterday the Texas Technological College was but a fancy—the dream of prominent men. Today that dream has materialized and in doing so national records have been broken. The story of the creation of the college and the development of Lubbock are so closely associated that they are inseparable, especially when developing a treatise of either. That one has a part in the making of the other and vice versa cannot be denied.

Two years ago the site of the Texas Tech was only a broad field—the remnant of a cattle range—bordering the little city of Lubbock which was making a brave fight with its agricultural resources to gain recognition on the South Plains. The development of the city and college in the past two years cannot be treated elaborately, but a brief outline will bring out the association of the two—one an educational institution and the other a commercial center. On the 2000 acres belonging to the Tech four buildings have been erected for the accommodation of something like 1,000 students, besides the palatial mansion of the President. Although these buildings are to be enlarged, they are of such beautiful architecture that they present a pleasing appearance even though they are yet in the course of construction. The field of work covered by the institution is broad enough to bring the interests of every prospective student within its scope, being divided into four co-ordinate colleges as follows: The College of Liberal Arts; the College of Home Economics; the College of Agriculture; and the College of Engineering, with four-year courses offered in each. Approximately 800 students have enrolled in these four divisions, establishing a record for the first year of American educational institutions.

In the meantime the growth of Lubbock has kept pace with the extensive preparations made for the opening of the school. Adjoining the college holdings three residential additions have been opened up, restricted to high-class homes, besides the extensive building program which has swept the entire town including the business section as well. Several months ago the citizens of Lubbock were appealed to in an effort to make preparation for caring for the students of the Tech. At that time the daily visitors to the city could scarcely find accommodations, but the citizenship responded promptly and plenty of homes have been found for the accommodation of every student that could not be placed in the various dormitories, all of which have been constructed by Lubbock citizens. The manner in which Lubbock has handled this matter has been commented upon commendably throughout the entire state, and the citizenship is to be congratulated for the co-operation shown. This co-operation on the part of the college officials and local citizens has made possible the Texas Tech as it is today.

The bill creating the Texas Tech stated that it "shall be a co-educational institution giving thorough instruction in technology and textile engineering," and "in addition to the courses provided in technology and textile engineering, the said Texas Technological College shall offer the usual college courses given in standard senior colleges of the first class." The institution has begun to serve its purpose and it can be truly said that the "eyes of Texas" are upon the Tech. And, largely due to its educational advantages, Lubbock has become the pride of the South Plains.

MERCHANTS CO-OPERATE.

The Toreador is being published through the co-operation of the Retail Merchants Association of Lubbock, which is one of the most vigilant and wide-awake organizations in Lubbock or in the South Plains country. Under the agreement entered into between this organization and the student management, there isn't a possibility of any one grafting off the student body or the merchants who support the publication with advertising. The price of advertising is set and the amount to be carried by a single merchant in one issue is limited. This will enable a larger number of merchants to be represented in each issue at a nominal cost. The merchants have shown the same spirit of co-operation in this matter as in all others concerning the Tech, and their organization is to be commended for its practical management of the matter.

TECH LIBRARY CONTAINS LIST FACULTY WORKS

GIFTS MADE TO LIBRARY INCLUDE WORKS OF FACULTY

The Library of the Texas Tech is endeavoring to collect the printed work of the members of the faculty and thus far has received a collection of pamphlets and articles of Dr. Leroy T. Patton, Professor of Geology; Dr. W. A. Jackson, Professor of Government and Economics; A. W. Evans, Professor of Education; Dr. E. F. George, Professor of Physics, and W. R. Waghorn, Professor of Music, according to the Librarian, Miss Elizabeth West.

Dr. Patton has presented to the Library a pamphlet entitled "The Geology of Potter County," which he wrote while connected with the Bureau of Economic Geology and Technology of Texas. This pamphlet was published as the University of Texas bulletin 2330, August 30, 1923.

Other works of Dr. Patton in the College Library are the following: "Notes on the Occurrence of Glacial Material Beyond the Border of the Drift in Muskingum County, Ohio;" "Geology and the Location of Dams on the Canadian River, Texas;" "In Support of Gardner's Theory of the Origin of Certain Concretions."

Dr. Jackson has presented to the Library a monograph entitled, "The County Sheriff in Iowa." This monograph is a re-print from Volume 4 of the Iowa Applied History Series published by the State Historical Society of Iowa. The entire volume covers the general subject of County Government and Administration.

Dr. Jackson wrote this monograph while acting as research assistant for the State Historical Society of Iowa in the summer of 1924.

Professor Evans has presented to the Library three articles in the High School Quarterly as follows: "Material Equipment of the Small High School;" "The Adjustment of College Entrance Requirements to the Junior High School;" "The Texas Plan of Inspection of High Schools."

Prof. W. R. Waghorn has presented the Library with four of his own musical compositions, namely: March for the Pipe Organ, "A thought of you" song; Texas, a toast, two Scotch songs arranged for three part chorus for women voices.

Dr. E. F. George, Professor of Physics, has given to the library his Doctor's Dissertation entitled "The Absorption of Light by Inorganic Salts," published by the Ohio University in 1923, and a pamphlet entitled, "Absorption of Light by Mixed Solutions of Colored and Colorless Chlorides," reprinted by the West Virginia University Scientific Association.

In addition to the above, the following gifts have been made to the Library.

From the Rev. Jack M. Lewis of Lubbock, the work of Mark Twain in 25 volumes.

From S. P. Putnam's sons for the author the work of George L. Raymond in 9 volumes.

The Raymond volumes comprise poems, dramas, selective quotations from the author's writings and treatises, ethics, aesthetics, poetry, art.

Through G. W. Meadow, Secretary of the Board of Directors, the Waco Times Herald and the Waco News Tribune have agreed to donate to the library a year's subscription to their respective papers.

Recently the college has received a gift from the Dallas News of 108 numbers to fill in gaps in the college files. This means that the college has an

almost complete file of the News for the past three years, it is stated by Miss West. When the library appropriations will permit these files will be bound and preserved as a part of the reference collection.

Miss West also states that it is the hope of the administration to build up a strong reference collection including files of newspapers and magazines as well as books. All these will be at the disposal of the student body at all times.

Until further notice the Library hours will be from 8:00 a. m. to 12:00 m. and from 1:00 to 5:00 p. m., Miss West stated.

Faculty Reception Is First Social Event Of College

The first social event given in connection with the Tech opening was the reception to the faculty tendered by Dr. and Mrs. Paul W. Horn at their beautiful home on the evening of September 22.

Mr. and Mrs. Kimbro and Senator and Mrs. Bledsoe, assisted the host and hostess in dispensing the hospitality of the president's beautiful Spanish home.

The guests were invited into the west drawing room to register and into the study, where delicious punch was served.

The house was decorated with garden flowers and the Spanish note was accentuated in the drawing room, where the piano was draped with a very lovely shawl that was brought

from sunny Spain by the daughter of the house. And in the dining room the table was covered with a Spanish scarf centered with a black glass bowl of red dahlias, and tall black glass candlesticks in which red candles burned.

These appropriate decorations gave harmony and tone to the Spanish motif that characterizes this home and its elaborate furnishings.

Dr. and Mrs. Horn were delightful hosts, furnishing variety and originality in entertaining the guests. Among other things, Dr. Horn called for responses from the guests which were cleverly given.

Mr. Stangel, the newest father of the Tech faculty, expressed warmly thanks for the honor accorded him and for the lovely flowers, the gift of the faculty ladies, which had so pleased Mrs. Stangel and "Baby Ruth."

Dr. Granberry presented Mrs. W. B. Gates, wife of Mr. Gates of the English faculty, referring to her as the "kid bride" of the Tech faculty.

The "faculty bachelors" Mr. Patton, of the geology department; Mr. Ray of the chemistry department; Mr. Galbraith of the chemistry department; and Mr. Pfleger of the modern language department. Mr. Qualla, of the Spanish department, in well chosen Spanish, these "hopefuls" to the guests and especially to the "maids" of the faculty.

Dr. Horn called on many other members of the faculty for some distinctive service which he had rendered or position which he occupied in the Technological College.

Miss Ruth Pirtle charmingly read for the guests.

On the whole, this the first reception of the president to the college, was a unique and pleasant affair, due

A MESSAGE TO THE STUDENT BODY

DR. PAUL W. HORN.

The opening of the Texas Technological College this year is an historic occasion. There will be other openings in years to come, but never again a first opening. There will be other student bodies, but never again a first student body.

The shaping of the destinies of the institution is largely in your hands. It will be yours to shape the traditions that in years to come will be even stronger than the written laws of the college. It is for you to say whether these traditions shall be in favor of kindness, good will, courtesy, hospitality, and the helping hand, or whether they shall be for the contrary.

It is for you to say whether the dominant ideals of the institution shall be those of honesty and straight-forwardness, or whether dishonesty and cheating shall prevail, as in some institutions they unfortunately do.

Some of you arrived on the ground in time to take part in the actual building of the institution. Some of you have with your own hands helped lay the bricks and mortar of the buildings, where you are to receive your instruction.

Others may not have done this, but, nevertheless, they will have a great part in deciding the spiritual nature of the influences which shall prevail here.

Let us see to it that we lay our foundation well. Others who come after us will profit by our wisdom and will suffer for our mistakes. Let us build for the future and for others, and by so doing we shall build for the present and for ourselves.

The President, on behalf of himself and the faculty, welcomes each one of you to the institution and invites you to take a part in helping shape its policies for good.

This initial issue of the *Toreador* is the first sheet off the press and on the streets of Lubbock carrying a story of the Tech-McMurry game played this afternoon. With in 2 hours after the last whistle of the game sounded football fans were re-living the battle from a complete play by play report appearing on this page. We expect to serve the students more efficiently each week by giving them the news of their school before it has become stale.

Union Services Of Churches To Honor Opening Of Tech

On Sunday October 4, all of the churches of Lubbock will join in union services to be held in the stock-judging pavilion in honor of the opening of the Texas Technological College. Services will begin at 7:30. There will be music by the combined choirs of the churches and the city. One of the pieces of music to be given by the choir and the student body and the entire congregation will be the hymn, of the Texas Technological College, "O College, Mother, Beautiful."

Dr. R. Thomsen, pastor of the First Presbyterian Church of Amarillo will deliver the address on this occasion. Dr. Thomsen is well known to members of the faculty and many of the students and is recognized as one of the most able speakers of the opening week.

During his stay in Lubbock, Dr. Thomsen will be entertained in the home of the Registrar, Mr. E. L. Dohoney, located at 2223, 16th St., and formerly known as the "Home Beautiful."

All students enrolling in the Tech were requested to specify their church preference and it is understood that they will affiliate themselves with church work as soon as possible. A committee from the churches met at the college building Thursday morning to get lists of the students and the churches they prefer, and these will

who will see that every student is invited to attend the church of his or her choice.

The service Sunday evening is the first reception of the churches to welcome the students, and it is expected that the attendance will be large.

For driving boats through shallow water a propeller has been developed in Scotland of which only the tips of vane shaped blades enter the water.

Fink Freed When First Jury Makes Its Last Report

HOUSTON, Texas, Oct. 3. —Max Fink, former orchestra leader, charged with criminal assault on two girls, 14 and 13, stood free in the first trial, and

the jury Friday morning was deliberating on the second case testimony. Meanwhile, following Fink's acquittal on the first charge, Criminal District Judge C. W. Robinson, voluntarily allowed Jimmie T. Johnson, member of Fink's orchestra and facing one charge of criminal assault, bond of \$2,500. The charge against Johnson grew out of the same parties. Fink was charged with connection with.

MATADORS AND INDIANS PLAY SCORELESS TIE

CONTINUED FROM PAGE ONE

punts over end and Indians take ball on 20-yard line. McMurry makes fourth through center, then punts to Matador's 55-yard line. Alford fumbles and recovers, but no gain. Nicklaus loses 5 yards. Hamilton goes out for Eubanks at quarter. Nicklaus 3 yards through right tackle. Alford punts to 28-yard line. McMurry ball with 72 yards to go. Time out for Tech. McMurry through center for 7 yard. Another buck through center for 1 yard. Punt to 35-yard line. Tech return ball but is penalized 15 yards for illegal use of hands. Harkrider beefs. First down 10 to go. Nicklaus makes end run for 5 yards. Wilson skirts right end for 4 yards. Alford punts to 20-yard line and ball is returned 10 yards. McMurry runs out of bounds for 1 yard gain. Goes around end for 2 yards. Through center 1 yard. Punts out of bounds. Tech ball at 11-yard line. Time out for Tech. Fromm subs for Smith at tackle. Alford punts and Matadors recover ball and make incomplete pass. Another fluke pass. End of half. Score 0-0. Tech rooters do snake dance during half.

The following subs, or entirely new team, except for two men, were run in: Daily end; Miller, center; Fields, left half; Gill, right half; Woodward, full; Westerfelt, tackle; Hankins, end; Dennison, guard.

Third Quarter: McMurry kicks and ball returned to 35-yard line. Fields 1 yard around left end. Woodward punts to 25-yard line. Double foul and ball returned to 35-yard line. Tech ball. Woodward punts and Tech recovers on 23-yard line. Gill 1 yard around right end. Woodward 5 yards through tackle. Fields 3 yards around left end.

Field goal from 20-yard line fails. McMurry punts to 48-yard line. Tech kicks back. McMurry no gain and punts. Remainder of quarter marked by scrimmages with neither goal in danger.

Fourth Quarter:

Ball on 40 yard line; a new line up was sent in by Freeland; Wilson gained three yards around left end; Wilson completed 25 yard pass to White; Nicklaus two yards around right tackle tackle; Wilson's pass intercepted by Hill; Hill return three yards; Mitchell punts for 55 yards to Hamilton who return 18 yards; time out for Tech. Hamilton knocked out and Eubanks substituted; McMurry penalized 15 yards for roughness; McMurry's ball on their 26 yard line; Mitchell punted 40 yards to Eubanks who was downed in tracks; ball on Tech 47 yard line; Woodard gained one yard round left end; Wilson passed to Calloway was incomplete; Woodard punted 44 yards to Hill; who returned two yards; Mitchell punted 45 yards to Eubanks who was downed in

tracks; Tech fumbled for 23 yard loss; ball on Tech 20 yard line; Nicklaus one yard off right tackle and went out of bounds; Alford punts 47 yards out of bounds; ball on the McMurry 41 yard line; Mitchell fails to gain; Mitchell punts 35 yards to Eubanks; Tech ball on their own 35 yard line; Alford to Calloway, pass in complete; Nicklaus gained eight yards around left end; Wilson makes first down off right tackle; ball on Tech's 45 yard line; Alford passed to Eubanks for six yards; Nicklaus failed to gain; Alford to Calloway pass netted 12 yards gain; Wilson to Calloway pass, incomplete; substitutes for Tech; Smith for Fromm; West intercepted Wilson's pass to Calloway; McMurry made a substitution; McMurry's ball on her 35 yard line. Mitchell fails through center; a series of substitutions were made by McMurry; Ledbetter after losing 10 yards fumbled and the Tech fell on it; Nicklaus five yards left tackle; Nicklaus failed to gain; Arbuckle was substituted for Wilson; Nicklaus gained four yards; a second after the whistle had blown, Arbuckle kicked a perfect drop kick but did not count.

Athletic Fund Boosted; Student Loan Proposed

At a luncheon sponsored by the Lubbock Chamber of Commerce Wednesday, announcement was made by President R. Q. Lee of the West Texas Chamber of Commerce that the directors of that body in their meeting here Wednesday had voted \$1,000 for the athletic fund of the Tech College, as another demonstration of their cooperation. Mr. Lee expressed himself in behalf of the body stressing the belief that the Tech has a great future.

This action on the part of the W. T. C. C. was hailed with enthusiasm and appreciation by Coach Freeland and his assistant "Big Higg," and the student body and faculty in general. This sum added to the appropriation already made, strengthened by the student activity fees paid during matriculation, will be a great help in taking care of the gridiron squad. It is understood that approximately seventy-five per cent of the students enrolled have paid the student activity fee and it is believed that the remaining twenty-five per cent will likewise respond.

Student Loan Fund Proposed.

Another action taken at the luncheon Wednesday which will be of much interest to students and prospective students of the Tech, was the announcement by Walter Kline of Wichita Falls, Governor of the 41st Rotarian District, that the Rotarians would undertake to raise \$5,000 as a loan fund for students working their way through the Tech. This proposal was offered by Mr. Chitwood and readily accepted. The plan by which the funds will be handled have not been worked out, but will probably be announced in the near future.

Simultaneously with this announcement another was made Thursday by

Dr. Horn that a Lubbock citizen, who requested his name to be withheld, would loan \$100 per year to each of five students. Dr. Horn expressed the belief that this would serve as a basis for a loan fund which would be greatly strengthened as time goes on.

The plan adopted by this Lubbock gentleman will not permit the loan to be given in a lump sum, but it will be divided into eight payments of \$12.50

each. Notes will be signed and payment guaranteed it being his intention to re-lend the money to other students. This plan will be of much assistance to those students who are depending upon self support.

It is believed that this or similar plans will be adopted by other local citizens who are co-operating in every way with the college.

Pay your student Activity Fee.

No Argument at All

The attorney was setting up illiteracy as a defense for his client, accused of forgery. "Why, your honor," he argued, "this man could not have been guilty of this crime; he cannot write his own name." "Your argument is worthless," said the judge. "The prisoner is not charged with writing his own name, but that of someone else."
