Spade Pupil Returns From Chicago Trip

Betty Byars

SPADE — Betty Byars, 16, traveled to Chicago for the National 4-H Club Congress, Nov. 25-29.

Betty's expense-paid trip was provided by Whirlpool - Seeger Corporation for a job well done in the 4-H Frozen Foods program. After eight years in 4H, her record was judged best in the state, and she was named state winner.

Betty learned to select, prepare, and freeze food, and became skilled in showing others. She froze a total of 890 quarts of fruits and vegetables, and 1,204 pounds of meat, dairy products and baked goods.

In addition, she prepared 31 exhibits and gave seven demonstrations in freezing methods. She also gave many talks and appeared on radio and television more than a dozen times. She won honors at county, district, and state fairs.

Betty served on county and district committees, and was president and junior leader in her local 4H Club.

Neuschwander, Bass: Elmer Hall, Charles Heathman, Albert Perkins, Herbert Funk, James Garrett, Carl Pillion, Fred Mathis, Paul Jensen, Jerry Banks.

C. Kenneth Hill, Jr., minister of music and education will direct the cantata. The presentation is open to the public.

KAT'S KORNER

By GAY DOUGLAS

Well, Cats — Aren't we the proud ones now — I sure thought we had lost the game for good when Graham made their touchdown.

But after we started scoring I didn't even mind the cold so much. Our boys really did a great job all the way.

We're all very proud of Linda Latimer. It's quite an honor being elected District F.F.A. Sweetheart! That banquet must have been quite an affair from all reports. Wish we had all been lucky enough to have gone.

I sure feel sorry for those football boys. They are going to have to ride all of an hour and 10 minutes on a nasty old airplane to San Angelo. The lucky band is going to get to ride down on the "Golden Dragons" (school buses)!

That game Saturday is really going to be one to see. Our brave Cats will really have to fight to win but I think they can do it. I hope everyone who possibly can will come to the game. The team will need all the support they can get. And, by the way, I overheard one of the cheerleaders saying one of the team would be able to that game Saturday in the stands if we would yell a little louder. The cheerleaders can't even hear you cheerleaders are sometimes. Let's let those boys know where our loyalty is! Yell Cats!

I certainly didn't know we had so many talented musicians in L.H.S. Four people in the All-State Choir and two in the All-State Band. And two first alternate choir members besides that. That's just wonderful, folks. I'm really proud of you.

Another of our beauties has just joined the ranks of the old married folks. Barbara Yohner was married to Burly Favor yesterday. Barbara was a cheerleader and a student council member as well as a faithful F.H.A.'er while she was a student. I know she'll be very happy as an "old married lady".

Levelland students came yesterday to give us a wonderful assembly. The Student Council has arranged several exchange assemblies for us. We will be taking a program to Levelland soon. That train to Snyder was really a barrel of fun for everyone. Just a little of everything was thrown in I think. Nothing serious, but enough to get things a little messy.

Those band kids sure have some sore necks I'll bet. Those cokes cases looked mighty heavy. But it was really nice to have them and their drinks and sandwiches there. Some people would have gotten mighty hungry before they got home.

That eternal deadline is getting closer now so I'll see you at the game.

1-AAA Cage Teams In Meet Today

Littlefield Plays 'Faces In Opener

By J. D. TRULY
The teams of District 1-AAA have a chance to feel each other out this weekend at Hereford before regular district play begins. Hereford is the host this year for the District 1-AAA Invitational Tournament. These games will not count in regular district play but it may be some indication of what is to come from all of the teams but Littlefield. The Wildcats still have more than half of their potential team playing football.

Littlefield will go into the tournament with a one win and two lost record. The Wildcats open play in the tournament Thursday at 8:30 against the host team, Hereford.

This tournament is not an elimination tournament so win or lose Littlefield will play Thursday, Friday, and Saturday. If the Wildcats beat Hereford, they will play the winner of the Canyon-Dumas game at 8:30 Friday night. If the Wildcats lose, they will play the loser of the Canyon-Dumas game at 5:30 Friday afternoon.

The teams entered in the tournament are Canyon, Dumas, Littlefield, Hereford, Levelland, Phillips, Olton, and Plainview.

Four games are on tap for Thursday. Plainview plays Olton, Levelland vs Phillips, Littlefield vs Hereford, and Canyon vs Dumas.

Littlefield will again be going into this game with only eight men. Charlie Duval is the leading scorer with 27 points in the Wildcats' three games played so far this season. Gaston Shaw is close behind with 22 and Larry Weaver with 15.

Channing had to come from behind to defeat the Littlefield Wildcats 52 to 37 Saturday afternoon in the finals of the consolation bracket of the Friona Invitational Tournament. Littlefield led 11 to 6 after the first period of play, but Channing outscored the fighting Wildcats in the second quarter 19 to 5 to take a halftime lead of 25 to 16.

The determined Wildcats fought back gamely in the third period but the high scoring Channing team pushed Littlefield from the charity toss line and increased their lead by one point by scoring 13 points to 12 for the Wildcats. The Wildcats went behind midway through the second quarter and could not catch up during the remainder of the game.

Personal fouls broke the back of the Wildcat team. Dale Rhodes, and Larry Weaver both fouled out early in the game. Charles Duval and four fouls against him when the final gun sounded. The

Tragedy struck twice for a Littlefield family this week. Mrs. Robert Henderson of 1215 South Westside was hospitalized in a local hospital for surgery. A son, George Payton Henderson of Colorado Springs, Colorado was fatally injured in an automobile wreck at Amarillo enroute home to be with his mother.

Henderson, 47, was killed instantly Monday night in a car-truck collision at the intersection of Pullman Road and Lakeside Drive in Amarillo. His car, rolled into a ball of wreckage from the impact of the crash, was demolished.

Anton Play Tops Area Basketball

By J. D. TRULY
The Anton Invitational Basketball Tournament got into full swing Monday with both the boys and girls teams from Shallowater and Anton blasting their way into the semifinals with smashing victories.

The Shallowater boys whipped Three Way, 52-37. Grady Perston dunked in 14 points, one more than Scotty Craig. Eubanks led the way for Three Way with 17 points. Paced by four scorers in double figures, Anton ran past Pettit.

Gayle Scifres Seriously Injured
Mr. and Mrs. G. E. Scifres of 905 East 8th received a wire Tuesday stating that their son Gayle E. Scifres, 23, suffered a fractured skull in an automobile accident at 2:40 a.m. Monday. His condition is serious.

The sailor, who recently visited here on furlough, is believed to have been returning to a base at Long Beach, California, when the wreck occurred on Highway 101 three miles from San Clemente, California.

Gayle mentioned to his parents during his pre-Thanksgiving visit here that he planned to buy a car before reporting back to duty. He left Littlefield to visit relatives at Brownwood before returning to the base. Details of the accident were not known Wednesday at noon.

Scifres left by plane Wednesday night to be at the bedside of his son in the naval hospital in Corona, California.

Cats had only eight men and with two of them out of play and another with only one personal remaining, the gamely Littlefield team could not play their best.

Littlefield scored more points in this game than they have in any of their other games. They scored 12 field goals and 13 free throws. The 12 field goals is the least that the Wildcats have scored in the three games played so far but the 13 charity tosses made the difference.

Dale Rhodes was high point man for Littlefield with nine points. Gaston Shaw followed with eight, and Larry Weaver with seven.

J. Shelton was high for Channing with 13 points. D. Hunt and J. Brown followed with 12 points each, and F. Bailey with 11. Only six players saw action for Channing with four of them counting for all but four of their points.

AMHERST CAGERS IN SPRINGLAKE TOURNEY
Amherst's Bulldogs got back to the basketball wars in the Springlake Tourney Thursday, Friday, and Saturday.

The Bulldogs have two more tournaments on their schedule. They will sponsor their own tourney Jan. 3-4-5 and will also play in the District 3-B Meet Feb. 14-15-16.

Amherst opens district play Jan. 8 against Spade and winds up their cage season with the district meet.

A girls game will precede each boys contest.

ANTON TOURNEY
Morton basketball teams took a double header from Whitharral in the Anton Tournament Tuesday night, while Wilson and Hale Center split a pair.

In the boys' division, Morton clipped Whitharral 56-46 and Hale Center dumped Wilson 50-33. Girls' results saw Morton trip Whitharral 48-29 and Wilson upset Hale

Center 47-43. Whitharral held a 24-16 halftime lead over Morton in the boys game, but a last-half spurt by the Indians pulled it out of the fire with almost ease. Newman scored 16 and Brownlow 13 for Morton while Coda Stephenson popped in 14 and Gage 13 for Whitharral.

Hale Center's easy win over the Wilson boys was paced by Jerry McMinn's 17 points. Wilson's top scorer was Dewey Corley with 16 tallies.

The top game of the evening was Wilson's upset of the Hale Center girls. Wilson had a 29-25 halftime lead and from there on the margin was never more than three or four points. The score was tied with three minutes left to play.

Juanita Benavidez scored 27 and Boxley 12 for Wilson; Gail Karrh and Roberson 12 each and Barnett 10 for Hale Center.

In the Morton Girls' win, Stephenson dumped in 21 for the winners and Raines 17 for Whitharral.

Play was idle in the tournament Wednesday but will continue Thursday.

Turkey Dinner Will "Cost" Less

Christmas dinner this year is likely to run into more cash per family, but on a basis of average earnings, it is going to be less expensive than 15 years ago.

And in quality and nutrition you get more for your money.

Comparing prices with 1940, prior to America's entry into World War II and as the country was moving into a more prosperous era, a turkey dinner today is likely to cost up to \$12.00, with all the trimmings, compared with around \$8.00 in 1940.

But it took the average wage earner 12.2 hours in 1940 to earn the price of the dinner whereas the average wage earner needs to work only 6.3 hours for the 1956 dinner.

Turkey is higher per pound than in 1940, but smaller birds permit purchase of a size to fit exact family needs whereas 15 years ago the birds were larger. Also, the bulk of turkeys today are purchased oven ready, with none of the waste which prevailed years ago.

In addition, improvement in food products generally has tak-

en place since 1940. The white bread used in the turkey stuffing and served at the table is enriched, contributing essential vitamins and minerals in quantities not possible prior to 1941 when enrichment started.

Not only are numerous foods improved in processing, retaining more essential food elements, many of them today are delivered to the homemaker in such form as to reduce her kitchen labors, taking much of the drudgery out of all the work of preparing the Christmas meal.

The menu used to arrive at the figures above included turkey, tomato juice, ripe, green and stuffed olives, pickles, celery, cranberries, peas, potatoes, yams, lettuce salad and dressing, butter, bread for stuffing and at the table, pumpkin and mince pie, milk and coffee.

A dietician has suggested, after such a meal, some bicarbonate of soda would be advisable. But isn't it wonderful to live in a country where most all families can overeat to such an extent!

Linda Latimer Elected District FFA Sweetheart

A smiling, yet tearful sixteen-year-old beauty was crowned District F.F.A. Sweetheart Monday night at the Littlefield High School auditorium. Miss Linda Latimer, daughter of Mr. and Mrs. E. L. Latimer, competed and won over 13 contestants for the coveted honor.

The sweetheart contest followed a banquet in the school cafeteria with representatives of some 28 F.F.A. chapters attending. Approximately 300 persons watched as banners were awarded to Littlefield for radio broadcasting; Spade, F.F.A. Quiz; Friona, Junior Farm Skill; Muleshoe, Junior Chapter conducting and Otton, Senior Chapter conducting.

The banners were awarded to the winners of first places in the contest conducted at Friona recently. Master of Ceremonies was A. T. Hedgepeth, ag teacher at Amherst. The contestants in the sweetheart contest each wore for-

Semi Finals At San Angelo Wildcat Band Marks Years 35th Appearance

The Wildcat Band, which will accompany the Wildcat football team to San Angelo will be making its thirty fifth public appearance since September on the San Angelo field.

The band, 96 strong in concert, marches 84 members. As a sweepstakes winner the band appeared in the Cotton Bowl at the State Fair presentation of T.M.E.A. festival. The Wildcat Band formed Texas on the theme of the festival "Mr. President, U.S.A." this year.

The mascot, "Sid Jr.", the live wildcat, accompanied the band to Dallas, and with band president, Jimmie Bennett, and drum major, Palmer McCown rode the Monorail with Dallas Times Herald reporter Lonnie Hudkins. The band, its mascot, and the fact that the school boasts of two oil wells on its campus won recognition from Frank Tolbert of the Dallas News in his cosmopolitan column.

Three members of the band will go to Dallas as representatives: Al State Band in February. They are Gracie Russell, clarinet; Jerry Banks, alto sax and Gay Douglas, Oboe.

In its first year in 3-A Bands the band has begun its trek of trophies in competition, including a first place in marching in the Gridiron Jubilee, Regional, Texas Interscholastic League Music Contest, held at Lubbock, in Jones Stadium, Texas Tech on November 27th.

The Wildcat Band has racked up additional marching miles and trophies in the Brownfield Texas Harvest Festival, the Sudan Fall Festival, Sudan Texas, and the

South Plains Fair Parade in Lubbock.

These Wildcats have traveled a total of 2,530 miles since September.

Is there any wonder the saying in Littlefield is "Follow the Wildcats and see Texas"?

PUSHBUTTONS PROFIT FEED LOT OPERATORS

Daily conversion of 51,000 pounds of bulk feed into choice beef is a pushbutton operation at Carter-Kirchhoff feed lots in Plainview, Texas.

Six men handle the pushbutton operation of the electric mixing plant that efficiently grinds, weighs and mixes the fattening rations for as many as 2500 feeders and provides custom rations for 25 separate pens.

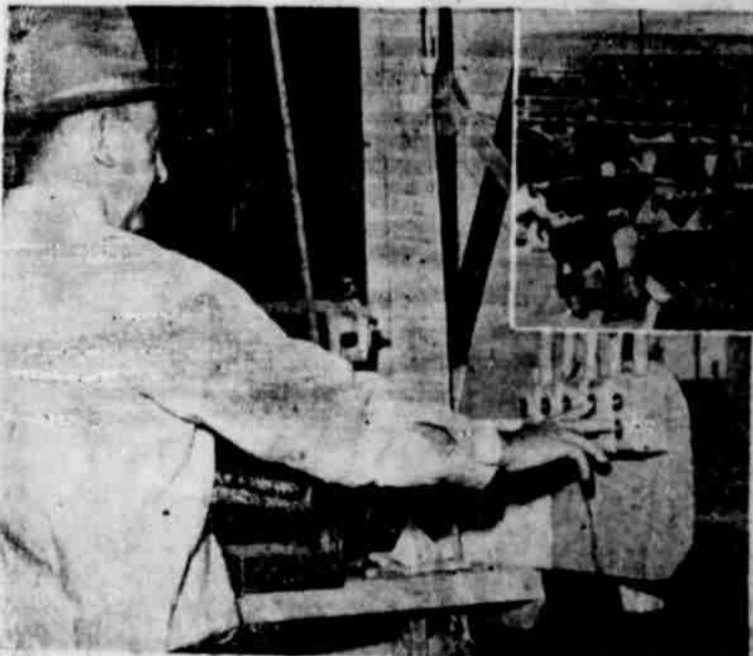

The venture started two years ago when two Plainview farmer-stockmen, John J. Kirchhoff and R. M. Carter, joined their capital and herds. The business has grown from a 400 head capacity to its present size. The rations fed are prescribed by Carter-Kirchhoff or by the cattle owners.

Pushbutton electric power controls the mill operation from receiving the feed until the mixed

rations are augered into lot trucks. Electric power the movement of the grown feed through the power grinder, to one of head storage bins, the scales, to the electric then augers the rations feed truck. The entire requires 100 horsepower.

"Profitable feed lot allows no margin for error control is essential in rations," says Kirchhoff. "1% error on mixing 50 feed can be costly. Electric ment gives us the position to eliminate mixing error.

Benefits of precise mixing is shown by Carterhoff's daily records on consumed, medical treatment, and the 30 day record. "Our records show our feeders gain an average pounds per day," Kirchhoff

John J. Kirchhoff operates the pushbutton controls which direct the movement, weighing, or mixing of rations, alfalfa or cottonseed for individual pen finishing.

Spade Triumphs Over Mules, 40-37

MULESHOE, Dec. 11 (Special)—Spade handed the Muleshoe Mules a 40-37 basketball defeat here tonight to end the locals unbeaten streak at eight games.

However, the Muleshoe girls' team avenged an earlier defeat by tripping Spade 53-51.

Muleshoe led the visitors until early in the third quarter, and pulled to within one point with four minutes left in the game. Spade never led by more than five points.

Joe Don Mote scored 11 and

Marlin Neel 12 for Spade; Oaki Alexander led Muleshoe with 14.

Muleshoe's girls were led by hot-shooting Shirley Mathieson's 31 points, with Sandra Briscoe adding 12 and Mary Jo Holt 10. Pat Pointer scored 19, Gloria Gary 18 and Alice Jones 14 for Spade. Defensive standouts were Muleshoe's Doris Childress and Bobbie King and Spade's Martha Shaw.

Health Officials Say Encephalitis To Be Serious

State health officials said that encephalitis is as serious and as human disease as malaria formerly was, but natural increase accompanied an epidemic and county mosquito control to begin making for local mosquito abatement in the spring. The so-called "disease" struck 336 Rio Grande Valley residents in 1954, and an outbreak this year in the Plains area of West Texas accounted for 341 cases.

The constant two of the biggest outbreaks of the mosquito-borne disease ever recorded, State Health Commissioner Henry A. Halle said. By contrast, only 96 cases were reported in 1955.

The Plains outbreak an estimated 15 deaths, Dr. Halle reported. "Encephalitis seems to occur in epidemic waves," the commissioner said. "And for some unknown reason the outbreaks are becoming more frequent."

The theory has been advanced that an increase in the number of water impoundments makes for ideal breeding places for encephalitis mosquitoes. And the more mosquitoes of the type capable of transmitting encephalitis, the greater the chance of it being spread among the human family.

Dr. Halle advised city and county health departments to make sure they had both funds and technical personnel available.

DRAKE'S COFFEE BREAKS

Just Slightly Stimulating
By MORLEY B. DRAKE

SMILE!
That's a broad subject. If you're old enough... perhaps you won't admit it... you will remember the words of the famous World War I song, "Smile, Smile, Smile."

Here's how part of it went: What's the use of worrying? It never was worth while, so pack up your troubles in your old kit-bag
And smile, smile, smile.

Ella Wheeler Wilcox gave us this one:
'Tis easy enough to be pleasant. When life flows along like a song:
But the man worth while is the one who will smile
When everything goes dead wrong.

—and we add: A woman, too!

Starlet Lili Gentle smiles in court at Santa Monica, Calif., where she won a new movie contract raising her salary.
She possesses what might be described as a winning smile.

"Coffee Prices Due to Slide Downward!"
That's a break for "Coffee Breaks."
We smile.

"Couple's Happy Marriage Strikes Discord With Arrival of First Baby"
That's when they should smile... in fact, laugh it off... there may be other events of the kind.

"Steaming Hot Meal, Pie a La Mode."
Coming Soon by Vending Machine"
That will be a sour smile for

able for their mosquito killing campaigns in the spring.

He said State Health Department entomologists and vector control experts are available to local areas for consultation on their problems of mosquito control.

But he added: "Local programs will be useless without working funds."

Meanwhile, the American Society of Tropical Medicine and Hygiene, meeting in New Orleans last month took cognizance of "the increasing exposure of man to mosquitoes due to various socioeconomic trends."

The society adopted a resolution in support of "more adequate work" in the field of mosquito control. It suggested that the work be done by the U. S. Public Health Service, in cooperation with state and territorial health departments.

folks on an 850 calorie diet.
"Needy Child Knows Santa Will Come"
That's an occasion for a hopeful smile.

Consider the case of the Macon, Ga., woman who was before a judge for a minor traffic violation. He fined her \$4. She muttered. He asked her to be quiet. She said "aw, shut up."

The judge fined her \$25 for contempt of court.
She shouldn't have muttered... she should have smiled.

"More Farmers Find It Profitable To Add Molasses To Livestock Feed"
That's a sweet smile for the cows.

Smiles of satisfaction enveloped Littlefield when the Cats went into the semi-finals with the defeat of Graham.

When the Cats win state... glory hallelujah... there'll be miles of smiles... 365 days of them.

"Suffer Over Broken Lives! It's better than over-drinking, over-eating" advises writer.

Such suffering produces only down at the corners of the mouth facial arrangements... sickly little smiles... until a new heart throb comes along, or until the healing process of time effects a cure.

The earth's age has been set at 3.5 billion years.
It isn't any wonder that this

old world sometimes gives off wry, wrinkled smiles as a reward for what we are doing to try and help it brighten up: it's been around too long.

Baby smiles are sweetest... from the cradle to 16... and on up. Own up, fellows, you've basked in the sunshine of those baby smiles... and all else is forgotten until the trance passes.

Pleasant smiles, spread at random, are cumulative and contagious. They float from one individual to another. One smile in the early morning may multiply into countless smiles ere the setting of the sun.

Always remember the case of the San Diego waitress who developed a habit of giving everybody a big smile. She received a tip of \$1,000 from a steady customer who dropped in regularly for a cup of coffee. She took a day off to shop for "a wonderful Christmas." Think how her smiles multiplied as the day quickly passed.

Charitable deeds... deeds of kindness... bring "smiles" in the heart of the doer... smiles to the heart and countenance of the recipient... smiles just everywhere.

It has been said that "smiles form the channels of a future tear."

Somebody is always taking the joy out of life.
But remember, smiles dam back tears, never to flow.

"Man is the artificer of his own

happiness," so let's Smile, Smile, Smile.
"Sweets with sweets, war not, joy delights in joy."

(Don't credit us entirely for all this conglomeration of smiles. It was the result of a suggestion

by Rev. Harry Vanderpool. We figured that Harry should know something about smiles... he's always smiling.)

Currently, about 20 per cent of the nation's electrical energy is generated by natural gas.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

Grass is our basic heritage. It is the greatest and most neglected resource of Lamb County and Texas. The Lamb County Soil Conservation District supervisors and Service personnel recommend the use of grasses as a cover for the control of both wind and water erosion. The widespread removal of native grasses on hillside and shallow soils to make way for cultivated crops and the overgrazing of range and pasture lands sometimes results in damage to the soil from wind and water. What takes nature hundreds or even thousands of years to manufacture, man can, and often does,

destroy overnight by improper land use and overgrazing. All of these offenses and more are chargeable to man in his pursuit of temporary advantages at the expense of lasting economy in the use and conservation of natural resources.

Eroded areas will rarely cover themselves with natural grasses during the first year or two. The help, therefore, of a quick grass covering is needed the first year to prevent unnecessary erosion. This can be accomplished by sowing some of the small grains and later sowing a mixture of grasses. As most of our severe winds oc-

cur during the spring months, a cover should be established early to help this erosion condition.

Switchgrass and Indiangrass rank high as a soil conservation plant because of their abundant branching rootstocks and fibrous roots which reinforce the soil against erosion. The yield of forage and the protective litter is high. Old stems remain erect in winter, thereby, protecting the soil and providing an effective snow trap. The grasses not only protect your land from erosion but are used as a cash crop in the harvesting of seed. Yields from natural stands may vary from a few pounds to as much as three hundred and fifty pounds per acre. Yields from irrigated, cultivated stands are higher and more dependable. Some Indiangrass and Switchgrass plantings are located on Wallace Gosdin's farm at Sudan and on Cecil Plate's farm northeast of Littlefield.

Grass cover is, also, used for waterways. These grass waterways are used in getting the water down the slope without carrying the soil along. Natural waterways are widened for large volumes of water in order to spread the water and prevent erosion from concentrating. These waterways should be seeded to a combination of native grasses, such as Buffalograss, Blue grama, Side-oats grama, or Mesquite. Gressed

waterways can be seen on the Norman Emfinger farm southeast of Littlefield.

Strip cropping is another use for grass as cover. Strip cropping means the practice of growing inter-tilled crops in alternating bands or strips with close-growing grasses. The wider and closer together the strips of non-erodible crops are placed; the more effective they are in checking erosion from the entire field. M. H. C. Pickrell has planted some strips of Littlefield this year. Blue panicum, often called Blue panic, is a deep rooted perennial grass. The plant may reach a height of eight feet under the best growing conditions and makes an excellent grass for close-growing strips. Seed yields may run as high as six hundred pounds per acre on irrigated land; and under dryland conditions, one hundred and fifty to two hundred and fifty pounds per acre is a good yield. Blue panicum is, also, a good pasture grass when overseeded on pasture or ranch land which has been cleared of Mesquite by root plowing.

To control wind and water erosion, to provide a cover on land too poor to grow field crops, and to provide hay and pasture for cattle plant your sandy soils to the different love grasses. Weeping lovegrass or Sand lovegrass is

good for re-grassing abandoned land and should be used for supplemental grazing. Seed yields, under dryland conditions, range from twenty-five to one hundred and fifty pounds per acre. While under irrigation, a yield of six hundred pounds may be reached. Weeping lovegrass plantings have been made in the sandy area north and west of Sudan and, also, north of Littlefield.

If grass is planted for a cover crop, you may want to harvest the seed for a cash crop. In learning whether the seed of any field of grass is worth harvesting, several things must be considered. These include the size, location, and condition of the field; the kind of harvesting equipment to use; and the need and demand for the seed. For most grasses, two field examinations are necessary. The early one is made approximately one week after flowering is well along. The second is made a few days before the harvesting begins.

In the early examination, consider the moisture conditions of the soil and seeds and the general appearance of the flowering plant. When soil moisture is low, reproductive parts within the flower die and no seed is produced. If rain does not fall during

Whitharral Beats Amherst, 62-34

WHITHARRAL, Dec. 10 (Special) — Whitharral's Panthers scored 21 points in the opening period then repeated the stunt in the third quarter as they rolled past the Amherst Bulldogs, 62-34, Monday night.

Amherst was playing with four of its regular starters. Four Panthers scored in the double figures. Nub Edwards led the pack with 16, Coda Stephenson had 15, Dale Gage, Larry Heard 10, Ledford Enloe, points for Amherst. In a girls game, Gage sank 31 points as Amherst won 53-35.

the period of flowering, a second examination is not necessary. Make the second examination a few days before harvesting begins. This is to make certain that there is enough good seed to justify collection. The combine is the most popular machine for harvesting most grasses. Combines work most effectively when the seed is mature and has passed into the hard-dough stage. But the risk of seed loss from shattering is important with some grasses and may offset the low cost of combining. If such is the case, a binder is useful for harvesting grass seed. The advantage of the binder is that cutting can begin several days earlier than direct combining. Mr. Sammy Hale, on the H. R. Thomas farm south of Olton, combined 4.4 acres of Weeping lovegrass on the tenth day of July this year and harvested 100 pounds of clean seed per acre. This grass field only had one light application of water.

Texas Methodists Have A Share In Camp Project

Texas Methodists will join Methodists from the South Central Jurisdiction in the use of a new educational building to be erected at the Western Methodist Assembly on Mt. Sequoyah, Ark., the leadership training center for Methodists in Texas, Kansas, Nebraska, Missouri, Oklahoma, Arkansas, Louisiana and New Mexico. Completion is expected by the 1937 assembly season.

Rev. Elmer H. Hook, superintendent of the assembly, which is owned and operated by the South Central Methodist Jurisdictional Conference, says the building is expected to cost \$10,000 and will be named the Paul E. and Mildred Martin Education building. Bishop Martin, a former member of the North Texas Conference, has served as chairman of the board of trustees for the assembly since 1934 and has been re-elected to another four year term.

Martin is a native of Blossom, attended Southern Methodist university, Dallas, and served pastorates in Dallas, Henrietta, Iowa Park, Greenville and Wichita Falls. He presides over the Arkansas-Louisiana Area. The Methodist Church, and resides in Little Rock, Ark.

One of the initial gifts to the Paul E. and Mildred Martin Education building was a gift of \$25,000 by Mr. and Mrs. Joe J. Perkins, Wichita Falls. This gift will be used to provide the chapel and it will be called the J. J. Perkins chapel. This unit will seat 120 persons for worship and class instruction purposes. It will be air-conditioned.

Lubbock Family Escapes Injury In Bainer Accident

A Lubbock family escaped injury at Bainer Switch late Saturday night when the car in which they were riding crashed into a cotton loader at the Bainer Gin. Highway Patrolmen said Earl McClanahan, 24-year-old Lubbock insurance salesman, lost control of his car on Highway 84 when the right front tire blew.

The car skidded sideways into the loader, and McClanahan, his wife and children were on their heads.

Officers said both the loader and the car were damaged.

DOWN MEMORY LANE

From the files of the Lamb County Leader, December 11, 1924.

The Ozark Service Station located on the corner of Tenth Street and XIT Drive is opening for business. The proprietor is Jim Douglass.

As the new settlers keep coming in the livestock has to keep going out to make room for them. This week Pat Boone shipped 6,500 sheep to Colorado and New Mexico, receiving \$10 per head for them. Incidentally this is the best price ever paid for sheep in this part of the West.

C. J. Duggan has been appointed deputy County Clerk, Marshall R. Cavett, with headquarters in Littlefield, and invested with authority to take legal acknowledgements.

The work of grading West Side Ave. from the Roger Z. Mills highway to the Ozark trail has now been completed, the work being carried on into Southmoor addition.

Progressive enthusiasm, is the proper term to apply to the spirit prevailing among the women of Lamb County, regarding the home demonstration work that was inaugurated last July by Miss Bertie Lee Burkhalter.

The Leader is just in receipt of a copy of Miss Burkhalter's report that was recently filed with the authorities at College Station and it is so meaty with vital and interesting accomplishments that brief resume is herewith given.

Aircraft Widely Used To Fight Farm Insects

Mr. and Mrs. COLLEGE STATION — Aerial operations against insects under State-USA contracts reached a new high in 1956, reports the U.S. Department of Agriculture. Aircraft sprayed and dusted insecticides on areas throughout the nation totaling more than 5 million acres. These figures do not include the large acreages treated each year for farmers and ranchmen by commercial firms.

Mr. and Mrs. In the 1956 Federal-State cooperative programs, four insects — grasshoppers, spruce budworms, Mediterranean fruit flies and gypsy moths — were principal targets. In the grasshopper control program airplanes covered some 2 million acres of rangeland in 10 western and southwestern states. About 1.4 million acres of forest lands in Idaho and Montana were treated for spruce budworm control. After the Mediterranean fruit fly struck orchards and vegetable gardens in a 3 million acre area in Florida, much of the infested area was sprayed several times by planes. About a million forest acres in 8 northeastern states and Michigan were treated to control the gypsy moth.

Mr. and Mrs. Other Federal-State operations in 1956 included control programs on Mormon crickets, tussock moths and spittlebugs. USDA and State technicians continue studies to develop improved aircraft and methods for insect control, including better insecticide formulations and more efficient spray equipment. They are also moving forward in research on aerial application of seeds, fertilizers, and weed killers and other farm chemicals.

Plains Irrigation Farmers Add Miles To Pipelines

Mr. and Mrs. COLLEGE STATION — Irrigation farmers in the High Plains area of Texas, from September 1, 1955 to September 1, 1956, added 710 miles of underground concrete pipe to their irrigation facilities. This makes a total of 2,532 miles of pipe now in use, says George L. Black, Jr., associate agent in irrigation for the Texas Agricultural Extension Service with headquarters at Lubbock.

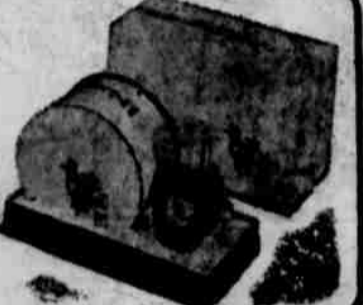

Mr. and Mrs. Black reports that the first installation was made in 1948 and that last year's additions amounted to 28 percent of the nine year total. "It is a demonstration which shows that farmers are doing something on their own to conserve and get the most efficient use from the water pumped for irrigation on their farms," says the engineer.

Mr. and Mrs. Advantages cited for the underground concrete pipe installations are the elimination of water losses from ditch seepage and evaporation; does away with the weed problem on ditches; makes for easier and more complete culti-

Mr. and Mrs. The cost of installing an underground irrigation system is high, points out Black, but since its lasting qualities are very good, the savings made in water, labor and better water distribution make it a paying proposition.

Baugh Praises Connie Baird, Former Bulldog

Mr. and Mrs. AMHERST — Connie Baird, who played end at Hardin Simmons University, Abilene, was the leading pass receiver in the Border Conference this year with 37 to his credit for 455 yards. He ranks among the three top

Mr. and Mrs. receivers of the nation and second in all-time at Hardin-Simmons.

Mr. and Mrs. Head coach Sammy Baugh said in the Abilene paper recently, "He is the best end in the conference and I consider him of pro calibre." Baird graduated from Amherst High School. He is the son of Mrs. Velma Baird who is now Mrs. J. D. Lane of Alex, Okla. Coach and Mrs. Lamar Kelly attended the game at Abilene when Hardin-Simmons defeated Texas Tech, 41-14.

Cubs To Attend

Mr. and Mrs. The members of Cub Scout Pack 41 will attend church services as a group, Sunday morning. The names of the churches in Littlefield were put into a hat and the Littlefield Drive Church of Christ was drawn. The Cubs will meet at this church Sunday morning at 11:00 a.m. for services. All Cub Scouts are to wear their Cub Scout uniforms and will sit in a reserved section with their den mothers.

Big Farms Are Beginning To Dominate Agriculture

AUSTIN — "Superfarms" are beginning to dominate agricultural production in Texas as many farmers come to be big business men, the University of Texas Bureau of Business Research reports. James H. Keahey of the Bureau staff, writing in the Texas Business Review, says the trend toward consolidation in industry and business has spread to agriculture.

In a four-year period, the number of Texas farms decreased 12 per cent, but land devoted to agriculture increased 4 per cent. The result is that the average acreage per farm has risen from 438.5 acres to 498.3 acres, Keahey notes. "The decrease in total farms has come from the absorption of the smaller units," the writer points out. "For instance, from 1950 to 1954, the number of farms with acreage between 100 and 139 acres dropped 19 per cent. At the same time, the number of big-acreage farms (500 acres or more) increased 5 per cent. Larger farming units make possible the efficient use of more machinery, the Bureau writer says. He reports significant increases in the number of tractors, trucks, grain combines, pickup hay balers and corn pickers. During the same four-year period, the number of horses and mules on Texas farms decreased by 42 per cent. Growing mechanization also was reflected in the annual farm consumption of petroleum products, which increased 25 per cent.

About 48 per cent of the nation's proved reserves of natural gas are located in Texas.

CLASSROOM BLACKOUT
Keep students in the dark if you want them to see the light. Teachers will find this easy thanks to a new drapery material just developed, which makes it possible to darken classrooms adequately during daytime slide-film and movie showings. The soft, lightweight fabric is made in four layers: a decorated and textured oil-based vinyl, a second layer of black oil-based vinyl plastic for opacity, a base fabric, and a backing of neutral beige vinyl. These drapes (resistant to fire, tearing, shrinking, stretching and discoloration) rate oil a good report—"A" for achievement!

Sand Hills Philosopher

Editor's note: The Sandhills Philosopher on his Johnson grass farm is confusing a local problem with an international one, his letter this week indicates.

Dear editor:

I read in the paper the other day where England, having spent a lot of money invading Egypt to protect the Suez Canal and winding up with the canal blocked and its money wasted, is asking the United States to postpone the next interest payment on its loan from this country, in the amount of around \$70,000,000.

I know exactly the shape England's in, and I can tell you it's not comfortable.

While I never have spent any

of the program which was interspersed with Christmas carols.

Secret pals were revealed and gifts were exchanged. The Christmas motif prevailed in the decor and refreshments of coffee, brownies and cookies were served to Mesdames Dillard Ridings, Carrie Eiler, Vera Rodgers, Robert Strickland, Rank Howard, Hub Spraberry, G. F. Edgar, Roscoe Brown, Hugh Buckner, C. G. Landers and Russell Cotton.

Roscoe Trostle of Snyder began his work Monday as a member of the Whitharral School faculty.

money on a canal, I've spent money on practically everything else at one time or another and I can report when you take on a money venture on borrowed capital and the thing doesn't turn out right, you can have a lot more respect for the feelings of me and England both.

Of course, I figured England was smarter than me, but I should have known better, as the more I learn about big outfits, the more I discover that frequently the difference between a little man and a big one is that the big one just owes more money on a bigger scale.

I understand the United States is looking favorably on England's plea to postpone the interest payment and I want you to know I'm in favor of it, provided the U. S. will save some of this favorable attitude for me and my situation.

I have some taxes coming due before long and I would like to call attention to the fact I invested in some cattle a while back and to put it in international language they turned out about like the Suez Canal. As I understand it, England captured the canal, but found it blocked with 49 sunken ships and out of commission for six months to a year, with the British winding up controlling the sand along the sides, and I can report my cattle venture wound up with me having control of a few barbed wire fences sagging between posts and a pasture that was producing about as much grass as the desert sands along the Suez Canal.

My question is, do you suppose there would be any way to get a small paragraph added to the a-

greement postponing England's interest payment to include postponing my taxes?

I'll promise to pay them later on, or at the same time England gets around to paying the interest on her loan, which I figure will give me considerable breathing time.

Yours faithfully,

J. A.

In Fence Rows Conserve Moisture, Add To Income

STATION — Have you ever stopped to think how desirable trees and brush in fence rows cost? A.H. Stenson, range specialist, a recent study showed a large mesquite tree all of the water from acre of cropland. On whose farm the made reported that the him \$9.10 last year. He a half bale of cotton to on his other cropland

ker says if fence rows, trees and brush are not controlled, the farmer would at least save his planting seed, time and labor by not trying to produce crops close to brushy fence rows. This he adds would be a waste of good cropland and not very good management. Now is the time of the year to apply chemicals to these moisture and soil nutrient robbers. Walker says research and many farm demonstration have shown that best control is obtained by spraying the cut-off stump, the trunk base or by applying a solution in frills to the standing trees. The accepted chemical is 2,4,5-T which

should be mixed with diesel oil or kerosene and applied with a hand or backtype sprayer. For the hard to kill trees, Walker recommends a pound of the chemical in six gallons of oil. For easier to kill trees a pound to 12 gallons of oil is suggested.

December, January and February are good months for carrying out the control program. Labor is usually available and working conditions more desirable. Too, few broad-leaf crops are growing which might be damaged from

outfit. The company took one of its eight-inch pipe lines off oil duty, and scraped and cleaned it for "Operation Water." Meanwhile the town drilled several wells, borrowed a pump, and started water flowing through the borrowed pipe line into the mud-caked settling station nearby. Soon there was enough water to tide the town over the emergency. Oil men can always be counted on to do their share toward the well-being of their communities.

Electric Gifts

ARE THE PERFECT GIFTS ... ANY TIME, ANY SEASON!

Mrs. James B. Sharp and Mrs. Phil Brewer of Slaton, Texas, both agree!

BLANKET MAKES BEAUTIFUL GIFT

Mrs. James B. Sharp was highly pleased when she and her husband, Reverend James B. Sharp, received a beautiful electric blanket as a gift. "A wonderful, marvelous gift", exclaims Mrs. Sharp as she holds its softness to her face. In the picture below, Mrs. Sharp shows how easy it is to set (and forget) the automatic temperature control. The blanket maintains the same comfortable temperature all night long regardless of changing night temperatures.

SENSIBLE FOR CHRISTMAS

"A gift anyone would be proud of", says Mrs. Sharp — advice that is appropriate for the Christmas season. An electric blanket lets you be sure — colors are pretty, size is no problem, and no "dents" are left in the gift budget.

HERE'S A GIFT YOU CAN COOK WITH

"Ours was a wedding gift", says Mrs. Phil Brewer, and it has proven to be "one of the nicest gifts". Mrs. Brewer was pleasantly surprised that her frypan would "bake as well as fry" and that it "does not use as much grease as an ordinary frying pan". Too, she found that she could "take it on a vacation trip and use it anywhere there is an outlet". You, too, will be happy to give or to receive an electric frypan for Christmas. It's versatility will appeal to all who receive it as a gift.

IDEAL FOR CHRISTMAS

An electric frypan is the ideal gift at Christmas (or for any occasion). It's a practical gift that lasts and lasts with each recipe cooked serving as a pleasant reminder of the giver.

Lipstick Logic . . .

If wishes were presents, a lot of folks would get a lot of beautiful gifts this Christmas.

Almost everyone of us would like to shower our friends and loved ones with the things they want or need. The kind neighbor who spends every extra dime on her shiftless son . . . we'd love to give her a completely new kitchen. The cousin who wears a 10-year-old coat with dignity and good cheer would get a minty wrap. The spouse's threadbare dressing gown would be replaced by a luxury robe to lounge in. We'd paint Mama's house, buy Brother a foreign-made sports car.

We don't question the sincerity behind the average Christmas wish . . . our own or someone else's. Most of the time it is pure generosity, love, good will. However, if we could buy our way out, would we sometimes be tempted to do it? With the church, a shut-in friend, a relative who lives far away?

The gift that carries real love or sincere friendship makes itself felt regardless of its price. But the most expensive one that is not backed up by real meaning might just as well have stayed in the store.

It's the year-round giving of ourselves that builds up into the priceless gift for someone we love. Then the thoughtful trinket at Christmas time, whatever it may be, touches off the wealth that is already stored in a loved one's heart.

For eleven months we make the investment. The Christmas gift we send is merely the dividend—the reminder of that gift-edged stock the receiver holds in the heart of a friend.
