DOUG DONLEY OF THE DALLAS COWBOYS

DALLAS COWBOY SPEAKS FOR AWARDS BANQUET

The Annual Awards Banquet was held Friday night, May 20, 1983 at the Borden County School cafeteria to honor students who participated in J.I.L. events throughout the 1982-83 school year.

Coach Bill May began the evening program with an introduction of all the students. As the students walked out individually he told the events each had participated in throughout the year.

The invocation was then given by Jennifer Wilson which was followed by a delicious meal catered by

Johnny's Barbecue, out of Odessa.

Superintendent, James McLeroy, introduced the guest speaker of the evening, Mr. Doug Donley.

Donley, a wide-receiver for the Dallas Cowboy Football team, is a native of Cambridge, Ohio, where he was an All-State halfback at Cambridge High, captained the football and basketball teams and ran a 9.4 100-yard dash for the track team. A communications

major at Ohio State, Doug is active in the Fellowship of Christian Athletes, Pro

Graduation Exercises To Be This Week

The school year 1982-83 is drawing to a close this week. Parents, friends, and neighbors will say goodbye to twelve graduated seniors soon.

Graduation exercises will be held for the Class of 1983 at 8:00 p.m. in the high school auditorium on May 26. Nita Tarbut, a deaf teacher and speaker, will give the Commencement Address.

Graduation exercises for the Junior High will be held May 27 at 8:00 p.m. They will also be held in the high school auditorium.

Keith Williams, son of Mr. and Mrs. Kenneth Williams, will give the Valedictorian Address for High School, and Jennifer Wilson, daughter of W.C. Wilson and Margaret Wilson, will give the Salutatorian Address.

In Junior High graduation exercises, Mickey Burkett, son of Mr. and Mrs. Jim Burkett, will give the Valedictorian Address, and Kelli Williams, daughter of Mr. and Mrs. Kenneth Williams, will give the Salutatorian Address.

"Build Your Life on a Rock (God) instead of 'sand' and it will endure forever" was the advice given by Rev. Steve McMeans during Baccalaureate Services Sunday, May 22.

Seniors Jennifer Wilson, Keith Williams, Kevin Telchik, Stephanie

PERFORM DURING RECITAL-Front Row-Senior Stephanie Stephens, Michael Maxwell, Pat Underwood. Back-Amanda Anderson, Kelly Jo Ogden, Shayne Hess, Kimberly Maxwell and Tammy Voss.

PIANO AND VOICE RECITAL

Students of Mrs. Chesley Wilson were presented in Recital last Monday, May 19 in the Borden High School Auditorium.

Stephanie Stephens, a senior this year gave her last performance as a student at B.H.S. Stephanie played "Minute Valse" by Chopin as her final number. She is the daughter of Mr. and Mrs. Steve Stephens. Other students performing were Kimberly Maxwell playing "The Monkey and the Kingroo" and "Baby Circus Elephant" by Glover; Shayne Hess-"Balloons for Sale" by Bastien, "Noisy Woodpecker" and "Waltzing Poodle" by Garrow; Kelly Ogden,

vocalist,--"In My Own Little Corner" by Rodgers and Hammerstein; Michael Maxwell--"Circus Parade" by Bastien, "Trumpets" by Glover and "At The Trading Post" by Garrow; Tammy Voss--"Party Rag" by Bastien, "Granny's Serving Tea" by Glover and "Racing Sea Horses" by Garrow; Amanda Anderson, vocalist,--"ten Minutes Ago" by Rodgers and Hammerstein; Pat Underwood--"If" by Gates and "A Cat's Tail" by Glover; Kelly Ogden and Amanda Anderson, vocalists--"Your Cheatin' Heart", "Bye, Bye Love", "Rocky Top" and "Candle On The Water."

BACCALAUREATE SERVICE

Stephens, Mark Rice, Shellie Peterson, Cody Newton, Roscoe Massingill, Doug Love, Kelley Lankford, Stephanie Herring, and Julie Redding were honored with the Sunday morning services. As the twelve candidates for graduation proceeded down the aisle, Mrs. Sallie Wilson played

the piano.

Mrs. Kay Hopper provided special music for the services. She sang "Give Them All To Jesus", "His Eye is On The Sparrow", "Amazing Grace", and "Our Lord's Prayer". Rev. Pat Ray gave the Invocation and Mr. Mike Wharton the Benediction.

Borden County School News

COMMENCEMENT EXERCISES TO BE MAY 26

Commencement Exercises for the Class of 1983 will be held May 26, 1983 at 8:00 p.m. in the Borden High School Auditorium. Candidates for graduation are: Roscoe Massingill, Keith Williams, Doug Love, Kevin Telchik, Mark Rice, Stephanie Herring, Kelley Lankford, Cody Newton, Shellie Peterson, Julie Redding, Stephanie Stephens, and Jennifer Wilson.

Keith Williams, son of Mr. and Mrs. Kenneth Williams will give the Valedictorian Address. Jennifer Wilson,

daughter of W.C. Wilson and Margaret Wilson, will give the Salutatorian Address.

Mrs. Nita Tarbet, an unforgettable deaf teacher and speaker will give the Commencement Address. Special Music will be by Mrs. Cindy Hataway. The Class History, Prophecy, and Will will be given by Kevin Telchik, Doug Love and Stephanie Stephens, respectively.

Ushers will be Sammy Williams, Kim Wills, Dawn Holmes, Phillip Benevidez and Roxie Wolf.

JUNIOR HIGH GRADUATION

Commencement Exercises for the Junior High Class of 1987 will be held May 27, 1983 at 8:00 p.m. in the Borden High School Auditorium. Candidates for graduation are: Shelly Buchanan, Mickey Burkett, Dana Douglass, Rockie Harbor, Brice Key, Betty Kropp, Anita Martinez, Matthew Massingill, Michael Murphy, Julie Ridenour, Gerry Smith, Thommy Soto, John Stephens, Dawn Sternadel, Linda Sternadel, Kristi Stone, Donna Sturdivant, Sherry Telchik, Sherry Vaughn, and Kelli Williams.

Mickey Burkett, son of Mr. and Mrs. Jim Burkett,

will give the Valedictorian Address. Kelli Williams, daughter of Mr. and Mrs. Kenneth Williams, will give the Salutatorian Address.

Special Music will be by Lisa and Gena McLeroy. The Class History, Prophecy, and Will will be given by John Stephens, Kristi Stone, and Gerry Smith, respectively.

Ushers will be Kim Turner, Mindy Williams, Monty Floyd, and Will Phinzy.

Mrs. Kay Hopper provided special music for Baccalaureate Services.

Miss Steadman and Jennifer Wilson enjoying visiting after revealing secret Grandmothers and Granddaughters.

Simona Benavidez and Nancy Martinez opening gifts given by their Secret Grandmothers.

Kelli McPhaul and several secret Grandmothers get acquainted.

Grandparent's Tea

The Annual FHA Grandparents Tea was held in the Borden County School Cafeteria on Tuesday, May 17. Twenty-five grandparents attended the get-to-gather.

Mr. Tom McGuire, band director provided back-ground piano music. Mrs. Teddy Cooley, FHA teacher, welcomed the guests and expressed her thanks for their attendance.

The secret grandparents and daughters played a game--"To Tell the Truth" in which their identities were revealed. Gifts were exchanged and the grandparents and granddaughters visited and got to know each other. The two had been corresponding by mail for months.

Those grandparents attending were Mrs. May Shafer, Mr. and Mrs. Bill Stephens, Mrs. Kathy Billington, Mrs. Edna Holmes, Mrs. Sue Green, Mrs. Maxine Anderson, Mrs. Margaret Sharp, Mrs. Brenda Conner, Mrs. John Couch, Mrs. Nikki Lackey, Mrs. Dee Poston, Miss Doris Steadman, Mr. and Mrs. W.F. Johnson, Mr. and Mrs. W.W. Staggs, Mrs. Juanita Neeley, Mr. and Mrs. Ben Jarrett, Mrs. Glenn Swann, Mrs. Betty Currey, Mr. and Mrs. Vivian Clark, and Mrs. Bonnie Kington.

Refreshments were served to members and guests as Jennifer Wilson, Tammy Miller, and Samantha Porter sang "You Light Up My Life," "Surround Me With Love" and "Almost Like A Song."

Sunlight reflected from the far planet Pluto takes five hours and 40 minutes to reach earth.

WTC sets classes in photography

Do you have some negatives from graduation that you would like to make your own enlargements from? Are you planning a vacation later in the summer, and you aren't sure of the types of pictures you would like to take while you're away.

Consider enrolling in one or more of three summer photography classes to be

offered at Western Texas College during the nine-week session. Each class will meet one night a week.

Introductory photography (Jou 130), scheduled for Tuesdays only from 6-10 p.m., will offer topics like understanding cameras and films, how to take better pictures and getting the right setting for

the best effect.

Color photography (JOU 230, listed as News Photography), set Thursdays only from 6-10 p.m., will allow students to process film and print pictures from color negatives and slides.

Introductory Photography II (JOU 234), also set Thursdays or on an individual study basis, will

focus on projects of personal interest, but prior experience or completion of JOU 130 is recommended.

Each three semester hour classes will be limited to 15 students. Labs may be individualized for working students with families. Cameras, chemicals and other equipment will be provided.

STUDENTS HONORED DURING AWARDS BANQUET

HIGH SCHOOL TWIRLERS FOR NEXT YEAR-Shelly Buchanan, Kristi Stone and Rene Telchik.

Mr. James McLeroy, Superintendent and Doug Donley, Wide'receiver for the Dallas Cowboys.

Doug Donley, speaker for the Awards Banquet, autographs programs for Coach Bill May during the Annual Awards Banquet last week.

Athletes Outreach, Big Brothers and other charitable endeavors.

Called "White Lightning" by his teammates, Donley led Ohio State in receiving his last three years enroute to establishing career records for receiving yards and receiving touchdowns. He averaged 21.2 yards per catch in his career and was a

two-time consensus All-Big Ten Selection.

In his speech, Donley spoke on his career as a Dallas Cowboy and answered questions for an excited audience. The Benediction was given by Keith Williams.

U.I.L. Sponsors were recognized as follows: Dave Briggs, Math; Joe Copeland, Science; Duke

Frisbie, Boys Track and Football; Kay Hopper, One-Act, All Speaking Events; Netta Jarrett, Typing and Shorthand; Tom McGuire, Band; Lynn Maxwell, Boys Basketball, and Girls Track; Bill May, Girls Basketball and Tennis; Sue Jane Mayes, Debate and Journalism.

Students were recognized as follows:

"All men have the stars . . . but they are not the same things for different people. For some, they are guides . . . for others, they are no more than lights in the sky. You - you alone - will have the stars as no one else has them."

Gayla Newton

RECEIVES ASSOCIATE DEGREE

Gayla Ann Newton of Gail was among the students receiving associate degrees from Western Texas College in commencement exercises held May 13.

Dr. Robert L. Clinton, first president of the college, was the guest speaker. Clinton presently serves as director of the Texas Public Community-Junior College Association in Austin.

Miss Newton received the Associate in Arts degree. She has been a member of the WTCwomen's rodeo team and was named Most Valuable Member by Coach Bob Doty at the spring athletic awards banquet.

FLUVANNA DAY

Monday, May 23, was Fluvanna Day in the Senior Citizens Center. Residents of the Fluvanna community 60 years of age and older were the special guests.

Nelva Jones presented highlights of the history of Fluvanna in a short program starting at 11:30 a.m. Emily Hataway added musical entertainment.

GAIL RODEO TIME

The Gail Jr. Rodeo will be held at 8:00 p.m. on June 10th and 11th, 1983. The Rodeo will have all events.

This years Rodeo is being put on by Runt Sloan from New Castle, Texas. We will look forward to seeing you at the Gail Arena both nights.

SUPPORT YOUR LOCAL RODEO!

"All doors are open to courtesy." Thomas Fuller

Patrick Toombs

RECEIVES B.S. DEGREE

Patrick Toombs, son of Marge Toombs of Borden County, and the late Glenn Toombs, received his Bachelor of Science degree in Animal Business at Texas Tech University May 14.

While at Tech, Patrick was in the Farm House Fraternity.

He is the Grandson of Mrs. Euna Conner of Lamesa and Mr. and Mrs. Cullen Toombs of Snyder.

FIREWOOD WASTED

Tons of wood are buried each day in municipal landfills at enormous expense to taxpayers, municipalities and private businesses.

This waste material -- limbs, sawdust, chips, scrap lumber and wooden pallets -- can be converted into useable products and energy, according to Ann Holland, an urban forester with the Texas Forest Service in San Antonio.

"These are not just theoretical concepts requiring large capital investments. Many are small scale and low cost, some produce needed energy, and most are profitable," she said.

One example of converting a liability into an asset is wood chips. A Harris county tree service company sells wood chips to Houston Power and Light Company. Chips are mixed with coal and burned to generate electricity. Previously, the chips were hauled to the municipal landfill at considerable cost to the tree company, the City of Houston and its taxpayers. The tree company now makes a small profit on the waste wood and Houston's energy bill is reduced.

In the City of Atlanta, GA, three maintenance crews now haul large limbs and tree trunks to a central site that is open to the public for

WHAT'S HAPPENING AT WTC SUMMER SCHOOL SCHEDULED

The Western Texas College Science Division will be offering an expanded summer schedule during both the two six-week and the nine-week sessions, Dr. Shelby Hillis, division chairman, said.

These courses are designed especially for students entering the associate Degree in Nursing program, but they are fully accredited college credit courses and are open to all studnets. By enrolling in both six-week sessions, students can complete 14 hours required for the ADN program.

Science courses to be offered in the six-week sessions and microbiology (biology 247) in the first session, June 1-July 6, and human anatomy and physiology (biology 241) in the second session, July 7-Aug.11.

Psychology 231 and psychology 232 will be offered in the six-week session to complete the 14 hours.

Courses to be offered by the science division in the nine-week session are biology 145 and 146, astronomy 141, and chemistry 141.

Registration for all summer classes will be held May 31. Classes begin June 1.

For more information call 573-8511, extension 237.

WTC will be offering a variety of other courses in summer classes. Copies of the complete summer schedule may be obtained by calling the Students Services office at 573-8511.

SUMMER

WTC REGISTRATION

Registration for summer classes at Western Texas College will be held May 31. Classes will begin on June 1.

Day and evening classes will be offered in a nine-week session from June 1-July 28. There will be two six-week sessions with courses limited to Biology 237 and Psychology 231 in the first session and Biology 241 and Psychology 232 in the second session.

Additional information about WTC's summer classes may be obtained by calling the office of the registrar at (915) 573-8511.

ARENA WORK DAY

There will be an Arena Work Day June 8, 1983. It will be at 8:00 a.m.

EVERYBODY COME!!!

Memorial Day

A time to remember someone held dear.

A memorial gift to the American Cancer Society supports programs of research to find a cure for cancer, public and professional education, and services for cancer patients and their families. These programs are dedicated to wiping out cancer in your lifetime.

Your memorial gift today could be a gift of life tomorrow. For more information call your American Cancer Society Unit.

HORSESHOW

The Dawson County 4-H Horse Club is sponsoring an Open Invitational Horse Show, Saturday, May 28th, 10:00 A.M. at the Lamesa Rodeo Arena.

Halter and performance classes for PeeWee, Junior, and Senior horsemen are offered with lots of trophies and awards. Belt buckles will be awarded to the high-point horseman in each age group. A high-point county award will also be given.

State 4-H horse show rules will be used.

A concession stand will be available.

For further information, contact Dawson County Extension Office.

ARTS AND CRAFTS FESTIVAL

The 1946 Study Club and the O'Donnell Young Homemakers are sponsoring an arts and crafts festival and sale on July 4 in conjunction with the annual O'Donnell Independence Day Celebration.

The festival and sale will be held in the O'Donnell community center, beginning at 1:00 on Monday, July 4, until 7:30 p.m. All area artists are urged to become a part of this exciting event. All types of arts and crafts are welcome. Spaces for the exhibits will be \$20.00.

Anyone interested may call Linda Mensch, (806) 428-3253, or Jackie Beckham, (806)327-5635, for more information or an entry form.

SALONS CAN BE HARMFUL

The tanning season has arrived and you may find yourself complaining about not having enough time to lie out in the sun. You may have even considered buying a membership to a tanning salon.

Before you do, the Texas Medical Association warns that these salons can be harmful to your skin and eyes. So can excessive exposure to the sun.

Tanning salons use ultraviolet light, the same as that emitted by the sun. Ultraviolet light may either be short-wave (UVB) or long-wave (UVA).

Experiments on animals have linked artificial tanning with UVB to sunburn and long-term skin damage. UVB also can damage the cornea and lens of the eye, so protective goggles should be worn.

Artificial tanning with UVA has been found to be more suitable and safer than UVB, but this does not mean it is safe. UVA also may damage the eyes if protective goggles are not worn. It has damaged retinas and produced cataracts in laboratory mice.

In addition, your skin may be overly sensitive to UVA if you are taking medication such as antidepressants, oral contraceptives, antihistamines and a variety of other sensitizing drugs.

Both ultraviolet types can damage the skin. Three

common types of skin cancer that can occur are basal cell carcinoma, squamous cell carcinoma, and the worst kind, malignant melanoma. These occur most frequently on continuously exposed parts of the body such as hands, face and neck.

In basal cell carcinoma, cells just below the skin's surface become cancerous. A tumor may develop and become ulcerated. Caused by long-term exposure to ultraviolet light, this cancer will not spread to other parts of the body. Basal cell carcinoma usually occurs on the face, especially near the eyes or on the nose.

Squamous cell carcinoma attacks underlying skin cells that have been damaged by continuous exposure to the sunlight. With this type of cancer, a malignant, or life-threatening, tumor will develop. The cancer will usually occur on any region constantly exposed to the sun.

Malignant melanoma is the most serious form of skin cancer because it may spread. A cancerous tumor develops from a mole present since birth, but sunlight also can play a part in the development of the disease.

For these reasons, it is advisable to avoid long-term exposure to ultraviolet light whether in a tanning salon or on a beach.

The longest golf hole in the world is the 17th hole at a course in North Carolina. It measures 745 yards, and is a par six.

FIREWOOD

Con't from pg 4

cutting firewood.

Savings from the reduced amount of material at the landfill and the shorter hauling distance have been estimated at \$14,000 to \$18,000 per year. And that does not include the free firewood to heat thousands of Atlanta's homes," Holland said.

She estimates that tons of chips and sawdust are dumped into local landfills every day. With just a little effort and not much expense, all this material could be used as mulch, surfaces for hiking and jogging trails, and other wood products instead of being buried and occupying valuable landfill space.

"Time is precious, but truth is more precious than time."
 Benjamin Disraeli

LOCAL NEWS

The 5th grade class of Borden County School gave a surprise party for Melba Rinehart on Tuesday, May 10. Melba was the teacher's aide for this class when they entered kindergarten in 1976 and has been 'promoted' each year.

The 5th graders served sandwiches, cookies, cokes, chips and dips, from a table centered with a cake. The cake was a 'Mother Hen and her chicks' to honor Melba and the children she has been promoted with for these years.

They also presented Melba with a gift to show the love and appreciation they have for her.

Lisa and Gena McLeroy were privileged to escort Doug Donley from the Lubbock airport to Gail, Friday evening. Even with a delayed flight the three made it back in time for the Awards banquet in the school cafeteria where Donley was to be the guest speaker.

Ceiling fans might make you think of steamy island hideaways or "Casablanca." But they can also help you have a more comfortable summer right in your own home. From ornate brass to pastel plastic models, ceiling fans are back in style.

You don't have to have 12-foot ceilings to use a fan either. But for safety's sake, a fan should be suspended from ceilings that are at least eight-feet high, since the blades are at least one-foot from the ceiling. For cathedral ceilings, an extension pole can be used to place the fan at the desired height.

Choose a ceiling fan based on the size and shape of the room. Most fans range from 36- to 52-inches in diameter. The 36-inch fan is useful in narrow spaces like kitchens, porches and sunrooms. The 52-inch fan is generally used in larger areas requiring a wider, more uniform distribution of air movement.

As you shop for a fan, notice that some have metal housing and hand-rubbed wooden blades. Other models are housed in plastic with either metal or plastic blades.

Metal blades are potentially more dangerous than wood or plastic. Any sharp-edged or thin blade can injure your hand if it accidentally touches the moving fan. So as a safety precaution, select units with blades no less than 3-16 inch thick at the tip.

If you want a fan with variable speeds, be prepared for a little noise. Some ceiling fans with speed control make a noise that sounds similar to the humm from a faulty fluorescent light.

Ceiling fan lights range from small fluorescent tubes to ornate globes.

Carefully choose a place for a fan with a light. For example, a fan with a light fixture suspended from an eight-foot ceiling will probably be too low.

A fan hanging low over tables or furniture may not present much of a problem. But in traffic areas, the light could become an obstacle. Some manufacturers offer a low-profile model light for such areas.

Ceiling fans range in price from \$50 to over \$1,000. Higher priced models are often primarily decorative accessories cast of solid brass or finished with highly ornate trim, stenciling and hand-crafted detail. But the majority of models are in the \$100 to \$400 price range.

Installing a ceiling fan requires either an electrician or a competent do-it-yourselfer. The easiest form of installation is to use existing wiring from an overhead light fixture.

Don't install a fan near curtains that might become entangled in the blades. Also, keep it away from areas where people change clothes. A low fan can harm a person raising his arms to dress.

Although a ceiling fan should produce years of reliable service, check the manufacturer's warranty. Most makers guarantee the motor for five years, but be sure to ask about servicing. Some manufacturers supply a toll-free number to answer consumer's questions, others have a network of service centers, and some neglect to mention service. So before you buy, ask the dealer what type of service is available.

With the wide variety of style, features, and prices available, you should be able to find a ceiling fan to suit your needs both for style and comfort.

CANCER SOCIETY NEEDS FUNDS TO AID RESEARCH

There's one race which goes on all year long.

The American Cancer Society is racing to find a cure for cancer, a disease which will strike in approximately three out of four families.

In 1983 alone, about 855,000 people will be diagnosed as having cancer.

It's a race which the American Cancer Society is determined to win---and to end.

Victory, however, will not come cheaply.

The American Cancer Society needs your help to accelerate its pace in research. The Society's overall investment in research each year has grown steadily from \$1 million in 1946 to nearly \$58 million today, a sum which represents nearly a third of the total ACS budget. This year, the Texas Division's District 2 is sponsoring a special event --- a Memorial Day 500 --- to encourage West Texans to contribute to the Society's

race to the final victory.

The unique campaign focuses on memorials for cancer victims.

'As someone who was cured of cancer and who saw his best friend claimed by the same disease,' ACS Public Information volunteer Glen Larum of Fort Stockton said, 'I can tell you that we deeply appreciate the gifts which help underwrite the race against cancer.'

Memorials are often a request of the family of the cancer victim, he pointed out, because they know the contribution will be used to help fight the killer.

While memorials are often thought of during times of immediate grief, continuing memorials are something often overlooked, he said.

On Memorial Day, when West Texans think of friends or family members who have died, the American Cancer Society is reminding local residents that a gift to the ACS can be a lasting memorial.

"Most people who give to support cancer control do so through our annual education and fund-raising Crusade," Larum acknowledged, "and while we are grateful, we hope they will remember our memorials program."

If each of the Texas Division's units can achieve its goal of \$500 with this special Memorial Day event, it will increase the amount the Texas Division can add to its important work.

Memorials should be sent, specifying in whose memory the gift is made, to: Mrs. Dorothy Brown, P.O. Box 23, Gail, Texas 79738. Checks should be made out to the Borden County Cancer Society.

Members of each of the units in the Division are hoping to bring the black, checkered flag down on cancer.

"We want more than anything," Larum said, "to win the great race against this dreaded disease."

A Gift to the
AMERICAN CANCER SOCIETY
MEMORIAL
PROGRAM
gives a long way
in cancer control.

A Special
Memorial Day 500

Your AMERICAN CANCER SOCIETY is racing against a deadly foe—a life and death race for the victims of cancer.
We can win!
But, we need your help.

**AMERICAN
CANCER
SOCIETY®**

This Memorial Day, join your local unit of the AMERICAN CANCER SOCIETY in a special Memorial Day 500. If each Texas unit can raise \$500 for ACS research, together we can make a big difference.
It could mean winning the race this year.

NEWBORN SCREENING PROGRAM

CURBS MENTAL RETARDATION

A statewide screening program for preventing mental retardation in newborn babies has proven effective since its creation in 1965, say officials with the Texas Department of Health.

The Texas Newborn Screening Program is designed to prevent brain damage through early diagnosis and treatment of four genetic or congenital disorders--phenylketonuria (PKU), hypothyroidism, galactosemia and homocystinuria.

An article on the program appears in the February issue of Texas Medicine, the Monthly Journal of the Texas Medical Association. The authors are Bradford L. Therrel, (fc) PhD; Walter P. Peter Jr., M.D.; Lois O. Brown, a registered nurse; and Patricia E. Dziuk, a medical technician, all of the Texas Department of Health.

In 1965, the Texas Legislature passed a law requiring the Texas Department of Health to set up a program to test all newborn children for PKU. This disease produces brain damage resulting in severe mental retardation.

Through the years, the law has been expanded to require testing for the other three disorders.

The authors noted the effectiveness of the program by citing the number of cases diagnosed in 1980 and 1981. In 1980, the program detected 63 cases of hypothyroidism, seven of PKU, one of galactosemia and one of homocystinuria. In 1981, the totals were 87 cases of hypothyroidism, six of PKU, three of galactosemia and none of homocystinuria.

In a related editorial, two pediatricians with The University of Texas Medical Branch at Galveston noted

that the money spent on the newborn screening program is a good investment.

Drs. C. W. Daeschner Jr. and Gail E. Richards said the annual cost to Texas taxpayers is about \$680,000. "In contrast, the estimated cost of lifetime care of a single severely retarded person ranges for \$300,000 to \$800,000 in custodial expenditures alone, and the value of their lost contribution to their families and to society is incalculable."

The shoestring was invented in England in 1790. Prior to this time, all shoes were fastened with buckles.

The average car uses 1.6 ounces of gas idling for one minute.

47,300; Japan, 25,000; Spain, 15,300; and Taiwan, 14,000. Week's export shipments totaled 133,900 bales.

FRESH PEACH SOUR CREAM PIE

1 (9-in) unbaked pie shell
1/2 C. granulated sugar
1/2 C. firmly packed brown sugar
4 T. flour
1 C. dairy sour cream
5-6 med. peeled fresh peach halves

Blend sugars, flour and sour cream. Arrange peaches, outside down, in pie shell. Pour cream mixture over peaches. Bake at 450 degrees F. 10 minutes. Lower heat to 325 degrees F.; bake 25-30 minutes more. Cool before serving.

OUTLOOK

SPEAKER NAMED

Richard E. Lyng, deputy secretary of agriculture, will speak on farm policy aspects at the Cotton Foundation's Ninth Annual Cotton Outlook Conference in Fresno, June 7-8. The theme of the meeting will be "Efficiency Brings a New Day." Other topics will include conservation tillage, crop and export outlooks, and farm financing, according to the National Cotton Council.

LACK OF PLANTING WILL NOT AFFECT PIK PAYMENT: The United States Department of Agriculture has indicated payment-in-kind and paid land diversion payments will not be reduced if a farmer fails to plant his permitted acreage.

However, deficiency payments would be reduced by planting less than the allowed maximum.

Information was issued following questions raised by cotton and other growers who are behind in plantings because of cool and wet weather, the National Cotton Council reports.

EXPORTS REPORTED: Sales of U.S. cotton for the current marketing year decreased a net of 1,800 running bales during the week ended May 12, the National Cotton Council reported.

Major buyers were Hong Kong and Japan. Increases were offset by cancellations for South Korea and Taiwan.

Sales for 1983-84 delivery increased a net of 127,800 bales. They included Hong Kong,

AGRICULTURAL CONSERVATION PROGRAM

Sign up for Brush Control Practices under the 83 Agricultural Conservation Program (ACP) is now underway and will continue through June 6, 1983.

Due to the late spring and mesquites not leafing out until the last week in April, cost shares can not be approved for aerial spraying mesquite until after June 7th. Producers will then have a 50 day period in which to complete the practice.

Remember if you are interested in a brush control practice sign up by the June 6, 1983 deadline, limited funds are available, however approvals will be made on a conservation needs basis rather than, first come first serve.

CONSERVATION USE ACREAGE (CUA)

Yes, the wind is blowing. Yes, its very dry and Yes, the sand is moving and will until we get some rains. We know that no one wants their land to blow, but this is just a reminder that the CUA land must be protected from wind, water and soil erosion, as well as controlling weeds. Spot checks will be made on these acres and violations of these rules could cause a loss of benefits such as PIK entitlement or deficiency payments as applicable.

Any legume or forage sorghums used as a cover crop cannot be mechanically harvested but can be grazed after September 1st. The minimum width and size requirements are an acreage of one chain (66 feet) and 5 acres. Skips of four normal rows may be used as CUA, and be at least 160" from plant to plant (this is when you have a narrow row planting pattern).

LOANS FOR COTTON AND GRAIN SORGHUM

The final date to put your 1982 cotton and grain sorghum in the loan is May 31st.

BIDS ON 1982 COTTON

Farmers with CCC cotton loans in excess of their PIK needs have through the close of business May 26th to submit offers at the County Office to sell their cotton to CCC. All zero bids will be accepted. For more information, check with us at the office.

Obituary

HODNETT

Big Spring-- Services were held at 4 p.m. Saturday at Nalley-Pickle Funeral Home for Claude M. Hodnett, 66 who died at 12:20 p.m. Friday in a Big Spring hospital.

Hodnett had farmed in the Vincent area until 1956 when he opened the Sportsman's Paradise store at Lake J.B. Thomas. He operated the store until 1978. He moved to Big Spring in 1980.

Survivors include his wife, Edith; a daughter, Mrs. Virgil Whitaker of Odessa; a brother, Archie Hodnett of Big Spring; three sisters, Letha Williams of Big Spring, Mrs. Rena Wainwright of Dallas and Mrs. Robert Dunn of Lamesa, and one grandson.

SERVE YOUR COUNTRY AT HOME.

In the Army Reserve, patriotism begins at home. You serve in a local Reserve unit, one weekend a month and two weeks a year. And earn \$1,200 per year to start.

A wide choice of skill training is available. Many skills are in technical fields. Most of them have application in civilian jobs.

Call your Army Reserve representative, in the Yellow Pages under "Recruiting."

ARMY RESERVE. BE ALL YOU CAN BE.

Traveling Healthy

PRE-TRIP PREPARATION

Nobody looks forward to having a well-planned vacation ruined by illness. The best way to avoid most costly medical treatments abroad is to anticipate your health needs in advance.

If you travel with medications, pack double the amount you normally use. Carry copies of your prescriptions, preferably in Latin, so that they will be understood where no English is spoken. And ask your doctor about necessary immunizations, such as typhoid and malaria vaccinations. You may also want to talk to your doctor about another more common vacation-spoiler, traveler's diarrhea.

If left untreated, traveler's diarrhea will average four days. Some intrepid travelers simply let it run its course, but when vacation time is short, you'll want to be prepared in advance. Your physician can prescribe a fast-acting anti-diarrheal medicine, such as IMODIUM (loperamide HCl) capsules, which provide fast relief within one hour after

Before you travel, ask your doctor for an anti-diarrheal medication like IMODIUM.

the initial dose. IMODIUM reduces cramps and also prevents loss of water and electrolytes, which are important for maintaining the body's delicate chemical balance. And you only take it when needed. Traveler's diarrhea is seldom a serious condition. However, if symptoms persist or if you develop a fever over 101 or notice blood or mucus in your stool, consult a doctor.

The best vacation plans frequently result from taking an active part in setting your own travel arrangements and priorities. Keeping traveler's diarrhea in mind—and planning your health-care needs in advance—can help make the difference in your vacation.

Your County Agent Says

by Alan Day

There are several small items that I need to touch on in this week's article. The House of Representatives turned down the adoption of new brucellosis regulations this week. This could mean a federal quarantine of the state. I'm not sure how this affects the new regulations proposed by the TAHCs scheduled to go into effect on July 1, 1983. It might be best to talk to your veterinarian and read the newspaper.

Grasshoppers are already present in many pastures throughout Borden County. Be advised of this fact that several control measures are available. We were lucky last year in that we didn't have a problem with grasshoppers.

This may not be the best year to spray mesquite according to the experts. The three months preceding spraying of mesquite should have normal to above normal rainfall. We obviously are behind on moisture for the last three months. You should evaluate your own situation.

If you are going to spray, keep the following items in mind: Watch the foliage development of mesquite. Mesquite plants with a large quantity of leaves are ripe for spraying once the leaves are fully extended and dark green in color. Usually mesquite plants that have fully developed dark green foliage and are past full bloom with small pods developing are in the best condition for spraying.

Soil temperature is also a key to good mesquite control. Best mesquite kill is usually obtained when the soil temperature at the

18-inch depth at spraying time is 75 degrees F. or above.

Usually soils on upland range sites and soils with a higher sand content warm up faster than bottomland and clay soils. So root kill of mesquite is usually higher on upland sites. Frequent rains during the spray season can reduce root kills because mesquite plants will continue to add new leaf growth. Delaying spraying for 10 to 21 days after a significant rainfall to allow new growth to mature will increase root kill.

Before spraying mesquite, you should also check for foliage damage caused by insects, disease, frost or hail, advises Welch. If a significant number of mesquite plants have been defoliated, root kill is usually reduced. Allow foliage produced after damage to mature before applying herbicides.

Three registered and effective herbicides for mesquite control on Texas rangeland by aerial broadcast spray are 2,4,5-T; and a 1 to 1 mixture of picloram (Grazon PC) and 2,4,5-T; and a 1 to 1 mixture of dicamba (Banvel) and 2,4,5-T. The picloram--2,4,5-T and dicamba--2,4,5-T Mixtures must be tank mixed because commercial formulations are no longer available. Use these herbicides at 1/2 to 1 pound acid equivalent per acre. Read and follow directions on the herbicide container before applying any herbicide, cautions the specialist.
