STUDENT TRANSFERS

The deadline for inter-district transfers is May 1, 1987. Anyone who wishes to transfer their children into the Borden County Independent School District for the 1987-1988 school year must submit their transfer application by May 1.

Transfer application forms may be picked up in the office of the Superintendent and returned to same by May 1. Do not use old forms as there have been changes since last year. Instructions will also accompany the forms that you will get.

After a transfer application has been received by the district, it will be reviewed and approved or disapproved. A copy will be sent to the parent making the request to let them know the status of

the transfer request. If the student transfer has been approved by the district, it will then be sent to the Texas Education Agency. Section A of the court order Civil Action 5281, "Student Transfers," requires the Texas Education Agency to review all student transfers and to insure that they comply with the terms of the order. You will be notified of the status of your transfer request by Texas Education Agency.

Transfer applications are not being mailed out this year as they have been in the past. If you have questions concerning the transfer of your children, there will be someone in the office to answer your questions when you pick up your transfer application.

PRAYER CORNER

.....Submitted by a reader

Dear Heavenly Father, Thank You for helping us to live a life that is pleasing to You and for sending Your Son, Jesus (Mark 1:11) as our example. Help us to learn more about Him so that when He returns to gather His people (Mark 13:27), we will be ready to receive a warm welcome into Heaven (1 Peter 1:11). Although we do not know the hour (Matthew 24:36), please illuminate the "warning" scriptures in the Bible so that we will be ready. In Jesus' name we pray, Amen

1 Peter 3:10: "But the day of the Lord will come like a thief. The heavens will disappear with a roar; the elements will be destroyed by fire, and the earth and everything in it will be laid bare." Luke 17:35 & 36: Jesus said, "Two women will be grinding grain together, one will be taken and the other left. Two men will be in the field, one will be taken and the other left.

John 3:3: Jesus declared, "I tell you the truth, unless a man is born again, he cannot see the Kingdom of God." John 14:6: Jesus said, "No one comes to the Father except through

Me." Romans 14:12: "...each of us will give an account of himself to God."

**BEDDING PLANTS FOR A
COLORFUL LANDSCAPE**

Texas gardeners are using more and more bedding plants for landscape color.

Plants like petunias and marigolds provide a colorful accent to garden beds, borders and containers, and many can also be used as cut flowers in the home.

To help gardeners select from the wide variety of plants available, the Texas Agricultural Extension Service has released a list of recommended bedding plant varieties for 1987. These plants have been evaluated in trial gardens and home landscape demonstrations throughout the state and are proven performers for Texas.

PETUNIAS

The Madness series of petunias have been selected for their tolerance and long-lasting flowers. These plants hold up well in the tough Texas climate and will bloom long into the summer months. Nine varieties in this floribunda class includes White Madness, Summer Madness, Sheer Madness, Pink Madness, Coral Madness, Red Madness, Rose Madness, Plum Madness and Burgundy Madness.

MARIGOLDS

The Inca series of Marigolds have done extremely well in Texas trial gardens for several years. These plants have large blooms and a free-flowering habit. Incas grow to about 14-16 inches in height and are available in gold, orange and yellow.

Many gardeners prefer shorter marigolds, and this is where the Queen series comes in. These plants have large, 2-inch flowers with a very compact growth habit (10-12 inches in height). Varieties include Golden Queen

Victoria (deep gold flowers); Honey Sophia (russet red with yellow edges); Orange Sophia (pure orange flowers); Queen Beatrix (golden yellow with red); and Queen Sophia (scarlet).

BEGONIAS

Although begonias are available in several colors, red has proven most popular, with Scarletta and outstanding performer. Plants are free-flowering and reach a height of 12-14 inches. Their compact growth habit creates an extremely attractive plant.

SALVIA

Red salvia can be one of the most striking plants in the garden. However, many varieties just won't stand up against Texas' tough climate. Red Hot Sally flowers early and will continue to flower well into the dog days of summer. This plant has strong spikes of beautiful red blooms and reaches a height of 10-12 inches.

ZINNIAS

Most of the previously mentioned bedding plants are grown from transplants. Zinnias, on the other hand, are generally direct-seeded in flower beds or containers. Since zinnias tolerate heat and drought, they are well-suited for Texas gardens.

Size is critical in selecting zinnia varieties since they range from 2 to 2 1/2 feet down to 6-10 inches tall. Smaller varieties generally are most popular. Thumbelina reaches a height of about 10 inches and forms a dense mound of flowers. Lilliput is slightly taller at 14-18 inches, comes in a balance of colors, and has a

compact growth habit. Both Thumbelina and Lilliput have some disease-resistant characteristics.

GERANIUMS

The Glacier series of geraniums have exhibited early-flowering characteristics and good heat tolerance. Although these plants thrive in full sun, most will tolerate partial shade. Plants reach an average height of 14-18 inches and branch freely to form a dense growth habit. Varieties in this series are Glacier Crimson, Glacier Salmon and Glacier Scarlet.

IMPATIENS

Although impatiens are somewhat difficult to manage during the hot summer months, they are among the most popular plants available. The Super Elfin series has been a favorite among Texas gardeners for years, and several varieties are available in a rainbow of colors. Plants reach a height of 8-10 inches with large, long-lasting flowers. Impatiens also can be used in containers and hanging baskets. At present, there are 15 varieties in this series: Blush, Bright Eyes, Coral, Fuchsia, Lipstick, Orange Impatien, Orchid, Pink Impatien, Red, Rose, Salmon, Salmon Blush, Scarlet Impatien, Twilight and White Impatien.

VINCA (periwinkle)

There is probably not a bedding plant more adapted to Texas growing conditions than vinca or periwinkle. These low-growing, bushy plants can tolerate extreme heat and are drought tolerant. The Little series of vinca are a favorite of gardeners throughout the state. Plants grow 10-12 inches tall. Little Bright Eye (white with red eye) and Little Pinkie have proven to be the best two varieties for Texas.

HARD FACTS ABOUT EASTER EGGS

One of Nature's most nutritionally dense foods may be hiding in your Easter basket, disguised as an egg.

Eggs are a good source of iron, vitamin A and riboflavin which are part of the Recommended Dietary Allowance.

Eggs are considered nutritionally dense because of the large amount of nutrients they provide per calorie. This makes them popular with weight conscious consumers.

They are also light of the budget. By government standards, one dozen large eggs weigh 24 ounces which makes it easy to figure their cost efficiency. For example, if one dozen large eggs cost 90 cents, that means they are 60 cents a pound, compared to over one dollar a pound for meat and other sources of protein.

Cholesterol levels should also be considered. Eggs are high in cholesterol, which has been linked to heart disease. If your doctor has put you on a low cholesterol diet just eat the whites as all the fat and cholesterol are contained in the yolk.

To hard cook eggs, place them in a pan and cover them with an inch of tap water. Bring them to a boil, simmer for 20 minutes, then cool immediately. You need to make sure the eggs are hard after boiling causes the whites to become rubbery.

Hard cooked Easter eggs will last, unpeeled in the refrigerator, up to a week. Do not keep them in your basket too long though, because they will only last two or three days at room temperature.

MULTI-COUNTY PECAN SHORTCOURSE

Lynn County will host our 1987 Multi-County Pecan Management Short-course on April 21, 1987 at the Electric Co-op Building located at 1800 Avenue J. Tahoka, Texas.

Dr. George McEachern will be on hand to lead the discussion on management of pecan and fruit trees for west Texas.

The shortcourse will also include a tour of an area pecan orchard and a 120 acre grape vineyard.

The time schedule will be as follows:
8:30-9:00 a.m. Registration & coffee
9:00-10:00 a.m. Pecan & Fruit tree management
10:15-12:00 noon Tour--Pecan orchard and grape vineyard

This should serve as an excellent opportunity for you to

get the latest insight on Pecan and Fruit tree management and also to visit with Dr. McEachern on any freeze damage your trees may have suffered.

TOO TIGHT?

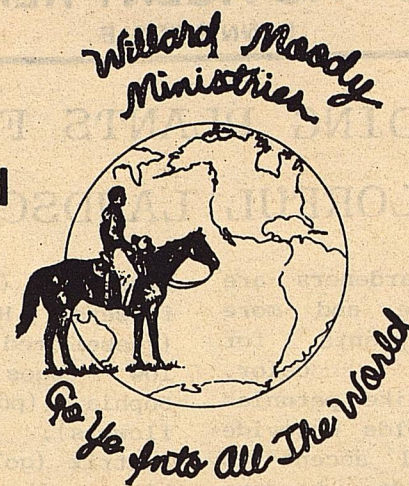

Loosening your collar may help you see better. A Cornell University researcher discovered that tight shirt collars can restrict blood flow to the head, thereby impairing circulation in the retina of the eye.

A collar that is as little as a half-inch too tight can cause significant difficulties for people whose work depends on accurate vision, such as pilots, machine operators and data processors.

High blood pressure adds to the workload of the heart and arteries, which may contribute to stroke, heart attack, kidney failure, and congestive heart failure. There is accumulating evidence that lowering blood pressure reduces the risk of stroke and coronary heart disease, according to the American Heart Association.

LOCAL EASTER MUSICAL

The First Baptist Church of Gail was the setting of an Easter Musical drama presented by the children's choir, April 12th.

The drama, entitled "Sonrise", depicted events prior to and after Jesus' death and resurrection. The twenty-six children

START THE BALL GAME WITH A JUMP BALL IN CENTER COURT.

PEE WEE BASKETBALL

April 7, in the Borden County High School gymnasium, an exciting event took place. The Globetrotters didn't come, it wasn't MTV, it was the day of the Annual Pee Wee Basketball games. A large crowd of parents, grandparents and other people interested in a fun time, came to see the 3rd, 4th, and 5th grade girls and boys play killer round ball.

Duke Frisbe, Mike Brown and Joe Bond, Coaches at Borden Co. were the referees. The crowd gave them the usual hard time as they tried to call the running with the ball, the hitting with the elbow and the stepping on with the foot. Coach Bill May was the score keeper.

The fifth grade girls and boys demonstrated their ball handling skills with different drills that they practice in P.E., such as passing the ball around their legs and dribbling with two balls as they ran to the opposite end of the court.

Although there were not really any losers, the scoreboard indicated that:
 3rd grade Red Shirts-4
 White Shirts-6
 4th grade girls Red shirts-2
 White Shirts -8
 4th Grade Boys Red Shirts-16
 White Shirts -10

The fifth grade girls and boys played two separate game but combined the score, which was:

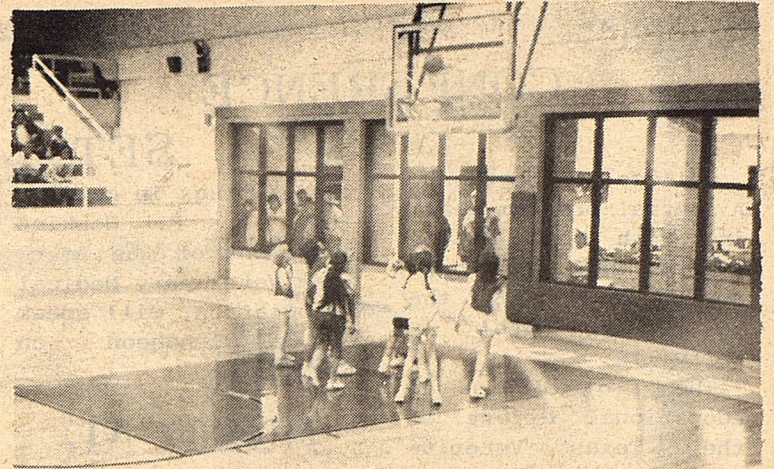

Red Shirts-16, White Shirts-30
