Serving the Counties of Borden, Dawson, Garza, Howard, Lynn & Scurry

L-R Wendy Corrigan, Representative Larry Don Shaw, Saundra Evans county chairman, and Pam Hess Borden County delegate. Texas State Democratic Convention held in Austin June 27-28.

State Democratic Convention a Success

The Texas Democratic Party State Convention, held June 27-28 in Austin was an extremely successful kickoff for the 1986 election campaign. A crowd of delegates, alternates, guests, and officeholders estimated at up to 10,000 interrupted Governor Mark White's speech 48 times with applause or standing ovations. The Governor forcefully listed his administration's achievements in the fields of education, transportation, water and economic development and contrasted his record with that of Bill Clements, who governed during the days of high oil prices and state revenues but invested none of those plentiful tax dollars in programs needed for our future.

The Governor also congratulated our teachers on their outstanding showing on the teacher test, saying he was sorry for the emotional stress the test caused but praising teachers for proving correct his support of

better salaries and academic excellence. The Governor pledged he would not back down from our commitment to quality education and told teachers they would not have to pass another test.

Senator Lloyd Bentsen and Majority Leader Jim Wright reminded delegates that the failed energy, agriculture, and trade policies of Washington Republicans should bear a great deal of blame for our economic woes. They reminded us that our Democratic Congressmen, the Governor, and other statewide officials are leading the fight for legislation to help our farmers, oil industry and manufacturing industries despite Republican opposition to pro-Texas bills such as the oil-import fee proposal.

The delegates responded enthusiastically to the call for grassroots help to make 1986 a Democratic year. Several thousand filled out pledge

Crago Colt Breaking and Horsemanship Clinic Scheduled

A colt breaking and horsemanship clinic and seminar has been scheduled for July 26-30 in the Borden County arena. Cliff and Chris Crago from Graham, Texas will conduct the five day clinic.

Cliff and Chris Crago are professional horse trainers specializing in cutting and reining. Chris is also into the barrel racing futurities. They ride and start many horses for the public and have prospects for sale at all times.

There will be a \$25. per person deposit required by July 12. The late fees is \$12. extra per person.

Participants enrolled in either class are encouraged to observe any or all of the other classes at no extra charge. It is especially advantageous for everyone to observe the 1st day or two of the colt class.

Colt class fees is \$150., beginning on Saturday morning, 7:30 a.m., July 26. One horse per person for 5 days, thru July 30, Wed. Each additional horse is \$100. Depending on the amount of entries this class usually lasts all day on the 1st day, then til noon on the last 4 days. Unhalter broke colts will be an extra \$50. Students enrolled in this class may be advised that the Crago's prefer to start colts in a ring snaffle, eggbutt snaffle or something similar.

Adult Horsemanship Class fees is \$100. per person, beginning on Sunday, probably after lunch. The time will be set after the clinic starts. It is possible that the horsemanship classes will be held after supper, depending on the afternoon temperatures. This class will go thru Wed. July 30. A person riding less than the full 4 days will pay \$30. per day. Riders in this class are to use whatever gear the horse and rider are accustomed to, but be advised that ring or eggbutt snaffles will get more accomplished. If you

have one or can borrow one bring it.

4-H Horsemanship Class fee is \$40. No person over the age of 20 yrs. old (as of the date of the clinic) will be entered in this class. This class starts on Sunday, either during the afternoon or after supper, depending upon afternoon temperatures. A person riding less than the full 4 days will pay \$12. per day. This class will go thru Wed., July 30. Riders in this class are to use whatever gear the horse and rider are accustomed to. An adult (20 years, or older) is not allowed to enter the 4-H horsemanship class. A kid is allowed to enter the adult horsemanship class.

It is possible that both horsemanship classes will be held at the same time, one class at the north end of the arena and the other at the south.

Problem horses will be worked with on the basis of the fee being determined according to the

degree of the problem.

There will be no arena fee. Spectator fee is \$10. per person per day. This does not include immediate family members of the student.

There will be many pens available at the arena for horses overnight. Water faucets are nearby. Bring your own feed troughs, buckets, bailing wire, etc.

If you have a colt that needs starting and needs a rider, or would like to be in the clinic but need a horse, contact us and we can put you in touch with local friends to fit your needs.

Both the Gail Cafe and the Coyote Country Store in Gail will be open to serve you.

This clinic promises to be a valuable learning experience for all students.

For more information, call; Mike or Susan Stephens 915-399-4511 or Dennis Pool 915-856-4336 or 856-4426; or Cliff or Chris Crago 817-362-4525.

4-H Horse Project Point Night Results

The first of a series of three point nights for the Borden Co. 4-H horse project was held in the Gail arena Tuesday night.

Placings by age groups and points given in each class are listed below

SUMMER CARE OF PECANS

Pecans need special attention in the summer. That means applying zinc sprays controlling aphids and scab, pruning and irrigating.

Pecan scab will likely be a serious problem due to recent rains. Fungicide sprays of Benlate, Topsin or Super Tin will prevent scab from overtaking the entire shuck. Homeowners should use Benlate. Scab can develop on pecans in any part of Texas as long as the weather is wet and warm.

Pecan growers have had to worry about sticky, sugar-covered leaves every summer due to aphid infestations. Zolone or malathion sprays can give homeowners good control.

Summertime drought is a sure bet every year, and pecans will suffer if they do not receive at least one inch of water per week from June through September. Actually, two inches is optimum. A mature pecan tree will use more than 100 gallons of water per day. If trees go more than three weeks without water, serious crop loss can occur.

Weeds and grass also use soil moisture, so keep competitive vegetation to a minimum under pecan trees. With shallow soil and vegetation under trees, a weekly irrigation will be needed.

On young pecan trees, weeds slow down growth more than anything else, so use a contact herbicide such as Roundup to keep the limb spread area weed-free.

Democratic Convention

Con't. from Pg. 1

sheets, saying they would volunteer for various projects to help secure a November victory. Delegates also contributed almost \$50,000 from their pockets to offset convention expenses and get the campaign effort underway, while smaller, select fundraisers brought in additional funds for the Democratic effort.

State Democratic Party Chairman Bob Slagle was overwhelmingly reelected to his fourth term as Chairman. The vote total was:

Bob L. Slagle 5618; Preacher Hays of Dallas 26; LaRouche candidate Colleen Gibson 0; Abstentions 22.

Ms. Bambi Cardenas-Ramirez of San Antonio was elected Vice-Chairman. Mr. Bill Wright of Houston was elected as Vice Chair for Finance, Frank Thompson and Ronnie Luna were reelected to the offices of Treasurer and Secretary respectively.

In an interesting sidelight, Lyndon LaRouche candidate for Chairman Collen Gibson received a unique rebuke from delegates. After being admonished by Chairman Slagle to

Pecan trees less than four years of age should have only one main trunk. If two, three or four trunks develop, simply cut the weaker ones out and leave the strongest one.

Young trees also should receive zinc sprays every two weeks to insure maximum growth. Make your final nitrogen application in June, because later applications can, and probably will, result in freeze injury in December or January.

Freeze injury is showing up in parts of Texas on mature pecan trees. Sometimes it is a limb or two, but occasionally, it is the entire tree. Warm winters mixed with an occasional cold spell are much more serious than a long, cold winter.

Varieties which were productive last fall such as Wichita or Mahan have been hit the hardest. Since the pecan has a short chilling requirement of only 400 hours, it can have active sap as long as weather is mild. Consequently, weak pecan trees did not go completely dormant, and when freezes do occur, freeze injury results. Homeowners should wait until mid-summer to prune out dead limbs to avoid removing limbs which may recover.

The information given herein is for educational purposes only. Reference to commercial products or trade names is made with the understanding that no discrimination is intended and no endorsement by the Cooperative Extension Service is implied.

quit hissing and booing, his opponent could speak, the delegates, in a spontaneous action, silently rose to their feet and turned their backs on the LaRouche speaker. Such action was unprecedented at a Democratic convention and is a clear indication of how rank-and-file Democrats feel about the LaRouche movement.

The world's first parachute jump from a balloon was made by Andre Garnerin of France in 1797.

The globefish staves off predators by gulping a large quantity of water, till it becomes simply too large to be swallowed by its enemies.

Letter

To the Citizens of Borden County:

We would like to express our thanks to all of you for a wonderful day at the Old Settlers Reunion June 29, 1986. We enjoyed the worship service, great food, music, the museum and most of all, visiting with everyone.

We lived in Borden County only 4 short years but it seems like home and it is nice to go home again to visit with friends and neighbors. Thanks again for a wonderful day and one we will long remember.

Yours truly, Billy & Helen Price

McLeroy Graduates from Tech

Gena Ann McLeroy of Gail was among more than 1,700 students at Texas Tech University to receive degrees in commencement exercises at the conclusion of the 1986 spring semester.

Gena earned her degree in bachelor of business administration in accounting, cum laude. She is the daughter of Mr. and Mrs. James McLeroy of Gail.

The children of

CALCIUM FORTIFIED FOODS CAN NOT REPLACE DAIRY PRODUCTS

The food industry is now marketing a number of calcium-fortified foods to nutrition conscious women who believe they may be at risk for developing osteoporosis.

Osteoporosis is a disease of brittle and porous bones that affects millions of middle aged to elderly women, making them more prone to fractures.

Calcium-fortified foods currently on the market include some brands of diet carbonated soft drinks and non-carbonated soft drink mixes, bread and flour. Most are prominently labeled and advertised as having added calcium.

Eating calcium fortified products in a balanced diet that still includes dairy products may be helpful, especially since the Recommended Daily Allowance of 800 milligrams of calcium per day is thought by many medical experts to be too low.

However, when dairy products are replaced with calcium fortified foods, other important nutrients from dairy products such as protein, vitamin D, riboflavin, B-6 and B-12 are lost.

It is especially important that teenagers and children eat dairy products both for the calcium and the other nutrients they provide.

Some of the powdered drink mixes supply 100 percent of the RDA for calcium, but other fortified foods provide a smaller

percentage. For example, two slices of bread made with calcium fortified flour supply only 10 percent of the RDA for calcium.

Adults can be sure of getting sufficient calcium by drinking the equivalent of 2 1/2 cups of milk each day. Children under 9 need 2-3 cups, 9-12 year olds should have 3 cups, and teenagers need 4 cups of milk a day.

A cup of yogurt, 1 1/3 ounces of cheese, 1 1/2 cups of ice cream or 2 cups of cottage cheese all supply the same amount of calcium as a cup of milk.

Consumers should also realize that eating calcium-fortified foods will not necessarily prevent osteoporosis, since general nutrition, hormone balance and exercise--in addition to calcium intake--have all been found to affect the condition.

While calcium rich dairy products are a necessary part of a balanced diet at any age, when it comes to preventing osteoporosis, they may have their most critical effect early in life.

A study conducted recently at the University of Pittsburgh measured the density of certain bones in middle aged women and found that those who drank milk with every meal up until the age of 35 had significantly more minerals in their bones than those who rarely drank it.

The study emphasizes the fact that bones reach their lifetime peak for mineral density during early adulthood and then start to deteriorate. The peak mineral density is determined part by genetics. But the amount of milk a person drinks during the first 20-30 years is believed to determine whether a person's bones attain optimum density.

Whether or not a woman chooses to buy special calcium-

fortified foods, probably the best thing she can do for herself and her children is to make sure that they get plenty of milk and other dairy products.

ASCS NEWS BY JERRY STONE

limited cross compliance in 1987

The 1987 farm programs for sheat, feed grain and cotton will contain limited cross compliance requirements. This means that to be eligible to participate in the program for one crop on the farm, the producer would be required to plant within the crop acreage base for each other program crop on the farm. Cross compliance is not a requirement under the 1986 farm programs. Therefore, no acreage limitation was imposed on the nonparticipating crops.

The 1987 programs also will permit acreage devoted to conservation uses, but no non program crops, to be designated under the 50-92 provisions. This provision means that a participating farm, with at least 50 percent of the permitted acreage planted to the program crop, may earn deficiency payments on 92 percent of the permitted acreage. Also, an acreage equal to the difference between the planted acreage and the program crops acreage must be devoted to conservation uses and designated for "Substitution" and acreage conser-

vation reserve as applicable. Haying and grazing of these acres will be authorized if requested by the State ASC committee.

Farmers who participate in the 1987 programs will not be allowed to produce alternate crops on acreage conservation reserve (ACR) land. Grazing of ACR will be authorized if requested by the State ASC committee, except during a five-consecutive month period designated by the committee. Haying will be prohibited. Program participants will not be permitted to upwardly adjust any crop acreage base with a corresponding downward adjustment in other crop acreage bases on the farm.

Other 1987 farm program determinations will be announced as they become available.

JULY 15, LAST DAY TO REPORT CROP ACRES

Farmers in Borden County who have planted cotton, grain sorghum and other spring seeded crops have only a few days to report the acreage to the Agricultural Stabilization and Conservation Service (ASCS) by the July 15 final

reporting date.

To date, only a few farms in the county are certified and eligible for farm program benefits.

Before program participants can receive the benefits of price support, deficiency payments and land diversion payments, the entire farm must be certified correctly. To be sure of planted acres, farmers can request and obtain measurement service from ASCS for a nominal fee. The fee covers the cost of the farm visit and acreage determination. This service is valuable not only to producers participating in the acreage reduction and land diversion programs, but to any farmer who desires an accurate acreage for any reason.

After farmers report their 1986 planted, diversion, conservation reserve and other program acres, ASCS will randomly check farms to verify that the acreage reports are accurate.

Farm program participants are required to report crops and acreages planted and the uses to be made of these crops, acreage conservation reserve, and acres

diverted for payments. Non-participants need to report their crops to insure future benefits and to protect acreage bases.

Producers who have not certified their farm with ASCS should do so before the July 15 deadline.

WHEAT POLL BALLOTS

Ballots were mailed to all wheat producers to determine whether they would favor imposing mandatory limits on wheat production. This is not a referendum, but it is a way for wheat producers to express their desires about a farm program. Ballots must be returned by July 14th.

Obituary

LUCILLE GRIFFITH

Services were conducted at 4p.m. Thursday at the Calvary Baptist Church in Rotan for Lucille Griffith.

Mrs. Griffith, 76, died Tuesday in a Sweetwater hospital. Interring at the service was Rev. A.H. Williams and burial followed in the Rotan Cemetery.

Born in Mason, she moved to Rotan from Brownwood 42 years ago. She was a member of the Calvary Baptist Church.

Survivors include her husband Herman G. Griffith of Rotan Three sons, Bobby Griffith of Snyder, Gene Griffith and Kenneth Griffith of Rotan three daughters, Estelle Rollins of Snyder, Wilma Odom of Taylor and Nancy Newman of Waco and brother Vernon Hennesy of Colorado two sisters, Jessie Worley and Elva Johnson, both of Fresno, Calif.; 18 grandchildren, including Tom Rowe of Gail and 12 great-grandchildren.

Emergency Medical Service

The regular monthly meeting of the Borden County Emergency Medical Service was held Tuesday, July 1, 1986, at 6:30 p.m. in the Borden County School. EMT's present were Gerald Boyd Pat Ray, Buster Taylor, Nelva Jones, Patrick Toombs, Dorothy Browne and Lisa Ludecke. Guests present were Micah Hensley, Rachel, Melissa and Jessica Ray. The next meeting will be Tuesday, August 5, 1986, at 6:30.

The basic EMT course is still in progress. Those persons still in attendance are Kent Holmes, Tom Rowe, Jo Anne Trussel, Kandy McWhorter, Larry and Kathy Billington, Mary Ruth Gray and Bill and Dorothy Buchanan.

NOTICE OF APPLICATION

RAILROAD COMMISSION OF TEXAS
OIL AND GAS DIVISION
DISTRICT 8A
DATE OF ISSUANCE: June 5, 1986
CASE NO. 101,681

NOTICE OF APPLICATION

NOTICE IS HEREBY GIVEN that the Applicant, Union Oil Company of California, P. O. Box 671, Midland, TX 79702, has made application for a spacing exception permit under the provisions of 16 Texas Administrative Code 3.37 (Railroad Commission Statewide Rule 37). Applicant Seeks exception to the between well spacing requirement to drill Well No. 276, Reinecke Unit Lease, 4358.28 Acres, Section 53, Block 25, H&TC RR Co. Survey, Reinecke Field, Borden County, being 10 miles in a northwest direction from Vincent, Texas.

The location of this well is as follows:

3957' from east line and 3945' from south line of lease.
1265' from west line and 1305' from south line of survey.

Field rules for the Reinecke Field are 467-1200. 40 Acres.

This well is to be completed at an approximate depth of 7000 feet.

PURSUANT to the terms of Railroad Commission Statewide Rule 37(h) (2) (A), this permit may be granted administratively if no protest to the application is received. An offset mineral interest owner and lessee is entitled to request a hearing on this application. They must be prepared to appear at the hearing either in person or by qualified representative and protest this application through cross-examination or presentation of a direct case subject to all applicable rules of evidence. If a hearing is called, the burden of proof of the need for an exception is placed on the applicant. A protestant should be prepared, however, to establish your standing to protest as an affected person, if challenged. If you have questions regarding why the applicant is seeking this exception, contact the Applicant's representative, J. R. Hughes District Drilling Supt., at (915) 682-9731. If you have any questions regarding standing or other matters, please contact the Commission at (512) 463-6887.

If you wish to request a hearing on this application, you must fill out, sign and mail or deliver to the Austin Office of the Railroad Commission of Texas notice of intent to appear in protest. A copy of the intent to appear in protest must also be mailed or delivered on the same date to applicant at the address shown above. This intent to appear in protest must be received in the Railroad Commission's Austin office by July 18, 1986. If no protest is received by said date, the requested permit will be granted administratively, to be effective the following day.

This Notice of Application requires publication.
