

State Capitol NEWS

Austin — District, county, city and precinct officials learned the hard way from the Texas Supreme Court that the constitution and law mean what they say.

Since 1876, the constitution has provided that a federal or state official is not eligible to serve in the Texas Legislature "during the term to which he was elected" to his previous office.

Even resignation before filing will not cure the ineligibility, the high court held in ruling

former Bexar County Commissioner Sam Jorrie off the ballot as a House candidate and in refusing to order ex-Fort Worth City Councilman Doyle Willis certified as a Senate candidate.

Jorrie had resigned February 1, and his successor has been named. Willis' place was automatically vacated when he filed for the Senate. His successor, too, has been named.

The decisions also will apply to a Port Arthur city councilman, Bob Wyde, and to a Fort Worth constable, O. L. Watson Jr., both of whom had filed in the Democratic primary for legislative seats.

In a Travis County case, the Court held that Justice of the Peace Curtis Lacy could not run for re-election because he had moved out of the precinct, and did not meet the law's standard which is: You must have lived in the precinct, County or district you seek to represent for at least six months before the primary or general election at which you seek to be elected.

Supreme Court also kept in force an earlier decision that slant-hole oil wells can be re-drilled or straightened. A Railroad Commission motion for rehearing was refused.

In a San Antonio case, the Court agreed with a Court of Civil Appeals ruling that income from a Texas trust could not be spent for establishing a non-medical "clinic-hospital"

in California which would be illegal in Texas.

Attorneys for two big discount stores challenged Sunday closing laws. Shoppers World Inc. of Corpus Christi claimed any type of article may be sold on Sunday if customers sign a certificate that their purchase is necessary to their welfare, health or safety. Spartan stores' attorney attacked the 1961 blue law's constitutionality.

In the Third Court of Civil Appeals, a 1960 ordinance by which LaPorte annexed 12 square miles of territory in Harris County won approval in a decision reversing the trial court.

REDISTRICTING HEARING SET
Houston federal court has set the showdown hearing on congressional redistricting for Friday (March 27).

"We will be ready," said Atty. Gen. Waggoner Carr who had anticipated an early setting.

Outcome of the case will determine whether Texas must hold statewide elections for all congressmen or perhaps hastily redraw congressional boundaries in a special session of the Legislature.

U. S. Supreme Court has upheld the Houston court's October 19 finding that present districts are unconstitutionally drawn in favor of rural areas. It has permitted the state to go back to the lower court, however, to explain problems involved in statewide congressional voting after the regular election process already has been set in motion.

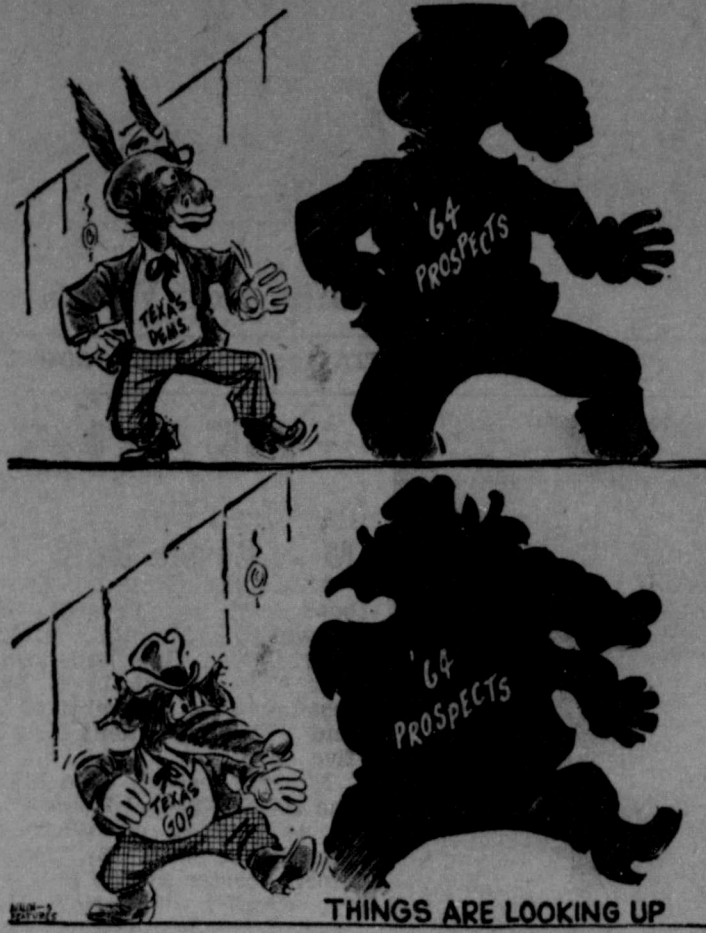

Houston court has held — and the Supreme Court agreed — that districts must be based as nearly equal in population as is feasible. Texas districts, if absolutely equal, would contain 416,000 population each. They now vary from 216,371 to 951,527.

State Democratic administration wants to delay effect of the ruling until the next regular legislative session in 1965.

Five Republican leaders brought the original suit. Twenty-two Republican congressional candidates and Bob Looney, Democratic candidate for Congressman - At - Large, have intervened on the side of immediate redistricting.

CONNALLY THREATENED
The FBI filed charges in Nashville, Tenn., against two women alleged to have made telephone threats on the life of Gov. John Connally the day Jack Ruby was sentenced to death.

Connally told newsmen threats and "vile" letters had increased since the Ruby verdict. Most of the letters and calls come from out of state. Actually, he has been subject to numerous such threats since the assassination of President Kennedy in Dallas on November 22, when Connally was serious-

BELLI BLASTED

Flamboyant Melvin Belli, defense attorney in the Jack Ruby murder trial, who bad-mouthed Dallas and the trial court there, received a return blast from Attorney General Carr. Said Carr of Belli's repeated anti-Dallas talk:

"An example of professional ethics which should shock all our members from coast to coast... It is almost a certainty to state that, had Mr. Belli acted so irresponsibly in the courts of his state or in the federal courts, he would have promptly been held in contempt and heavily fined and/or placed in jail."

The president of the American Bar Association, in a speech at San Francisco, Belli's home town, said: "That he (Belli) should so flagrantly disregard the code of professional ethics, and his oath as an attorney, is a discredit to him and to his profession."

Belli, who has resigned from the American Bar Association, anyway, retorted: "...Being barred from the ABA would be like being banned from the Book of the Month Club."

'WATCHDOG' AGENCY SETS RECORD
Agriculture Commissioner White claimed a record number of public service inspections conducted by his department — which he termed a "watchdog agency" — over the past year. He said there were more than 1,400,000 separate acts of inspection.

Inspections ranged from checking the accuracy of gasoline pumps to crops in the field and products at retail outlets. He estimated that on commercial scale corrections alone, his staff saved Texas housewives more than \$2,000,000 last year.

APRIL OIL ALLOWABLE
Texas oil production will be held at 29 percent of potential during the next month, highest figure for April in five years. Texas Railroad Commission, which heard predictions of nine major oil purchasers that demand for oil will increase from two to three percent this year, set April allowable at 2,931,746 barrels daily. March production was 2,983,222 barrels a day, also under a 29 percent order.

Twenty-four executives, delivering their annual state-of-the-industry reports, said there were 177,800,000 barrels of crude oil on hand in Texas on March 1. This is some 1,480,000 barrels more than they figured desirable.

Railroad Commissioner Jim Langdon reported that substantial progress is being made toward re-organization of the Commission. He also stated the Commission will move to curb water pollution due to faulty well engineering.

APPOINTMENTS ANNOUNCED
Governor Connally named D. M. Skidmore of El Paso and E.

Earl Merrell Jr. of Bryan to the State Board of Architectural Examiners.

Hugh M. Patterson of Houston was designated a member of Texas Civil Judicial Council, and Wallace Scott of Austin named to the State Board of Canvassers.

CRIME AT NEW HIGH

Major crime in Texas reached a new high last year, with a felony committed every two and a half minutes, Department of Public Safety records show.

Crimes reported to DPS in 1963 totalled 229,254 — a 5.8 percent increase over 1962 and 88.6 percent above 1953. Seven major felonies tabulated showed these rate increases: murder, up 8.5 percent; rape, up 14.2 percent; robbery, up 10.6 percent; burglary, up 4.9 percent; aggravated assault, up 4.4 percent; theft, up 6.6 percent; and auto theft, up 2.8 percent.

FUNDS DWINDLING

Screwworm eradication funds will be spent by July 1, reports the Southwest Animal Health Research Foundation. Maintenance of the barrier zone of sterile screwworm flies between Mexico and the U. S. will depend on congressional appropriation.

Two new screwworm cases have been confirmed — one in Medina County, another in McCulloch County near Brady.

NEW SHELL SUIT FILED

Coastal interests have filed a new suit seeking to thwart Parks and Wildlife Commission orders permitting close-in shell dredging in Galveston and Trinity Bays.

Suit urges that dredgers be moved back 1,500 feet from live oyster reefs. Commission voted to permit dredging as close as 300 feet under supervision.

SHORTS SNORTS

General Land Office will

receive sealed bids on May 5 for more than 369,785 acres of state school lands offered for lease.

U. S. Judge Homer Thornberry has been assigned to preside over Austin and Waco sessions in the Western District, succeeding veteran Judge Ben H. Rice Jr., who died at Marlin.

More than 2,270 Texans came down with the measles during the week ending March 7, State Health Department said bringing the year's total to nearly 10,000.

Number of job-holders in the State decreased in January to an estimated 3,506,400, according to the Texas Employment Commission with the bulk of employment fall-off in agricultural service firms, but the commission predicted expanding job opportunities in 1964.

Attorney General Carr ruled that the board of supervisors of any levee improvement district may deposit district funds in any depository they choose but warned that such depository must give bond with a corporate surety company in an amount equal to the funds deposited.

Col. Homer Garrison Jr., director of the Department of Public Safety, said 1963 held an all-time record of 2,729 motor-vehicles in Texas.

Texas Independent Producers & Royalty Owners Association charged the U. S. Department of the Interior with falling to meet federal statutory market demand requirements and th-

warting efforts of state conservation bodies to hold balance and stability in the producing industry.

Railroad Commission reset for 9 a. m. on May 15 Dallas hearings on requests by the Chicago, Rock Island and Pacific Railroad and Fort Worth and Denver Railway to discontinue trains between Fort Worth and Houston.

Final reports have reached State Comptroller Robert S. Calvert from only a few counties, but preliminary estimates are that there may be nearly 3,000,000 Texans qualified to vote in this year's elections, a 10 percent increase over 1960.

Texas Water Commission has launched a massive study to determine how much water is underground in 35 Central Texas counties between the Red and the Colorado Rivers.

it's the cleanest...
there's just no limit
... to how clean electricity is. With just the flick of a switch or punch of a button—you never see it, or smell it, it's so clean you'd hardly know it was there. With no flame there is no smoke, smudge, film or fumes, no vents to check or burners to adjust—this means less cleaning required for walls, curtains, furniture. If you'll stop and think about it you'll agree that flameless electricity is the easiest, cleanest, most comfortable way to live.
If you'd like to install flameless electric heating in your home, see your electrical heating contractor or a representative from WTU.

Radioactive Fallout

Its Dangers & Effects

College Station — The dairyman, like all other farmers, is concerned about the prospect of a nuclear attack and effect it might have on his family, livestock and business. In producing a vital part of our nation's diet, dairymen have some definite problems and responsibilities in protecting the nation's food supply.

The possibility of radioactive contamination has presented dairymen with two very real and immediate problems. Of major concern to today's dairyman is the fact that many of his customers, through gross misunderstanding, have begun to consume less milk because of the widely publicized association of milk and radioactive contamination.

The dairyman is also asking what can and should I do to protect my cattle and feed supply in event of a nuclear attack? Best protection will come from a plan that is well thought out ahead of time.

A closer look at the first problem will show the customer's present reaction to the continued talk about milk and radioactivity. First, the dairyman

must know the answer to some of the questions customers are asking. Why was milk chosen as the food to use in measuring rate of fallout throughout the country? How does milk rank with other foods as a possible source of radioactive contamination? What happens when a cow eats feed that is contaminated by fallout? What is the relationship between calcium and strontium 90? Why should we be drinking more milk rather than less?

The scientists picked milk as a sampling material because it is produced in all parts of the country, brought to central collecting depots and is easily sampled. Cattle generally harvest forage over a large area and since they pass into milk some of the radioactive isotopes which they consume they are, in effect, sampling agents. Further, an increase in the radioactivity of milk may be at least in some ratio to the increase of radioactivity on the earth's surface and is a fairly good indicator of isotope concentration in the human diet.

Of the natural sources of calcium, milk is the least contaminated with radioactive strontium. For example, if there are 100 units of strontium to each 100 units of calcium in pasture plants, only 1/2 unit of strontium for each 100 units of calcium would get into the human population. The strontium-calcium ratio in milk is only about 1/10 that of feed the cow eats. Vegetables and meats actually have a higher percentage of strontium 90 from a given acre than does milk. Looking at it another way, plants actually supply about 15 percent of our calcium and 63 percent of our strontium. Milk supplies 80 percent of our calcium and 34 percent of our strontium. Meat supplies about 5 percent of our calcium and 3 percent of our strontium.

The two questions, what hap-

MOTOR VEHICLE INSPECTION DEADLINE APRIL 15

IT'S TIME FOR A CHANGE—The Department of Public Safety urges all motorists to get their 1964 Inspection Stickers before lines start forming at inspection stations.

pens when a cow eats radioactive contaminated feed and what is the relationship between calcium and strontium 90, can best be answered together. Fortunately, the metabolic processes of both man and animal act to reduce the amount of strontium that is deposited in the bones as compared to the amount that was originally present in the vegetation and soil. This protective mechanism is measured by the term, "discrimination factor" and refers to the natural preference of the body for calcium over strontium.

There are two good reasons why we should encourage people to drink more milk. First, milk is an excellent source of calcium and much of the strontium has been screened out by the cow. And secondly, animal research has shown that a body well nourished with calcium does not retain as much strontium as a body that is deficient in calcium.

Contamination of milk from iodine 131 may also be a problem for the dairyman, particularly during the first few weeks after a nuclear attack. However, this element decays rapidly, with a half life of eight days, and would decay away in about sixty days. Studies indicate that five to ten percent of the radioactive iodine on forage crops consumed by animals would get into the milk.

Dairyman also have the problem of guarding their animals against radiation and the eating of contaminated feed. Protection from these hazards would be the same as for other livestock.

Tips From The TACKLE BOX

By B. F. Gladding
There's No Such Thing as a "magic" lure, that is. There are dandy lures for spinning and bait casting but the true "wonder" lure has yet to be invented. A good lure can do so much but no more. The rest is up to the fisherman — you.

Take that old reliable, the wobbling spoon. No deadlier lure has ever been devised, yet the best of spoons becomes a poor lure when merely cranked in at a steady pace. To pull strikes, a spoon should spurt, fall off in a fluttering dive, dip, zoom and, in general, do what watching fish least expect it to do. The trick is to make it act like crazy, for that's when ex-

der with a sudden jerk that makes the water fly. Let it rest again, then quickly reel in a few turns. Make believe the plug is a mouse on a string and the quarry a tail-twitching cat. It's the way to fool bass with surface lures.

Finally, for a special thrill, try this. Cast over a horizontal stub or branch, then reel until the plug rises above the water. Jiggle it while it dangles. When a big bass leaps high to grab it, you'll know one of the big moments in bait casting!

Any fishing question? Send them to me, in care of this newspaper.

Today's MEDITATION from The World's Most Widely Used Devotional Guide

The Upper Room
© THE UPPER ROOM, NASHVILLE, TENNESSEE

Read Matthew 26:36-46
Again, for the second time, he went away and prayed, "My Father, if this cannot pass unless I drink it, thy will be done." (Matthew 26:42.RSV.)

One bitter cold day I knelt alone at the altar of a little village church and prayed a desperate prayer. A tragedy had overtaken me, and the pain of it was almost beyond description. In this modern Gethsemane I turned my face toward heaven and asked God to take my life.

God indeed took my life, but not as I had asked. He used it from that very hour as never before. The cross of pain I was called to bear became the instrument whereby I was enabled to help others. Through my

suffering I came to understand better the world's suffering.

God's Son prayed in a Gethsemane infinitely more terrible than mine. He prayed that the cup might pass, but with perfect faith He prayed, "Thy will be done." His prayer was in accordance with God's plan for the salvation of the world.

PRAYER: Our Father in heaven, whose wisdom is unimpeachable, whose love for us is perfect, and whose power is supreme, enable us to say, "Thy will be done." Grant to us Thine infinite strength for every ordeal. In the name of Christ. Amen.

THOUGHT FOR THE DAY
"O Cross that liftest up my head, I dare not ask to fly from Thee."

Lynn E. Chapel (Michigan)

KEEP GOOD RECORDS

Have you been reading and hearing about "ways to save on your taxes"? The essential first step to tax savings is complete tax records. These records do not have to be fancy — just

complete, accurate, and current. In many cases, the simpler, the better. That's the tax advice today from Ellis Campbell, Jr. District Director of Internal Revenue.

He said that one of the easier ways to "set up a bookkeeping system" is to get a supply of large envelopes or folders. Label them according to the types of income and deductions you have. Accumulate the information as you go along. Preparation of the tax return will be much easier, with less chance of overlooking any income or deductions, when this is done.

Mr. Campbell asked taxpayers not to mail their records with the return. If the return is selected for audit, the taxpayer will need the records to back up the items shown on the return.

Mr. Campbell pointed out that good tax records are vitally important to taxpayers who have travel and entertainment expense, itemize deductions, have income other than wages, operate businesses, or who have sold property or investments.

Colonel Homer Garrison Honored By Cattle Raisers

The Texas and Southwestern Cattle Raisers Association's close working relationship with the Texas Department of Public Safety was noted here today with the presentation of an appreciation award to Colonel Homer Garrison, Jr., Director of the Texas Department of Public Safety, and Chief of the Texas Rangers.

San Angelo — West Texans with aquatic vegetation problems in farm ponds should reduce rank pond growth with proper chemical and fertilizer applications now — during March and early April.

After troublesome vegetation has been chemically controlled, ponds should be heavily fertilized to increase murkiness and reduce sunlight penetration.

INFORMATION FOR VETERANS
Questions & Answers

Q. Is a veteran given preference in obtaining private employment?

A. A Veteran is aided in obtaining private employment by the Veterans Employment Service of the U. S. Department of Labor. This work is carried on through the local state employment offices in each of the 50 states.

Q. Can I select my own lot for future burial in Arlington National Cemetery?

A. No. Gravesites are not assigned in advance of immediate requirement. Application may only be made at time of death of the veteran or that of an eligible dependent.

Q. I am a Canadian and have served in the armed forces of the United States but not during wartime. Am I entitled to become an American citizen?

A. An alien with three years active service during peacetime may have this naturalization process authorized and expedited provided he file citizenship papers while in the service or within six months thereafter.

Do you realize that your local social security office stocks a library of a dozen different social security informational pamphlets? You can obtain pamphlets and booklets there explaining every phase of social security retirement, survivors and disability benefits. And they're free.

BIRTHS
A son, Michael Chad, was born to Mr. and Mrs. W. D. Hairgrove of Coleman Tuesday, March 17. Weight was 8 pounds, 3 ounces.

A daughter, Rhonda Gay, was born to Mr. and Mrs. Joe B. Allen of Santa Anna on Wednesday, March 18. Weight was 7 pounds.

March is Hard Month on Game

San Angelo — Birds and animals in the Texas Panhandle and Trans-Pecos are now in their most critical period of the year, according to Pierce Uzzell, wildlife supervisor.

While most sportsmen are comfortably dreaming of warm spring months just around the corner, quail, deer, antelope and other wildlife are enduring cold nights with only partially filled stomachs because food grown last summer is now scarce and hard to find.

Early spring plant growth as well as early insect hatches are the salvation of wildlife populations that have endured hard winter months.

In 1963 the Trans-Pecos Area had a dry winter and wildlife will be desperately awaiting early green foods to ready them for their big job of rearing young this summer.

Since the Panhandle has had frequent snowfall this winter, early spring plants should soon be available for wildlife that need to build their strength before producing a new wildlife crop.

Ronnie Hardy Gets Promotion

Word was received this week of the promotion of Ronnie Hardy, son of Mr. and Mrs. Elmer Hardy, formerly of Santa Anna. Hardy was promoted to Construction man, E-3.

He is a Seabee attached to the motor pool at Jacksonville, Florida.

Hardy entered the Navy in July last year under the two year reserve program. He will be transferred in July of this year, but his new duty station has not been determined as yet.

New Physics Prof For Howard Payne

Brownwood — Kenneth N. Locke of Austin has been named assistant professor of physics at Howard Payne College, it has been announced by Dr. Forrest Agree, academic dean.

Locke will report to the college in September, Agree said. The new teacher is presently at the University of Texas in Austin, where he is a candidate for his Ph. D. degree in Physics.

Florida, the last of the territory owned in North America by the Spaniards, was ceded to the United States in 1819.

The first Olympic Games recorded occurred in 776 B. C. in Greece.
