Grain Sorghum Is Largest Acreage And Cash Crop

"The Grain Sorghum Producers Association has done it again," reported Mr. Truett Jones of Tokio, Texas, a local representative of the Organization. The legislative action of relating grain sorghum to corn on a nutritional value was given millions of dollars of farm income protection to the grain sorghum producers of the United States. While many acres of farm income were being lowered by the provisions of the new farm bill, the total loan and price support payments were raised from \$2.14 per hundred weight in 1970 to \$2.25 per hundred weight for 1971. This is an increase of 11¢ per hundred weight income protection on all grain grown. Grain sorghum is now related at 92% of the nutritional value of corn, and tests are being conducted to substantiate that the nutritional value is at least 95% or greater than that of corn. This would mean an additional 8¢ per hundred weight income protection for all grain sorghum grown.

The production year of 1969 saw 16.8% of all grain sorghum grown, go into export markets as cash sales. This means that 16.8% of the producer's income is derived directly from export markets, which removes this much grain from the local market condition. This additional grain could have a depressing factor upon local prices. Export markets pay well to our local producers, and milo products must see that these markets are maintained and enlarged. The Grain Sorghum Producers Association, since its organization in 1956, has been the recognized spokesman for grain producers. It has seen a national production go from 22 bushels per acre to a high of 65 bushels per acre, which demanded new markets, and these markets were found in the local feeding and export industry.

Grain sorghum sales exceed \$200,000,000.00 in this area each year and is now the largest acreage and cash crop in the area. Producers in each county are elected and serve on the board in making policy decisions and giving directions. Their efforts have paid big dividends for the producers of this area. Administrative decisions are being made each day that affects the income of each grain sorghum producer. GSPA must meet with leaders on all levels to get the best possible deal for the producer. Many producers have overlooked the opportunity to support this commodity with their membership dues. Incidentally as a landowner or land operator, have you given your support?

Tim Byrum Presented All Tournament Trophy

TIM BYRUM was presented an "All Tournament Trophy" for being one of the five outstanding players in the Plains Cowboy Tournament.

Tim is the son of Mr. and Mrs. E. V. Byrum of Lovington, New Mexico, and presently resides in the R. M. Jones' home.

He is a senior at Plains High School and Captain of The Plains Cowboy Basketball Team.

He moved to Plains during his Sophomore year, and has played basketball for the Plains Cowboys since that time. He is the leading scorer for the team this year.

His other activities include auto mechanics, FFA and Spanish Club. Although his plans following graduation are indefinite, he wishes to pursue a basketball career.

City Slates New Markers For Streets

The sincere and lengthy effort of the members of the Chamber of Commerce are now showing results.

For many months the Chamber has waged a campaign for the installation of street markers on the main thoroughfares of Plains. Through the persistent efforts of Mr. Pete St. Romain, an agreement was reached between the Chamber of Commerce and the Plains Lions Club to help finance and install a number of street markers. The cost of this operation proved to be too expensive for the two clubs. Mr. St. Romain who was appointed to represent the two clubs, approached the city council with the matter.

At their regular meeting Tuesday night, an agreement was reached with the council whereby the council will bear one-half of the cost while the Chamber of Commerce and Lions Club will each bear one-fourth of the expense. Markers will be installed at each of the street intersections on Highway 380 from West to East city limits, as well as other strategic points within the city. In all, thirty-five markers will be installed at this time.

It was agreed that individuals wishing markers on streets near their residence, may purchase them through the city.

THE SECOND PLACE JUNIOR TEAM WAS COACHED BY KENNETH BLOUNT AND THE TEAM MEMBERS WERE: (left to right) CHRIS WINN, TIM BOWERS, KREIG BLOUNT, AND BRAD CRUMP.

The Second Annual Yoakum County Livestock Judging Contest

109 Contestants Enter Yoakum County Livestock Judging Contest

BY LEO WHITE

THE SECOND ANNUAL YOAKUM COUNTY LIVESTOCK JUDGING CONTEST held last Saturday, January 9, in the Plains Rodeo Arena and Livestock Exhibit Building, attracted 109 contestants. Nineteen senior teams and seven junior teams competed for plaques and trophies valued at over \$100.

PLAINS FFA WON HIGH TEAM HONORS. The team of Wayne Wauson, Lowell Trout, Rolan Taylor, and Gene Wauson made 1440 points out of a possible 1800. Second place team honors went to Denver City FFA. The team of Johnny Gober, Earl Bales, Steve McVey and James Reagan won the second place plaque for their Denver City Chapter. This team made 1416 points. Third place went to Lea County 4-H Club with 1407 points. The Lea County team was composed of Danny Watson, Mickey Gilmore, Billy Cogsdil and Jack Duffey.

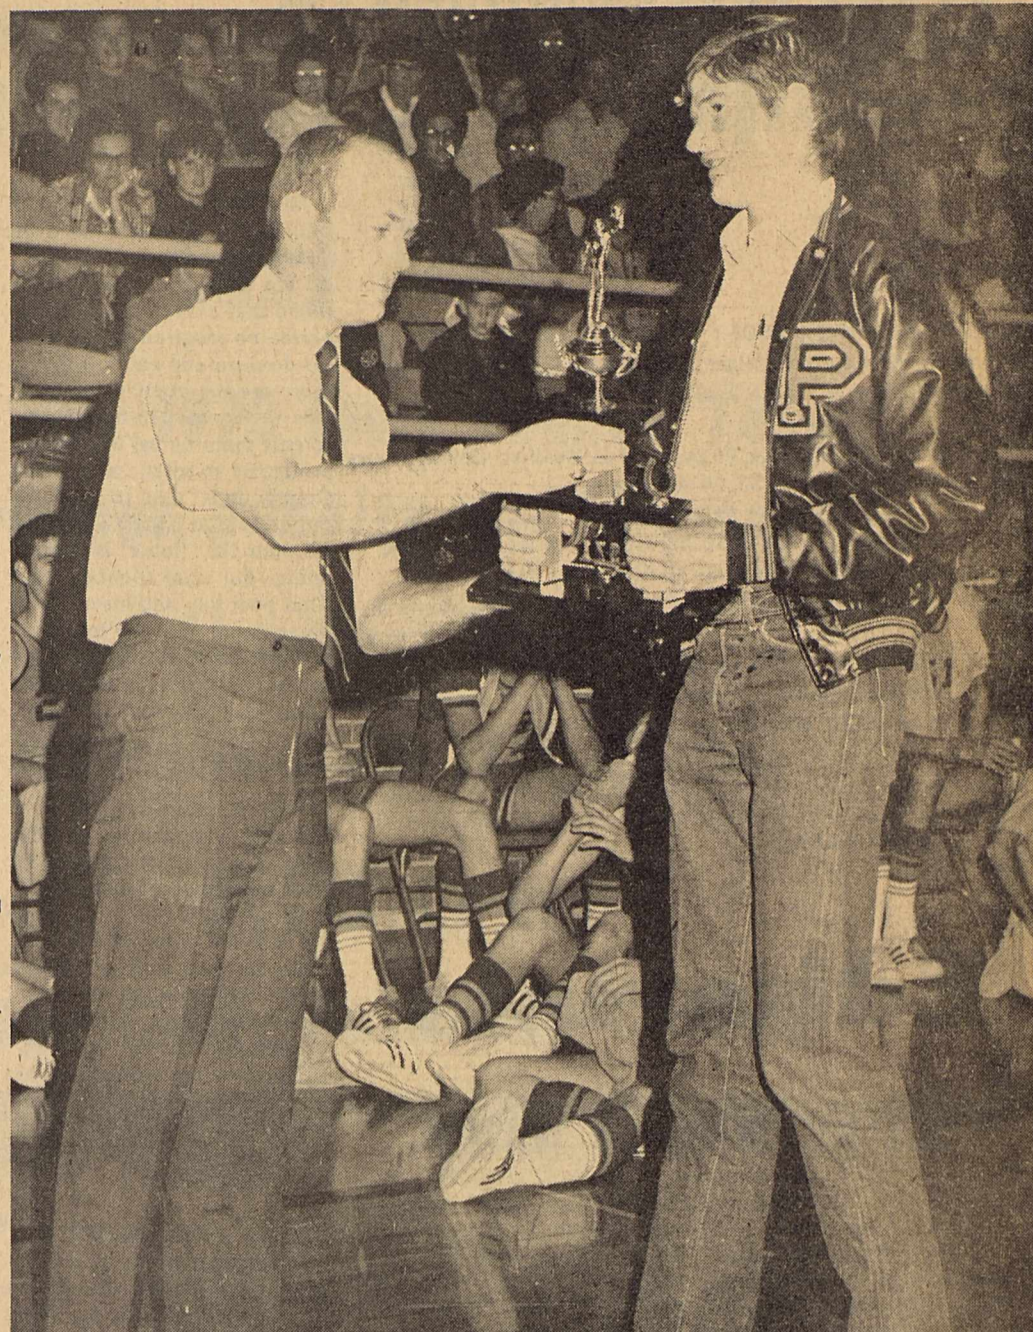

In the Junior Contest, first place went to the Lea County 4-H Club who made 1389 points. This team was made up of Lesli Benge, Rayburn Benge, Benny Wooton and Randy Robertson. Yoakum County 4-H Clubs had six junior teams entered in the contest. The second place junior team was coached by Kenneth Blount and the team members were: Kreig Blount, Chris Winn, Tim Bowers, and Brad Crump. The third place team was made up of members of the Green Clover 4-H Club and their leader was Mr. Dan Beck. Members of the third place junior team were: Steve Beck, Keith Beck, Donna Long, and Brenda Hobbs.

The Denver City FFA team that won second place in the contest, also won first place in the steer judging so they received two plaques for their days work. A plaque was awarded to the Tatum FFA team for winning high honors in the sheep judging. A third place plaque was presented to the 4-H Club team from Terry County for being the high point team in the swine judging.

Trophies were given to three high individuals of the entire contest, FIRST PLACE HIGH INDIVIDUAL WAS WAYNE WAUSON OF PLAINS FFA. Wayne won 523 points out of a possible 600. Second high individual was Wayne Head of Lovington FFA, Head scored 500 points. There was a tie for third place between Mickey Gilmore and Kenny Orr of Denver City FFA. Each boy made 498 points and Gilmore won the trophy by winning the coin toss.

A special THANKS is in order to all who helped with the contest. Some helped by bringing in animals to be used in the contest. Others made up the work crew that is so necessary in conducting a contest of this kind. About thirty people were used to lead groups, ask questions on the classes, grade placing cards, tabulate results and keep the contest operating.

When you work with people who will readily volunteer to do whatever job needs to be done in order to have a good contest for our boys and girls, then you tend to forget all the frustrating work of preparing and getting ready. When you see a smile come across the face of a boy or girl who has scored higher than they thought they would, you realize that helping young people to learn is the greatest and most rewarding vocation there is. When you see parents who show they are proud of the accomplishments of their children, your faith in the future is restored and you know the world will be in good hands when these youngsters assume their roles of leadership.

TIM BYRUM, CAPTAIN OF THE PLAINS COWBOY BASKETBALL TEAM, IS PICTURED ACCEPTING A 3rd PLACE TROPHY FROM COACH JIM WARREN, FOR HIS TEAM.

Commissioners Meet In First Regular Session Of New Year

Monday morning found our County Commissioners with many different kinds of business to attend to. This meeting being the first regular business session of the new year 1971, they were kept busy until around 3:30 p. m.

Among the business of the day were many more or less unimportant things. The more important have been picked from the minutes of the Commissioners' Court. They were:

A motion was made and seconded that the Dr. Sharp Clinic be paid off by March 19th, 1971.

Mr. Johnnie L. Fitzgerald, Commissioner of Precinct # 4, hired one new hand, Mr. Pete Flores of Plains, Texas.

The bid of \$26,500. from West Texas Equipment Company for a new caterpillar tractor was accepted for Prct. #2, H. C. Cotton, Commissioner.

living go down, the raise would automatically be lowered back to the 1970 wages. The vote for the raise was 3-for and 1-against.

Raymond Bookout moved and Vance Brown seconded the motion to the Severance Agreement of Paul Cobb to Deryl Hobbs that the steel frame building, 60 feet by 50 feet, now located on the West side of the Yoakum County Airport should be severed from the real estate. A few legal aspects were yet to be made before the Severance Agreement could be correctly written up.

Cotton Allotment Notices To be Mailed Soon

W. M. OVERTON, YOAKUM COUNTY
ASCS COUNTY EXECUTIVE DIRECTOR

Cotton farm operators will soon receive their 1971 base cotton acreage allotment notices. It is expected that the 1971 base allotment will be approximately 67 percent of the 1970 allotment. (The 11.5 million national 1971 base cotton acreage allotment is approximately 67 percent of the 1970 allotment.) The 1971 base allotment will be used to compute payments and will determine the required set-aside acreage. The 1971 allotment notices will perhaps be mailed before the 1971 yield is computed and approved. Operators will be, at a later date, advised of the 1971 approved yield, which will be used for payment purposes for participating farms. The payment will be not less than 15 cents per pound X the approved yield X the 1971 allotment.

Setting aside the required eligible cropland plus the normal conserving acreage, if any on the farm, and planting and working in a workmanlike manner not less than 90 percent will qualify cotton producers for the cotton payment.

Regular strip-row patterns of two or more rows skipped may be used as set-aside acreage in 1971. This is a change from prior years. Sweet sorghums, red top cane, etc., may be planted on the set-aside acreage and may be grazed after the fall release date, which has not been set at this time by the county ASCS Committee.

The regulations that are now written states that the set-aside acreage must be land from which a crop has been harvested in at least one of the last three years. This means land used for diverted acres the past three years is not eligible for set-aside acreage in 1971. Recommendations have been made to change this ruling. However, as of this time we have not been notified of any change. The sign-up date on the program is March 1, 1971 through April 9, 1971.

Producers who have not presented 1970 cotton production records are urged to file them at their earliest convenience. Gin numbers and warehouse weights are needed.

Transfer of Cotton Allotments; Cotton allotments may be transferred by sale or lease from Yoakum County to any other Texas county. Allotments may be transferred to Yoakum County from any other Texas County that has approved the transfer out by sale or lease. The ASCS County Committee in each county makes this determination. Transfers will be made on the 1970 projected yield in all transfer cases. Price support payments will be made on the 1971 approved yield which might be more or less than the 1970 yield. The final date to transfer to Yoakum County is April 1, 1971.

Tournament Results

Lubbock Christian High School won first place at the Plains High School Basketball Tournament held January 7-9.

An exciting playoff between L. C. H. S. and Eunice ended with a high score of 72-54. The Plains Cowboys battled the Sundown Roughnecks for 3rd place, winning 69 to 43, and Sea Graves defeated Three Way for Consolation 74-65.

The Plains Cowboys defeated Cooper 54 to 43 and downed the Roughnecks 69 to 43. Lubbock Christian High School ended the Cowboy winning streak with a 61 win over Plains 34.

Plains B team beat Sundown 46 to 53, but lost to Cooper 36-39.

Employee Change

At Light Plant

The resignation of Mr. Gene Smith, effective January 14th was accepted by the city council at their Tuesday night meeting. Gene has been active as plant superintendent for the past year.

Roy Millsap, who has been employed as a plant operator for a little over a year, was promoted to the position as plant superintendent.

Cliff Sims, who comes from Magazine, Arkansas, and who was formerly a resident of Brownfield, was hired by the council to fill the vacancy of plant operator created by the promotion of Roy Millsap.

Cliff Sims is a brother of Jim Sims, who is also a plant operator.

THE DILEMMA OF WATER

The City of Plains is caught up in a situation which every town, city, state and country faces from time to time. The situation is a simple one when reduced to the most basic terms. The voters must go to the polls and make a decision.

The decision concerns water. Whether or not the city of Plains will have good water supplied by a water treatment plant or brackish water just as it comes from our wells.

To say the decision is an easy one is being too simplistic. The decision involves a lot of complicated information which must be fully understood by every voter if he is to cast a ballot meaningfully.

There are few readers of this paper who doubt the editor's position. The readers know the editor is in favor of purchasing a water treatment plant. And because they know he favors it, they have been rather quick to accuse him of favoritism and one-sidedness. He has been accused of not publishing the facts about the situation. He has been accused of publishing just one side of the story.

Your editor has repeatedly called for any documented facts that anyone could present concerning the water situation. He has promised to publish them. He has stated, however, that he would not publish opinions, except in the "Letters to the Editor" column.

The Du Pont Company, which has worked in our city for more than two years has accumulated volumes of data about our city, its water and its needs. Based on what they learned, engineers and technicians from Du Pont put together a proposal for a water treatment plant. The details of their proposal, and an explanation of what it will mean to us, is presented on pages 4 and 5 of this edition of The Plains Review.

As a newspaper man, your editor has followed each step in the development of the data used by Du Pont. He has kept in very close touch with the operation of the test plant. He has asked many questions about the proposal for a permanent plant. And from this, he has concluded that the Du Pont proposal is based on solid engineering data. It is documented in all respects and considers all the possibilities it is humanly possible to anticipate... to foresee... to predict.

There are those who oppose the Du Pont proposal. They have advanced many reasons for their opposition, but to this point, they have not substantiated them with facts, figures and technical data. This can only lead your editor to conclude they are operating in the realm of opinion. And each of us is entitled to his opinion.

Hopefully, however, the people of Plains will take time to review the factual information which is available to them and form their individual opinions only after doing so. It would be a shame for them to react to the opinions of others, and cast their ballots in puppet-like fashion.

Mrs Beryl Bowen Of Australia Speaks To Tsa Mo Ga Club

"I want to visit Australia" was the general feeling of those present at the Tsa Mo Ga Study Club meeting, Monday night, January 11, 1971. Mrs. Beryl H. Bowen of Erina, Australia, was the guest speaker and presented slides to illustrate her talk.

Mrs. Bowen and her son, Gregory, are the guest of Mr. and Mrs. Truett Hadnett of O'Donnell. Mrs. Hadnett, who corresponds with thirty-four international friends, introduced Mrs. Bowen and stated that they became acquainted as pen pals. This is Mrs. Bowen's second visit to O'Donnell, having visited Mrs. Hadnett about two and a half years ago.

On this trip Mrs. Bowen, Gregory, and her daughter, Susan, have been to England and are now on their way back to Australia. They were met on arrival in New York by a young lady who had stayed in their home as a Rotary Exchange Student. On arrival in Texas,

they were met by the Hadnetts and a pen-pal of Susan's, whom Susan is visiting in O'Donnell.

The Bowen's are from the small town of Erina, near Gosford in New South Wales, about an hour and fifteen minute drive from Sydney on the Expressway. They have a poultry farm and sell eggs and day-old chicks. They live in a lovely brick home with a tile roof and a pretty yard with gum trees--and various shrubs and flowers.

As Erina is very small, they do most of their shopping in Gosford. Gosford is not a large town but has two high schools, a hospital, and other facilities such as you would find in a town in Texas. The town has a limestone quarry that sells stone to be used as trim in much of Australia.

In Australia, the students all wear uniforms to school. The girls uniform consist of a plaid pleated skirt, solid blouse, and jacket to match the skirt. The

younger boys wear short pants and the older boys wear white shirts and long trousers. As they have summer when we have winter, their school starts in February with a week of holiday in May and two weeks in August and September. School is out in December with a six weeks vacation before beginning again in February.

Gosford is on the east coast of Australia. Around Gosford vegetables are grown for market and there is a large area of citrus farming. There are mountains to the west with lush green growth. They have no snow but do have heavy frost in winter--and an average rainfall of about 60 inches. There is a salt water bay about four miles from Mrs. Bowen's home with lovely beaches.

Mrs. Bowen said they do not have study clubs there but have service clubs that are very much like our clubs. Their clubs have "fate" much like

our bazaar where the members make items to sale to make money for their projects. They also sponsor walkathons and other projects to help raise money. Interwheel, the club to which Mrs. Bowen belongs, sponsors many worthwhile projects, including work with a Brownie Troop visiting a Nursing Home regularly. Each first Monday club members run the trolley, a rolling cart to sell sweets, powders, and other small articles, at the hospital.

Mrs. Bowen brought for display a lovely artificial arrangement of the flowers used there to decorate for Christmas. They were a red bell type flower and a Christmas bush, both grow native there. Mrs. Bowen's home with lovely beaches.

Mrs. Wayne Davis presented Mrs. Bowen with a money corsage. Mrs. Bowen commented

that she would not spend it but would take it home with her as she had not seen anything like it.

Mrs. A. B. Carpenter read a poem of thought for the evening.

Mrs. Tom Warren presided for a business meeting following the program.

Guest for the evening included Mrs. Bowen and Gregory, Mr. and Mrs. Truett Hadnett of O'Donnell, and Mrs. Sammie Williams of Morton.

Mrs. M. W. Luna, Mrs. P. W. St. Roman, and Mrs. Sherman Henard were hostess for the social hour.

SAY SOMETHING NICE ABOUT YOUR TOWN TODAY!

Friendly Chats with Faye McConnell

An upright man can never be a downright failure.

I know that I have the most wonderful husband in the world. He never forgets special occasions as Mother's Day, birthdays, our Wedding Anniversary, etc. But was I surprised Tuesday morning, January 12th after having gone to the post office for the mail to walk into my office and find a lovely wrapped present, with a beautiful and sentimental card attached and addressed "To My Valentine."

This was one time that he forgot the exact date, as of course we all know that Valentine's Day is on February 14th. But for some reason, this made the gift more precious. I would like to share with everyone who comes into my office, a piece of the Valentine candy, as long as it lasts, and also share with you the sentiments of the card; The card is a lovely light pink, with a large banjo and sheet of music on the front, with valentines running up and down the strings, and which says: "With Love, Sweetheart, on Valentine's Day." Then opening it up, the verse reads as follows:

There's someone who, with just a smile,
Can make my day seem bright.
There's someone who, with just a word,
Can make my cares seem light.
There's someone dear and wonderful,
I've loved right from the start,
And if I haven't told you so,
That someone's You, Sweetheart."
With Love,
Your husband.

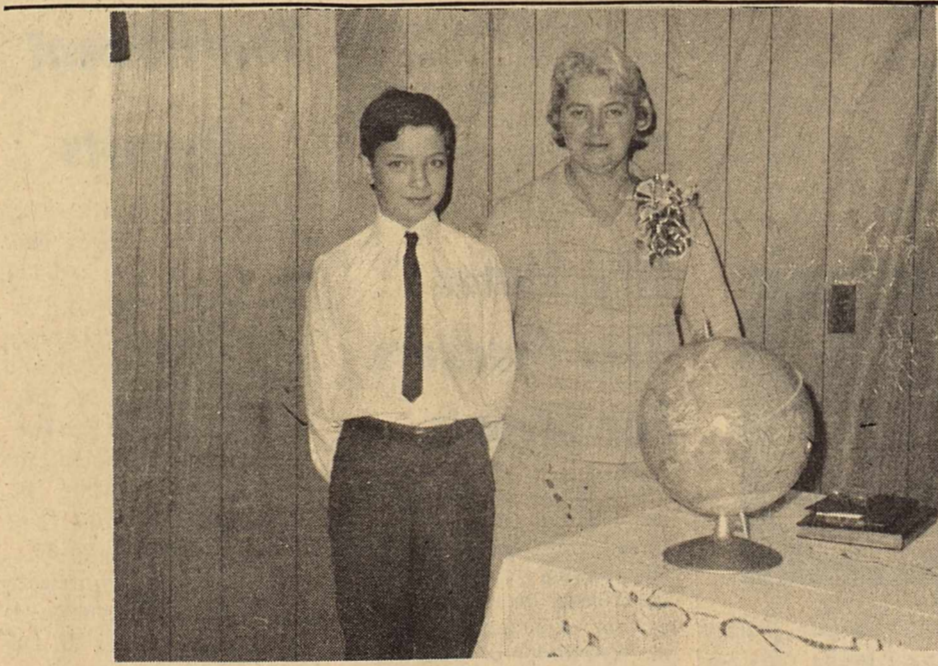

Another thing happened that day which was not so pleasant. As I started backing my car out to go to the post office, the deputy sheriff, Bob McDonnell, came driving in right behind me, and I'm sure, we did not miss each other more than two feet. Of all people's to back into, I almost hit a police officer. Just too close a shave for me to enjoy; nevertheless, we could smile at one another and wave our hands in greeting, thinking all the time, how luck we were; especially did I feel lucky as it would have been my fault.

An optimist would say that a glass was half full. A pessimist looking at the same glass would say that it was half empty. By the same token, one would see life as having many rough spots, the other would remember more of the joys along the way.

During World War II, many non-swimmers at the Naval Training Stations were required to take swimming lessons nightly after a full day of drilling until they became qualified swimmers.

One boy was really getting nowhere, and the chief in charge of instructing him asked, "What's the matter? Why can't you swim? Haven't you got any water in Kentucky?" After a short blank stare, the recruit replied: "Yes, chief - we have air, too, but I can't fly!"

I never knew a night so black
Light failed to follow on its track.
I never knew a storm so gray
It failed to have its clearing-day.
I never knew such bleak despair
That there was not a rift, somewhere.
I never knew an hour so drear
Love could not fill it full of Cheer!
—John Kendrick Bangs.

OBITUARIES

Yoakum County Citizen For 50 Years Passes Away

Yoakum County's oldest citizen, Mrs. Carrie Alice Copeland, died about 9 a. m. in Terry County Hospital in Brownfield, Texas.

Mrs. Copeland was 98 years old in December, 1970. She was born near Cleburne, Texas. She and her husband A. C. Copeland, moved to Gomez in Terry County in 1908 and to Plains in 1920.

She was preceded in death by her husband, and a daughter, Mrs. Katie Hudson. Funeral was conducted at 2:30 p. m. Wednesday in the First Baptist Church here with the Rev. James Mosley, pastor officiating. He was assisted by Rev. H. A. Tarkington, pastor of First Assembly of God Church.

Burial was in the Plains Cemetery directed by Barrett's Funeral Home.

Survivors include one son, Charlie, Sr. of Plains; a stepson, George of Tatum, New Mexico; nine grandchildren and a number of Great-grandchildren and great-great-grandchildren.

Red Copper Passes Away

Fred B. (Red) Copper was found dead in his room at Pasadena, Texas from an apparent heart attack on Tuesday, January 5th, 1971, at the age of 51 years. He was born on July 11, 1919. Mr. Copper was interned in Crescent, Oklahoma on January 9th at 4:00 p. m.

He is survived by his wife, Lorene; two sons, Alfred of Viet Nam, and Bob in Alameda; both boys are in the armed services, with Bob being a helicopter pilot; one daughter, Freda Copper; two step-daughters, Mrs. Sue Abergast and Mrs. Peggy Sams, both of Dallas, Texas; one step-son, Quentin Saveroy; five grandchildren, and eight sisters.

Services For Hunter Long

Services were held Friday morning at 10:30 A. M. in Stedham Memorial Chapel in Socorro, New Mexico for Mr. Hunter D. Long, age 78.

Mr. Long died of an apparent heart attack at his ranch home and was pronounced dead on arrival at a Socorro hospital. Survivors include his wife, Virginia, two daughters, Betty Craig of West Covina, California, and Ann Lou Brooke of Silver City, New Mexico; 1 brother, Dick Long of Truth or Consequences, New Mexico, 2 sisters, Mrs. Beulah Beal of Albuquerque, New Mexico, and Mrs. Lillian Williams of Plains, Texas.

Attending the services from Plains were Mr. & Mrs. J. W. Beal and Joe. J. W. is the nephew of Mr. Hunter Long.

Mr. Long will be remembered by many Plains residents as he grew up in Plains where his mother owned and operated the old "Long Hotel," and his father, Mr. J. P. Long, was County Treasurer in Yoakum County for many years.

Terry Haight Passes Away

Terry Haight, brother-in-law of H. W. Culwell of Plains, age 42 years, died suddenly Thursday morning about 6 a. m. on January 7, 1971 at Abilene, Texas from a heart attack.

He was employed at Dyess Airforce Base.

He is survived by his wife, Mary; one daughter, Kathy of the home; mother, three brothers, and one sister.

Mr. and Mrs. H. W. Culwell and Mr. and Mrs. Vaughn Culwell attended the funeral. Burial was in the Abilene Cemetery, January 8, at 2:30 p. m.

Mr. and Mrs. Robert Culwell of Los Angeles, California, Mr. and Mrs. Mike Culwell of Tulsa, Mr. and Mrs. Vaughn Culwell, Gary and Julie and Mr. and Mrs. Joe Curry were dinner guest of Mr. and Mrs. H. W. Culwell Sunday night.

SUDIE THOMPSON CHDA★ Says

DELICIOUS GRAPEFRUIT

Neglected your vitamin C for the day? Then have a hearty helping of grapefruit. It will go a long way toward providing the vitamin C you need. And you need it to eat something rich in this vitamin daily, since it is not stored in the body. As in other citrus fruits, grapefruit offers the most vitamin C when pulp, as well as juice.

When grapefruit halves are served as appetizers or desserts, the center is usually decorated with colorful fruit--amaras chino cherry, a few grapes, or a strawberry. Or put a mound of fruit sherbet--orange, lemon, or raspberry--in the center of each half.

A delicious way to sweeten grapefruit is to cut out the white center and fill the hole with strained honey. Set the sweetened fruit in the refrigerator for a few hours or overnight, so that the honey can penetrate all parts of the fruit, giving it a delicate honey flavor. Some restaurants that serve breakfast grapefruit this way call it grapefruit supreme.

Another sweetened variation is prepared grapefruit halves with a spoonful of strawberry, raspberry or cherry preserves in the center. Or try a dish the youngsters will delight in, grapefruit halves with pepper mint candy crushed very fine and sprinkled generously over the top. Let the candy on the grapefruit about 15 minutes before serving.

Grapefruit segments--alone or with other fruits--may be a dish for breakfast, dessert or salad. A grapefruit-cranberry cup starts with tangy grapefruit sections and then is topped with a combination of ground raw cranberries and ground whole oranges, sweetened to taste. Another gay combination is grapefruit and orange sections with sliced strawberries--garnished with mint. Or grapefruit sections may be combined with raspberries, melon balls or cubes, peaches, pears, banana slices, seeded grapes, diced apricots, apples, pineapple or cherries.

Combined with fruit or vegetables, grapefruit is a good salad standby. Make it the salad feature by arranging segments on lettuce, sprinkling with chopped nuts and garnishing with a little pimiento. Serve with your favorite dressing. Or vary it by combining with oranges, dates, pineapple--the same fruits that are good in fruit cups--on lettuce background.

A special treat is a grapefruit salad bowl. Alternate grapefruit sections and tomato wedges in rings of avocado arranged with salad greens in a bowl with French dressing. It's a wholesome salad when you combine 1 part grapefruit sections and 2 parts shredded cabbage and 1 part sliced raw carrots--mixed with French dressing.

TRY BROILED MARINATED CHICKEN

6 tablespoons grapefruit juice
1 envelope Italian salad dressing mix
1/8 cup salad oil
2 to 3 pounds chicken, cut into servings pieces

Combine grapefruit juice and salad dressing mix in crust or jar with a tight-fitting lid. Cover and shake well. Add oil and shake again. Place chicken in a large bowl. Pour oil mixture over chicken pieces, cover and let stand in the refrigerator at least six hours or overnight.

Place chicken on rack under preheated broiler. Broil about 5 minutes on each side, or until done. Baste occasionally. Makes 2 to 3 servings.

Plains Fine Arts Club

The Plains Fine Arts Club met January 7, 1971 in the First Baptist Church with Mrs. Robert White, Miss Sue Parker and Mrs. Ben Liles as hostesses.

Mrs. Robert White, president, presided over the business meeting. Reports were heard from the various committees and the minutes were read and approved. A special committee, composed of Miss Sue Parker, Mrs. L. O. Smith and Mrs. Bob Blundell, was appointed to select a student from the Plains High School to be the recipient of the annual award given by the Plains Fine Arts Club. This is a cash award and is given to help the student selected to further their education, preferably in music.

Mrs. Rhonal Teaff, program director, gave a discussion on voice do's and don'ts and a voice lesson. She presented Mrs. C. L. Anderson who gave the story of the Hymn of the Month, "Praise to the Lord", and it was sung by members of the choir, accompanied by Mrs. Darrell Lindsey.

Eighteen members and one guest, Mr. Clay Lindsey, were present for the meeting.

HORS D'OEUVRES IN A HURRY

There's no reason to shy away from serving hors d'oeuvres when these Crunchy Cheese Balls can be prepared so quickly. Post 40% Bran Flakes sautéed in butter provide the attractive coating for these chive-flavored cheese balls. A refreshing punch makes a delicious accompaniment.

Crunchy Cheese Balls

- 1 package (3 oz.) cream cheese
- 1 tablespoon chopped chives
- 2 teaspoons butter
- ½ cup 40% bran flakes, slightly crushed

Soften cheese with a fork. Stir in chives and shape into 12 small balls. Chill. Just before serving, melt butter in small skillet. Add cereal and sauté over low heat--about 3 or 4 minutes. Roll cheese balls in sautéed flakes. Insert a wooden pick in each ball. Makes 1 dozen hors d'oeuvres. Note: Recipe may be doubled.

PLAINS REVIEW

Weekend guests of Mr. and Mrs. Carl Lowrey and boys and Mr. and Mrs. Blackie Bearden were Mrs. Lowrey.

Weekend guests of Mr. and Mrs. Carl Lowrey and boys and Mr. and Mrs. Blackie Bearden were their brother and family, Mr. and Mrs. Dale Bearden and Diana of Ft. Worth.

Mrs. Jesse Dearing, Melvin, Mr. and Mrs. Claude Addison and Debbie attended the district two 4-H meeting in Lubbock Saturday.

Dortha Gray accompanied her aunt Catherine Fitzgerald to the airport in Lubbock Saturday and picked up her aunt, Mrs. Lois Williams of Jackson, Calif.

Mike Wilkins, Beverly McKee, Lance Smith, and Steve Simpson returned to college at South Plains Monday.

Mrs. Ray Bearden and Mrs. Harold Parrish will be hostesses to a ceramic party Tuesday, Jan. 19 in the clubroom in Plains.

Mr. and Mrs. Don Gillian visited in El Paso, Juarez, Mexico, and toured the Carlsbad Caverns last week.

Danny Kelley has gone on a field trip to Old Mexico with a group from Texas Tech.

Russell Jones left Saturday for Houston to return to the University after spending the holidays with his parents.

Mr. and Mrs. Gary Goodsell & Giner left Tuesday for home at Manhattan, Kansas where Gary is attending college. They have been visiting her parents, Mr. and Mrs. Jesse Snodgrass for the past two weeks.

Gregg Jones left Tuesday to return to North Texas at Denton after spending the holidays with his parents.

Mr. and Mrs. Tommy Wilson and family of Andrews visited Mr. and Mrs. Tommy Elmore and family Thursday.

Bro. and Mrs. Don Knight and Rev. and Mrs. Avin Kelley of Smyer left Sunday afternoon to attend the Evangelism Conference in Ft. Worth.

Mr. and Mrs. Ray Bearden, Rickey & Rhonda attended Mr. Bearden's nephew's wedding in Welch Saturday night.

Visiting Mr. and Mrs. A. J. Crutcher was his brother, Don, from Lamesa.

Mr. and Mrs. Melvin Lowrey, Tracy, Tonya & Kevin were supper guests of Mr. and Mrs. Rowe Stephens and family Wednesday.

Mr. and Mrs. John Dale Curtis and family, Mr. and Mrs. Rowe Stephens and family and Mr. and Mrs. L. L. Smith returned home after spending the holidays in Port Aransas.

Terry Wood was admitted to the Brownfield Hospital Sunday with pneumonia. He was feeling better Monday.

Mr. and Mrs. Albert Harris, night ginner at the Tokio Co-op Gin moved back to Vicksburg, Mississippi last week.

Mr. and Mrs. Warren Newcomb announced the birth of a daughter, Misti Dawn, born Jan. 1, at 4:10 p. m. in the Brownfield Hospital. She weighs 6 lbs. & 6 ozs. Grandparents are Mr. and Mrs. Roy Martin of Tokio, and Mr. and Mrs. Allen Newcomb of Brownfield.

Visiting Mr. and Mrs. Alton Elmore Sunday afternoon were their son and family, Mr. and Mrs. Ricky Elmore and Chris, Rex Swann of Canyon and Janice Strickland of Levelland.

Jeff and Cheryl Gentry visited their father & family, Mr. and Mrs. Roy C. Gentry in Washington, D. C. during the holidays.

Visiting Mr. and Mrs. Charles Williams, Shelly, Matt, and Kirk were Mr. and Mrs. Wayne Rogers and family of San Antonio.

When you buy land, it is important to know that tough laws govern real estate agents. They are required to provide all the facts that a buyer demands in advance of sale. ANNOUNCEMENTS

There will be a Ceramic workshop Tuesday, January 19 from 9:30 to 6:00 in the clubroom at Plains. Everyone is invited.

Mr. and Mrs. Farris Glenn of Olton visited Mr. and Mrs. W. R. Bean Sunday. They were neighbors in Lamb county and Haskell county several years ago.

Recent visitors in the Robert Young home was Mr. and Mrs. Art Webb of Gleason, Tenn. They also visited Mr. and Mrs. Foy Cogburn and Mr. and Mrs. Neil Parks.

Mrs. C. L. Strickland and Wayne of Levelland visited in the Ray Strickland home last Wednesday.

Mr. Bandy was ill last week. His sons, Leon of Meadow and Audie of Lubbock were here part of the week.

Skeet Robertson was in Lubbock Saturday morning. He was in Seagraves Saturday evening and visited with the Julian family.

Mr. and Mrs. Elton Hicks of Denver City visited Mr. and Mrs. Skeet Robertson Sunday. Skeet and his wife visited Mr. and Mrs. Due McDaniels in Denver City Sunday night.

Mrs. Donald Bookout was in Seagraves Saturday to take her mother to the doctor.

Mrs. Ralph Bone was taken to the hospital in Lubbock Monday. Mr. Bone is reported to be improving.

Mrs. H. M. Smith returned home last Wednesday after spending the holidays with her son, Glenn and family, near Dallas.

Mr. and Mrs. Earnest Blount of Seminole visited his brother G. T. and family last Friday.

Mr. and Mrs. Tommy Blount spent the weekend in Levelland and visiting her parents, Mr. and Mrs. Railey.

Mr. and Mrs. Ben Gibson spent the holidays in Santa Fe, and their grandson, Victor, returned home with them for a two week visit. S. F. C. and Mrs. L. H. Gibson, Bradley and Valeria of Santa Fe, came last weekend for their son, Mr. and Mrs. E. W. Shellers and Donnet of Denver City were there Saturday.

Visiting Bob Wason Monday night was his daughter, Ita Grigsby of Lubbock, granddaughter, Mrs. Mike Miller of Norfolk, Va. and Mrs. Charles W. Seale and Kathy of Hereford.

Mrs. D. C. Newsom has been visiting relatives in East Texas.

Mrs. Geo. Fullerton of Dorie, returned home with her, Mr. and Mrs. J. D. Newsom of San Diego, Calif. visited her this week also.

Mrs. Hoss Newsom was in Dickens last Thursday and Friday.

Mrs. Shirley Curry of Seagraves visited her mother, Mrs. G. T. Blount last Saturday.

Mrs. Dee Keck spent the weekend in Levelland visiting friends.

We did not have any fires this last week. Thank Goodness!

We held our Annual Election of officers for 1971 at our Monday night meeting. They are: Chief-----O. W. Harbour Secretary-----Billy J. Phillips Fire Marshall-----S. L. Tingle Captain-----Jackie McDonnell Captain-----Billy Willison Lt.-----Nino Garcia, Jr. Lt.-----Pete Flores Reporter-----J. C. Sims Assist. Rep.-----S. T. McDonnell

Leaving the Chiefs post was James O. Barnett. Leaving the Secretary post was Leroy Howell. The rest of the post was held by the same men.

We are having a standard first aid course in the near future. We would like to invite the public to this course. If anyone is interested, please leave your name at the City Hall within the next two weeks. We need to know how many people wants to attend so that we can purchase enough books. THIS IS A FREE COURSE. Let's all make an effort to attend.

Installing underground irrigation pipeline on the Yoakum Farm Company land in SW Yoakum SWCD. John Milligan of Yoakum Farms and Gilbert Pierce of The Plains SCS with two laborers are shown with part of the pipe being laid. SCS Photo

Underground Irrigation pipeline to save water, improve irrigation efficiency and reduce cost of applying water to crops continues to be a very worth while conservation practice in our sandy soils here in Yoakum County Soil and Water Conservation District. There has been many thousands of feet installed under the Great Plains Conservation Program, by land owners at their own expense and for the last two years under the ACP program of the ASCS office.

Some of those who have installed pipe in recent days are Henry S. May, Albert O. Williams on the Lee Kid farm, Harvie Pool on the Yoakum Farm Company, Grady Warren on the Paul New farm and Kenneth Blount. To date there have been 456,706 feet of irrigation pipelines installed in the District under all programs.

The Yoakum SWCS Board met last Monday at ALMA'S Restaurant in regular session which is once a month. The Board plans to meet on Tuesday, February 2nd and travel to Morton to attend the South Plains Area Association meeting.

A. E. McGinty, Secretary of the local SWCD, is President of the South Plains Association.

There were 14 Great Plains Conservation Program contracts that expired on December 31, 1970 in the local unit. This is the smallest number we have had to expire in several years, but due to a shortage of GPCP funds, we have not been able to write as many contracts as we were writing in the early 1960's. The Plains work unit has 27 active contracts now and 5 in the process of being approved which will make a total being out at present.

Chisel plowing continues to be the largest farming job and it is doing a good job of preparing the land for the coming wind erosion period. Are you a stalk shredder or do you use all the stalks and cover along with clods of soil to prepare for what is to come????

FORGIVE US OUR DEBTS, AS WE ALSO HAVE FORGIVEN OUR DEBTORS.

These familiar lines from the Lord's Prayer are as meaningful in life today as they must have been on the day when they were spoken. Jesus had told His followers: "Blessed are the merciful, for they shall obtain mercy... Blessed are the peacemakers... be reconciled to your brother... Love your enemies and pray for those who persecute you."

As we reread these passages, we can see how applicable they are to us and to the situations in our lives. We need to be merciful. We need to cure our hostilities. We need to be reconciled with our brother and to know that all men are our brothers. We need to learn how to love not only those who love us but those whom we consider our "enemies." We need to pray for and bless those who we feel persecute us.

Sometime ago, there was heard one person deliberately and with malice belittle another person in a large crowd, and not long afterwards, this same person was praying to his Lord in a loud voice. Also, another person deliberately and with malice failed to give help to another person because of holding some grudge.

What is Christianity if it is not living by the words and teachings of Jesus, and where in the Bible do you find any place where Christ Jesus taught hatred and malice toward another person, regardless of the reason. One of His statements was: "Do not yet understand, that whatsoever entereth in at the mouth goeth into the belly and is cast out into the draught? But those things which proceed out of the mouth come forth from the heart; and they defile the man." Perhaps you do not especially like some things that another person does, but even then, we are supposed to love that person's soul and not speak or do evil to him because each person alive has a part of God's Spirit within him, but perhaps they have not yet come to the realization.

God is everywhere; in our trees, flowers, mountains, valleys and yes, within each and every soul that He has created. Job said: "My brethren have dealt deceitfully as a brook and as the stream of brooks they pass away;... the paths of their way are turned aside; they go to nothing and perish."

Surely, right now, we all have a need to pray in the Christ Spirit of love and forgiveness.

"For if you forgive men their trespasses, your heavenly Father also will forgive you," St. Matt. 6:14

Mrs. Bessie McCravey was confined to her home all week because of a severe cold.

David Box spent last week in Coleman with his grandparent Mr. and Mrs. A. J. Walton who are in the convalescent home there. Mrs. Walton had pneumonia but was improved Saturday.

Mr. and Mrs. Joe Crump, Paula, Brad, and Steve visited Mr. and Mrs. Frank Crum and children in Rockdale during the holidays.

Tommy Guy Box, Dale Cleveland, Joe St. Romain and Troy Wilkins were on the senior 4-H judging team Saturday in Plains. Dale was high point on the team while Tommy Guy and Joe tied for second place.

The State Line H. D. Club operated the concession stand Saturday in the stock barn for the Yoakum County Judging Contest. Those working were Mesdames Roy Perkins, A. R. Mitchell, R. G. Hartman, Don Young, Clark Jones, Lee Roy Box, Tom Box.

Mrs. R. G. Hartman and Mrs. Lee Roy Box, Dicky Hartman, Lebeth Box, Janet Townsend, and Bonnie Sue Atkison attended Lea Co. 4-H Council in Lovington Saturday.

Mrs. Tom Box and Tommy Guy were in Lubbock Wednesday and visited with Ralph Bone in the West Texas Hospital. Mr. Bone has been seriously ill, but is now improving.

members present. Each office reported on the meeting attended in 4-H Council in Lovington Saturday. Programs were listed thru August. Mr. Kemp, associate agent, Lea Co., is to give the program Feb. 13 on "Yard Beautification and Lawn Care." Mrs. A. R. Mitchell played the piano while Rene Bradford led several song Sandwiches, cake, and tea were served to Mr. and Mrs. Frank Griffin and family, Clark Jones and grandchildren, Greg and Mark Parker, Mr. and Mrs. Tom Box and Tommy Guy, Mr. and Mrs. R. G. Hartman and Dicky, Mrs. A. R. Mitchell and Judy, Mr. and Mrs. Lee Roy Box and Kimberly, Janey, Jackie and Ruby Townsend.

Mr. and Mrs. Barron Blair, Linda and Royce visited Mrs. B. B. Blair and Mr. and Mrs. Frank Gatlin in Andrews.

Mr. and Mrs. Hayden Box were called Sunday to the bed side of her mother, Mrs. A. J. Walton, in Coleman. Her mother had apparently suffered a stroke and is unconscious.

Mrs. Blanche Dyer was brought home from the hospital where she has been a patient with a broken arm.

Order And Notice Of City Election

STATE OF TEXAS)
COUNTY OF YOAKUM)
CITY OF PLAINS)

Election Order

I, Roy A. Edwards, Mayor of the City of Plains, Texas, by virtue of the power vested in me by law, do hereby order that an election be held in the City of Plains, Texas on January 30th, 1971 for the purpose of deciding the following proposition:

"Shall the City of Plains, Texas purchase a desalination plant for the City's water system"

() For the Proposition

() Against the Proposition

And that said election be held at the City Hall in said City and the following named persons are hereby appointed managers thereof, to wit:

Mrs. James Livesay JUDGE
Mrs. W. H. Culwell CLERK
Mrs. John Anderson CLERK

The City Secretary is hereby directed and instructed to post properly executed copies of this order and notice in the appropriate places, have it published in the local newspaper and recorded in the County records.

Signed and executed this 11 day of January, 1971

SEAL
Roy A. Edwards, Mayor

H. G. Abercrombie, Secretary

Cooperative water treatment testing program at an end

Since the fall of 1968, the "Permasep" Products Group of the Du Pont Company has enjoyed an outstanding relationship with the city of Plains. We hope we have been good neighbors. We hope you feel we have helped your city and its people.

We know you have helped us.

The cooperation of your city officials—as well as the cooperation of many private citizens—has helped Du Pont make major advances in the development of means and methods of converting brackish water to good water which meets the standards of the U.S. Public Health Service.

* * * * *

At the same time, Plains helped us tell people throughout the United States about this new way of making good water from bad. You allowed us to hold a press conference in your city . . . you allowed us to film a commercial which was used on national television . . . you permitted us to feature your town and its people in our company magazine.

Du Pont hopes it continues to be closely allied with the future of Plains. We hope also the many personal ties which have been developed will become even closer.

* * * * *

You are aware the cooperative testing and development program which brought Du Pont to Plains just over two years ago is ending. Development testing at the water treatment plant which Du Pont has operated since June, 1969—supplying 100,000 gallons of good water per day to the city—is completed.

The people of Plains will now make a decision about the future of their water supply system. You will decide either to have hard brackish water, or to purchase a permanent desalting plant which will consistently provide good water to all parts of the city.

* * * * *

The agreement between the city of Plains and Du Pont called for the city to receive a sales proposal for the permanent plant as the testing program neared its end. A proposal was made to the city council in November, and additional information supplied in December, 1970.

Du Pont's proposal suggests the city buy a plant with a capacity of 150,000 gallons per day. This plant is larger than the test installation and will nearly eliminate the blending of untreated well water that has been required during hot weather.

If the suggested plant is installed in accordance with the recommendations of the city's consulting engineer, all users will receive the same quality water. The consultant's recommendations—fully considered in the Du Pont proposal—will prevent treated water from being limited to certain sections of the city. All users will receive identical water at any given time.

The Du Pont proposal assumes that both city wells will be connected to the plant, rather than just the single well presently connected.

An explanation of the proposal made to the city council is presented on the facing page. The cost data there are examples based on one set of possibilities developed by Du Pont for purposes of illustration. The final water rate structure would be worked out by the city.

* * * * *

Each registered voter in Plains will be asked to express his opinion. Should the city purchase a permanent desalting plant to provide good water? Or, should the city continue with water which does not meet the standards of the U.S. Public Health Service?

* * * * *

While conducting tests and development work here, the Du Pont Company developed a new water treatment device which is very different from the B-5 permeators which have supplied your good water for more than 18 months. The new device—called the B-9

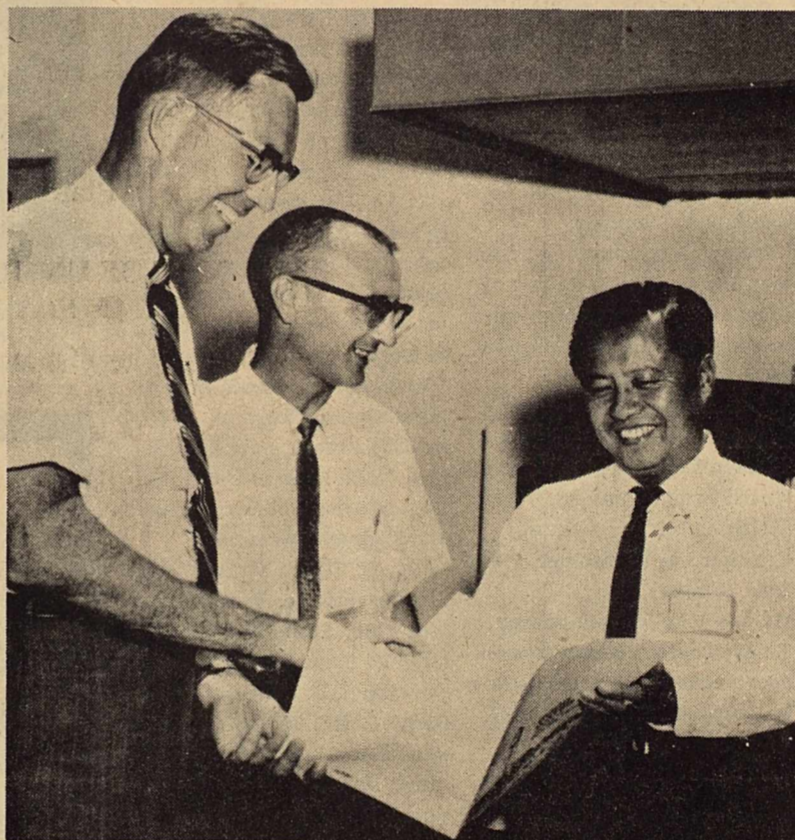

permeator—is smaller, more economical and more reliable than the units in the present plant.

The new plant which Du Pont has proposed—a larger permanent installation owned by the city—is planned around the new B-9 permeator. It is based on the most up-to-date water treatment information available and on the best treatment devices on the market.

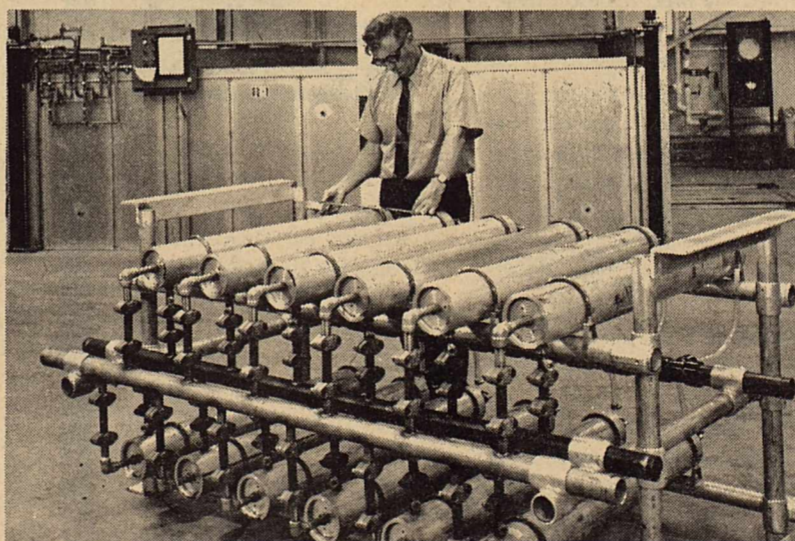

* * * * *

Du Pont knows the people of Plains realize the importance of the question they face. We know you realize fully that the outcome of the January 30 referendum will affect your family, and may influence the future growth of your city. We hope you choose to buy a water desalting plant and enjoy the comfort and convenience good water will provide.

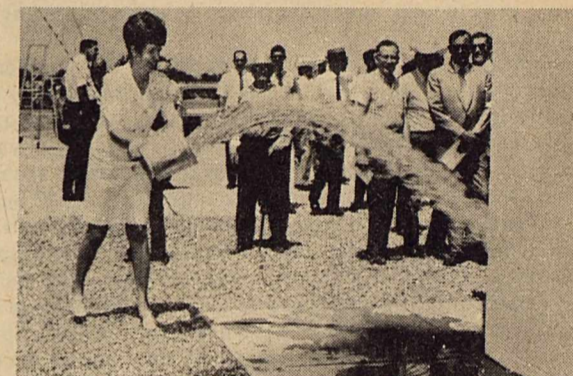

Du Pont will try to provide you the facts necessary to make a sound judgement on this question. The outcome of the election is important to us. But the understanding and continued friendship of the city of Plains is far more valuable. We will devote our efforts to maintaining the relationship that has grown up over the past two years.

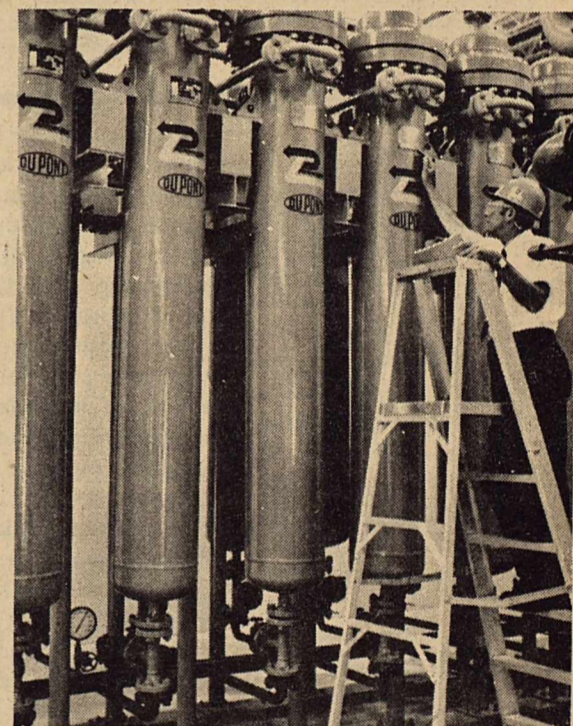

Mayor Roy Edwards was joined in dedicating the Du Pont test installation by Robert Wright, Jr., Du Pont, and Dr. Chung-ming Wong, Director of the Office of Saline Water (right). At the August 19, 1969, dedication, Dr. Wong called the plant's completion a "milestone in man's conquest of inner space." He congratulated the people of Plains for their willingness to use new technology to improve their water supply.

The 150,000 gallon per day water treatment plant proposed for the city will be equipped with the new B-9 permeator, recently announced by Du Pont. Six modules like the one above will supply good water to the city if the plant is installed. The older, less efficient permeators which have operated since June, 1969, will be removed. The entire plant will be updated with the latest equipment.

Mrs. Jeaney Edwards, wife of Plains Mayor Roy Edwards, christened the water treatment plant in August, 1969, by dousing it with good drinking water produced by the "Permasep" permeators. Since that time, the plant has operated around the clock, producing 100,000 gallons of good water daily.

These B-5 permeators originally installed in the Du Pont test plant have produced more than 50 million gallons of good drinking water for the city of Plains. This model permeator has been discontinued and replaced by a new, smaller, more efficient unit called the B-9 permeator. The permanent treatment plant proposed by Du Pont is based on the better performance of the new B-9 permeator.

THANK YOU FOR LETTING US

City voters must make a choice on future plant

DU PONT'S PROPOSAL FOR A NEW PLANT

The proposal Du Pont has made to the city is for a plant which will produce 150,000 gallons of good water each day. The test plant has been producing just 100,000 gallons. The size of the suggested plant has been increased in order to provide more water and nearly eliminate the blending of untreated well water during the hot summer months.

-More Days Of Good Water-

The proposed plant will provide good water more days of the year than did the test plant. Side-by-side comparison of the estimated performance of the plants looks like this:

	Proposed	Test
Days of water at less than 500 parts per million dissolved solids. (This is excellent water.)	260	185
Days of water between 500 and 1,000 parts per million dissolved solids. (This is good water.)	80	90
Days of water at more than 1,000 parts per million dissolved solids. (This is fair water.)	25	90

-Good Water In Whole City-

The Du Pont proposal assumes the city will follow the recommendations of its consulting engineer and connect both city wells to the plant. This will help eliminate the problem certain parts of town have in getting good water when both wells are in service.

With the new plant installed according to the proposal, the entire city would receive the same quality water. There would be no difference in water quality from one side of the city to the other. Distance from the treatment plant would not affect water quality.

-Size Of Plant Economical-

Du Pont has suggested the 150,000 gallon per day plant after studying water use in Plains and balancing this against the cost of different size treatment facilities.

Building a plant large enough to handle the hottest summer weather would not be economical. There would be much of the year the plant would be in only partial use because of reduced water use.

It is estimated a plant which produces 150,000 gallons of water each day will supply the total city need 260 days a year. There will be 80 days a year when amounts of untreated well water will have to be blended. The remaining 25 days will require heavier blending, but water quality throughout the city will remain better than untreated well water.

Increasing the plant size to 200,000 gallons per day would increase the city's investment \$28,000. This would add only 30 days a year to the length of time when no blending was required.

Du Pont feels the plant it has suggested is the best size for the city to purchase. It represents the best investment in terms of capacity.

HOW YOUR WATER BILL WILL BE AFFECTED BY A NEW PLANT

A new, permanent, 150,000 gallon per day water desalting plant can be operated by the city of Plains without large increases in monthly water bills. Here are some examples of monthly bills based on current city water rates and ones in Du Pont's proposal.

If you use this amount of water each month	3,000 gallons	5,000 gallons	7,000 gallons	9,000 gallons	11,000 gallons
Your present monthly water bill is	\$3.50	\$4.70	\$5.90	\$7.10	\$8.20
With the proposed Du Pont plant installed, your monthly water bill would be	\$4.75	\$6.65	\$8.55	\$10.45	\$12.25

These figures are based on the latest information available to Du Pont. Final water rates with the new plant in operation would be determined by the city and would not necessarily be identical to those shown here.

WHAT DO GOOD AND BAD WATER REALLY COST?

The average American family, according to the U.S. Department of Interior, uses approximately 8,500 gallons of water each month. In places having good water, the monthly water bill represents the total cost. But where water is bad, there are other related costs, usually called "hidden" costs. They have a dramatic effect on the real cost of water. These "hidden" costs are part of your household budget in Plains, and cannot be disregarded.

THE COST OF UNTREATED WATER IN PLAINS

If you use 9,000 gallons of water each month, your yearly water bill without a water treatment plant is..... \$ 85.20
 Without a water desalting plant, you have "hidden" costs each year of..... \$151.50*
 Your total yearly cost for water and water-related maintenance and problems is..... \$236.70

THE COST OF TREATED WATER IN PLAINS

If you were to use 9,000 gallons of water each month with the proposed Du Pont plant in operation, your yearly water bill would be..... \$125.40
 With a water desalting plant in operation, you would have no "hidden" costs..... \$ 0.00
 Your total yearly cost is..... \$125.40

GOOD WATER DOES NOT INCREASE YOUR HOUSEHOLD EXPENSES. IT SAVES YOU MONEY.

*See "The Hidden Costs of Bad Water"

THE HIDDEN COSTS OF BAD WATER

When poor quality municipal water like that found in Plains is used by homeowners, the dissolved minerals build up in pipes, cause appliances to wear out long before they do in other cities, create a need for excessive amounts of soap and detergents, and make bottled water necessary for cooking and drinking. Clothes wear out quicker and there is general discomfort caused when showering or shaving.

A study done by the U.S. Department of Interior shows that the average American family living in a city with poor quality water has expenses that could be eliminated by good water. These expenses are estimated as follows:

- Reduced appliance life, clogging pipes and damaged plumbing fixtures, \$50.00 a year
- Excessive wear on clothing 11.50 a year
- Bottled Water 50.00 a year

These are not the total hidden costs. Du Pont

estimates that the extra soap and detergents you must use cost you \$40.00 a year.

This means you are paying \$151.50 a year in extra household expenses because you do not have good water.

Not considered in that figure is an estimate that each resident must pay an average of \$6.90 a year in taxes for maintenance and replacement of municipal piping, storage facilities and water meters.

GOOD WATER STILL AVAILABLE AT PLANT

Arrangements have been made for good drinking water to remain available from the spigot located near the side entrance to the Du Pont treatment plant. You may bring your own containers and fill them for your use at home.

This arrangement will be continued for the next several weeks as the present plant is dismantled. The water will be produced by a new "Permasep" B-9 permeator, the same device Du Pont has proposed for a permanent installation here.

'How To Ruin A Town, Are You Contributing?

In this column is listed "How to Ruin A Town in Ten Easy Steps," and the list follows below.

1. Never attend meetings. Just sit around and criticize the way "they" are doing things.
2. Vote against any kind of bond issue, whether the purpose is good or bad. "They" just want your money.
3. Make fun of the fire and police departments. "They" are just out for "glory" and money.
4. Don't go to the school concert, little league ballgame benefit program, youth stock show, or arts and crafts exhibit. Instead, sit in a trance in front of the "boob" tube.
5. Knock the city council. This is a must, after all, every member is just on the council to get a little "kickback."
6. Criticize everyone who attends church because they are all "hypocrites."
7. Buy everything you can from an out-of-town discount store or mail-order catalogue. After all, they're the ones who are the first to come forth with

donations and service to the community.

8. Don't support your local newspaper, Chamber of Commerce or civic groups. But, be sure and jump on the editor the first time your name is misspelled or your great-aunt's three-minute visit is omitted from the social column.
9. Spread any story or rumor that is defamatory or uncomplimentary about the town. Be sure out-of-town visitors are told, "there is nothing here, you'll find most of the advantage you're looking for 30 miles away or in the next county."
10. Always be skeptical and cynical about anything supposed to be good for the progress and betterment of the community. Above all, adopt as your motto, "If it's good, it can't happen here."

If you see yourself in any of these "rules", it's not doing your community any good. And, in most cases, communities who are in trouble are full of people who live by these commandments.

This is a Summary of the Proposition presented to the City of Plains by E. I.

Du Pont for the sale of a Water Desalination Plant

SUMMARY

	PLANT CAPACITY (1000 GAL/DAY)		
	100	150	200

Taxpayers Ask IRS

This column of questions and answers on federal tax matters is provided by the local office of the U.S. Internal Revenue Service and is published as a public service to taxpayers. The column answers questions most frequently asked by taxpayers.

<p>Q Can a child born before the end of the year be claimed as a dependent for the whole year?</p> <p>A Yes, as long as the dependency tests are met for the balance of the tax year in which the child was born.</p> <p>Q I didn't have a job when I moved here. Does that mean I won't be able to deduct my moving costs?</p> <p>A You may be able to deduct your moving expenses if you meet certain requirements. In fact, anyone moving to accept a new job as well as someone transferred to a new location by his present employer may qualify.</p> <p>The first requirement is that your new place of employment be at least 50 miles farther from your old home than your previous job was.</p> <p>The second requirement is that you be a full-time employee on your new job for</p>	<p>at least 39 weeks during the 12 months following the move.</p> <p>For details, send a postcard to your IRS district office and ask for a copy of Publication 521, Tax Information on Moving Expenses.</p> <p>Q I didn't pay any estimated tax this year and now I find I'm way underwithheld. What should I do?</p> <p>A File an estimated tax declaration, Form 1040ES, as soon as possible and pay whatever should have been paid by this date. This will reduce the penalty for underpayment of estimated tax. Form 1040ES and instructions may be obtained from any IRS office.</p> <p>Q What's the deadline for reporting the social security tax I withhold for my cleaning woman?</p>	<p>A February 1 is the due date for the Employer's Quarterly Tax Return for Household Employees for October, November and December.</p> <p>Q If someone dies during the year, does an income tax return have to be filed if there was any income or earnings?</p> <p>A Yes, the same general tax filing requirements apply to taxpayers who are deceased. There are special provisions, however. For details, send a post card to your local IRS office and ask for a copy of Publication 559, Federal Tax Guide for Survivors, Executors and Administrators. It's free.</p> <p>Q What's the filing date for farmers next year?</p> <p>A April 15. However, farmers who do not file estimated tax declarations by January 15 should file their 1970 returns and pay the tax due by March 1, to avoid possible penalties for underpayment of estimated income tax.</p>
--	--	--

CITY TAXES ARE DELINQUENT After January 31, 1971

AVOID PENALTIES, and INTEREST and Collection

Costs by paying taxes before February 1, 1971

All City taxes are acceptable by mail, but must be postmarked before 12:00p.m. January 31, 1971 to avoid penalty. Personal property taxes are NOT paid by the various loan companies

CITY of PLAINS

YOUR LIFE INSURANCE

Prepared by the American Society of Chartered Life Underwriters, the national society of life insurance professionals who have earned the C.L.U. designation by meeting high educational, ethical and experience requirements.

QUESTION: I just purchased an additional \$10,000 straight life policy and find the cost is more than twice that of the \$10,000 policy my father bought for me as a child. Why such a difference now—I'm the same risk under each policy?

ANSWER: No you're not. You're older. If your new policy costs "more than twice" your child policy, you are probably in your early 30's. The death rate at your present age is probably about four times greater than it was when you were 10.

There's another reason for the difference. If your father took out the policy when you were 10, the insurance company stood to collect more premiums, before paying the face amount, than is now the case.

But here's some news to cheer you up: the old policy is actually costing you very little, if anything. It has nearly \$1,400 cash value in it already—and this cash value is increasing each year by more than you pay in.

Scientific Chain Reaction

A press release from a Denver-based, investor-owned power company reports that, "Skills and equipment developed in advancing the nation's space program have provided a valuable assist. in. erection of Colorado's first nuclear electric power plant." The release describes in considerable detail how a division of a space-oriented manufacturing firm is making certain components of the nuclear plant. The facilities of the space firm were uniquely suited to the job.

No one can ever know the enormous impact of space technology on all phases of American life. The one certainty is that the space program has given the United States a storehouse of knowledge that, if used wisely, can advance the cause of civilization and human betterment for centuries to come. The \$20 billion plus that it took to put man on the moon set off a scientific chain reaction that could open the doors to "rebuilding the Earth"—as one space firm official so appropriately expressed it.

With the passage of years, the benefits of the space program should become obvious enough to provide their own answer to those who maintain that tax dollars spent on space could better be spent here on Earth. As a matter of fact, the money is spent here on earth, and Earthlings are receiving full value for every dollar of the investment. It would be the greatest of tragedies for all mankind if America abandons the exploration of space.

business

A Century of Progress

The 100th Anniversary of the working girl is currently being observed. It began when eight trained young women from the YWCA in New York entered the business world as female office workers in an era of all-male secretaries.

By the turn of the century Tillie the Toiler had become the right hand of her boss. Thomas Edison had sung, "Mary Had A Little Lamb," and his voice recorder found its way into offices. Women were able to operate the dictating machine, too, reports Edison Voicewriter president, Robert Murray.

The Edisonic, the new magnetic belt-dictating machine from Edison Voicewriter, a division of McGraw-Edison Company, is the latest model successor of Edison's dictating machine. (NP Features)

The Plains B-Team are pictured as they compete with Cooper during the Plains Cowboy Tournament, January 9, 1971.

During the first quarter Plains scored 7 points against Cooper's 5. Cooper gained on Plains at the half, changing the score to 19 over 13. In the third quarter, Plains bounced ahead with 31 points to Cooper's 24. In the final quarter

Cooper takes the lead and wins 39 to 36.

Mr. Mackey McWhirter is coach for the B-Team. The team members are : Tommy Beal David Barnett Bruce Lester Charles Fisher Mike McRae Randy Tidwell James Lewis Gene Wauson Robert Wilcox Lee Murph

COUNTY TREASURERS REPORT

IN THE MATTER OF COUNTY FINANCES
IN THE HANDS OF

WILDA OVERSTREET

Treasurer of Yoakum County, Texas.

COMMISSIONERS' COURT

YOAKUM County, Texas,
In Regular Session

January Term, 1971

WE, THE UNDERSIGNED, as County Commissioners within and for said Yoakum County, and the Hon. Gene H. Bennett, County Judge of said Yoakum County, constituting the entire Commissioners' Court of said County and each one of us do hereby certify that on this, the 11th day of January, A. D. 1971, at a regular term of our said Court, we have compared and examined the report of Wilda Overstreet, Treasurer of said County for the period beginning on the 1st day of October, A. D. 1970, and ending on the 31st day of December, A. D. 1970, and finding the same correct, have caused an order to be entered upon the minutes of the Commissioners' Court of said County, stating the approval of said Treasurer's Report by our said court which said order recites separately the amount received and paid out of each fund by said County Treasurer since his last report to this Court, and for and during the time covered by his present report, and the balance of each fund remaining in said Treasurer's hands on the said 31st day of December, A. D. 1970, and have ordered the proper credits to be made in the accounts of the said County Treasurer, in accordance with said order as required by Articles 1636-1637, Chapter 1, Title 34 of the Revised Statutes of Texas, 1925.

And we, and each of us, further certify that we have actually and fully inspected and counted all the actual cash and assets in hands of the said Treasurer belonging to Yoakum County at the close of the examination of said Treasurer's report on this the 11th day of January, A. D. 1971, and find the same to be as follows, to-wit:

WASHINGTON AND SMALL BUSINESS

There's Always Power

One of the more interesting observations of the times is the flip flops that occur in the intellectual establishment.

For a long time, the Keynesian school of economics was all the rage. This was a theory developed during the British depression years between the two world wars by a former Oxford don, Lord Maynard Keynes.

He reasoned in times of economic decline that government should engage in a wide variety of public works projects to put people to work and so to speak "prime the pump." Then when things picked up and the private sector took over, taxes would be increased to pay off the deficit which occurred during the pump priming period.

In this country one of the leading exponents of Lord Keynes was John Kenneth Galbraith, who has flitted back and forth from Harvard to Washington, and at one time was ambassador to India.

There was one big trouble with the application of the Keynes theory, however. And that was political unreality. During boom years no politician wanted to raise taxes to pay off any deficits.

As was inevitable, the tinkering with the economy, and the constant building of government deficits eventually led the nation down the road to a less happy economic condition.

So, recently, from a podium in Cambridge, England, Dr. Galbraith announced the Keynesian theories are now dead.

As to be expected whenever the high priest of any cult announces his god is dead, his followers waited with bated breath to learn what new god is being proposed to take the place of the expired one.

Dr. Galbraith had the answer for this. Wage and price controls are essential, he claims, to lead American people back into the promised land.

It may be necessary for wage and price controls to be instituted to save the day. But the interesting part of this pronouncement is that when the theories of the extreme liberals do not work out, they fall back on the premise that the government should do something.

In this case, it is for the government to step in and exercise what is tantamount to complete governmental control over the economy.

There is perhaps an ideological and semantic distinction between government setting prices and wages, and complete totalitarianism, but the difference seems quite small. And it is most interesting that the extreme liberals who orate about extending the scope of democracy finally get around to espousing the antithesis of democracy.
