Weight Watchers Program Ends With Monday Meeting

The final meeting of Weight Watchers was held Monday July 15 at the Library.

Houston management declared it was no longer economically feasible to continue with the program in Plains. Everyone is invited to attend meetings in Seagraves at 5:30 each Monday in the community center.

Those in attendance at the meeting Monday night were asked, "When you view a half glass of water, how do you see it filled? Half full? Half empty?"

The lecturer pointed out that "the way you view yourself is often reflected the same way."

Members were encouraged to pursue their desire for a better figure or better fitness with the number one exercise, walking.

Walking is safer than running, easier than push-ups and more fun than machines and everyone can do it.

Walking is free, requires no new skills, can be done at your convenience and no age, sex, weight or height limitations.

Walking is the oldest form of exercise known. As a health and fitness program, walking can be as mild as light exercise or as rigorous as an aerobic workout.

Girls State Participant Tells Of Experiences In Government

By Traci Nance

Girls State was a wonderful and unique experience. I not only learned about Texas government, I also made many friends that will last a lifetime.

I left Sequin June 11 and for the next 10 days, I lived in a mythical state composed of 582 girls.

For the first three days, I was introduced to almost every office of government, ranging from city to state. Learning about Texas government was just the beginning. After many hours of campaigning, our city, county and state officials were elected. We performed every duty that our own Texas government requires.

Another exciting aspect about Girls State was learning how the House of Representatives and the Senate functioned. We wrote bills, discussed and debated them just as our Texas representatives and senators do.

Some of the highlights of the trip

were visiting the capitol and hearing speakers such as Myra McDaniel, Ann Richards and Mrs. Cowle Keeton Rylander.

Texas Girls State was a wonderful experience. I now realize just how much work goes into making a government run smoothly. We should be proud of our state because it's not only one of the biggest, it's the best.

Voice Of Business

United States Chamber of Commerce

For years, job creation has been the *raison d'être* for government economic policymakers, both at the national and local level. The Reagan administration has pointed to the creation of nearly eight million new jobs as the crowning evidence that its economic policies have succeeded. State and local governments have fallen all over each other to attract new business -- especially manufacturing jobs.

Why all the fuss? What difference does that local steel plant, or mill or tool and die company make to a community?

More than you might think, according to a newly released study by the U.S. Chamber of Commerce entitled "What 100 New Jobs Mean to a Community."

"100 New Jobs" is an update of the Chamber's classic 1973 study of the same name, which development authorities have been using for years to determine the benefits of encouraging a new business to locate in their areas.

The very first line of the new edition explains why both the study and new jobs are in such demand: "For most communities, new business means more business." According to the study, 100 new manufacturing jobs bring along with them:

- Nearly \$2 million in additional aggregate personal income.
- Seven new retail establishments.
- Nearly \$1.5 million in new retail sales.
- 102 new families
- and most important, 64 additional

nonmanufacturing jobs.

The key to this bonanza of growth, of course, is to get the 100 jobs in the first place -- and the study provides some straightforward advice on this score, as well. Though incentives such as government loans, bonds, subsidized interest payments and development assistance are important, the key seems to be simply to provide a good climate for business -- especially favorable tax and regulatory climates that do not deter business startups. The study indicates that most new business results from startups rather than moves by existing companies.

Two larger lessons can be drawn from this. One is that it is just as important to keep 100 jobs, and the other business they produce, as to attract them. That too requires a favorable business climate -- one that doesn't price jobs out of the market.

The second lesson is that what is true for communities is true for the country as a whole. We have created millions of jobs in the past few years by creating a good climate through pro-growth reforms. But we need more investment to increase productivity to stay competitive. Higher taxes and the large federal deficit drain much needed capital from the investment stream. We need to become more competitive -- and budget reform is the place to start -- in order to produce the next 100 new jobs, and the next, and so on, and so on....

Keep An Eye On Changes

L.D. Hinson First Assembly of God

"Changes" are facts of life we must constantly deal with. Many changes in our life styles have brought us comforts and conveniences we wouldn't want to give up, especially in areas such as travel, communications and standards of living. However, some changes have not been so beneficial to us. I refer to those changes that hinder or have caused us to neglect our relationship with God.

In spite of the modernization of machinery, transportation and communication which allows us to accomplish many times more work than even 10 or 15 years ago, we still seem to have less time to give to God than before. I wonder, why is this so? What is to blame? Obviously the blame should not be placed on the improvement of materials and equipment, they save us time; and we can't honestly complain of less time, because there have always been 24 hours in a day. It seems to me that the real blame lies in the changes we have made in determining what is most important to us, or what we would rather do.

For example: We would rather sleep in an extra 30 minutes at the start of a busy day than to rise and spend a few moments with our Creator. Or we would rather spend our Sundays and Wednesday nights pleasing ourselves rather than by worshiping our God.

We make time to do the things we really want to do!

It is a misconception to think that we do not have the time to seek God because the day is so demanding. In truth, that is when we need Him the most. In speaking of our worry to meet our daily needs, Jesus said, "So don't worry at all about having enough food and clothing...your heavenly Father already knows perfectly well that you need them, and He will give them to you if you give Him first place in your life and live as He wants you to." (Living Bible, Matt. 6:31-33)

We must carefully guard against changes in this world that may cause us to change in our relationship with God. The courts of our land have told us that God is not needed or welcomed in our schools, the State legislature tells us that Sunday is just another day -- "business as usual." Everyone reminds us "we haven't got the time!" If Christians are not careful, they just might be unconsciously led to believe that these philosophies are changes that they must accept and make in their hearts.

Let us vigorously guard against any and all changes that would diminish our relationship with God! Let us seek Him, while He may be found, and let us keep America the "one nation, under God" which she started out to be.

MRS. MARK ALAN RODRIGUE

Miss Armstrong, Mr. Rodrigue Pledge Vows In Louisiana

Patricia Lynn Armstrong and Mark Alan Rodrigue, both of Beaumont, exchanged wedding vows in University Baptist Church in Lake Charles, La., June 23 at 2:30 p.m.

Parents of the couple are Harold and Kittie Armstrong of Leavenworth, Kan. and Bert and Lois Rodrigue of Lake Charles, La. The bride is the granddaughter of Neil and Mary Lou Parks of Plains.

The double ring ceremony was performed by Michael Rodrigue, brother of the bridegroom.

The bride wore a Southern Belle style gown of lace and silk organza with sculptured lace at the neckline featuring a large ruffle of lace at the edge of a yoke on the bodice. The sleeves were large puffed Cinderella sleeves which were finished with large ruffle of lace. The full length skirt also featured the large ruffle of lace and a bustle of layers of ruffled lace flowing into a full length train.

Her finger tip veil was made of tulle and attached to a crown of silk organza flowers and pearls, forming a poof at the back. It was trimmed with lace from the wedding dress of the bride's mother.

She carried a cascading bouquet of white orchids and white roses atop a white pearl Bible belonging to her mother.

Jo Ann Turner, organist accompanied Jim Stroud, minister of music at Trinity Baptist Church, Lake Charles, La. as he sang "My Only Love," "Two Will Be One," and "The Lord's Prayer."

Barbara Peterson of Spring and Patti Prince of Baton Rouge, La. served the bride as honor attendants. Bridesmaids were the bride's sisters, Melissa Armstrong and Glenna Armstrong, both of Leavenworth.

The attendants gowns were fashioned after the bride's gown, Southern Belle styled of dusty rose antique taffeta, featuring the puffed sleeves and ruffled yoke and ruffle at the base of the full length skirt with wide lace trim. Their headpieces were crowns of taffeta fabric flowers trimmed with silk organza and pearls.

They carried cascades of Rueburn Lilies and Stephanotas.

Robin Rodrigue of Westlake, La., niece of the bridegroom, was flower girl. She carried a white crocheted basket trimmed in lace and filled with rose colored flowers. Her dress was identical to the attendants.

Ringbearer was Paul Rodrigue of Westlake, La., nephew of the bridegroom. He carried a heart shaped pillow of lace, trimmed in pearls.

Best Man was the groom's father, Bert Rodrigue. Groomsman were Dale Gauthreaux of Fort Worth; Allen Carter of Lake Charles; and David Fare of Lafayette, La.

Ushers were David Dumesnil of Lake Charles, and Keith Green of Sulphur, La., both cousins of the bridegroom.

Lighting candles were cousins of the bride, Kristi and Karen Cobb of Plains. They were attired in waltz length dresses fashioned like the bridesmaids.

Reception followed in Trinity Baptist Church Fireside Room, Lake Charles, La.

Kemi Cobb, cousin of the bride, presided at the guest book.

The bride's three-tiered wedding cake was made by the bride's aunt, Janelle Cobb.

Those serving at the reception were Janelle Cobb and Lela Warren

of Plains; Marsha O'Bryan, Shreveport, La.; Karen Rodrigue, Westlake, La.; Sandra Zeringue, Rindy Zeringue, Joy Dumesnil, LeAnn Chapman, Margie Dailey, Clarabelle Heard, all of Lake Charles; and Janet Cress of Dickinson.

The bride is a graduate of LaGrange High School, Lake Charles, La. and is employed at Beall's in Beaumont.

The bridegroom graduated from Barbe High School and McNeese State University in Lake Charles and is currently employed as an engineer for Industrial Technicians in Beaumont.

A Lot Of Reasons Why I Don't Drink

(Editor's Note: The following article was given to the newspaper by David McGill, Drug/Alcohol Abuse Counselor.)

"How come you don't drink anymore?" a renewed acquaintance from long ago asked me the other day.

"Any more than who?"

"I mean any longer. How come you don't drink anything these days?"

"Drink? I drink coffee, tea, milk, soda pop, water, fruit juices, ice cream frappes."

"I mean drink," he said, "you know, booze."

"Oh, booze. No, I don't drink booze any more, you're right," I said. "I couldn't trust it any more. It turned on me. Once my friend, it became my enemy."

"Maybe you got a bad batch," he said.

"No, the sauce is the same. I changed. Because I have the illness of alcoholism, my tolerance weakened. Alcoholism doesn't come in bottles, it comes in people."

"Sounds pretty confusing," the fellow said.

"You think you're confused," I said, "You should have seen me. I drank for happiness and became unhappy; I drank for joy and became miserable; I drank to be outgoing and became self-centered. I drank for sociability and became argumentative and lonely..."

"I drank for strength and felt weak; I drank to prove my masculinity and it sapped my potency; I drank medicinally and got sick; I drank because I thought my job called for it and I lost my job..."

"I drank for relaxation and got the shakes; I drank for confidence and became uncertain; I drank for courage and became afraid; I drank

for assurance and became doubtful..."

"I drank to stimulate thought and blacked out; I drank to make conversation and it tied my tongue; I drank for warmth and lost my cool; I drank for coolness and lost my warmth..."

"I drank to feel Heavenly and came to know Hell; I drank to forget and became haunted; I drank for freedom and became a slave; I drank for power and became powerless; I drank to erase problems and saw them multiply; I drank to cope with life and invited death..."

I drank because I had the RIGHT and everything turned out wrong."

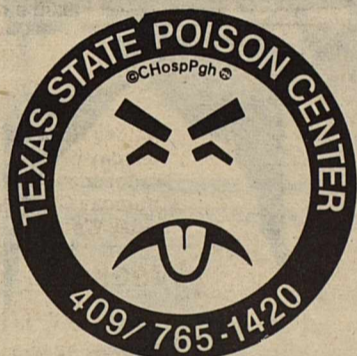

"Gosh," my friend exclaimed, "that must have taken a bunch of booze to get you in that shape."

"Just one," I told him. "The first one. For me, one is too many and a thousand isn't enough."

"So that's why you don't drink anymore?"

"Yep, I made it a rule. I changed tradition and I made a new tradition. I don't drink while I'm sober."

Contrary to popular belief, bulls cannot see red—or any other color. It's movement that attracts their attentions.

Plains Independent School District

From The Superintendent's Desk

This week I would like to discuss curriculum and how we decide what subjects should be taught in our schools.

The Texas Education Agency has the authority to approve or disapprove any course taught in Texas schools and failure to teach required courses will result in loss of accreditation for the local school district.

All schools work to attain accreditation in order that their students might be accepted by Texas colleges and universities. To be accredited, all minimum requirements for a balanced curriculum as set by the Texas Education Agency, must be met.

A well balanced curriculum in the elementary and junior high school shall consist of English, language arts, mathematics, fine arts, health, science, social studies, physical education and computer literacy.

On the high school level, the curriculum must include English, mathematics, science, social studies, economics, physical education, health, business education, vocational education, other languages, speech and computer science. In the secondary teaching fields, two or three courses will usually be taught in each subject area.

Courses such as swimming, radio, photography, communications, arts and science training are electives to Plains and must have T.E.A. approval as electives.

I think that you can see that the Texas Education Agency will pretty much determine the courses offered by all Texas Schools. At Plains I.S.D. we continue to comply with rules and regulations set by the Texas Education Agency and feel that we offer our students a quality education.
