### Twas The Night Before...

Twass the night before Jesus came and all through the house, not a creature was praying, not one in the house. Their Bibles were lain on the shelf without care in hopes that Jesus would not come there.

The children were dressing to crawl into bed, not once ever kneeling or bowing a head. And Mom in her rocker with the babe on her lap was watching the Late Show while I took a nap.

When out of the East there arose such a clatter, I sprang to my feet to see what was the matter. Away to the window I flew like a flash, tore open the shutters and threw up the sash!

When what to my wondering eyes should appear, but angels proclaiming that Jesus was here. With a light like the sun sending forth a bright ray, I knew in a moment that this must be THE DAY!

The light of His face made me cover my head, It was Jesus! returning just like He had said. And though I possessed worldly wisdom and wealth, I cried when I saw Him in spite of myself.

In the Book of Life which He held in His hand was written the name of every saved man. He spoke not a word as He searched for my name, when He said, "It's not here," my head hung in shame.

The people whose names had been written with love, He gathered to take to His Father above. With those who were ready He rose without sound while all the rest were left standing around.

I fell to my knees, but it was too late; I had waited too long and thus sealed my fate. I stood and I cried as they rose out of sight; Oh, if only we'd been ready tonight.

teachers who make a special effort to prepare their students for higher education. It was established in 1986 to promote public esteem for the teaching profession in Texas.

Mrs. Dearing's husband, Melvin, is employed with the Post Office and farms. They are parents of a son, Jeremy, a student at Plains High School, and a daughter, Kassie, a student in Plains Junior High.

According to the American Cancer Society, one out of <sup>nine</sup> ten women in the United States will develop breast cancer sometime in her lifetime. It is currently estimated that over 37,000 women die each year as the result of breast cancer.

Ninety percent of breast cancers are diagnosed by women or their physicians finding a lump in the breast. Women who are diagnosed with a lump large enough to feel have a 50 percent five year survival rate. A woman who is diagnosed as having breast cancer by mammography, before a lump can be felt, has a 97% five year survival rate and a 90% 10 year survival rate.

A mammogram can detect a cancer this small, ● even before it can be felt.

### Guidelines For Screening Mammography Established by the American Cancer Society.

- I. 35-40 years of age - One baseline mammogram.
- II. 40-50 years of age - A mammogram every 1-2 years depending on breast type and risk factor.
- III. 50 years of age and over - An annual physical examination and annual mammogram.
- IV. Asymptomatic women under 50 years of age with significant high risk factors should be examined at appropriate intervals. These risk factors include previous breast cancer and family history of cancer.

V. A symptomatic woman should have a mammogram at any age when she experiences a mass, nipple discharge, skin changes or unexplained breast pain.

A screening mammogram is an x-ray of the breast using extremely low dosages of radiation (usually comparable to dental x-rays) and is designed to find very early cancers.

A female technologist who is highly trained in mammography will perform the examination.

The charge for the screening mammogram is \$45.00. The Unit accepts cash, check, Visa, Mastercard and American Express.

Thank you,

Dear Santa,

I would like to have all the things my brothers don't let me

have, like their Nintendo games and baseball cards.

Bring them some dolls of their own, because they are always dressing mine in funny clothes and throwing them up and down. They also need a television of their own, because they get mad at me if I switch the channels and turn it off. I don't think they like me as much as they use to. I will be up when you come, because I like to sleep all day and stay awake all night.

## Jim O'Neal's Granddaughter Recieves Gold Star Award

Jayne Gladden, sixteen-year-old Morton High School junior, daughter of Alvin and Gail Gladden of Morton and granddaughter of Jim and Nona O'Neal of Plains, received the 4-H Gold Star Award. The award is the highest honor presented at the county level by the youth organization. Jayme was one of 35 outstanding members of 4-H clubs across the South Plains that were honored in Lubbock at the 35th Annual District Gold Star Banquet.

Jayne is an eight year member of the Morton 4-H Club and has carried projects in sheep, swine, clothing, food and nutrition, food conservation/preservation/safety, housing, vet science and electric energy. She has served her club as president, vice president/membership, and secretary, secretary for County Council and County and District Council Delegate. She has participated in South Plains 4-H Leadership Camp as a participant and counselor, South Plains 4-H Electric Camp, Texas Sheep and Goat Youth Leadership Workshop, Texas 4-H Congress, and District Food Show and Fashion Show. Jayme received third in Meat Science Demonstration at Texas 4-H Round-Up, she received County Swine and Sheep Showmanship Award, Grand Champion Lamb, Grand Champion Barrow and second

place for State Sheep Recordbook in 1992.

Speaker for the banquet was Dr. Lynn Thibodeaux, assistant director of 4-H and youth with the Texas Agriculture Extension Service. Dr. Thibodeaux traced the past successes and future challenges of the 4-H program. She presented the mission statement which identifies 4-H as an organization which develops youth and adults, utilizing research-based information in creative, diverse educational programs. Tops on the list of values, she said, is that "people are the most important product of 4-H." Among other key values are that 4-H provides a nurturing, positive environment in which people can learn how to fail as well as succeed, and that programs are designed to meet local needs. The goal of 4-H is empowering individual, families, and communities to release their potential.

Four-H is the youth development program of the Extension Service, an educational arm of the Texas A&M University System.

Students in Mrs. Pierce's fifth and sixth grade science classes practiced recycling in their project to decorate the Plains Junior High School Christmas tree.

Ornaments were made from items about the home that can be recycled. They included small paper sacks, Ma-

son jar rings, Coke cans, styrofoam cups and more.

"The students have great imaginations when designing these ornaments. I always look forward to seeing the different ideas they come up with each year," states Mrs. Pierce. Some ornaments from previous trees were also used.
