Campaign Of Methodist Church Is Progressing

To every person in our community who would like to participate in our activities during this educational campaign:

We welcome you to the Methodist Church. The time has come for us to recognize our responsibilities to our church. The church is the basic factor in the life and advancement of our community.

With the thoroughness of this campaign, we are hoping that we may reach every person in the church; that each one will recognize his responsibility and do what his heart prompts him to do and what his pocketbook allows him to do. The success of our efforts depends on the people themselves who have joined hands to help each other.

This can be accomplished with a little vision and co-operation, and everyone will feel better for having been a part of it. Joy and blessings are the rewards for those who take this attitude and act upon it. Do you know of anyone who regrets having given to a worthy cause? Do we think of life in terms of what is denied us, or in terms of what I can do for God?—Reporter.

Youth Rally

A Youth Rally will be held at the Baptist Church again Saturday night, May 5. No special program has been planned but the evening will be spent in group singing, playing games and everyone is looking forward to a pleasant evening of recreation.

What Is Greatness? Lesson for March 6, 1951

WHAT is a great man? Some men have been called great who were not so; they were only prominent. Hitler, for example, was certainly prominent enough; but he was not great. Men can truly be called great for various good reasons. Some may be artists; some may be soldiers, others statesmen or prophets. Once in a while a man is born who is great in more ways than one.

David the Ideal King SUCH a man was David, King of Israel and one of the world's most famous men. The United Kingdom of Israel had a short history, only three kings reigning over it - Saul, David and Solomon. Of the three, David was by all odds the greatest man and greatest king. Neither Saul nor Solomon was capable of holding for a lifetime to a high ideal. Neither was capable of whole-hearted devotion to God. Neither one could gain and hold the loyalty of the nation. It was only David who could do these things.

Military Genius DAVID was great, in part because of his power in battle. What no one since Joshua had been able to do, David did: he welded the quarreling, jealous, weak tribes of Israel into a "single sword." The times called for military genius, and David had it. So, often since David's time, there have been great soldiers who have used their military genius not for conquest in itself but in order to win some place in the sun for peace-loving nations. One thinks of Charles Martel, who saved Europe from barbarian conquest; of William of Orange who set the Dutch free from Spanish tyranny; of Washington, "father" of a great nation; and of many others.

The great soldiers of history have been more than professionally skilled and successful killers of men; they have been like David, men whose skill was used to preserve nations, not to destroy them.

Lovable Leadership IN OUR times Hitler brought the word "Leader" under a shadow, because his leadership was in the wrong direction. But there is such a thing as noble and wise leadership, and David had this quality in a high degree.

It is true, success has something to do with it. Men will flock to a winner who would have nothing to do with him if he were a loser. But still it is a fact that most of the world's great leaders who have come up from obscurity, as David did, have arisen at the head of groups of devoted men who have followed them loyally through the darkest times.

So it was with David. During his years as leader of the "underground" (literally so, since for some time his headquarters were in a great limestone cave), he developed the hard core of the army he commanded at a later time.

Leader in Faith DAVID had yet another quality of greatness, and for this he is perhaps best remembered. He was a man of deep religion. But religion for him was not merely a personal matter; he carried his faith into public life, he made his faith contagious.

Religion for him was not a stick with which to beat other people about the head, but a rod and staff to lean upon. It was not a secret locked in his own heart but something he desired to share with all his people. And though he sometimes slipped and terribly fell, he could always rise again, for his religion gave him that rarest of all qualities in great men; humility before God and man.

• When you can't sleep — feel just awful because you need a laxative — do as MILLIONS do — chew FEEN-A-MINT. Oldest Food
Bread is the oldest prepared food known to man. Remnants of white bread baked more than 5,000 years ago have been found in the Valley of the Kings in Egypt.

Protection Measure
The first wheat crop raised by Pilgrims in New England was sown in cemeteries to protect the soil from Indians.

Food Energy
One pound of enriched white bread today can supply 40 per cent of a worker's daily food energy needs.

Astonishing Progress Is Made in Devices to Aid Hard of Hearing

NEW YORK.—Most human beings—humanly enough—are loath to admit imperfection. And yet it is common knowledge that not one of us is perfect.
The wearing of a hearing aid is an admission of a failing—in this case an aural one. It is also an indication that a sensible person has discarded a lot of false pride (not without pain) and gone a long way toward solving a tough situation in a sensibly realistic way.
One of the reasons why more people do not wear hearing aids is that they fear to be different. They don't want any fingers pointed in their direction—they don't relish

being a "collector's item"—and they labor under the mistaken impression that their disability is comparatively rare. The latter is far from true. Statistics show that between 15 million and 20 million persons—young, old and middle-aged alike—suffer in this country today from some form of diminished hearing. Many of these people are being benefited by hearing instruments—but not as many as could be.
Wartime advances in electronics have made possible astonishing improvements in this field. Hearing aids are getting smaller, they are more efficient and more attractive—but above all they are more un-obtrusive.
Women, having the female advantage of longer hair, are able to wear the newer hearing aids in complete comfort and security, serene in the knowledge that they are not in the least conspicuous. Often with clever arranging of the cord, it is possible to be absolutely sure that no one is aware of your "crutch."
Men, of course, are not quite so fortunate, and it is for this reason that many of them have resisted hearing instruments. Many men, however, wearying of the struggle to hear without them, have been agreeably surprised by some of the so-called invisible aids.

Some Farmers Like the OPEN CENTER TIRE

Others Like the TRACTION CENTER TIRE

Let your soil conditions determine which is the TIRE for YOU...

**Firestone
CHAMPION
OPEN CENTER OR TRACTION CENTER**

THERE are many tractor tires on the market today but only two basic types—the Open Center and the Traction Center. Some farmers prefer the Open Center for their soil conditions. Others prefer the Traction Center. Only Firestone builds both.

Both Champions have the curved bar design to give you the extra leverage necessary for full traction power. Both have Flared Tread Openings for positive cleaning action. Both have many extra-traction and long-wear features not to be found in other tires.
