Meals Have More Variety When You Have Both an Electric Refrigerator and a Home Freezer

• An electric home freezer makes it almost like buying a super market right in your own home. And your electric refrigerator, a perfect companion to your freezer, solves most of your food problems which don't require real freezing. You can freeze your own fruits, berries and vegetables for year-round use. You can safely store meats bought in quantity on bargain days. The sportsman can enjoy his fish-and-game finds after the fishing or hunting trip is over.

Your electric refrigerator, of course, still plays a most important role in your home food life. Milk, eggs, butter, cream and many other perishable foods can be frozen and stored in your refrigerator before they spoil, which gives your electric refrigerator greater life.

Plan now to have the best in food protection facilities by having both the electric home freezer and the electric refrigerator.

Visit your favorite store which sells electric appliances and see the many models of modern ELECTRIC REFRIGERATORS and ELECTRIC HOME FREEZERS.
