Pressure Saucepan Saves Time and Fuel

IN A comparatively short time the pressure saucepan has won an assured place in farm kitchens, according to Laura Dalley, in an article in Capper's Farmer, one of the best known farm magazines.

It saves time and fuel. Many different foods may be prepared in a pressure saucepan. It is particularly good for those which need long cooking. "Pressure cooking," Miss

Dalley says, "preserves food value, color and flavor."

A few rules of operation are important:

1.—Never fill the pan more than two-thirds full.

2.—Be sure that steam flows steadily from vent before you close it.

3.—Wait until weight or pressure control jiggles or hisses or cooking indicator is at right position to your directions before you start counting time. Then reduce the heat and let cook for specified time.

4.—Reduce the pressure as each recipe indicates.

5.—After pressure is reduced, be certain to remove the weight, or lift the pressure control, before removing cover.

Some farm women are doing a limited amount of canning in their pressure saucepans, Miss Dalley points out.
