Farmers Urged To Take 'Break' Twice Each Day

COLLEGE STATION, June 27.

— A "break" in morning and afternoon hours is as important to farmers as it is to city workers, according to the Texas Farm and Ranch Safety Council. In fact, these "breaks" in work routine can prove especially important, for they reduce the possibility of accidental deaths and injuries as well as improving work efficiency.

The farmer who just can't spare the 10 or 15 minutes required to get off the tractor, walk around or maybe have a snack or something to drink, should be reminded that recent accident studies indicate that the highest percentage of farm work accidents occur during the late morning and mid-afternoon hours.

Farm wives can serve as break reminders to their husbands by packing a mid-morning and mid-afternoon snack and taking it to the field.

This break can also provide mothers an excellent opportunity to take children to the field to watch father operate the dangerous machines that they sometimes find such fascinating "play-pretties." This may satisfy the children's curiosity and make a much anticipated event in the daily life of the youngsters.

So, why not follow the advice of the Texas Farm and Ranch Safety Council and take time out for a mid-morning and mid-afternoon break? It can pay off in safety, pleasure and efficiency.

Collision Kills Gorman Couple

One of the worst tragedies of this area in recent months was the deaths Monday night of Mr. and Mrs. Bruce Laminack of Gorman when their car was in a head-on collision near Grandbury with a Buick driven by a Coleman woman who also died in the crash. A daughter of the Laminack's and a granddaughter were also seriously injured.

Mrs. Laminack was a sister of Mrs. Ed Stack of Carbon.

Engineers To Be Hired In Exams

Federal career opportunities for professional engineers have reached the highest level in American history, the civil service commission office in Dallas stated today.

Whatever the professional specialty, the commission revealed, almost immediate employment is available in a broad range of scientific research and development projects and in the entire field of national defense.

Starting pay levels for graduating engineers without professional experience are comparable to those in private industry. The pay scale above the beginning level is geared to the length and quality of an individual's experience.

Engineers with degrees and as little as four years of professional engineering experience may enter the federal service at a salary of \$10,320 a year, the commission said.

The current examination announcement for engineers is obtainable at most post offices or from the Eighth U. S. Civil Service Region, 1114, Commerce, Dallas, Texas.
