JERRY MEHAFFEY of Gorman owns a 160 acre farm located three miles south of Carbon. The above picture shows a Coastal Bermuda sprigging machine in operation. Jerry planted 163 acres of Coastal in 1964, built cross fences to divide this area into three pastures and constructed farm ponds for livestock water. A cow and a calf is run for a six-month period on approximately two and one half acres. Fertilizer in keeping with soil test is applied annually.

## Easter Seal Appeal Letters Are Mailed In Eastland

Easter Seal Appeal letters are to be delivered this week in Eastland County, according to H. T. Wilson, the Easter Seal Representative of the Easter Seal Society for Crippled Children and Adults of Texas. As Representative, Mr. Wilson serves as contact representative for disabled persons needing Easter Seal rehabilitation services and also serves as Treasurer of the Easter Seal Appeal in Eastland County.

The Easter Seal Society offers physical and occupational therapy, speech and hearing programs and special equipment loans to enable disabled persons to make the best use of their abilities to overcome handicaps. These services are financed by the annual Easter Seal Appeal.

The Society also provides for research into the causes and cures of crippling conditions, finances public education programs, and provides scholarships for training of professional personnel to staff rehabilitation centers.

Mr. Wilson pointed out that all these programs are import-

ant to Texas in order to continue to provide the best rehabilitation services for its own disabled citizens.

During 1967, the Texas Easter Seal Society provided treatment and services to 17,622 children and adults who were in need of rehabilitation services. These services are available to any disabled person who can benefit from help provided by the Easter Seal Society, Mr. Wilson added.

The Easter Seal Campaign will run through Easter Sunday, April 14.

### GORDON SPOT By DEE GORDON Eastland County Agent

The best way to be sure that you have the right type and amount of fertilizer when you need it is to get it on order now or even perhaps better in the barn. And if you need spreader or applicator equipment, better get an order in early for its use. Once fields are dry enough to permit use of the equipment, it may be hard to come by.

If fertilizer is purchased in bags, here are a couple of

storage tips. Be sure to give it room by leaving an air space between each stack of bags. Always store fertilizer in a dry place. Don't place bags on a dirt or concrete floor because they'll pick up moisture and get lumpy and caked up. It isn't a good idea to stack fertilizer more than eight bags high. Keep fertilizer away from animals since it is food for plants and not for animals.

Demand for fertilizer is high and because of wet fields have caused delays in getting plant food distributed, a real rush is expected when fields are dry enough for working.
