

Five Tests Active In McMillan Field; Big Deals Pending

Agnew Oil Company last Thursday spudded a test on the H. E. Wade farm west of the company's Fowler lease and during the week drilled to 900 feet. A steel derrick and line tools are being used and drillers have been making about 100 feet a day since spudding.

Good progress was made the past ten days on Golden No. 4, offset to Watt Brothers No. 1. The hole is approximately 900 feet deep.

The Daniels test on the W. F. James land is being drilled and was down about 1,300 feet Thursday. This is slightly east of production and is given a good chance to be one of the best producers in the local field.

Watt Brothers are rotary drilling an offset to the north of their No. 1, reaching about 1,300 feet.

Cordova Union Oil Corporation No. 1 on the D. L. Brevard farm is being rigged up and drilling probably will begin by Monday of next week or before.

Williamson & Lohn on the J. L. Wilkins land, farthest well to the east in the McMillan field, is still shut down at about 1,400 feet.

Several large deals are pending which will be announced within a short time.

As the millions of World's Fair visitors saw tires made in the Firestone Factory and Exhibition Building, we asked thousands this question: "What do you value most in a tire?" Car owners from every state in the Union were interviewed—drivers of automobiles, trucks, busses—out of it all came one composite answer: "Give us Blot Protection, Non-Skid Safety, and Long Wear, at a moderate price."

Firestone engineers used every conceivable resource in the development of a tire embodying these qualifications and selling to the public at a price within the reach of every car owner. Answer—the new Firestone Century Progress Tire.

COMPARE QUALITY—CONSTRUCTION—PRICE

This new tire is equal or superior to any other first quality tire, regardless of brand—name—or by whom manufactured, or at what price offered for sale. Davis to Open New Dry Goods Store About August 1

Clyde Davis, for the past seven years with the Higginbotham Brothers & Company store in Ballinger, announced Saturday that he was leaving immediately for the dry goods markets in St. Louis, New York and other eastern centers to purchase merchandise for his store, which will be opened here either on August 1 or 15.

The store will be operated under the name of C. C. Davis Company and the building on Hutchings Avenue formerly occupied by G. O. Woodroof & Son has been leased. During the next several weeks the building will be completely remodeled and new fixtures installed to take care of the stock of new merchandise which is being purchased.

Mr. Davis stated before leaving here for market that he would handle a general line of merchandise for the entire family. Nationally advertised articles that are well known, including Stetson hats, Brownbult shoes, etc., will be sold.

Mr. Davis is well acquainted with the needs of this section and intends to furnish a modern store with a full and complete line of dry goods for the whole family. His years of experience has given him a thorough knowledge of the dry goods business and by careful buying he will feature quality at moderate prices.

NEW BRIDGE IS VOTED FOR LONDON HIGHWAY

LONDON, July 4.—Eleven years after it was discovered that Waterloo bridge in London was sinking, the highways committee of the new Socialist London county council has recommended the erection of a new one to take its place.

The committee favored Sir Giles Gilbert Scott's design for a structure wide enough for six lines of traffic. The estimated cost is \$6,500,000, for which provision was made in the 1932 money bill. This bill was rejected, and a new measure will have to be passed. It is hoped the government will assist financially. In the eleven years many projects for dealing with the situation have been advanced.

L. E. Bair left yesterday for San Antonio, Corpus Christi, and points in South Texas to spend a few days' vacation. He will visit his brother at Corpus Christi for two days.

Archie Parr was an entrant in the motor boat races at the Christoval regatta on the Fourth.

Local Man's Brother Killed, Others Hurt In Crash with Truck

Mr. and Mrs. Henry Jones and Mrs. R. T. Jones have returned from Floydada where they were called to the bedside of Mr. Jones' brother, W. B. Jones, and family, who were in an automobile-truck crash near Floydada last Saturday night. Mrs. Jones died from injuries Wednesday morning at 1 o'clock and was buried Wednesday afternoon.

Mr. Jones is still in a hospital and in a very serious condition but the attending surgeons were more hopeful for his recovery Wednesday evening provided no complications ensue.

The accident occurred just after dark Saturday evening. An aunt of Mr. Jones, Mrs. W. A. Jones, and the driver of the truck, a Mr. May, were killed instantly. Mr. and Mrs. Jones sustained severe injuries which caused Mrs. Jones' death. Two boys on the truck were also injured, one having an arm broken and the other getting minor cuts and bruises.

The truck, loaded with wheat, was stalled on the side of the highway. Mr. Jones was driving at a fast rate of speed and approaching the rear of the truck was blinded by the lights of another car and did not see the truck until too late to avert a collision. The momentum of the automobile knocked the truck down the road approximately 300 feet, taking out two sections of fence on the right-of-way.

Mr. and Mrs. J. D. McNutt attended the picnic at Christoval July 4.

Postal Receipts For Past 6 Months Show Good Gain

Receipts at the Ballinger post-office showed a gain over the same period of the previous year of \$1,145.36, according to Postmaster J. A. Reese. The increase was steady for each month, the local postoffice receiving more business for the first half of the year than for several years.

According to reports made to Washington the receipts for last year and this were as follows:

1933	1934
First quarter \$4,256.33	\$4,636.29
Second quarter 3,898.13	4,663.53

All lines of business here have enjoyed a similar increase this year. The slackened business at present is believed to be caused by the between-season purchase of merchandise and because of the crop conditions caused by dry weather. Automobile sales, grocery buying and several other lines have held up well, however.

Postal receipts are usually a fair barometer of business generally and the considerable increase in the local office for the past six months is encouraging.

Day Gin Purchased By Morrison Bros.; Families Move Here

O. G. and E. L. Morrison, of Abilene, have purchased the Day gin from the Day estate and have moved their families to Ballinger. Mr. and Mrs. O. G. Morrison and children are occupying the Day residence on Broadway and Mr. and Mrs. E. L. Morrison have rented a house at the Oklahoma Natural Gas Company park north of Wilke Terrace.

Most of the summer will be spent in putting the gin plant in first class condition before the beginning of the cotton ginning season. For that reason the new owners will have little time to get out and meet the farmers of this trade territory.

O. G. Morrison stated Tuesday that they would continue to gin both square and round bales. This is the only round bale press in Ballinger and the franchise will be retained for this territory.

Both the Morrisesons are experienced gin men and have operated plants previously at Hamlin and Abilene.

The Day gin is one of the oldest established plants in this section. Ed Day began ginning cotton in Ballinger over 30 years ago and since that time a Day gin has served many farmers in this territory every season. Several years ago the location of the plant was moved when new equipment was installed.

The new management invites farmers of the Ballinger area to visit them at the plant and stated they would have further announcements to make later in the year or just before the ginning season.

Playground Ball Played at Night In Winters, Miles

Each of the Winters churches has organized a playground baseball team and are playing four nights a week. Games are scheduled for a week in advance and play will continue the rest of the summer.

Night playing was made possible by the subscriptions of various individuals of the town. The field is lighted by flood lights and everyone seems to be highly pleased with this form of recreation.

Flood lights and other equipment for a field at Miles have been ordered and playground baseball will be played there at night.

Several business men of Ballinger have been working on a plan for installing a system of lights on some vacant lot in Ballinger for playing this game at night. With the installation of lights at Miles and Ballinger inter-city games could be arranged to be played at least once or twice a week.

Mr. and Mrs. J. A. Schnable attended a picnic given by the Community Natural Gas Company at Lake Brownwood July 4.

Two Barber Shops Install Indirect Lighting Fixtures

Two barber shops in Ballinger have recently installed the most modern type of lighting equipment. These shops, Campbell & Forson, and Ed's Barber Shop, are now using indirect lighting.

The Campbell & Forson shop is equipped with four overhead units which supply illumination for the entire shop with no shadows anywhere, and Ed's shop, a smaller place, uses two overhead units.

With this new type of illumination there is no glare in the eyes of the customer or of the barber. The soft glow is transmitted by the reflector in the fixture and diffused by the white walls. This double reflection softens the light and at the same time none of the power is lost by absorption in dark colored walls.

The installation of these modern lighting fixtures was directed by A. F. Edmonds, lighting specialist for the West Texas Utilities Company. This lighting service is free to all patrons of the company. Mr. Edmonds will make a demonstration and recommendations for the proper lighting of the home or business house if asked for this service.

SERVING

Except in the larger cities, electric service was rarely satisfactory before long-distance transmission of electric power was perfected.

Small local plants serving single communities generally lack the variety and volume of demand which enables a larger system, serving a wide area, to operate efficiently.

Nor can small, isolated plants meet sudden new demands for more power nearly as readily as the larger system.

The transmission line can deliver larger amounts of power at once without the delay of installing additional equipment. Thus it clears the road for industrial growth.

The present-day industrial progress of small communities is based in a large measure on the ample and economical power supply which resulted when the transmission systems replaced small local plants throughout the nation.

With 2,608 miles of transmission lines, the West Texas Utilities stands ready to render satisfactory service to 159 prosperous cities, towns and communities throughout West Texas, *The Land of Opportunity.*

Do you know that your increased use of Electric Service is billed on a surprisingly low rate schedule... and adds only a small amount to your total bill?
