Members of the Lions Club at Winters discussed an adequate water supply for that city at their meeting last week.

Wayne Sellers, son of "Doc" Sellers, publisher of the Rising Star Record, will enter the run-off in the representative race in Eastland county.

Brookridge is adopting a program of improvements for the next few years that will include a number of parks.

Teaching hundreds of thousands of young people. The other book, "Creating Safer Communities," is a guide for planning and executing sound community traffic control programs.

The Albany football field has been added this summer and will be ready for the first game in September.

Citizens at Brady received their second injection of typhoid serum Saturday.

The Garden Club at Comanche Kimble county ranchmen have begun to reseed their pastures in order to provide better grass for livestock.

Conservation practices will be observed in Sutton county on August 21 when a special tour is conducted.

W. F. Stonebaugh, operator of the Paddy Wiggly store at Coleman, last week gave three of his employees homes.

Wool warehouses at Eden have announced the sale of 175,000 pounds of wool last week at 25 cents per pound.

Mrs. J. D. Hoff and children returned Sunday from Lubbock where they had been visiting relatives.

Paul Trimmer, Jr., is at home from Abilene, where he had been attending summer school.

Curtis Gilligan returned Friday from a two week's vacation trip in Indiana.

Hints for the Farm

Irrigation of strawberries will pay dividends, J. F. Rosborough, horticulturist of the Texas A. & M. College extension service, believes.

After the crop is harvested, it pays to irrigate in dry periods of the summer and fall.

The tests here out results of similar tests of the year before, when berries that received 4 inches of water in three irrigations in the summer and fall of 1936 produced 370 quarts of berries per acre over the yield of unirrigated plots.

In most sections of Texas, the usual practice is to let the vines die in the summer and to buy new plants in the winter or spring.

This practice should result in stronger, healthier vines for transplanting in addition to saving the expense of buying new plants.

Newsletters praise the work of the Brady radio station during the recent flood.

Rev. E. F. Graham, for three years educational director and student secretary of the Southwest State Teachers' College, at San Marcos, has accepted a call to the Miles Baptist Church.

The Coleman Democrat-Voice had week published two editions of the Brady Standard.

Melvin reported the largest rainfall of any place in the flood zone last week.

Dr. T. Richard Sealy, prominent Santa Anna surgeon, has returned from Mayo Brothers clinic at Rochester, Minnesota.

Mentor citizens have been requested to keep a close watch for snakes and poisonous spiders since the floods.

Kimble county ranchmen have begun to reseed their pastures in order to provide better grass for livestock.

Conservation practices will be observed in Sutton county on August 21 when a special tour is conducted.

The SNAPSHOT GUILD

Picturing Children Indoors

Floodlight from almost directly overhead makes the child's figure stand out against a background of rich shadow. The picture was snapped when the subject had forgotten there was a camera near.

PARENTS usually think of indoors and sunny summer days as the proper place and time for picturing children, and once this was true. Before the advent of fast films and electric light bulbs especially designed for amateur photography, daytime was the only time snapshooters could work. Today that is no longer the case.

Nowadays, pleasing child pictures may be taken inside the home either by day or night, and more amateurs are taking them. This is partly because the home provides an ideal setting for pictures one wants to keep, and partly because the photographer can control his light to make pictures more interesting.

The modern large-sized amateur flood bulbs are so powerful that the camera worker can put two of them in reflectors three to four feet from his subject, and take snapshots, as he would outdoors, with an ordinary box camera. The camera is, of course, loaded with supersensitive film and its lens set at the largest opening. Other cameras can be used at 1/25 second shutter speed and f.8 or f.11 lens opening.

Ability to take snapshots like this is a great help in obtaining natural, unposed child pictures. It is no longer necessary to take "time" exposures or to tell the child to "hold very still." Now his toys can be placed in the circle of light cast by

the flood bulbs, and as soon as he is absorbed in them, and unconscious of the camera—snap goes the shutter and the picture is made!

There is a variety of lighting arrangements one can use on child pictures. For a cheerful, joyous effect, everything in the picture should be light in tone, and there should be even illumination, with no deep shadows. However, when a dramatic effect is desired, illumination can be restricted to the child's face and hair, with everything else in deep shadow. This tends to give the impression of a very small child in a very large room; sometimes an effect of loneliness which is more appealing than if the picture were bright and carefree.

Beautiful "high-key" effects can be obtained with the child on a window-seat where daylight diffuses through the curtains, and bright floodlight inside so that there are no dark areas or masses of shadow. The child's clothing should be light in color. Good balancing of light will give a picture that is almost all white and lighter tones of gray, with just enough shadow here and there for accents. "Backlighting," as from the window, can also be obtained with artificial light, a bath being placed behind the child so that the hair becomes a bright, silky halo.

Start today to keep a picture diary of your children.

John van Guilder.

Exciting Moment at UAW Meeting

Free-for-all fist fights interrupted the trial of four suspended officers of the United Automobile Workers at the headquarters at Detroit. Photograph shows a door-guard swinging fists at some of the rank and file members of the union who demanded admission to the trial.

Sink Is Cool Place in Summer

When summer comes to West Roxbury, Mass., the twin daughters of Mr. and Mrs. James McKinnon climb into the kitchen sink and turn on the water. Carolyn Jean at the left can't be interested in the camera, but Marilyn Jean has a saucy stare for the photographer.

HE'S 'MIBS' KING

Frank Santo, thirteen years old, of Throop, Pa., who was crowned the marbles king of the United States at the conclusion of the national marbles tournament at Wildwood, N. J. As a result of his victory Frank received a \$150 radio set and a wrist watch. His father is an unemployed miner.

National Amateur Golf Champion Johnny Goodman and his schoolboy sweetheart- bride, the former Miss Josephine Kersigo, as they posed for photographers during the wedding reception which followed their marriage in Omaha.

CHARLIE BROADCASTS

Charlie Grimm, until recently manager of the Chicago Cubs, has taken up new duties as a radio announcer at the ball games in Chicago. Charlie, succeeded as manager by Gabby Hartnett, is shown telling the radio audience about a sensational play. Charlie broadcasts home games of both the Cubs and Sox.

ENVOY TO LATVIA

John C. Wiley of Indiana, now the United States consular general at Vienna, who has been named by the state department as minister to Latvia and Estonia. He will assume his new duties after he winds up his affairs in Vienna.

ADMITS MOSCOW LINK

The Communist party in the United States is "part and parcel" of the Communist International, Earl Browder, party secretary, admitted during his testimony before a legislative committee inquiry into law observance. Browder is pictured as he testified during the hearing, held in New York.

Mary Hardin-Baylor Speech Department Is Outstanding

An outstanding Department of Speech has been built up at Mary Hardin-Baylor College, Belton, where students have won state and national honors in forensics and dramatics. Among those winning honors last session are the students pictured who won state honors in the Intercollegiate One-Act Play Tournament by taking first place for the best diction, first place for individual acting, which distinction was given Miss Jessie Maude Turner, Palestine, (holding telephone), and second place for their play. In the group (left to right) are: Miss Frances Gustavus, Ballinger; Miss Turner; Miss Sally St. John, McAllen; and Miss Elizabeth Moore, Waco. Miss Ainslie Harris, Tallahassee, Fla., who holds the M. A. degree from the University of Wisconsin and who is spending six weeks there this summer, is head of the Department of Speech. Miss Cynthia Sory, Jacksonville, is assistant in dramatics and Miss Thelma Robuck, Cooleidge, director of forensics. Both Miss Sory and Miss Robuck are doing graduate work in Northwestern University this summer and have been cast in the major productions of the summer school.

Astor Kin Sells Golf Balls

Francis Ormond French, impecunious father-in-law of John Jacob Astor, III, who was refused unemployment relief and a WPA job recently, is shown selling a customer a pair of golf balls for a quarter at a golf driving practice range at Brighton, Mass., where he secured a job. French is paid \$5 a day and 50 per cent commission on all golf balls he actually sells.

They're Bald and Proud of It

Presenting some of the finest bald spots on the heads of the members of the Bald Head Club of America. The members held their twenty-sixth annual convention and barbecue at Bristol, Conn., recently.

PEOPLE WANT TO "Take It Easy"

At the end of the day—as in the evening of their lives—people want to "take it easy." They want to relax—to slouch down in a comfortable chair. They want to retreat from the cares and high-tension of working and living. They want to rest and be comfortable.

"Relax! Take it easy!" is the cry that brings peace to the hearts and heads of a mad world. And if the goods or the service you are selling will help people to forget "nerves" and worry and bring them comfort, you will get more business if you tell them so!

Furniture, shoes, cigars, garden tools, used cars, summer clothes, beach wear, corsets, and radios! Advertise them with a "comfort appeal" and sell more of them. Bank accounts, insurance, beauty treatments, laundry service, new homes, vacation—advertise the COMFORT they bring and get more customers!

GET COMFORTABLE! Tell 'em your advertising—tell 'em in The Ledger, with illustrations from the famous Meyer Both Advertising Service that SAY "Now you can take it easy." Tell the world to get comfortable and then hear the cash register ring!

WORLD CROSSROADS

UPWARD TREND OF BUSINESS IS EXPECTED IN TEXAS SOON

AUSTIN, Aug. 3.—A slight recession was seen in industry and trade in Texas during June in comparison with the preceding month and with June, 1937. Dr. F. A. Buechel, assistant director of the University of Texas bureau of business research, said in his latest survey of Texas business. The Texas composite business index for June was 92.3 compared with 93.0 for May and 98.9 for June last year, he said.

"There are growing indications that the Texas business curve will soon reverse the downward trend which has prevailed since last September," Dr. Buechel said. "It is expected, however, that the upward trend of the composite index will be gradual, not sharp; but some of the factors in the combined index, such as retail sales, runs of crude oil to stills

and electric power consumption, may register rapid improvement. Employment, pay rolls and miscellaneous freight car loadings are expected to increase more gradually. Since these latter items are given the greater weight in computing the index, the composite index is expected to show only a moderate gain during the next several months."

School children in an Illinois village took up the subject of slot machines and other gambling devices in arithmetic class and reported their findings, including their conclusion that chances of winning were small indeed, to the village board.

Australia's snake situation is peculiar, says the bulletin of the New York zoological society, in that Australia has many species of snakes and the great majority are poisonous.

Commentator Follows Traced to the Caveman

Less than ten minutes after instrumental music made its first appearance in the world the commentators were on hand to start reading meanings into it. That hairy ancestor of ours who discovered that you could blow fine blasts through an animal horn had barely got back to the cave and begun to strut his new accomplishment before his lady when a pair of shaggy neighbors dropped in to dispute about the significance of his music, observes Edward Barry in the Chicago Tribune.

According to one, the louder blasts expressed courage and defiance, while the more sober tootlings carried a suggestion of the blower's secret fear of the very tribes or beasts he was defying. The other scoffed at this interpretation and declared that the widely spaced tones represented the steady tread of men and that the quicker sections depicted the mincing of women and children.

The astonished composer hemmed and hawed, then guardedly admitted that each commentator was partly right. He could not offend his guests by disclosing the fact that both interpretations were complete surprises to him!

Insects Have Own Tools to Bore Holes in Wood

Insect egg-laying requires many tools, of which some are surprisingly like man-made tools. The Sirex saw-fly, for example, says a writer in Pearson's London Weekly, uses a gadget very like a gimlet, with which it bores holes in wood to lay its eggs. Another type saw-fly has at its tail two tiny saws fitted with sheaths. These cut slits in stems or leaf veins in which the eggs are placed.

The ichneumon fly works hard for an hour to drill a hole more than an inch deep in tough wood.

And the ichneumon fly is well aware, in a way mysterious to us, that it will strike a grub in the wood on which to lay its egg. Its young will then have living food to eat when they are hatched.

Also there is a locust which lays its eggs in the earth by boring the soil with a tool like the cobble's awl, and working on the same principle.

The hypodermic syringe of the surgeon injects fluid under the skin; so does the sting of an insect. Actually, when we knock the bee off our skin, his sting, and part of his body, are left behind. Consequently, the bee soon dies. And that is why it was thought bees could sting once only.

But, given time, the bee can remove his sting and fly off to do more damage with it. The remarkable apparatus he uses to inject poison has barbs which attach it securely to our flesh.

The wasp, as it happens, stings a caterpillar, not to kill it, but to paralyze it—as by our anesthetics.

Pioneers in Smoking

The Encyclopedia Britannica says that the introduction of the tobacco pipe to Europe is generally ascribed to Ralph Lane, first governor of Virginia, in 1585 he brought an Indian pipe to Sir Walter Raleigh and taught that courtier how to use it. Another authority, "The Social History of Smoking," says that the honor of having first smoked a pipe of tobacco in England is divided among several claimants, Captain William Middleton, Captain Price and Captain Koet having smoked together in London. The same author states that pipes were smoked in England before 1584, the plant having been introduced into Europe about 1560 and been under cultivation in England by 1570. Raleigh first brought the practice of smoking into common use and it is probable that he was initiated in the art by Thomas Hariot, whom he had sent out to Virginia for the specific purpose of inquiring into and reporting on the natural productions, including of course tobacco.

Growth of the Flea

Fleas, like all insects, go through stages, from egg, through grub and pupa, to adult insect. The grub feeds on the bodies of dead beetles and other stray animal matter. Then it turns to a pupa, which never eats, but just lies in the dust, in cracks and crevices in the floorboards in houses. It is very sensitive to vibration. Directly a footstep touches those boards, the vibration makes all the pupae wake up and hatch out. From each pupa a hungry flea.

The Name Cordelia

The name Cordelia has two origins and meanings. The Celtic meaning is "jewel of the sea" and the Latin "warm of heart." Despite these attractive meanings, the name is not common. The story of Cordelia, the Welsh princess, has been told by Shakespeare in "King Lear" although the dramatist gave the story a different ending than the fact that Cordelia committed suicide when taken prisoner by her sisters.

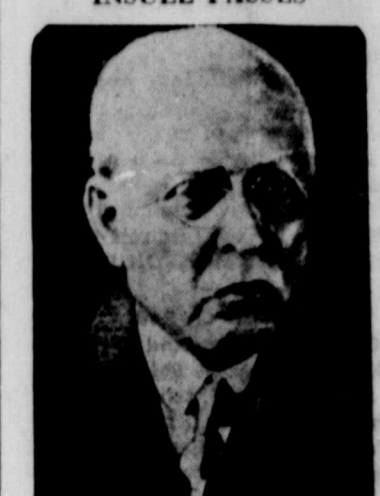

Waiter: "Mr. Brown left his umbrella again. I believe he'd leave his head if it were loose."

Manager: "I dare say you're right. I heard him say only yesterday that he was going to Switzerland for his lungs."

Cheap materials rather than poor construction were mainly blamed for the short life of some shoes in a recent laboratory test of 40 shoe construction methods.

Firemen's School Saves Texans Much on Insurance

INSULL PASSES

Memories of the Titanic days when he was the utility king of America were recalled in the recent death of Samuel Insull in Paris. The famous Chicagoan passed away at the age of seventy-eight. The utility company empire he erected in his heyday crashed after the 1929 stock market panic, causing the loss of billions to investors. Insull, who came to America as a poor young man, rose rapidly to success. He was secretary to Thomas A. Edison for a number of years before he undertook the erection of his utility empire.

MISSOURI SCHOOL OF MINES TEACHER COMES TO TEXAS

EL PASO, Aug. 3.—G. Perry Steen, inspecting engineer at the Missouri School of Mines, Rolla, has been appointed to the engineering faculty of the College of Mines and Metallurgy here, a branch of the University of Texas, for 1938-39, according to Dr. D. M. Wiggins, president Steen will teach courses in engineering and drawing at the college of mines. He holds the degree of bachelor of science in civil engineering from the Missouri School of Mines and has completed resident work for the master of arts degree at the same institution. He is a member of Phi Kappa Phi and Tau Beta Pi, academic and engineering honor societies.

Notice to Debtors and Creditors

No. 1550, Estate of W. P. Jones, Deceased. Pending in the County Court of Runnels County, Texas. THE STATE OF TEXAS, County of Runnels:

To those indebted to or holding claims against the estate of W. P. Jones, Deceased.

The undersigned having been duly appointed Executor of the Estate of W. P. Jones, Deceased, late of Runnels County, Texas, by Paul Trimmier, Judge of the County Court of said county, on the 5th day of July, A. D. 1938, hereby notifies all persons indebted to said estate to come forward and make settlement, and those having claims against said estate to present them to him within the time prescribed by law at his residence in Ballinger, Runnels County, Texas, where he receives his mail, this 11th day of July, A. D. 1938.

C. P. SHEPHERD, Executor of the Estate of W. P. Jones, Deceased.

51 CARS OF POULTRY LEAVE TEXAS DURING JUNE

AUSTIN, Aug. 3.—Shipments of poultry from Texas to out-of-state points during June totaled 51 cars, compared with 63 cars during the corresponding month last year, a decline of 18 per cent. The University of Texas bureau of business research has reported. Egg shipments totaled 44 cars, compared with 43 cars during June last year. Five cars of eggs were shipped into Texas during June, all of which came from Kansas; last year in June 11 cars were brought in, 9 from Kansas and 2 from Nebraska.

DEPARTMENT STORE SALES DECLINE DURING JUNE

AUSTIN, Aug. 3.—Reports to the University of Texas bureau of business research from 107 Texas department stores showed a decline in sales during June of 12.4 per cent from the preceding month and 3 per cent from June, 1937. Normally the decline from May to June is nearly 15 per cent. It was stated. Aggregate sales during the first six months of 1938 were nearly 1 per cent greater than for the corresponding period last year.

Gentleman (at police station): "Could I see the man who was arrested for robbing our house last night?"

Desk Sergeant: "This is very irregular. Why do you want to see him?"

Gentleman: "I don't mind telling you. I only want to ask him how he got in the house without awakening my wife."

Carbon paper for tracing embroidery patterns at Ledger office.

FARMERS AND GINNERS PLAN FOR BETTER COTTON

COLLEGE STATION, Aug. 3.—More than 20 regional meetings have been held this season by ginnners in the interest of more careful handling of cotton on the farm and at the gin, and 14 additional meetings are scheduled, according to F. E. Lichte, ginning specialist of the Texas A. & M. College extension service. The meetings have been attended by 2,800 ginnners and other representatives of the industry.

"Texas has been making considerable headway in increased plantings of quality strains of cotton, but this is a slow process," Lichte said. "Quality cotton is on the way back, but in the meantime we can improve the quality of our cotton tremendously by proper handling."

"Picking the cotton clean and dry is the responsibility of the grower. Most ginnners, by the use of improved equipment and cleaning machinery, are doing a great deal to maintain quality."

"Sometimes it almost seems that each new advance in ginning equipment results in more careless handling of cotton on the farm."

Modern equipment will provide higher grade lint from damp or moderately trashy cotton, but no machinery has been developed that can dry wet cotton or glean roughly harvested cotton to give lint equal in quality to that ginned

from dry, clean picked cotton. Lichte warned.

Already 550 of the 12,700 gins in the Cotton Belt are using the driers developed by the U. S. department of agriculture. Of these, 273 are in use in Texas' 3,564 gins.

The ordinary temperature of the drying air should not be over 100 degrees and even in the case of very wet cotton, air temperature should not exceed 200 degrees. Excessive temperatures, Lichte pointed out, injure the cotton fiber.

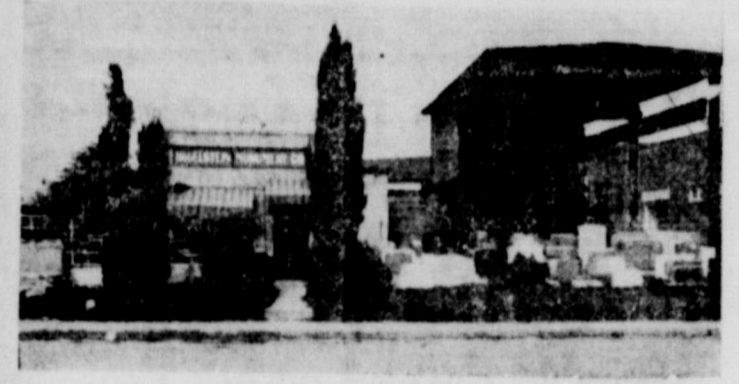

Guardian's Notice of Application for Authority

No. 1558 In the Matter of the Guardianship of Edwin Elmo Unsell and Genevieve Unsell, Minors In the County Court of Runnels County, Texas:

Notice is hereby given that Ida Elmorah Unsell has made application for authority to make an oil and gas lease upon the estates of Edwin Elmo Unsell and Genevieve Unsell, in the South 100 acres of the North 246.6 acres of the West half of Section 208, Abstract 1377, T. & N. O. R. Co. Survey, in Baylor County, Texas, and that a hearing on said application will be had at the office of the County Judge in Ballinger, Texas, on the 13th day of August, 1938.

IDA ELMORAH UNSSELL, Guardian. 4-11

West Texas' Best Known Home of Fine Memorials

HAGELSTEIN MONUMENT COMPANY can truthfully be rated the largest monumental works in the West, serving a radius of 150 miles in all directions, and employing a large number of local salesmen and stone craftsmen. Hagelstein Monument Company is authorized dealers for Rock of Ages Granite in this territory.

They are the only firm that can furnish the seal. Without this seal

No Monument Can be a Genuine Rock of Ages Memorial

We have a nice display in Ballinger with Mr. H. A. Burke as manager, who will be pleased to show you or assist you in any way possible. See or write us if you want quality at low cost.

Sincerely, HAGELSTEIN MOUNMENT CO.

You Will TRAVEL FURTHER on MANSEFIELD EXTRA MILEAGE and HERE'S WHY

Mansefield tires are built to give you extra mileage. Cord-Lock construction puts 3 1/2 more full weight cord fabric into the sidewalls. The high tensile steel ply cords are 7 times as strong as actually needed. The Durawall Rubber resists high speed wear and prevents "blows".

Is Your Wiring Safe?

Electric wiring should be checked regularly to see that it is safe. Lamp cords, iron cords, defective sockets and wire without insulation are only a few of the hazards that cause accidents.

The Houston Chronicle of July 28 says:

"A shock of 110 volts of electricity apparently was the cause of the death of Ralph Eugene Newell, one-year-old son of Mr. and Mrs. Eugene Q. Newell at their home Wednesday," he mother said the child was playing on the floor near a defective wire from a socket to the radio. She heard a noise, saw the child fall back on the floor and a doctor pronounced him dead a few minutes later.

A complete check-up is inexpensive, provides security for loved ones and your home and provides better electrical service. Call me for a close inspection.
