A new type motor oil for the new cars

Your new car needs this new type oil

Prevents "4000-mile knock." Many 1952 and practically all the 1953 automobiles have bigh compression engines.

You've heard about these fine new engines. You know, for example, that they require gasoline with extra anti-knock performance . . . a gasoline like Humble Esso Extra

Now, Detroit's automotive engineers have discovered that high compression engines need an entirely new type of motor oil. With conventional oils in the crankcase, the new engines have a tendency to ping, or knock, after four to eight thousand miles of driving.

This "4000-mile knock" is caused by combustion chamber deposits; these increase the compression ratio to a point where no commercial gasoline will give you anti-knock

Humble Esso Uniflo, an entirely new type motor oil, prevents the formation of deposits that cause "4000-mile knock" in high compression engines if you begin to use it regularly in the first 1000 miles of driving.

Protects against friction wear and acid corrosion. Second, the engineers discovered that friction is the chief cause of wear in automobile engines. Moving parts in the new engines are so carefully machined that they fit very closely. This gives you much better performance from your car, but it also requires superior lubrication. Heavy oils and oils that "thicken" in cold weather don't flow readily between such closely fitting parts. The result is excessive wear from friction, and expensive engine overhauls . . . To minimize friction wear . . . again you need Humble's new Esso Uniflo

Esso Uniflo has such an amazingly high viscosity index that it gives you the quick-flowing characteristics of an SAE 5W oil at 25° below zero Fahrenheit, and the tough, full body of an SAE 20 oil at 110° Fahrenheit.

Furthermore, the additives in Esso Uniflo are anti-acid only to that of Esso Uniflo. -this new type oil cuts acid corrosion as much as 50%

You Need Only One Grade of Humble Esso Unifie. You use it year 'round. Esso Unifio meets all the specifications for SAE viscosity classifications 5W, 10W, 20W and 20. It is a heavy duty, detergent oil, recommended for API service classifications ML (light duty), MM (medium duty), MS (severe duty) and DG (general diesel duty). Its viscosity index is amazingly high.

Premium Value - Premium Price

Humble Esso Uniflo costs something more than most motor oils. But you'll agree that the small extra costless than one-tenth of a cent for each mile of drivingis cheap insurance against "4000-mile knock," friction wear, and acid corrosion!

A Word to Owners of Older Automobiles

If you use an oil meeting SAE viscosity classifications up to 20-you will find it profitable to change to Humble's new type Esso Uniflo. It will protect your car against friction wear and acid corrosion; reduce starting drag and extend battery life

If your engine has just been rebuilt-change to Esso Unifio. It will prevent the deposits causing "4000-mile knock"; it will protect against wear from friction and corrosion, reduce starting drag and extend battery life.

If you use SAE 30 or SAE 40 oil-Humble continues to recommend Esso Extra Motor Oil No. 3, a high quality, heavy duty, detergent oil with a viscosity index second

1807--- Robert E. Lee---1870

Few men who made history are remembered with more admiration than ROBERT E. LEE. His gallantry and courage made him a brilliant military leader, but it was his sterling character which won him the devotion of his followers and the high regard of friend and foe alike.

He refused to barter his personal respect for monetary gain. He preferred to live on good terms with his conscience rather than to accept tempting offers which were made to capitalize on his reputation and his famous name. He placed principles in which he believed above personal profit.

When, on January 19th, we observed the anniversary of his birth, it is an inspiration again to review the story of his life. He will always be revered and remembered.

Don't Wait Too Long

Don't warr until you are half dead before you call your family physician. His chances, and yours, are better if you call him at the first sign of illness. It will be less expensive for you, too. Often a word of advice, a sensible precaution, will prevent serious complications. Even though you may feel perfectly well, it is good practice to see your physician regularly, at least twice a year. If he finds it necessary to prescribe medical treatment, bring your prescriptions to us. We will fill them promptly and accurately with the finest ingredients.

411 Sheepskins from Texas

"Where do General Electric's engineers come from?" a visitor asked us. "I suppose they all got trained at MIT, or Cornell, or Michigan."

His question set us pondering, so we started plowing through the file cabinet for an answer. And, of course, it turned out as you'd imagine-NO. General Electric engineers don't always come from eastern technical schools. They won their slide rules from colleges in every state.

Maybe you'd like to hear how many of our bright engineers got their engineering education in your home state. Here's part of the list ...

328 came from colleges in Kansas . . . 207 from Oklahoma . . . 125 Nebraska . . . 103 Montana . . . 97 South Dakota . . . 87 North Dakota . . . 47 Arkansas . . . 41 Wyoming . . . 411 came from Texas colleges . . . well, the list includes every state.

One out of every twenty employees at General Electric is an engineer or scientist. You know that a big part of our work is improving products and working out new ideas.

Right now young men from your home state are working on big and important engineering jobs at General Electric. You should be mighty proud of them because—take our word-they're doing a swell job.

You can put your confidence in ELECTRIC

SMART FOLKS-THOSE BUICK ENGINEERS! They've made the 1953 BUICKS 87 ways better

Enter GENERAL MOTORS \$194,000 BETTER HIGHWAYS CONTEST

UR hat's off to the men who made the 1953 Buicks what they are—the greatest, Buicks in fifty great years.

They came up with a new kind of V8 for the SUPER and the ROADMASTER-a brilliant V8 Engine with a long list of engineering "firsts." They redesigned the F-263 Fireball 8 for record horsepower and compression in the spirited Buick Special.

They kept every inch of room in the roomiest six-passenger Sedan in America - and still shortened its turning radius considerably.

They did new wonders with the wonderful Million Dollar Ride. They stepped up visibility, comfort, handling ease, control

And man!-what they did with getaway They dreamed up, designed and developed a new Twin-Turbine Dynaflow

Drive* that whisks you away quick as a wink-and just as smooth, almost as silent. In fact, no other car in the world gets

away with all the combined quickness, quiet and smoothness of a Twin-Turbine Dynaflow

Wouldn't you like to see for yourself just how great these Golden Anniversary Buicks really are? Drop in soon-we'll be happy to do the honors.

Thank You

TO MY FRIENDS AND CUSTOMERS:

Last week I sold my interest in the Davis-Barnett Nash Co. to Mr. Davis in order to dissolve partnership and I no longer have any connection with said business.

Mr. Davis will continue to operate the business under his own name and will render any service you may need.

It is with deep regret that I got out of the business. I wish for Mr. Davis continued success in the operation of said business.

My plans are not complete as to what I will do in the future. I still have several good used cars, and for the time being, I will make my home, 400 Broadway, my headquarters. You may see me there or call 3934.

Thanks Again

Wallace M. Barnett

Good eating ahead when your freezer's stocked with SAFEWAY GUARANTEED MEATS

How to wrap and freeze meats

The U.S. Department of Agriculture recommends: Wrap meats in quantities that you wish to cook at one time. Wrap in vaporresistant covering to make package airtight and prevent drying. (Pliofilm, proper cellophane or laminated papers are best. Safeway self-service meat sections offer you cuts wrapped in Pliofilm or Cellophane. You may freeze these just as they are without extra wrapping.) Pull paper tight to drive out air. Seal seam with a fold Twist or fold ends. Tope ends and seams. Freeze quickly at 0° F. or lower. Store at 0° F. Limit storage time. Rotate cuts so that those you store first are

Corned Beef Bavil
