Calves born on Texas farms and ranches during 1970 totaled 5,378,000 head, up 2 per cent from 1969. The increased calf crop, says the Texas Crop and Livestock Reporting Service, was due primarily to the greater number of cows since the calf crop percentage remained stable, 88 per cent compared to 89 for '69. Cows and heifers 2 years and older numbered 6,118,000 head, up 3 per cent.
