## Santa Fe Newsletter Talks of Wheat Crop

Here's what the November, 1973, newsletter of the Santa Fe Crop Report had to say about the winter wheat situation in the territory Santa Fe serves:

Conditions generally were favorable for planting much of the intended winter wheat acreage in the Santa Fe-served Southern Great Plains states until late September when heavy rains, accompanied by turbulent weather, hit much of North Texas, the eastern half of Oklahoma, Kansas and Nebraska, as well as parts of Missouri and Iowa. This was followed by another severe storm period October 10 and 11, with much of the same areas with parts of Eastern Colorado and Western Kansas being affected. Heavy snows were common in Eastern Colorado with rain following

elsewhere. Many North-Central Oklahoma and South-Central Kansas counties recorded more rainfall in the twelve hour period beginning the evening of October 10, than has ever before been recorded in the same length of time with widespread flooding, extensive damage to land, farm buildings, machinery, newly planted wheat, unharvested acreage of corn, soybeans, and grain sorghums; and severe damage to homes, highways and railroads, as well as loss of life being reported from several cities.

Because of rains, flooding and wet fields farmers have been unable to get into their fields to plant intended winter wheat acreage. Mid-October reports indicate farmers in Texas have planted 80 per cent of their

intended wheat acreage compared with 84 per cent last year at the same time. Oklahoma reports indicate 75 per cent of the wheat planted this year with 92 per cent planted on the same date last year, while Kansas reports indicate only 55 per cent planted this year with 95 per cent planted at the same time last year. In numerous areas it is doubtful if the land will dry sufficiently to allow much additional acreage to be planted and a considerable acreage already planted may be lost due to excess water. Until streams recede and fields dry the full extent of damage to the 1974 winter wheat crop cannot be determined.

Delays in planting, damage to some acreage by high water and lack of adequate fertilizer supplies in many areas may offset the expected 12-15 per cent increase in the acreage expected for the 1974 hard red winter wheat crop.

**Program to Honor Rotary Foundation**

Young ambassadors of good will, some 6,300 of them, have traveled from their own nations to other lands for up to a year of study, thanks to an organization called The Rotary Foundation.

The Rotary Club of Crowell will honor The Rotary Foundation on its 56th anniversary with a special program at the club's weekly meeting November 14 at the community center. The club will join with the other 15,500 Rotary clubs around the world in observing "Rotary Foundation Week" November 11-17.

The Rotary Foundation has made grants totaling seventeen and a half million dollars in the past 26 years during which fellowships have been given. Academic awards are made on graduate and undergraduate levels. In addition, awards are given to teachers of the physically and mentally handicapped, technical training awards are made to young craftsmen, and a group study exchange program allows young business and professional men to study their vocations in other countries.

The Rotary Foundation was created by Rotary International to provide educational and vocational study programs for qualified young people in countries other than their own. It is supported by contributions from individual Rotarians, Rotary clubs and others.

**School Board Has Regular Meeting Mon.**

At the regular monthly meeting of the Crowell school board Monday night, bills totaling \$6,500 were approved to be paid. In other action pertaining to financial matters, the board approved the audit report for the 1972-73 school year.

Following a discussion of physical examinations for bus drivers, the board hired Lupe de los Santos as a new driver. The board voted to buy a time clock for the hourly personnel on the recommendation of a representative of the U.S. Department of Labor.

The board approved a 4-part form establishing the criteria by which the principals are to assess the performance of the professional personnel under their supervision. The principals are to make annual evaluation of each professional staff member with the evaluation forms to be submitted to the superintendent. With the information obtained from the evaluation forms, the superintendent is directed to plan in-service programs and activities designed to improve "those areas of greatest need."

Members of the textbook committee are Margaret Daniel, Faye Cates, Patricia Streit, Gordon Erwin, Barbara Wall, James Streit, James Welch, Martha Thomas, Margaret C. Rasberry, Zelma Justin, L. H. Wall, Jr., and Larry Jones.

The school officials are presently looking for an operation Mainstream teacher aide due to the resignation of the last one.

**Cold, Damp Weather Hangs Over Area**

Foard County is beginning to feel the first push of winter during the past week. Late last week a front pushed through, and made the temperature crisp and almost perfect for the big Crowell-Holiday football game Friday night.

Then another front early this week brought some more cold weather along with a light mist part of Monday and Tuesday.

The mercury dropped to about 40 degrees and the county is still looking for its first hard freeze of the season.

**FOOD, FIBER MONTH**

Agriculture adds \$10 billion annually to the Texas economy and employs about 30 per cent of the state's labor force. Gross farm income totaled \$4.7 billion last year as Texas continues to move toward the head of the national rankings in total agricultural receipts. It now ranks behind California and Iowa. Agriculture is indeed big in Texas and is continuing to grow as foreign and domestic markets continue to expand, says the extension service. As a tribute to Texas agriculture, November is being designated as "Food and Fiber Appreciation Month."

**Rotary Club Seeks Candidates for Rotary Foundation Awards**

Bill Klepper, president of the Rotary Club of Crowell, has announced that the club is seeking young men and women as candidates for Rotary Foundation educational awards for study abroad in 1975-76.

The Foundation offers four types of educational awards: Graduate Fellowships, for those who have received a bachelor's degree or equivalent and are between the ages of 20 and 28; Undergraduate Scholarships, for those with a minimum of two years of university level work and are the ages of 18 to 24; Technical Training Awards for those with a secondary education and at least two years' working experience and are the ages of 21 to 35; Awards to Teachers of the Handicapped, for those who have been engaged as full-time teachers of the mentally, physically or educationally handicapped for at least two years at the time of application and are the ages of 25 to 50.

Each award includes round-trip transportation, educational and living expenses for one academic year, and funds for intensive language training, if necessary.

In 1947, the Foundation started its programs of sending young adults abroad for study and since that time, the Foundation has awarded more than \$17.5 million for its various programs, and more than 6,000 young men and women have gone to countries other than their own for a year of study. As a non-profit organization, The Rotary Foundation is supported by voluntary contributions from Rotarians, Rotary clubs, and friends of Rotary in 150 different countries.

**NEW UNIFORM MEAT LABELS**

During the next few months, many grocers and meat retailers will be adopting a new uniform system for labeling meat cuts. A standardized list of some 325 cuts has replaced about 1,000 previously used names to take some of the confusion out of shopping for meat. Most of the fancy names have been dropped. The new standard label will include the name of the animal specie (beef, pork), the primal or sub-primal cut (rib, shoulder) and the recommended name of the particular cut (STEAK, ROAST).

**Same Game, New Rules for Ag Producers**

"Who's on first, what's on second?"

"Some farmers and ranchers may be in a quandry over the present state of affairs, but the ball game hasn't changed,—just the rules," says Cecil Parker, economist with the extension service.

"For the first time in a long while, agricultural producers find themselves in a situation where both costs and prices are rising. In recent years, production costs have risen while prices received for agricultural products remained generally stable. But now prices are also moving up and producers are finally seeing the outcome of the ball game in a different light."

The economist points out that farm prices, costs and demands for farm products have reached

a new plateau during the first half of 1973. But how long will this situation continue?

Parker expects present conditions in the farm economics picture to continue until at least 1975. "Record crops are expected this year and in 1974 and there should be no drastic change in domestic and foreign demands for agricultural commodities during the next two years."

According to the economist, U. S. farmers could realize a gross income of about \$85 billion this year. This would be a 23 per cent, or \$19.5 billion, increase over 1972. Of course, production expenses have also shown a record increase and could be up about \$12 billion by the end of the year.

During the first six months of 1973, costs of farm-originated production inputs—feed, seed and feeder cattle—averaged 35 per cent above the first half of 1972. At the same time, production inputs of non-farm origin—fertilizer, fuel, equipment—increased only 7 per cent during the first half of 1973 compared to the same period last year.

What do the coming months hold as far as farm costs are concerned?

"Record crops this fall should lower feed costs somewhat," believes Parker. "However, the prices of those input items not originating on the farm will continue at a high level and may even increase due to increased production costs."

**Travel Broadens Tourists' Views On Food Prices**

American tourists who traveled abroad this summer came home with a new appreciation for U.S. food prices.

Compared to what they paid for food in foreign countries, they're quick to admit that American food is still a bargain.

One tourist just back from a visit to Sweden reports his tab for five hamburgers, some French fries, and a soft drink added up to a whopping \$27 in American money.

Another businessman who went to London said a dish of strawberries and a cup of coffee cost him \$5.

Meanwhile, in Japan, beef costs range upward from \$12 a pound.

Cottonseed accounts for about 15 percent of protein concentrates fed to livestock.

**California's Edible Gold**

California grows more than 200 commercial crops and produces about one-fourth of all the food on American tables. It's also the No. 2 state in cotton production.

**What One Person Can Do**

Rebecca Latimer Felton, an 87-year-old Georgian, was the first woman seated in the United States Senate. She served three days.

Here's what happened according to Hope Chamberlin in "A Minority of Members - Women in the U.S. Congress": In September, 1933, Senator Thomas E. Watson of Georgia died. Governor Hardwick, who had unsuccessfully opposed the 19th Amendment, decided to appoint a woman to serve out the term in hopes of wooing the newly enfranchised women voters. He was sure that the electorate would pick a man for the full term during the 67th Congress.

When the governor announced his appointment of Widow Felton, he said she was a "noble Georgia Woman, now in the sunset of a splendid, useful life. It is unfortunate," he declared, "that an elected successor will prevent her from being sworn in." He also announced that he was entering the October primary and planned to be that elected successor to Senator Watson.

In November, the 67th Congress met. After delays and debate, Mrs. Felton was allowed to present her credentials. Three days later, she stepped down for her elected successor. But before she did, she delivered her first and last speech as a Senator. She predicted: "When the women of the country come in and sit with you, though there may be but a very few in the next few years, I pledge you that you will get ability, you will get integrity of purpose, you will get exalted patriotism, and you will get unstinted usefulness."

The 85 women who have succeeded Mrs. Felton as Senators and Representatives have fulfilled that prediction. Government needs dedication, honesty and ability. Never more perhaps today.

**Consumer's Stake In Farms**

More than three-fourths of the nation's food supply is produced by less than a million commercial farms. This means that more than 200 consumers are dependent on the economic health of each farm.

**COSTS MORE ALL THE TIME**

"The business of keeping the House and Senate operating in Washington is apparently becoming more and more of a complex job, judging from the number of people it takes to keep them going. The number of people employed by the branches of Congress have jumped to over 20,000 at a cost of \$300 million a year, triple the figure seven years ago. A per capita average of \$14,000 is reflected in the Senate and \$13,000 in the House and two thirds of the members of Congress now have aides who earn \$25,000 a year or more."—Selma, Ala., Times-Journal.

## Hints for Homemaker

Hints for the Homemaker by Rhonda Ward, C.E.A.

### HOMEMADE SOUP

Most people declare there's nothing like a good homemade beef and vegetable soup. Start with beef, a ham bone, pork hocks, fish, chicken, oxtails, or any other meat base. Cover it with water, add salt and other seasonings as desired, then simmer until all the meat flavor is drawn out into the liquid. Nothing takes the place of this long, slow simmering.

This means you'll have to stay around the house for several hours, but you can do other things since the meat requires only an occasional peek. Add

the family's favorite vegetable to the finished soup stock and perhaps a thickening agent like barley, macaroni, potatoes, or rice. When these items are cooked, the soup's ready to serve. Freeze any extra soup and it's ready for almost instant meals.

Or, if you wish, just fix the meat stock and freeze it. Then you can finish the soup just prior to serving it. Homemade soup can answer the dilemma caused by those small amounts of vegetables left over after meals. Often there'll be too many peas or beans to throw away, but not enough to have for another meal. Keep a container in the freezer just for these leftovers. Then, when the family's ready for soup, get out the frozen meat stock and the frozen leftover vegetables. Combine and heat. It'll be ready in a few minutes.

If you like homemade soup fairly often, you may want to keep a container of soup stock in the refrigerator. Whenever you have leftovers which would be appetizing in the soup, pour them into that container. Then, for a quick meal, out comes the container and—the soup's on.

Remember the Home Demonstration Club's Rally Day, Friday at the community center.

## 2 Minutes with the Bible

### ACCEPTED

In Ephesians 1:6 the Apostle Paul sings a doxology, as it were, "to the praise of the glory of God's grace, wherein He hath made us accepted in the Beloved" (Eph. 1:6).

In the story of the Prodigal Son it is touching to see the Father accept his wayward son back to his bosom—and so generously! He does not merely admit him back into his home; he clothes him with his best robe, puts a ring on his hand, shoes on his feet and kills for him the fatted calf so that they call all to "eat and be merry" in celebration of his return.

But the prodigal was after all the Father's son, whereas Paul bids us "Gentiles in the flesh" to remember that originally we were "without Christ...aliens from the common wealth of Israel...strangers from the covenants of promise, having no hope and without God in the world" (Eph. 2:12).

Hence it is even more touching to contemplate God's gracious acceptance of us who were not sons but "aliens" and "enemies" (Col. 1:21).

The word "accepted" in the above passage actually comes from the word "grace" (Gr. karis) with which the verse begins: "...His grace, wherein He hath embraced us in the Beloved One."

Thus God looks upon us now with delight; He delights to favor and bless the believer because He sees Him in Christ, His beloved Son.

This passage reminds us how God once broke through the heavens to declare: "This is My beloved Son, in whom I am well pleased" (Matt. 3:17). And now He is delighted with us and blesses us with "all spiritual blessings in the heavens" because we are "in Christ," the "Beloved Son." Not that we have attained to this position. Far from it, for "He hath made us accepted"—He hath embraced us in the Beloved.

## Former Editor of Wildcat Writes Letter to Current Editor

An open letter to the Wildcat News:

I read the article entitled, "Why" in last week's issue of the Foard County News. There are several implications in the editorial I wish to question. The first point I dispute is the overtone of the article. It implies that a man must prove his virility on a football field. I would like to ask: "What is a man?" From the editorial, a man is defined as an egotistical, athlete who must be bruised and battered to prove his manhood. One who has to prove his manhood is actually questioning his own masculinity.

As for pride, I feel that it is necessary for all people, whether it is excelling in athletics, striving for good grades, or working for the betterment of society. Athletics in the school system is only one of the many different facets or obtaining pride.

The staff of the "Wildcat News" is composed of very talented and brilliant individuals; however, the editorial is a contradiction of everything that you have accomplished. It is my guess that the staff of the "Wildcat News" published the editorial without actually understanding its contents.

A school newspaper should be concerned with "gut" issues, such as the hair code, the inadequate curriculum, the student parking problem, etc. In other words, the "Wildcat News" needs to be a voice of the students in every aspect of school life. I hope the future editions of "The Wildcat News" will be of true concern of the school system, the community, and above all, the students of Crowell High School.

Sincerely,  
Daryl Halencak

## CUTTING COSTS

"We've seen reports where reportedly the U. S. Postal System is cutting its costs. But at whose expense? It certainly doesn't appear that its service has gotten any better—in fact some of the letters we've read have indicated that it has been much slower. How many people have been inconvenienced by the slowness of mail? How many people have missed out on orders because of delay of mail? That's an indirect expense to that business then. How many people have had to pay penalties for late arriving remittances? So far, it would look like the centralization of mail to the big centers, taking away the mail from the smaller, more efficient

## Who's Eating High On What Hog?

That fellow who produces the pork chops for your dinner table doesn't eat as high on the hog as you might think.

He spends 324 days producing a pound of pork; furnishes all the feed, capital, labor, interest, taxes, and facilities; and yet receives only about 43 percent of what you paid for that pound of pork.

## How would you like to sign the work you do?

It's a shame that most of us don't get to sign our work. Because we'd probably do it better. Just out of pride. And that could mean better products and services for everybody. So, even if you don't have to sign your work, do the kind of work you'd be proud to put your name on.

## WE ALL CUSS INFLATION

"We all cuss inflation and are convinced that our income will not keep pace with rising prices, but how would you like to be a farm worker in Russia? It would require 60 years' wages to purchase a new car. Well, that takes care of private transportation problems for most Soviets. No wonder their public transportation is used extensively. With rising gasoline prices and growing traffic problems in this country, the one man-one car concept may be a thing of the past in a few years but if we are to 'attain' the same standard of living as now exists in the Soviet Union, we are going to have to work at it. Step number one, of course, is to inject even more socialism into our system, tax more businesses out of business, and put the bureaucrats in control of everything."—Lennox, S. D. Independent.

## IT'S INCREDIBLE

"It's incredible. The butchers claim they're not making any money. The wholesalers claim they are not making any money. The meat packers say they are not making any money. The ranchers also say they are not making any money. So who's making the money? Sometimes we get the uneasy feeling that somewhere there are cows buying mutual funds and gold stocks!"—Sikeston, Mo., Standard.

Foard County News—7

Crowell, Tx., November 8, 1973

From the News...

## 30 YEARS AGO

News items below were taken from the Thursday, November 4, 1943, issue of The Foard County News.

The War Chest Drive for Foard County, with a goal of \$1,800, is well underway and the results thus far are very gratifying, announces Claude Callaway, county chairman.

The Crowell Wildcats rolled on undefeated and untied in conference play by defeating the Valley View Warriors by a score of 33-0 here Friday night. Crowell boys who saw action were Parkhill, Taylor, Wharton, Short, Cox, Erwin, Archer, McBeath, McDaniel, Carter, Joy, Payne, Lewis, Mason, Vecera, Cunningham, Tamplin, Sandlin, Todd and Bell.

There were 3,486 bales of cotton, counting round as half bales, ginned in Foard County from the crop of 1943 prior to Oct. 18, as compared with 7,107 bales ginned to the same date last year.

Self Motor Co. has been appointed local dealer for the John Deere Plow Co., George Self, manager, announced this week. A new Model A tractor on rubber with equipment is now on display.

The Crowell High School football team will journey to Childress Friday night to play the Childress Bobcats, a class AA team.

"For the past few months, we have let up on our efforts to get this scrap into town," remarks county agent D. F. Eaton, because the need was not so pressing, but that situation has changed now and has become critical. Unless more scrap can be found quickly, many steel furnaces will have to close down.

The two-year-old male buffalo, which Dr. J. M. Hill bought last year, together with two females, and put on his ranch southwest of Crowell, was accidentally killed last Friday. Dr. Hill, Charlie Wishon and Jim Marlow were attempting to put the animal in a chute when he lunged against the fence and broke his neck. The buffalo was dressed immediately and the meat put in cold storage and given to friends through the courtesy of the meat department of Haney-Rasor Grocery. The head of the buffalo will be sent to a taxidermist and a rug will be made out of the hide.

M. S. Henry returned Sunday morning from Denver, Colo., where he attended the 12th annual meeting of the Soil Conservation Association. He was accompanied to Denver by R. H. Nichols of Vernon and the two men were appointed by Gov. Coke Stevenson to represent the Pease River Flood Control District.

Mrs. Oscar Gentry has accepted a position as saleslady in the Beverly Hardware & Furniture Co. store on the west side of the square.

Mr. and Mrs. Frank Halencak honored their son, Pfc. Rudolph Halencak, with a birthday dinner on October 27.

LaVerne Owens, daughter of Mr. and Mrs. Alton B. Owens of Margaret, celebrated her 11th birthday with a party and her teacher and schoolmates as guests. Attending were Mary Huskey, Billy George Pruitt, Wayne Shultz, Joyce Ann Middlebrook, Helen Riethmayer, Jack Lindsay, Bruce Bledsoe, Billy Bond, Miss Emma Belle Hunter, Anna Rea Owens of Crowell, the honoree and her mother.

TEXAS PRESS ASSOCIATION

AUSTIN, Tex.—Over 200 leaders of industry and representatives of professions met in the capitol last week to review the new state laws governing campaign contributions, expenditures and lobbying.

Secretary of State Mark White and Attorney General John Hill discussed the major changes brought about by the "reform" legislation of the last Texas legislature.

"We are living in a period of legal transition," the Attorney General told the business and professional men and women.

"My office has produced over 200 opinions so far this year -- more than the total last year -- and over 100 opinions are stacked up to be prepared."

White outlined his recent "campaign contributions and expenditures directives" at the meeting sponsored by the Texas Society of Association Executives.

Other speakers reviewed the details of the new lobby law and the sections of the penal code which affect campaigns and lobbying.

"H.B. 2 -- the new lobby law -- is unconstitutional," stated Frank Maloney, Austin attorney. "It violates both the first and fifth amendments to the constitution."

He cited federal cases which supported his opinion on the new Texas lobby law, and other speakers pointed out that several AG opinions are needed in this state to clarify sections of the campaign expenditures law and lobby law.

Political action committees for state businesses and associations are being formed as a result of the new laws.

Labor unions must go the PAC route in Texas now also, because they are prohibited under the new law from contributing to political campaigns.

Speakers on the program indicated that the Sharpstown scandal and Watergate investigations are going to make office holders, candidates and those who work and contribute to campaigns very wary about future political activities in this state.

"Until we get more information from the Secretary of State's office, and additional Attorney General's opinions, most representatives of business, professionals, labor and industry are going to be very cautious about participating in political campaigns and contributing to campaigns," one spokesman for the group said.

"None of us wants to be the first 'test case' under these new laws," he concluded.

Others observed that it was going to be harder to get good people to run for public office because of the tough new laws and predicted the strict campaign laws would make it easier for incumbents to remain in present offices.
