BREEDERS OF ALL KINDS OF CATTLE, HORSES, SHEEP, GOATS, SWINE, POULTRY AND FANCY STOCK find the JOURNAL A PAYING MEDIUM FOR ADVERTISING.

TEXAS PRODUCTS

COMPARISON WITH THE OTHER SOUTHERN STATES AS SHOWN BY CENSUS RETURNS.

The compilation of the various statistics of the twelfth census will not be completed for several months but some advance statistics concerning the South and West are given in the Manufacturers' Record and the showing made by Texas is flattering in the extreme.

Table with 3 columns: States and population, Total population, Per cent increase. Lists states from Alabama to West Virginia.

184,000, the seed sold to mills being \$15,832,000. This year's crop of nearly 10,000,000 bales, or a gain of about 2,500,000 bales, with one-half of the seed sold to mills for \$40,000,000, is estimated by Colonel Shepperson as worth \$33,000,000, the bulk of the crop having been sold early in the season when the price was very high.

other sections, for its production in this line is mainly of sweet potatoes. In 1900 its Irish potato crop was 10,940,410 bushels, worth \$10,254,497. Its sweet potato crop, which is never recorded except in census reports, was, in 1890, 39,000,000 bushels. With an increase in population of about 25 per cent in ten years, and a greater increase in agriculture, the South's sweet potato crop must be about 50,000,000 bushels at present. The average value of the Irish potato crop as reported by the United States agricultural department, was 60 cents a bushel, but estimating the sweet potatoes at 50 cents, the aggregate value would be \$25,000,000.

since it reached such alarming dimensions, is refusing to admit any cattle, sheep or swine except from the British Isles. This is done not only to protect the vast livestock interests of this country, but also to protect our \$30,000,000 or \$40,000,000 annual export trade in cattle.

THE SCOTT OIL COMPANY

Of Fort Worth, Texas, Incorporated under the Laws of the State of Texas. Capital \$500,000. Shares \$1 Each.

MAIL ORDERS

We want you to send us a trial mail order. Send for samples of the new goods and see what a pretty assortment we will send you.

FASHION SHEET COUPON

seriously injured by the cold after Easter. The crop will be much larger than ever before on account of new deeds of acres in new orchards, which have reached the bearing age. Rice in Brazoria County—A company was recently organized in Houston with a capital stock of \$30,000 to build a rice canal for Brazoria county. The canal will take the water from the Brazos river at a point in the vicinity of the Arabia plantation and will convey it across the prairie east and southeast, so as to supply the country pretty generally with water for rice irrigation. The big Walker & Baker canal will soon be completed. This canal will irrigate from 3,000 to 5,000 acres and most the land under this canal will be put in rice this season. Prof. Nettleton and partner are preparing to put in from three to six hundred acres in from next to last year and will increase to about \$800 each next season. Munson Bros. are preparing for seeding 1,900 acres this season. The Hull plantation at Sandy Point will all be in rice this year. The irrigating plant is complete and ready. The Camp Rice Farm on Chigger bay will have 800 acres. The Alvin Fruit and Nursery Co., will have several hundred acres, and the grand total planted to rice in Brazoria county this year will not fall short of 10,000 to 12,000 acres. East Texas Peaches—Very encouraging reports come from Cherokee county in regard to the peach crop. No damage was done by the recent cold weather and but little uneasiness is felt for the future. Easter has passed and the danger period is now regarded as over. An experienced peach-grower at Jacksonville, who has closely observed and noted the results, is authority for the statement that within the last ten years, with one exception, the peach crop has not been

the milk production was 780,000,000 gallons, which, even at a valuation of 5 cents a gallon, would represent \$39,000,000 in value. Out of that portion used for butter there were made 197,000,000 pounds, worth, at 10 cents a pound, \$19,700,000; but in value of the milk will be counted in the total figures. The poultry interests form an important part of farm production. The number of poultry, including turkeys, ducks, geese and chickens, is over 115,000,000, and the production of eggs for the year was over 125,000,000 dozen. The value of the eggs and poultry consumed at home and sold was over \$25,000,000, but at this figure the average consumption of poultry and eggs for the year would be only \$5 per year as the South now has about 5,000,000 families. The exact figures are probably much larger.

Table with 3 columns: Articles, Texas, Value. Lists various agricultural products like Cotton crop, Wheat, Rice, etc.

the lumbering interests of the whole South have grown with great rapidity during the last decade. Instead of sending away all our lumber in its rough shape, we are turning out more and more finished products, as illustrated by the simple story of that High Point, N. C., has within 10 years developed a furniture-making industry the output of which was \$1,500,000 last year against little or nothing ten years before. A year ago Mr. B. P. Fernow, the forestry expert of the nation, in an elaborate article in the Manufacturers' Record, showed that the timber business of the South, including that used for fencing and fire, aggregates over \$200,000,000 a year.

Foot and Mouth Disease.—The officials of the agricultural department are closely watching all reports from abroad regarding the extent of the foot and mouth disease, a fatal malady that is raging among the livestock in almost every country in Europe. For the last three years the outbreak has been general on the European continent, and the reports constantly arriving from various foreign points do not indicate any diminution in its extent. This government, as it has done

Must Pull Down Fences.—Cattlemen of Western Kansas are now receiving notices from the agents of the government land to tear down their government fences in compliance with the ruling made by the department last year. Stockmen have been trying to get this postponed for a year, but were not successful. The department is so much in earnest that the failure to take down the fences within 60 days from the time the notice is received is a crime.

Hereford Headquarters Moved.—The headquarters of the American Hereford Breeders' association has been moved from Independence, Mo., to Kansas City, the new offices being located at 225 West 12th street, where Secretary C. R. Thomas will have the records and registry books of the association. The president of the association, Col. Frank Rockefeller, will be found at the headquarters as often as convenient will permit. The move to Kansas City has been made with the idea that the interests of the association will be best served by the officers being located there. Hereafter all mail and express matter should be addressed to Kansas City. The Hereford business has grown rapidly lately and the bulk of the white face territory can be reached quickly from the new offices. Secretary Thomas will be glad to welcome all cattlemen from the southwest who may have occasion to visit Kansas City.

New Zealand Cattle.—Frank Carpenter, the well known newspaper correspondent, writing from New Zealand, says: "I am surprised at the fine cattle raised in New Zealand. The islands have registered Shortorns, Herefords, Polled Angus, Ayrshires, Jerseys and cross-breeds. There are more than 300,000 dairy cows, and their average grade is high. I am told that the good milk cows each yield 500 gallons of milk per annum and that as much as 700 gallons is gotten from selected herds. The milk is rich, averaging about a pound of butter to every two and one-half gallons of milk, so that the common New Zealand dairy cow annually produces 200 pounds of butter or 500 pounds of cheese at 9 cents a pound, you will see that each cow brings in about \$45 a year, which you will agree is pretty good for a cow."

Stock in Hill County.—There were 5,000 mules and horses shipped from Hill county, Tex., last year. The tax rolls show there are still 22,000 head in the county, valued at \$625,000. Six thousand head of cattle were shipped out of the county last year, and there are still over 23,000 head in the county, valued at over \$333,000. Over 200 cars of hogs were shipped and there are still over 28,000 head in the county, valued at \$7,000,000.

Sale at Victor, Ia.—Korns & Lee held a sale of 43 animals at Victor, Ia., on Monday, April 16, with 25,000,000 to \$24,000,000. The highest bid was \$24,000,000 for a pair of high, V. R. Ward of Hawarden, Ia., topped the sale at \$1000 for Imp. Coquette. Several other animals went almost as high. W. R. Hunt of Sildell, Tex., was one of the attendants at the sale.

Grand Combination Public Sale 110 --- Registered Short Horn Cattle --- 110

At Kansas City Stock Yards Sale Pavilion. Monday and Tuesday April 22, 23, 1901. When 110 head, 50 of which will be Bulls and 60 Cows and Heifers, consisting of both Scotch and Bates breeding, a mixture of this blood and a strong infusion of Booth blood. Each consignor, June K. King, Gentry Bros., John Morris & Son, W. P. Harding, N. H. Gentry, Arthur Wallace, Fred Cowley, C. E. Leonard, W. R. Nelson, and Col W A Harris are all established and reputable breeders which is a sufficient guarantee that the offering will be the equal of any known to the breed. It will be the last opportunity, at least so far as announced, to take place at Kansas City this spring, to secure one or more high class Short Horns. The farmer and ranchman will find in the bull offering his one chance to get bulls at his own price.

Breeders Who Seek Your Trade

SHORTHORNS. V. O. HILDRETH. Breeder of registered and high-grade Shorthorn cattle. Young bulls for sale. Address and Residence at Iowa Station, T. F. R. E. O. Dallas, Texas.
