DALLAS, FORT WORTH AND SAN ANTONIO, TUESDAY, JULY 23, 1901.

Largest Weekly Circulation in Texas Guaranteed to Advertisers.

Men who have tried AN AD IN THE JOURNAL are those who continue to use its columns and declare there is no better medium for them. Like results for you from

THE JOURNAL

FARMERS' CONGRESS.

MEETING IN SESSION AT COLLEGE STATION THIS WEEK—AN EXTENSIVE PROGRAM.

The Texas Farmers' Congress is in session at College Station this week, and the meeting will apparently be one of the most successful ever held by the organization.

Tobacco and Macaroni.—In a recently published interview, Secretary Wilson said: "This country sells \$30,000,000 worth of tobacco and buys \$13,000,000 worth of high-grade varieties."

Using Formaldehyde.—Following the discovery that adulterated and poisonous milk had been furnished the Cook county hospital comes the accusation that Chicago merchants are making wholesale use of formaldehyde to keep fruits and vegetables from rotting on their hands.

WINNERS AT GREENVILLE.

At the recent carnival in Greenville, Tex., there was a very creditable display of live stock. The following were the prize winners in the exhibition:

Berkshire sow and five pigs: W. E. England, first prize; J. F. Boyle, second prize. Poland-China sow and five pigs: J. E. King, first prize.

White Plymouth Rocks: R. A. Davis, first and second prizes in both classes. \$5. Barred Rocks: R. A. Davis, won in both classes, \$4.

export 20,000 barrels of flour. They were consigned to London, Belfast and other points. Mr. McClean of the company said that the company had exported for the year from June 1, 1900, to July 1, 1901, about 200,000 barrels of flour.

To Kill Johnson Grass.—J. B. Baker, a prominent nurseryman of Fort Worth, said a few days ago: "It is an all wind that blows no one good. Texas has been suffering from dry weather, from which the crops have suffered and it is a splendid time for the farmers to abate a nuisance which they have been trying to rid themselves of for years past—the Johnson grass."

The Fever in Missouri.—Dr. E. J. Netherton, deputy state veterinarian, last week condemned a herd of cattle at Fairfax, where he went to examine cases of splenic fever.

PECAN GROWING IN GEORGIA. Pecan growing in Texas is an industry which is yearly attracting more and more attention in Texas. The wild or uncultivated nut has in the past constituted a very large part of the Texas crop put throughout the state.

ROCK CREAMERY.—The stock for the combined butter, cheese and feed storage factory has been closed and in a few days the builders will be at work on the building, says the Round Rock Searchlight.

Light Brahmas: R. A. Davis, all four premiums, \$6. Silver-laced Wyandottes: R. A. Davis, first on cockers and first and second on hens, \$4; J. T. Spradling, second on cockers.

South Dakota Sheepmen.—The South Dakota Sheepmen's association held its annual meeting in Rapid City last week and the following officers were elected: President, James Boyd, Rapid City; vice-president, Joseph Boyd, Rapid City; secretary, Joseph Boyd, Rapid City; Joseph Waterston, sheep inspector.

Prizes at Dallas.—The Dallas fair of fers the following prizes and premiums as shown in their catalogue: Herefords, \$600; Shorthorns, \$600; Holsteins, \$600; Red Polls, \$600; Jerseys, \$600.

Packers Must Pay.—It is claimed that packers throughout the country will lose hundreds of thousands of dollars each year if a decision announced by Judge Kohlsaat in the United States circuit court Thursday is sustained in the higher courts.

Dakota Wool Shipments.—A late dispatch from Pierre, S. D., says: The heaviest load of wool ever loaded on this division of the Northwestern road, a shipment of 40,000 lbs. of wool and went to a commission company at Chicago.

PECAN GROWING IN GEORGIA. Pecan growing in Texas is an industry which is yearly attracting more and more attention in Texas. The wild or uncultivated nut has in the past constituted a very large part of the Texas crop put throughout the state.

Light Brahmas: R. A. Davis, all four premiums, \$6. Silver-laced Wyandottes: R. A. Davis, first on cockers and first and second on hens, \$4; J. T. Spradling, second on cockers.

tration of gasoline, which is satisfactory in some respects, but tedious and expensive, because each sheep has to be dosed several times. Now if a man has several thousand sheep or goats and has to drench each animal three to six or eight times, the total expense and labor involved is considerable.

Row Over Ticks.—A considerable row has been stirred up recently on account of a bottle of ticks sent from Fort Worth by Inspector Johnson, employed by the Kansas sanitary board, to that board.

Sheepmen to Organize.—Wyoming sheepmen are preparing to organize the Wyoming Wool Growers' association in the near future.

Favors Charging for Bulletins.—G. W. Hill, chief of the division of publications of the department of agriculture, believes that a small charge should be made for the books issued by that department.

Growing Rubber.—The cultivation of rubber, prompted by the wasteful methods of the natives on the upper Amazon in Central America, and the East Indies, who chop down trees to drain the milk quickly—a foolish notion—promises to be an important industry some day.

Light Brahmas: R. A. Davis, all four premiums, \$6. Silver-laced Wyandottes: R. A. Davis, first on cockers and first and second on hens, \$4; J. T. Spradling, second on cockers.

of the Richard's King county ranch of 23,000 acres of fine grazing land. It was known as the 3 D ranch, being the southern range for the company's cattle. The price to be paid for the land is \$2.25 per acre.

Packinghouse Talk.—There appears to be widespread interest in the status of negotiations with Armour and Swift looking to the location at Fort Worth of large packing houses.

Disease of Sheep.—Dr. Charles Wardell Stiles, geologist of the United States department of agriculture, who has been for some time in Victoria, Texas, left last week for Washington whence he will go to Germany as the representative of the government at the International Zoological congress to be held in Berlin in August.

alarm among the hay growers. This worm attacks clover and alfalfa hay, both in the mow and in the stack, cutting up the leaves into chaffy pieces and webbing the mass together by its abundant spinning.

Macaroni From American Wheat.—Consul Joseph E. Hayden writes the state department from Castellamare di Stabia, Italy, after efforts covering a period of over two years he has succeeded in demonstrating the fact that the very finest quality of macaroni can be made of American wheat.

Light Brahmas: R. A. Davis, all four premiums, \$6. Silver-laced Wyandottes: R. A. Davis, first on cockers and first and second on hens, \$4; J. T. Spradling, second on cockers.

chaser. 20 animals went to Maine purchasers. 14 animals went to Oklahoma purchasers. 12 animals went to Alabama purchasers.

In closing his circular Secretary Macfarlane says: "The Aberdeen-Angus are a native Scotch breed, indigenous to the north-eastern district of Scotland. There this breed originated, and there it has been brought out as one of the most valuable of living varieties of cattle."

Masterson's King County Deal.—For two weeks past E. A. Patfrath of Fort Worth has been hard at work on a big deal which was closed Friday July 19.

in Paris, France, to which point all of the kernels are shipped. We have never attempted to build up a market for the kernels in this country owing to the fact that the demand for them in France is much greater than we will be able to supply for a long time to come.

Cotton Wilt.—A new disease is killing cotton in Georgia. W. A. Orton, an assistant pathologist of the department of agriculture at Washington, has been investigating the disease. Mr. Orton says the disease is caused by fungus in the soil which clogs the vessels in the stalk and causes the plant to wilt so that the disease can be recognized by cutting across the stem, the heart being black in the stalk affected.

Light Brahmas: R. A. Davis, all four premiums, \$6. Silver-laced Wyandottes: R. A. Davis, first on cockers and first and second on hens, \$4; J. T. Spradling, second on cockers.

ANGUS TRANSFERS.

Secretary's Report of the Transfer of Aberdeen-Angus Cattle. In Texas the Aberdeen-Angus cattle have not yet received the attention that has been given to the Herefords and Shorthorns but the breed is steadily winning favor and a considerable number of animals have been brought to the state during the past few months.

1 animal went to Georgia purchaser. 1 animal went to California purchaser. In closing his circular Secretary Macfarlane says: "The Aberdeen-Angus are a native Scotch breed, indigenous to the north-eastern district of Scotland. There this breed originated, and there it has been brought out as one of the most valuable of living varieties of cattle."

DROUGHT BROKEN.

RAINS HAVE FALLEN OVER TEXAS AND OVER SOME TERRITORY IN OTHER STATES.

Throughout Texas during the past few days, local showers and heavy thunderstorms have effectively broken the drought, which the state, in common with other sections of the south and west, has felt for some weeks. At no time has Texas suffered from the drought as have some of the other states, notably Kansas and Missouri, but in parts of the commonwealth the dryness has cut short the corn crop and has affected most other crops to some extent, though cotton is unharmed.

Phillips Exonerated.—Charges of irregular practice made against "Corn King" George H. Phillips have been dismissed by the directors of the board of trade. According to the committee the charges were made by customers who were ignorant of board of trade dealings.

Light Brahmas: R. A. Davis, all four premiums, \$6. Silver-laced Wyandottes: R. A. Davis, first on cockers and first and second on hens, \$4; J. T. Spradling, second on cockers.
