High Military Rank Attained by Humble Civilians.

Sir Douglas Haig Tells of Many Instances That Came to His Notice During the Great War-Men That Failed.

An interview with Sir Douglas Haig. printed in the Manchester Guardian, contains some shocking instances of the romance and fortunes of war.

"Promotion," said the field marshal has been entirely by merit, and the highest appointments were open to the humblest, provided he had the necessary qualifications of character, skill and knowledge. "Many instances could be quoted of

men who, from civil or comparatively humble occupations, have risen to im-"A schoolmaster, a lawyer, a taxicab

driver and an ex-sergeant major have commanded brigades.

vision and another held successfully the position of senior staff officer to a regular division. "The undercook of a Cambridge

college, a clerk to the Metropolitan water board, an insurance clerk, an architect's assistant and a police inspector became efficient general staff "A mess sergeant, a railway signalman, a coal miner, a market gardener,

an assistant secretary of a haberdashery company, a quartermaster sergeant and many private soldiers have risen to command battalions. "Clerks have commanded batteries.

"A schoolnraster, a collier, the son of a blacksmith, an iron molder, an instructor in tailoring, an assistant gas engineer, a grocer's assistant, as well as policemen, clerks and privates, have commanded companies and acted as adjutants."

These instances are not strange. They show possession of military instinct which only required the chance to be displayed.

Analyzing further, of course, It could be abundantly shown that some men, although given high rank, fell down lamentably when opportunity for work offered.

While technical education is essential, soldiers are born, not made.

It would be interesting to collate from our own records some of the many instances of American soldiers who rose from the ranks to commissions after a brief apprenticeship to the profession of arms.

Ground Glass Not Harmful.

Experiments recently carried out by the army medical corps have entirely disproven the popular belief that ground glass is harmful to the digestive tract.

Glass was ground and sifted to secure varying degrees of fineness and considerable quantities of the material were incorporated in fresh meat. the same being fed to hungry dogs. This was repeated in some instances on a number of days after which the dogs were killed and the digestive tract examined both with the naked eye and by the aid of the microscope and no injury whatever was perceptible. Before being killed the dogs apparently suffered no inconvenience and appeared normal in every way.

These findings should eliminate for all time the idea of glass being the cause of death in animals maliciously peisoned.-W. H. Feldman, Colorado Agricultural College, Fort Collins,

Its Face Was Its Fortune.

Two years ago my husband and I were coming into Chicago from an Indiana town in a roadster that certainly showed the hard use we had given it. About midnight we started down a little grade on a lonely stretch of road and found at the bottom that the road was blocked by two large machines with licenses from a West-

We stopped, of course, and expected one machine to pull aside. Instead two men walked back to our car and lcoked us over. Then one called: "All right," and the road was cleared.

They thought our old model machine was probably not worth stealing, but they neglected to search our pockets, which contained several hundred dollars .- Chicago Tribune.

Wrested Fortune From World.

Sir Marcus Samuel, who has purchased from the earl of Berkeley for the sum of \$25,000,000 a parcel of the fashionable residential section of Lopdon, known as Berkeley square, started in business life keeping a little shop in one of the poorest quarters of the British metropolis, where he made and sold for a shilling or two, ornamental boxes made of shells from the seashore. Later he invested his savings in oil, made money and started a company called the "Shell," thus identifying his big new venture with his original struggling business.

Those Investigations!

Congressman (conducting an investi-gation of the cost of living)—Come in here and sit down! I want to ask you some questions. Now don't try to evade, 'cause you can't get away. Is It true that you have been profiteering in food products?

Profiteer-Yes, it's true. What're you goin' to do about it? Congressman-Well, well, now, don't

get excited. I just wanted to know if It was true.

And thus another stirring investigation is recorded .- Kansas City Star.

Indianapolis Man Tells How Small Creature Led to Discovery of Hidden Mountain Dew.

"A funny thing happened to me the other morning," volunteered an East side man after he got firmly established on the rear of an incoming East Washington street car and had successfully filled and lighted his pipe and had it going good.

"What's that, Bill; did you forget and go to church?" asked another passenger, who seemed to know the victim of the funny incident.

"A bug caused it." continued Bill, ignoring the insinuation; "funniest lookin' bug I ever saw.

"I was lying on the bed reading some poetry, 'The Death of the Flowers,' you know how it goes. 'The melancholy days have come, the saddest of the year; of wailing winds and naked woods and meadows brown and sere. The robin and the wren are flown, and from the shrub the jay and from the woodtop" --

'Well, as I was saying," continued Bill, "I was reading that sad poem-I'm doing a lot of that thing since the state went 'ery'-when I saw this bug running across a rug toward a clothes press in the corner of the room. It was the meanest lookin' bug I ever saw, and it certainly was goin' some. I fumped off the bed and made a dash for it, but it beat me and got into the closet! I didn't want the bug crawling around over my bed in the night, so I dived right into the clothes press and threw out about three dozen different kinds of garments that had been tossed in there to get 'em out of the way. Then suddenly I saw the bug and back in the corner a quart of mountain dew both at the same time. Durned if I didn't forget all about everything but that quart. It certainly was some find. I wonder when the wife hid it there."

"What became of the bug?" asked a young fellow who evidently was studying to be a lawyer.

That's the funny part of it," replied Bill. "'Course I never thought of the bug again until about an hour after that when I saw Mr. Bug clear on the other side of the room beatin' it to get under a dresser, I got him that time, and he sure was some bug."-Indianapolis News.

Lost and Found.

A customer with a camera came in to tell his troubles to Joe Craven, a photographer in South Illinois street. "Last Sunday I found this camera

on a bench at Riverside," he said. "There were two films that had not been used so I exposed them and would like to have the roll printed. If you know or hear of anybody who lost a camera, why just give it to

them. So when Craven printed the plctures he took one of them and put it "This Girl Lost Her Camera; If Know Her Please Tell Her That Her Camera Is Here and She May Have It and the Pictures Gratis!"

Three days later she came in for the camera and the finder of the camera came back for his set of pictures. The sad part of it all is the fellow came just about ten minutes too late to meet the girl. So girls, if you see a fellow look at you and then take a picture out of his pocket and look it don't get excited. He merely wishes to meet the good looking girl* who lost the camera .- Indianapolis oxen.

The Friendly Water Trip.

It's a queer world. Sunday we spent in a friend's boat, making the trip to Wallaceburg, Ont. Along that stretch of blue water we passed every sort of people in every sort of boats, and in every instance we waved a hand in greeting to them and they waved to us. It was no trick af al' to get a warm and genial sign of friendship from passersby. The people on land saluted us. It seemed as though we were continually being welcomed as we arrived in sight and wished good luck as we departed.

Yet on land we could have passed the same people time after time and not one of them would have turned to look or wave a hand. Why can't people be as friendly to land travelers as they are to those who travel by water? It's a queer world .- Cleveland Leader,

Priests Fought as Poilus.

Yesterday on the Rue St. Honore I met two priests, one wearing an empty sleeve, one wearing a mechanical leg and both wearing the Croix de Guerre. "Were you in the war as chapleins?"

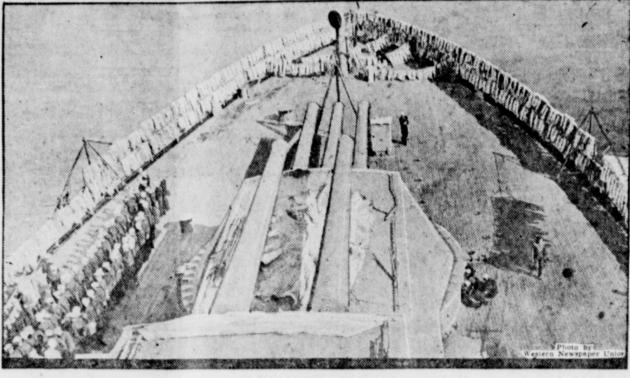

"No," replied the one-legged priest. "we were poilus. Most of the younger priests fought in the ranks." But I suppose very few were wounded?"

"On the contrary," replied the onearmed one, "the percentage was high, You see, we had no families, so it was only right that when there was something dangerous to do we should go first."-Lee Shippy in Kansas City

Cotton Production Welcome.

Mesopotamia has always grown some cotton, which modern methods may improve. Of this material may have been the veil with which Rebekah covered herself at her first meeting with Isaac, as she journeyed under the guidance of Abraham's servant from Mesopotamia to Canaan to become Isaac's wife. Cotton competition between Mesopotamia and Egypt would be particularly attractive. And the Bleecker street "I" station in New cotton is one good thing of which war's tatterdemallon, the world of today cannot have too much.-Boston

"AIRING DAY" ON THE U. S. S. OKLAHOMA

At first glance this might seem to represent a camouflaged warship entering the "danger zone" during war times, but it is really a photograph, snapped from the fighting top of the U. S. S. Oklahoma, showing the "gobs" lined up for "bedding drill," while adorning the rail can be seen the bedding of the sailors exposed to the fresh gir.

You Do More Work.

You are more ambitious and you get more

enjoyment out of everything when your blood is in good condition. Impurities in the blood have a very depressing effect on the system, causing weakness, laziness, nervousness and sickness.

GROVE'S TASTELESS CHII TONIC

restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how

it improves the appetite, you will then appreciate its true tonic value.

RON and QUININE suspended in Syrup.

The Strength-Creating Power of GROVE'S TASTELESS Chill TONIC has made it

the favorite tonic in thousands of homes.

More than thirty-five years ago, folks
would ride a long distance to get GROVE'S
TASTELESS Chill TONIC when a
member of their family had Malaria or

seded a body-building, strength-giving onic. The formula is just the same to-

ay, and you can get it from any drug

Caused by

Acid-Stomach

acute or chronic. Nearly every case is caused by Acid-Stomach.

There are other stomach disorders which also are sure signs of Acid-Stomach—belching, heartburn, bloat after eating, food repeating, sour, gassy stomach. There are many aliments which, while they do not cause much distress in the stomach itself, are, nevertheless, traceable to an acid-stomach. Among these are nervousness, billiousness, cirrhosis of the liver, rheumatiam, impoverished blood, weakness, insommia, melancholia and a long train of physical and mental miseries that keep the victims in miserable health year after year. The right thing to do is to attack these silments at their source—get rid of the acid-closusch. A wonderful modern remedy called EATONIC now makes it easy to do this.

One of hundreds of thousands of grateful users of EATONIC writes: "I have been troubled with intestinal indigestion for about nine years and have spent quite a sum for medicine, but without relief. After using EATONIC for a few days the gas and pains in my bowels disappeared. EATONIC is just the remedy I needed."

We have thousands of letters teiling of these marvelous benefits. Try EATONIC and yes, too, will be just as enthusiastic in its praise.

Your druggist has EATONIC. Get a big

DADDY'S EVENING The FAIRY TALE by Mary Graham Bonner

THE OTTER.

"I have known such a free life, such a wild, free life," said the Otter, "that I grow impatient—that is, I grow restless and I become bored with the dull life of the zoo.

"I would rather be free even if I were in danger of having my beautiful fur taken. And the only way my fur can be taken is by getting me first and putting me to a sorry end.

"By a sorry end I mean a real end. There would be an end of me if they got my fur. That is there would be an end of the real me, the me that speaks in otter language, and walks and breathes and eats and plays.

"There would still be otter as far as my fur is concerned. But that is only a part of me. It would be as though they would keep my coat and leave me to get another. But I can't get another. Once my coat is takenthere is no otter left.

"Still it is a great compliment to have them like my fur. It is a great honor to feel that my fur keeps people warm. But they can't get me easily, for I don't look out for com-

"No, I would be perfectly happy without any people's compliments. Of course otters' compliments are quite, quite different. "I wouldn't mind those in the least.

No, not in the least. They wouldn't do me any harm, but those compliments of the people-well, they're funny compliments. Funny indeed. "As though they would take one

hand and pat you and slap you with the other. Still how could they compliment our fur in any other fashion? "No, they must compliment our fur in that way. I see that they must.

"Such a glorious life as an otter has when he is free. He is such a fine animal, such a fine furry beast. He loves Canada and the cold weather, he loves the North and the wind and the snow. He loves real winter better than he does a make-believe win-

"And he doesn't care much for summer, a foolish sort of a season for a creature with all the furs he wants. I can't put my furs into storage or in camphor balls, as I hear people can. I have to keep mine with me, for

Such a Glorious Life as an Otter Has.

there is no safe storage house for otters' furs except on their own backs. "So I have to keep my fur on and that is why I hate the summer time. this season of the year!

"Often I try to get away but they like to keep me here for people to look at. Ah, many people come to look at me, and they say,

"'Oh, what beautiful fur. How fine a coat would be of that fur, or a muff would be nice too.

"'And a fur hat would be delightful and fur mittens quite too won-

"Yes, that is what they say when they see me in the zoo. But I would like to answer them and say,

"I am safe here. You cannot touch me. But I would rather be wild, wild and free and run the danger of you and of your love of my fur than I would be here where life is so dull and so much the same, day after day after day.'

"Yes, that is what I would like to say to them. And yet I have had a happy winter. I have enjoyed myself. sliding down hill, for I'm a folly fellow, too. Yes, I am like a child in the way I like to slide down hill-and like many a grown-up too, for I've noticed grown-ups like to slide down hills when they get a chance.

"They pretend they're pleasing the children when they get on their sleds, but ah, I've seen them and I know

"But I'm an honest otter and I admit I like it, and who wouldn't? So I've had a good winter, but oh, for the old otter the free life is the real life. though I have little to grumble of here. But that is the trouble, the life is so dull, one can't even grumble, it's too bad!"

Substitute for Linseed Oil.

A Swedish engineer has succeeded in obtaining a substitute for linseed oil from purely Swedish raw materials. The substitute is said to possess all the good qualties of the genuine article. The invention, which is the result of long and patient work, has been bought and will be exploited by Director E. Schelin of Stockholm; manufacture would have been begun long ago, but for delay in delivering the necessary machines. The main advantage of the substitute oil is that it Is cheap to manufacture and does not need an extensive plant.

Is to have been a hero.

-Elliot. one in cooking, as well as on a horse's rein, and it almost seems as if butter and eggs knew their mistress and instinctively obeyed her orders, feeling themselves in the grasp of a superior power."-Kate Douglas Wiggin.

SUNDAY NIGHT LUNCH.

Dishes which may be prepared on the table in a chafing dish or with little work before-Mand are always appreciated.

> English Monkey. -Soak one cupful of stale bread crumbs in one cup ful of milk until soft. Melt one ta-

blespoonful of butter, add a cupful of soft cheese, and when the cheese is melted add the soaked crumbs, one egg slightly beaten, half a teaspoonful of salt and a few dashes of cayenne. Cook three minutes and pour over toasted crackers or toasted bread, and sprinkle with paprika.

Jellied Chicken Salads .- Put into a saucepan three cupfuls of highly seasoned chicken stock, the whites and yolks of two eggs, three tablespoonfuls of gelatin and two tablespoonfuls of lemon juice. Boil two minutes, stirring constantly. Place on the back of the range for thirty minutes, then strain through a double cheesecloth. Cover the bottom of individual moulds with liquid jelly and set in ice water. When firm decorate with red and green peppers cut in fancy shapes; cover the decorations with the jelly mixture. Moisten one cupful of cooked fowl with one-half cupful of mayonnaise dressing to which has been added one teaspoonfu! of gelatin dissolved in two tablespoonfuls of water. Shape in balls, put a ball in each mold and add jelly to fill molds. Chill, remove to lettuce and serve with may-

onnaise dressing. Another nice cheese dish which is easy to prepare is toasted cheese sandwiches. Spread rounds of bread with butter, and fill with cheese mixed with cream, paprika and salt, put together sandwich fashion and fry in butter, a very little, not to make them too greasy to handle. When brown on both sides serve with a plain lettuce salad. Olive oil may be used to brown the sandwiches in.

Scrambled Eggs .- To make a few eggs go further in serving, use from a quarter to a half a cupful of wellwashed rice; brown the rice in butter or sweet fat of any kind in a frying pan. When yellow add water or milk and cook until the rice is soft, then add three, four or five eggs (dependng upon the number to be served). with milk and butter; salt and pepper to season. Stir and cook as scrambled eggs, and the dish will be as good as one made using double the eggs.

Would I'd a rose on my bosom to lie. But I shrink from the piercing thorn; I long, but I dare not its point defy; I long and I gaze forlorn.

WHAT TO HAVE FOR DINNER.

As simple meals are the accepted and expected way of saving work

these busy days, we must strive to have a well-balanced meal, attractive and at the same time appetizing. It is not always easy to suit all members of a family. but if we endeavor to bring up this generation

to eat and enjoy all kinds of food well cooked and served, perhaps in time we may have a generation of lish clergyman has become an aviator." Americans with normal appetites. We may not like all things equally well. but there is no reason, except where there is some physical disability or idiosyncrasy, why we may not eat something of all foods placed on the table. The physical development of a child depends upon his having a variety of the various seasonable vegetables and fruits, and it should be the first and important thing to teach a child to like all kinds of foods.

A child may be handicapped all through life because in his youth he did not become accustomed to eating various foods that needed special care in preparation to make appetizing, or the importance of such foods was not understood. It is worth while to labor with children to teach them to like different vegetables, if for no other reason than it makes them more livable with. We are reaching the stage in our civilization when it is something to be ashamed of to say: "It doesn't run in our family to like cabbage." The fact is the average person who doesn't like cabbage or celery or carrots or any of the other good things, has not been properly brought up, and none of us like to ad-

Summer Squash.—This delicious vegetable must be cooked until tender and as much of the liquor evaporated as possible. Then season well with salt and butter. This is important, use plenty of butter. Go without it on the bread for dinner, (the English people think it strange that we serve butter at dinner with meats and vegetables), but use it as seasoning in vegetables, especially if you are trying to teach some one to like them. The proper seasoning is fully as important as the proper cooking and serving.

Father Got It.

"Dad, do we have to pay war tax so the government can buy our Thrift stamps back from us?" said Dick, who was just eight years old.

"Yes, you have the right idea about it," replied the father. "Well, why can't we turn in the

stamps and just call it square? If we could do that I could buy a soda. I've got a dime," said Dick.

Dick was waiting for an answer, and after much thinking, father reached for his pocket, "Here's another penny."

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus, Instantly it stops hurting, then shortly you lift that bothersome corn or callus a decided conscience. His work came right off, root and all, without one bit of pain or soreness. Truly! No humbug!-Adv.

When Aloft.

"A high churchman, eh?"

New Theory of Ice Transportation. A novel theory of ice transportation has been suggested to the London Geological society by F. Debenham. In South Victoria land deposits of marine mud exist on the surface of floating "land ice" in deep bays of the Ross sea, and are found on land up to a height of 200 feet. The ice sheet at pears to lose from annual melting on the surface while annual freezing causes it to grow from below. It is believed that in severe seasons the ice sheet freezes to the bottom, taking up portions of the sea floor, and this gradually rises to the surface, while

NEW RAIL PLANS ON SOUND BASIS

Congress Determined to Make Certain Future Growth of Transportation Facilities.

PLANS AGREE ON PRINCIPLES.

If you get great pleasure out of Return of Roads to Owners With Assurance of Adequate Revenues.

Washington .- One of the big problems before the new Congress is getting the railroads back on a peace You can't always tell just what is basis. These 200,000 miles of steer highways were taken over by the Govbusiness standards of efficiency.

But, as has been pointed out by President Wilson as well as by many men in public life who have given

Old Laws Obstruct Growth,

The President recently said that it lation without reforming the anti-Farmers what are late threshing, quated laws that were obstructing the

chards. Prices may n t be "right" Congress evidently is tacking the but to permit fruit to rot on the railroad problem with the same spirit. been proposed differ in the nethods be adopted in reaching the desired goal, it has been pointed out by Senator Cummins of Iowa, that all thes that Congress will have little difficulty in framing a bill that win meet with popular approval, and that will take the railroad question out of politics for many years to come,

Many Plans with One Aim.

The Iowa Senator has a commandberlain's Tablets in a multitude of ing position in this Congress because he cases has fully proven the great value s the ranking member of the Interstate Commerce Committee of the United States Senate, and it is in this committee that the new railroad bill will take final form. In an address before a national meeting of business men at St. Louis Senator Cummins stated that since the close of the war, fully thirty complete plans for new railroad legislation had been submitted to him by business men, economists, bankers, railroad officials and owners. Government officials, railroad workers and just plain citizens.

The basic principles upon which all of these plans, with one exception, agree are as follows:

1. Private operation is more efficient and more conomical than Government operation, and the public interest will therefore be served by a return of the roads to

private management. 2. To make certain that new capital will be attracted to the expansion of railroad facilities, there ought to be greater certainty that a fair return will be earn-

ed on the investment. 3. The merging of weak and strong roads into large competing systems should be encouraged.

The making of a formula to prooide a fair return on railroad capital seems likely to be the phase of the problem most thoroughly debated in Congress. The Director General has been urging that the Government ought to guarantee a certain return and share in any excess earnings. Leading bankers, especially some of the international bankers in Wall street, who have in the past marketed many hundreds of millions of railroad securities, also look lavorably on the suggestion of a Government guarantee, which will make it easier to sell new securities, and will also stabilize the market for the old bonds and

Government Guarantee Opposed. But the proposal that the Government shall guarantee the interest and dividends on private capital invested in railroads will undoubtedly meet with very vigorous opposition in many quarters. Even railroad executives, who might be supposed to take kindly to the idea of a Government guarantee against failure, have frankly stated that they do not want it, because they believe it is un-American in principle. would tend to lessen efficiency, and would involve the roads in a Government partnership that would inevitaly lead to Government ownership. ECONOMICAL FEED FOR SHEEP

Alternating Pasturage Advised to Keep Plants Growing and Prevent Stomach Worms.

(Prepared by the United States Department of Agriculture.)

Because of the importance of economical feeding in profitable sheep raising, the United States department of agriculture directs special attention to opportunities for growing forage crops as a feed for lambs and ewes.

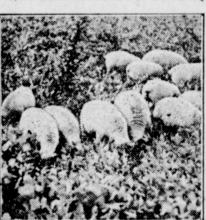

Early spring pasturages of wheat or rye may be used at the start. These provide succulent green feed appetizing to the ewes and lambs. Overpasturing, however, must be avoided when these crops are later to be used for grain. Where it is possible to keep the rye or wheat pasture about 11/2 to two inches high, the lambs and ewes seem to relish it more and will consume larger amounts. Oats and Canadian field peas may be sown together early in the spring at the rate of 11/2 bushels of field peas and 11/2 bushels of oats centuries it led a precarious political to the acre. This crop should then be ready when it is time to take the flock off the rye or wheat.

Rape, another good forage crop, may be sown at the rate of six to eight pounds an acre, and will provide later pasturage, following the oats and Canadian field peas. In sections where soy beans and cowpeas grow satisfactorily they furnish an excellent midsummer pasture. If sowed later they make a good forage crop in late summer and early fall. When sown in corn they serve as an excellent supplement to the corn for fattening lambs.

If pastured by alternating the grazing in different parts and not allowing any particular section to be too closely eaten, a field of soy beans may be used for a considerable time. When most of the leaves have been eaten it is time to move to a fresh portion of the field so that the plants on the grazed part will have a chance to leaf again. In some sections it may be desirable to cut this growth and use it for hav, especially when other leguminous hays are not available.

It is good practice to sow rape at can then be turned in the corn field in the fall and will feed upon the lower

Lambs not only make a rapid and cheap gain on forages of this kind, but a forage-crop system prevents, to a large extent, injury from stomach worms. It has been demonstrated that by changing lambs every two weeks to ground not previously grazed that season, stomach worms can be effectively

Sheep on Pasture.

controlled. Since this condition exists, it is better to have the pastures of a convenient size, so that the lamber and ewes will consume all the forage in a period of about two weeks and again be turned on a new pasture. This does not allow the use of a second growth. The ground can then be plowed and a second crop seeded to afford later forage crops.

Where lambs are to go to market an effort should be made to get them off early. Lambs make the best and cheapest gains during the first four months of their lives. A grain feed fed in a lamb creep arranged in the field will prove helpful in pushing the lambs along and keeping them in good condition. This feed should consist of corn, oats and bran. Lambs should be fed all but no more than they will clean up each day. Never put clean feed into the trough where old feed remains.

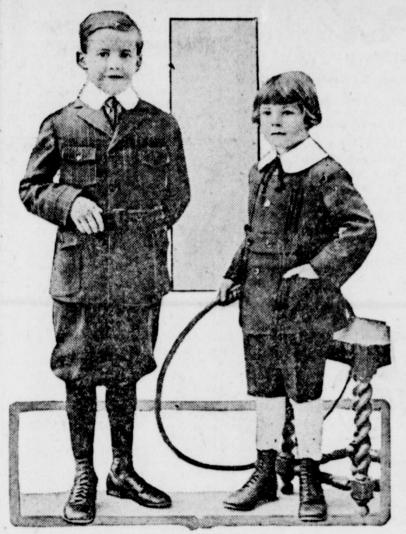

Lambs weighing 60 to 75 pounds make the most desirable market offering. The reason is that lambs of this size dress out a desirable market carcass, which can be more readily handled by the butcher, in meeting the demands of his trade. Heavier lambs do not sell so readily, and when supplies are large there may be a small price discrimination in favor of lambs under 80 pounds.

Growers will find that by following system of forage crops for rotation of pasturage to prevent stomach worms, and supplying grain feed in a lamb creep to keep the lambs gaining steadily, larger profits can be realized.

Good Shelter for Pigs.

Pigs need a place of shelter to appropriate when the weather is bad, and shade when the sun is too hot for their endurance.

PAYS TO MAKE USE OF PAINT

Apart From Adding to Appearance of Structure It Also Tends to Retard Deterioration.

The foundation reason for painting is protection of the thing painted. The owner of property should never forget that. No one can look upon painting as an expense if he is convinced that it prevents a greater ex-

There is, however, another great reason for painting and that is the appeal of pride in appearance. This is quite human. It is seen in the matter of clothes. Primarily clothes are to keep us warm, but a suit is discarded while it is still warm because it is shiny, out of shape, or slightly faded. In other words, one feels that it would compromise their standing were they to

So it is with the painting of houses, both without and within.

In progressive, proud communities, houses are painted every three or four years through pride in appearance. Progressive citizens are not satisfied with the looks of their houses after three or four years' exposure to weather.

As good citizens we should not only see that every person knows that structures will deteriorate if unpainted, but we should also try to make people as proud of the appearance of their hômes as their more progressive neighbors. We should deliberately set out to make them ashamed of their dingy homes which are a reflection upon the whole community.

This work is peculiarly one for local example and community co-operation. Everyone knows that a newly-painted house is likely to start the whole neighborhood to slicking up. It becomes contagious.

Every person who wants to see his community prosper will join in such a movement.

HOME CITIES ALSO NEEDED

Well to Remember That There Are Other Things in Life Besides "Business."

If a writer on present-day industrial economics is right, the next few decades will be marked, in the United States, by an amazing amount of selfstudy by individual cities, towns, and even villages. He foresees "intensive study undertaken by every municipality to determine what can be manufactured in that place." Within limits he is probably right, but there will be many who will honestly hope that the limits will not be too widely extended. and who will believe in all seriousness that an occasional municipality without manufactures has its place in the scheme of things for a well-balanced nation. "Business first" may be a good slogan, but "business all the time" and "business everywhere" might weaken enthusiasm for desirable industry by overemphasizing it. One is reminded that since somebody gave current meaning to the term "business efficiency" about 2,000 books on the subject have been written and printed in English!-Christian Science Monitor.

Boosters and Roosters.

The difference between the effective booster and the rooster is that the latter has no responsibility and the former must make good. There was a time when the boosters from a town would go on a visit asserting that they lived in the biggest city, had the tallest buildings, the largest stores, the wealthiest people, and so on, using words without stint simply because they wished to say something favorable about home. They would be placed in the rooster class now unless they could show by facts and figures that their assertions were true.

Landscape Gardening.

The great mistake made by most novices is that they study gardens too much and nature too little. Now gardens in general are stiff and graceless, except just so far as nature, ever free and flowing, reasserts her rights, in spite of man's want of taste, or helps him when he has endeavored to work in her own spirit. But the fields and woods are full of instruction, and in such features of our richest and most smiling and diversified country must the best hints for the embellish ment of rural homes always be derived .- Andrew Jackson Downing.

Pointed Advice.

"Oh, doctor," cried a wild-eyed man. of my departed relatives come and all around my yard when dusk is fallany evening and see a couple of dozen

"Sharpen the tops of the posts," briskly replied the physician. Five dollars, please."-Judge.

Followed delightful days of love and All over a trivial matter, too-as are

most lovers' quarrels. Hereford, astonished and heartbroken, tried to exfused to listen. Hereford stumbled home in the moonlight with his brief dream of love destroyed.

Madeline nursed her pride and would not send for him. Then Mr. Langdon sent his son on a trip to another island to be gone a week.

Hereford held to the hope that Madeline would be in a lenient mood by the time of his return.

She, not hearing from him, became church. Apply to Mrs. J. E. Kinney angrier than ever and would not listen to the promptings of her naturally generous heart.

Several days after Hereford's departure, which was unknown to Madeline, Tom Drisko received a telegram calling him to San Francisco on urgent business. They left at once.

There was no time for Madeline to see Hereford, even if she had been so Hereford explain. The remembrance of his grieved look and his sad eyes hurt her conscience and kept her from sleeping.

"I will find a cable from him when we land," she said to berself. This • is making land loans now at 8 • thought was a source of great conso-• per cent instead of nine which • lation, and she began to be almost a happy.

cisco and found no word from Hereford, she was angry with herself for • • • • • • • • • • • • • • • • • having capitulated even if Hereford didn't know it.

Hereford had lived on the hope that his sweetheart would relent and let him explain when he returned, which he knew he could do if she would only

had planned to travel in Mexico. Then came the entrance of United States into the war.

Hereford strongly patriotic always, had an additional reason for enlisting -his country first, and thereby means of forgetting his lost love it work, the more dangerous the better.

Madeline had been on a feverish ound of sightseeing and pleasure in a vain endeavor to forget. To lose remembrance was impossible, and she begged her mother to return home. On the way east Mrs. Drisko asked her children to stop off at Gettysburg with

"My dears," said she the day after they arrived at the hotel, this is the anniversary of the battle of Gettysburg, when your grandfather was wounded. We will take a taxi and go to the very spot on Little Round

Mrs. Drisko was overcome with emotion when she viewed the beautiful landscape, the peaceful wheatfield. the peach orchard and many other spots made famous at this great battle. With tears streaming down her cheeks she looked at her strong young son standing so straight beside her and knew that he, too, was willing to

shed his blood for his country. Not that she would have him do therwise-for her heart beat high vith pride on that day when he told her he had enlisted-but for the sorrows of the world and for the tears and blood that must be shed before the most infamous tyrant since the world began could be laid low in the dust, never to rise again.

Came the sound of 'marching feet They looked around. Mrs. Disko, with tear-dimmed eyes, saw only a company of soldiers out on a hike but Madeline saw more than that. Her heart stood still as she thought she caught a sight of a familiar figure in charge of the men. She had never seen Hereford in uniform-still the lieutenant looked very much like him. The soldiers were soon out of sight and Madeline, with a sigh, decided her heart had deceived her, and that her lover was still in Hawaii and she was

"Those men belong to corps," said Tom Drisko. "I have been reading about them. They are mostly picked men. There are several Olympic champions among them, and one of the greatest electricians in the world has given up an income of \$100,000 : year to become a private in the tank They are a splendid lot of men. I am going to try for it myself."

The Driskos were to leave early the next day. That same evening Madeline started from the hotel to get a magazine from the little newsstand across the circle. It was Saturday night, and the streets were crowded with men in uniforms. In the tearooms and drug stores one could see them in scores eating ice cream and drinking soda water.

"Isn't it a funny thing that a solfier is always hungry?" remarked a young officer to another as they were strolling around the circle.

Madeline looked up. The voice-she ad heard it before and it startled her ut of her usual poise.

Recognition was instantaneous and all the pride and resentment were forgotten as though they had never ex-

"Madeline!" exclaimed Hereford, his handsome face aglow with sudden

"Hereford!" gasped Madeline, meekly. "Oh, Hereford!"

"Come with me dear," he said, and forgetting his companion he took Madeline's arm and guided her down a quiet street. They sat on the steps of a church and poured out their young hearts in love and contrition. for they had nothing to quarrel about in the first place.

Saying good night in the hotel paror. Hereford asked:

"My dearest, you know we expect to leave very soon for the other side. Is there anything you would like me to send you?"

"Nothing-except always your love." said Madeline happily.

Curious Cities of the World.

Some curious cities of the world are told about in Leslie's Weekly. Among them is the remarkable town of Curva. Bolivia, built entirely on a curved mountain top. One of the most peculiarly located towns in the world is this one, most aptly named Curva. It is situated high in the Bolivian Andes and is entirely confined to the top of a hill.

In Patagonia, at the southern extremity of South America, lumber of any kind is extremely scarce. So the town of Puerto Madyrn, 838 miles from Buenos Aires, is constructed entirely of tin and zinc. These are brought down from the capital and are much cheaper building materials than lumber. The houses, roofs and walls are built of metal; the fences also are constructed of it, with a wooden frame.

The curious town of Newcastle, Jamaica, is located on the side of a hill in such a way that none of the houses are on the same level. Even the graveyard, every tombstone is higher or lower than its neighbors.

Good Imitator.

A little Hebrew from Harlem was listening with open mouth to a Scotchman from Glasgow, who was livening things up a bit in the Salvation Army hut just back of the lines.

One of his "buddles" asked him the reason for the expression of awe on his countenance. "What's the matter, Abey, didn't you get the joke?" he

"I don't know nothin' about no joke," was the answer, "but Gawd, how that guy can imitate Harry Lauder."-Everybody's Magazine.

Had a Good Excuse for Doing **Very Little Remodeling**

Provided by nature, the wall of a rocky cliff offered limited possibilities for those pre-historic people to improve into an artistic home. But those limitations don't apply to your home.
