MIAMI, Roberts County, TEXAS, Thursday, September 16, 1920.

No. 7

SCHOOL OPENING MONDAY

Students enroll first day and Teachers Begin Work.

Miami Public School was reopened Monday with a very large attendance, and the largest number of visiting patrons our school ever had. Order was called by Judge J. K. McKenzie, and the Holy, Holy, song which was led by prayer, led by Rev. E. G. Burton. Rev. B. F. Jackson, president of the School Board made a talk which was followed by Clarence Huber with piano at the piano. Rev. R. A. Gilley and Mr. J. R. Durrett gave splendid ideas on education and get it, then the entire school joined in singing the Battle Hymn of the Republic. Atty. W. Moore gave a short talk on education especially addressed to the boys and girls, which was followed by announcements from Supt. Gilley, and Rev. Bone offered a prayer.

Started off what promises to be a fine year in making Miami one of the prominent schools of this section of the state. We say it will be this year than ever before, because our public school has grown year, and our people are striving to make it better each year. We have always had a splendid school, but it is better this year than previous year, and we will try to make the next still better than this.

C. A. Gilley will make as a subject this year Latin besides duties attached to his position. Mr. H. H. Crain will have the class and also charge of the 4th grade, in which there was enrolled the first day 46 students.

M. Moore, B. S. from the Texas State University, and will teach Vocational Agriculture with 14 students for the first year. Vocational Agriculture has been taught in the school since the first day of the equipment has already been arranged and a room is being arranged for this work being experimental work which will be done outside the school in actual demonstration work. Additional units of affiliation with the State University. Credit for this work in our schools can be given to the ladies Clubs of our town.

Virgie Dyer, B. A., from the University of Texas, will teach History in the 4th grade and have charge of 31 students.

Ruth Hall, B. A., M. Mus., from the Southwestern University, will teach the 6th grade and part of tenth and students enrolled in the 10th grade in the 9th grade.

Elizabeth Turnbough of Bowie, Tex., also a graduate from the C. I. A., is teaching the 6th grade and has 29 pupils.

Myrtle Turnbough, also of Bowie, Tex., has charge of the 5th grade and has 26 in attendance.

Ruby Robertson of Era, Tex., is teaching the 4th grade and has enrollment of 32.

Nina Severson, B. E. from the University of Kansas, is teaching the 3rd grade and has 34 students.

Rosa Lee Moore of Amarillo, Tex., is teaching the 2nd grade work, started in with 34 students in room.

C. A. Gilley is teaching the 1st grade and starting this year with 40 children.

Aurelia Baker, teacher of the 1st grade, also has a large number of pupils.

Helen Worly, B. S., of C. I. A., is in charge of the Home Economic department.

KNIGHTS TEMPLAR MEET

Fort Worth, Texas, Sept. 10.—Arrangements for the Knights Templar conclave, which will be held under the auspices of Worth Commandery No. 19, K. T., Sept. 23-25 in Fort Worth at Moslah Temple's Mosque on Lake Worth are fast taking shape and the entertainment features of the conclave have been decided upon.

Thursday, Sept. 23, will feature the registration of the visitors and assignment to quarters from 8 o'clock until noon, when autos will leave Second and Main streets for the mosque for the opening of the Commandery. The Order of Red Cross and Malta will be conferred during the afternoon starting at 2 o'clock. Lunch will be served from 5:30 to 7 p. m., when the preparation for the Order of the Temple will be held. The Order of the Temple will be conferred from 8 until 11 p. m. Visiting ladies will register at Second and Main street with the rest of the visitors and Sir Knights and will be guests of Worth Commandery No. 19 at the Majestic theatre in the afternoon.

Friday, Sept. 24, will feature the Knight Templar parade during the morning from 10 a. m. until noon and autos will again leave Second and Main streets at 2 p. m. for the mosque, where a boat ride on Lake Worth will be provided from 2 to 7 p. m. for all Sir Knights and their ladies. From 7:30 to 12 the Order of the Temple will be conferred.

Saturday, Sept. 25, Moslah Temple's mosque will be open for the Sir Knights and their ladies to spend the day there. The Grand Ball will be held at the Mosque starting at 8:30 p. m., and will be under the auspices of Worth Commandery Drill team.

From present indications there will be one of the largest crowds ever attending such a conclave and it is expected that there will be over 1000 Knights Templar in the big parade the morning of Sept. 24.

Hotel accommodations are in charge of Sir Knight H. W. Austin, 215 1-2 Main street, Fort Worth, and visitors contemplating attending the conclave are urged to write Sir Knight Austin at once that accommodations may be provided upon their arrival in Fort Worth.

It is now expected that a great number of the Grand officers of the Grand Commandery of Texas will be in attendance during the larger part of the conclave and that over twenty or thirty Commanderies under the jurisdiction of the Grand Commandery of Texas will bring their drill teams, workers and candidates to participate in the conclave.

Reduced railroad fares have been granted for the conclave, selling date Sept. 22 to 25, good to return Sept. 26th.

Miss Elizabeth Turnbough of Bowie, Tex., is starting in with approximately 29 students.

Many new faces are noted among the students this year, and it is estimated that the total enrollment will reach 400 in the next few weeks, there being several students who are not able to get started at the first of school. We also note several boarding students from other places who are coming this year to take advantage of our unequalled school advantages.

The school now needs more room which is really needed this year. A few more desks is also needed for immediate use, and our new heating plant is being installed as fast as workmen are able to do the work. This however will be completed in ample time for use before cold weather.

REV. W. A. ERWIN, Evangelist

REVIVAL MEETING

At the Presbyterian Church Friday evening 7:30 p. m. Rev. W. A. Erwin and his team of workers will begin a revival.

We extend a special invitation to the pastors, their people, and all un- saved to come and assist in these services.

Rev. Erwin needs no introduction to the Miami people. Come one and all and help to make this a wonderful meeting.

J. H. Bone, Pastor.

ABO PASS MEETING MONDAY AT ENID OKLAHOMA

A Meeting of the Abo Pass Highway will be held next Monday at Enid, Okla., to which delegates from three states will attend to work out plans and advertising of the Highway, connecting Kansas City, Wichita, Amarillo, New Mexico, etc. This is a very important Highway to Roberts County.

J. A. Meade has been designated by the Commissioners' court as a representative of that body, and J. R. Durrett and J. A. Covey were elected by the Commercial League, and these gentlemen will leave Spaday afternoon for Enid, returning Tuesday.

DISTRICT COURT HAS BUSY SESSION

The Honorable District Court of Roberts County has had possibly the heaviest docket this term it has had in a long time. The case on trial last week when we printed was that of the State vs C. E. Session, charged with theft of a cow, and the jury returned a verdict of not guilty. The next case coming up was that of the Gray County State Bank vs Byron Williams, which was tried before Judge Ewing without a jury, and it is expected that Judge Ewing will return his verdict today.

Monday the case of J. W. Philpott vs Samuel Edge went to trial and lasted until last night, the jury returning a verdict in favor of Mr. Edge. A case on trial today is the heirs of Fred Webster vs The Security Benefit Association for payment on policy, is being tried before J. W. Sanders of Canadian, selected as a special Judge, Judge Ewing being disqualified.

Tomorrow, the I. N. Auten divorce case is to be tried, and it is likely that it will be the last case for trial at this term of court, there being others however, but not time to get them before the court.

Selling last shipment at better than wholesale prices. Gage Hats, Childrens and Ladies at \$4.95 and \$5.95. The Style Shop. Over Pastime Theatre.

AMARILLO DISTRICT MEETING OF W. M. S.

The meeting of the Amarillo District Conference of the Womans Missionary Society is being held here yesterday and today. The attendance in the afternoon was not a full representation of the district, but several more delegates come in today.

The afternoon program was well attended by local people. The meeting was called to order by the District Secretary, Mrs. E. E. Adams of Amarillo. After the song, "We are Marching to Zion" and prayer led by Mrs. Burton of Clarendon, Mrs. J. R. Durrett of Miami was elected Secretary for the meeting. Mrs. J. W. Burks of the Polk Street Methodist Church of Amarillo was leader for the afternoon and chose for her Devotional lesson the third chapter of John, and gave a splendid talk on "District Obligations and How We are meeting them."

The leaders opening of the subject was discussed and followed by Mrs. J. G. Thomas of White Deer with an interesting talk along the development of Spiritual lines. The discussion of this subject brought out the fact that we as Auxiliaries are not as spiritual as we should be. Mrs. Babie Betts Burton, Corresponding Secretary of the Womans North West Texas Conference discussed the subject from a financial standpoint, and made the statement that all the Conference in the State, this Conference is ahead financially. This is very gratifying to each district represented in this Conference. Mrs. E. E. Adams of Amarillo urged the development of the social side of the Auxiliaries throughout the district and the reports showed that Miami has been taking the lead in a social way. A talk given by Mrs. B. F. Jackson of Miami showed the educational advantages to be derived from work and study in the Missionary Society. Authorities claim that twelve years in a good club or the Missionary Society is equal to a four years college course.

The night program last night began promptly at 7:30 with Mrs. E. E. Adams, District Secretary presiding. The attendance to the night session was good, and several new delegates arrived who were not present at the afternoon program. After a song in which all present took part the local Pastor, Rev. R. A. Stewart conducted the devotional

MICKIE SAYS

AWRIGHT! GIT PEEVED IF YA WANTA, BUT WE AINT GOINTA WILL NO PERFECTLY GOOD NEWS ITEM T' ACCOMMODATE YOU, NER NOBODY ELSE! MICKOSH, MAN! WE'RE RUNNIN' A NEWSPAPER AN' IT'S OUR BIZNESS T' PRINT TH' NEWS 'N YA OUGHTA KNOW BETTER 'N TO ASK US T' SUPPRESS A GOOD ITEM!

Come and see us about your GROCERIES

We have appreciated the big harvest trade in groceries this store has been receiving, and are still dispensing the best groceries on earth at the lowest margin of profit of anything on the market. We want your threshing bill for groceries, your harvest bill, your ranch bill, and your family grocery order. Fact of the matter is, we are in the grocery business and are equipped and prepared to serve you with anything you want to eat. We acknowledge that we don't handle the lower grades of canned goods because we don't believe in eating that junk. We do handle QUALITY groceries and are willing to live and let live on our profits. Give us a trial.

IN BUSINESS FOR YOUR GOOD AND MINE

exercises of the evening.

Mrs. B. F. Jackson of Miami, came first on the program with the welcome address, and in her usual attractive and impressive manner expressed the appreciation and welcome of the local Auxiliary to the visitors present. Mrs. Adams in a few well chosen words responded to the welcome.

One of the most appreciative parts of the program was a solo, "Jesus Lover of My Soul," sung by Miss Virgie Dyer, one of Miami's most accomplished young ladies. The song was rendered in a sweet and gracious way, and was appreciated by all present.

The last on the program was Mrs. Burton of Clarendon on "Our Common Task." This subject was giving us a message from all the home and foreign fields. The message was thoroughly discussed by Mrs. Burton.

one of value and interest, the speaker trying throughout the hour to impress the church and the Christians of our land with their "Common Task," of giving our Christ to the forger within our gates, so that they may not become a menace to us. Urging the Church to be about the Masters business in the foreign fields. The harvest is white, both home and abroad, but the workers are few.

Gage Hats of Velvet in the latest shapes and colors, best buy in town. Closing last shipment at \$4.95 and \$5.95. Must be seen to be appreciated. The Style Shop. Over Pastime Theatre.

Mens very finest silk Crepe De Chine shirts at only \$10. each, for the next ten days. Locke Bros.

CO-OPERATION

We realize that our own growth is primarily dependent upon the success of our customers. Discuss with us your business requirements and give us the opportunity to assist. Introduce your friends to us. We will appreciate their business, and co-operate with them.

SAFETY

Liability of stock holders is double the amount of their holdings together with Four or more Annual Examinations under State Supervision, and the protection of the "Guaranty Fund Bank" affords unparalleled safety.

IRWIN MYERS

ISOBEL!

Synopsis.—Dr. John Michelson, just beginning his career, becomes resident physician and companion of Homer Sidney at Hartley house. Mr. Sidney is an American, a semi-invalid, old and rich and very desirous to live. Mrs. Sidney is a Spanish woman, dignified and reticent. Jed, the butler, acts like a privileged member of the family. Hartley house is a fine old isolated country place, with a murder story, a "haunted pool," and many watch-dogs, and an atmosphere of mystery. The "haunted pool" is where Richard Dobson, son of a former owner of Hartley house, had killed his brother, Arthur Dobson. Jed begins operations by locking the doctor in his room the very first night.

CHAPTER II.

That evening I had dinner with Mrs. Sidney and her daughter Isobel. I had been in the house twenty-four hours and did not know there was a daughter until dinner brought the three of us together.

Mrs. Sidney was Spanish. She was a lovely woman, gracious and charming, but I thought there was a great deal of steel hidden in her disposition. She did not seem to ask that life be soft or to expect to find it so. She had a Roman dignity of self respect which did not, I could be sure, permit moaning. It would not have taxed any one's perceptions to recognize in Mrs. Sidney a human being living an extraordinary life. The fact was so apparent that it seemed a part of her personality.

It must be remembered that I had come to Hartley house prepared for abnormalities. There was first, the man with the wonderful will to live which had interested Dr. Brownell. There was the alien beauty of the house, the strange servant Jed, the haunted pool—insignificant as it was, to a rational being—the lovely woman who was so apparently a tragic figure. There was the fact of my being locked in my room the first night. There were the forbidding defences of the place—walls, dogs and keepers. I may be excused for taking a fanciful view of my new surroundings.

Then there was Miss Sidney—Isobel. She came into the dining room an unexpected if not astonishing phenomenon to me, who did not know that there was a daughter in the family.

Mrs. Sidney presented me. "How do you do?" said Miss Sidney, and she seemed to find it tiresome that a stranger had taken a place at the table.

Jed served us, and the dinner was excellent. Although the ladies had only a glass of sherry each, I was offered a variety of liquors. My habit is abstemious except upon rare occasions, but I was so embarrassed by Miss Sidney's boredom that I took two glasses of champagne, and they made

me a more tolerable dinner companion. It was some champagne stimulated remark on feminism which caused Miss Sidney to stare at me as if I were an animal which, being smooth skinned, suddenly had grown a coat of fur.

She stared for an instant and then laughed. She was quite frank. She had been bored; she had become interested. I could see that she distressed her mother. Mrs. Sidney, any one could know, held to conventions as the salvation of life; Miss Sidney did not.

Isobel Sidney was a very attractive girl. I guessed her age to be twenty-three. I also guessed that candor and honesty were outstanding points in her disposition. Her youth and her beauty were magnetic, and I must confess that my romanticism was touched instantly. I had seen just enough of Mr. Sidney to understand how this girl could be the daughter of Mrs. Sidney.

By the time dinner was over we had found a pleasant agreement in ideas and taste. I was in an ecstasy, full of

the sensation which comes to a diffident man, unaccustomed to women, when he dares to think for the first time that he has been interesting to a young and beautiful girl. It is one of the Elysian emotions. We grow old and bald, and women are adventures dismissed from our lives. We know we do not interest them. We do not think of interesting them. We become pantalooned lay-figures too scared of scandal or too confirmed in propriety to break out of the narrowed way. There is an age which comes to a man, a condition in which he finds himself, to which he submits if he have any morals, and when it comes and when he submits, the gates are closed upon fanciful, romantic adventures. If he has been fortunate, he is content. He sits at the west window, and his prospect is the sunset. He no longer asks the great question of youth: "Could I make that girl like me?"

To me, after that first dinner with Mrs. Sidney and her daughter, the ecstasy was a romantic folly. Isobel had captured me, my sense, my rationality, my judgment, my mind, fancy and emotions. Beauty and youth alone are enough to do this for an imaginative young man, and when attractive aspects of character are back of beauty and youth, and when the young man looks forward to a probability of that conquering circumstance, propinquity, he may be excused if his feet lightly touch the floor. I was captured and knew it after that first dinner—knew it, and both loved and dreaded it. I was about to make a fool of myself and be at once a happy and a miserable fool.

In the exalted state of egotistic emotions which I have outlined, I went to Mr. Sidney's room after dinner and sat with him for two hours. I began to appreciate how charmingly his life was decorated. A really rare subtlety of art was used to bring a warm color into this indomitable but feeble man's winter of life. I did not fully appreciate until later what thought and care lay behind the unstudied comforts and sensations Hartley house offered.

Mr. Sidney was white haired and very gracious. His manner was a warm cordiality. It was not precise. It was robust, but it was benignant. Later I saw how his presence pervaded the place.

We had a cheerful talk. What he said suggested to me that my world could not have been more than a hundred years old at the most, and that his included the period of inorganic evolution in which the period of organic evolution is but a pin prick. Youth is startled by such conceptions of life, but I had an interesting evening.

Before I said good night, Jed came in with two bottles of wine. He stood and looked at me unpleasantly. I arose to go, and Mr. Sidney said:

"I think we shall like each other. At least, I hope you will be comfortable, even happy. And don't be distressed about the wine. I don't drink it any more. Jed drinks it, and I enjoy seeing him do it."

A whippoorwill was reiterant in the woods at night, and its call came from dark recesses odorless and mysteriously veiled. Having said good night to Mr. Sidney, I had gone to my room with a book from the library. The night was fresh, sweet-smelling and cool. I had read for several hours when I heard the cut bolt in my door thrown against the piece of metal which had been left in the socket.

There was no transom above the door, and evidently the threshold kept light from appearing beneath it. I had been reading, as I said, for three hours at least, and whoever tried to bolt me in had good reason to think I was asleep.

I knew who the person was. It was Jed. Knowing I was not locked in, I was undisturbed and continued reading. Shortly afterward I heard a woman's voice in expostulation far down the hall. It arose abruptly to a sharp cry, and I had to lay aside my book and expose the fact that my door was not locked, a thing I had not wanted to do until the secret of its being locked could be discovered by revealing that it was not.

I hurried out and down the hall. Jed had a woman by the wrist. Both of them saw me coming. She released herself from his relaxing grip by a quick jerk and ran. He stood until I came up.

"What is the matter?" I asked. "What makes you think anything is the matter?" he asked. "Don't take me for a fool," I said. "That was Mrs. Sidney who screamed. You were holding her. It seems to me it needs an explanation."

"Who are you that you need an explanation?" said Jed. "You are drunk again."

"I know I am. If that's satisfactory to my employer, why should it bother you?" "I doubt that it is satisfactory to your employer that you should be making his wife scream at midnight. Look here: you're a servant in this house. What have you to say for yourself? I'm going to have an explanation of this." Jed had been surly and angry, but now he grinned.

"All right," he said, "but if you want to be decent about it, ask Mrs. Sidney first whether she wants your help and your asking. That's my advice, young fellow. And while we're asking, how did you get out of your room? You're not supposed to be out. We don't want people in this house running around the halls at this time of night."

"I opened the door and came out. Why shouldn't I come out. I heard a scream and came."

He looked at me as if he were doubting himself. I think he was uncertain whether he had thrown the bolt or not. It transpired later that I was right, but for the time I was worried.

When I went back to my room, I was restless, as one naturally would be, a stranger in so strange a house. It was impossible to sleep and difficult to read. I sat by the window and alternately dozed and read until day broke and the woodthrush began to sing. Then, quieted, I went to bed and had two hours' sleep.

I thought it wise to speak to Mrs. Sidney about the incident of the night. She had seen me, she knew I had talked to Jed, she might or might not know that I recognized her. I might add to her perplexities by speaking to her, but I might obtain an insight into matters which would enable me to act discreetly and usefully. If I remained ignorant of motives prevailing in the house, I might at any time blunder into a serious mistake. It seemed best to speak to Mrs. Sidney.

I could see when I spoke to her, she had been greatly disturbed, but she was Roman.

"It was nothing serious or important, doctor," she said. "I'll not say that it was pleasant or that I liked it, but it had no significance. Jed is a faithful and invaluable servant. He has a vice for which he is not responsible. He was a perfectly sober man when he came to us, and if he isn't now, it is our own fault. My husband corrupted him without intending to do so. My husband, when he was well and strong, loved to drink wine. He drank it in great quantities and without any disturbance of his sobriety or good nature. It mellowed and at the time intensified life for him. He cannot use it now, on account of his health, but he enjoys seeing the use of it, and Jed has been made the victim of Mr. Sidney's vicarious enjoyment. Jed is not always considerate of his position when he is not sober, but he never is dangerous, not even when, like last night, he is exceedingly annoying."

I admired the lady's resolution and fortitude, but I did not think she was telling the truth—not all of it. "That was the first time anything of the kind ever occurred," she said. "I am sorry it disturbed you. I met Jed in the hall. He was not sober, and he had a preposterous request to make. When he has spent such an evening with Mr. Sidney, he resents being a servant in the family. He wants to be accepted as a member of the family."

"I have had something to do with that," I suggested.

"No doubt it has inflamed his egotism to have you enter the family. The situation with him is difficult. His pride was hurting him last night. He had lost all sense of proportion. He was like a child. He remonstrated with me; he was too important as Mr. Sidney's crotch to be merely our servant! It was only a drunken mood, but he forgot himself and grasped me by the wrist. I had been trying to control him and restore his common sense. Then I became indignant, and you heard my voice. I am afraid it was shrill, but I was not alarmed. I was merely indignant."

"You speak of Jed, Mrs. Sidney," I said, "as if he were merely an annoying alcoholic, tolerated when he is annoying, because of his general usefulness but that does not explain why he tries to lock me in my room while he is sober and before these disturbances begin. That shows design and intent to have a free hand when he makes the disturbance. I do not like being locked in my room."

"It is outrageous," said the lady nervously. "I did not know that it was done. I shall see that it is not repeated."

"I am not so sure you can," I said, "and I wish you would not try. I have protected myself against it, and I'd rather Jed did not give me any more thought than he thinks is necessary now."

"I am sure, doctor," said Mrs. Sidney, "that you will understand Jed and the situation better when you have been here longer. It may be annoying to you now, but we all here live for the pleasure and comfort of Mr. Sidney, who is worthy of all we can do for him. He did everything he could for us while he was active, and if thoughts would benefit us, he would be working for us now."

Mrs. Sidney was determined to protect the secret of the situation, and I had no right to cross examine her. The next time I went to town I bought myself a forty-five caliber pistol.

Although I was prepared for recurrent disturbances, there were none. Within a week I had found my way into a pleasant routine. Jed seemed to be conscious that he had over-

stepped his bounds. He was not apparently contrite, but he was cautious. A week was without incident. Then Miss Sidney went away to make a visit. Her absence was a spiritual disaster. Ecstatic and morose youth! The beauty of Hartley house became a hollow and dark melancholy, making sad sounds. Vibrant life had gone from it. Its perfume was lost.

I cannot now tell quite what it was that made Hartley house, a place so comfortable and genial, at the same time a place so threatened. The threat could not be ignored; it was there. The story of the ghost at the haunted pool could have nothing to do with it. The threat had tangible aspects. Mrs. Sidney's worry, unspoken but graven in her resolutely Roman face, was one evidence. The extraordinary behavior of Jed was another. The atmosphere of the place was one of mystery.

During the pleasant, peaceful, odorous summer months, when our life was one of undisturbed routine, I never escaped the sense of dread. I hoped the intangible would take shape; surely something intangible that would be embodied, hung over the house.

I may not be able to make this certainty appear so vividly to you as it did to me. It permeated; it was in the atmosphere; it hung over the woods; it filled the house. It came with the odors of blossoms; it was expressed in the summer winds; it was threatened

She Had Been Greatly Disturbed, but She Was Roman.

In the lightning which flashed over the river, I could not reconcile this effect to such a cause as that feeble ghost story of the pool. I could not dread that ghost or feel its presence. It was a benevolent ghost needed for decoration.

I asked the people of the house, the servants, and found that for them it was largely a superstition. They all had been brought from the city, and only a few, such as Jed, a gardener, the housekeeper and the cook had been long enough in the house really to be associated with it.

Jed was the only one that willingly would be in the vicinity of the pool at night. The others might laugh at the suggestion of terror, but they would not willingly test their superiority to superstition. If they had been really frightened, they could not have been kept in service. They were not. The place was large, comfortably inhabited and genial. There was a touch of dread at one spot. They avoided the spot, and it was negligible so long as they did avoid it.

In the small town of Hartley there was more of the legend than there was at Hartley house. To the people who lived at a distance and came in contact with the place only on occasions, it had an alien, exotic air. Mr. and Mrs. Sidney had come from South America, from Montevideo, where they had lived many years. The circumstances of their selection and purchase of the place were normal, but the villagers spiced a great deal of gossip with notions of the atonism, wealth, aloofness and odd habits, concerning which gossip ran from our servants to the Hartley householders.

I have mentioned that my first morning at Hartley house a gardener asked me to see one of his children, which had a bad cough. The man had a good deal of sickness in his family in the next few months, and I was of considerable service.

"I shall not hesitate to kill you."

(TO BE CONTINUED)

Varnish to Imitate Ground Glass.
To make a varnish to imitate ground glass dissolve 90 grains of sandarac and 20 grains of mastic in two ounces washed methylated ether, and add, in small quantities, sufficient benzine to make it dry with a suitable grain, too little making the varnish too transparent and an excess making it crapy. The quantity of benzine required depends upon the quality, from one-half to one and one-half ounces, or even more. The best results are obtained from a medium quality. It is important to use pure washed ether, free from spirit.

Safeguarding the Goat.
In Switzerland the goat is placed ahead of all other animals. If a boy plagues a goat he can be fined and sent to prison. If a person meets a goat on a path and drives him aside he can be arrested. If a goat enters the yard of a person not his owner, and is hit, the person guilty must pay a fine.

GOOD ROADS

GOOD ROADS ARE NECESSARY

Problems Involved in Railway Operation Again Bring Improved Highways to Front.

While it is admitted that the railways must necessarily form the nation's long-distance transportation lines, the auxiliary power of the public road, through the development of the gasoline engine and the motor vehicle, is receiving thoughtful attention in official circles.

Public discussion of high-cost problems and the railway situation ran into the country road at two points recently. The first point touched was that the public highway is a potential short-haul freight and express line, and that with a national system of improved roads intersecting each state north, south, east and west there will thus be constructed the basis of a comprehensive nation-wide system of traffic arteries with which state and county systems may connect. With such a system provided the development of freight and express transportation is anticipated far beyond comprehension, says Chicago Tribune. Its advocates assert that the motortruck as it appears on the public highways today is but an infant to what it will be once the public roads are built to permit its enlarged use.

Those who doubt the possibilities of the highway freight and express as factors in the reduction and stabilizing of food costs are told to look back over the development of the railway and note that the beginning was upon

Motortruck Is Big Factor in Reducing and Stabilizing Costs.

a basis far less promising as a practical proposition than the basis upon which the gasoline driven vehicle stands today.

Dropping back to the point of short-haul delivery, attention is being called to the fact that the radius of highway shipping is being gradually extended as modern roads are being built. Advocates of a national highway system, the creation of which is provided for in the Townsend bill now pending in congress, have encountered the argument that approximately 50 miles is the maximum of motor delivery. Their answer is that while this may be true, it is true only at the present time because of the illogical connections and the general condition of the roads.

The same economic conditions which forced railway development are forcing a national development of the public highway, and the advocates of a national highway system assert that each day's discussion of the present economic situation produces additional reasons why the federal government must get down to highway building on a nationwide scale and in dead earnest.

In a sense the legislative mind at Washington seems to be approaching the present phase of economic problems somewhat in a spirit of weariness. "Will we ever get anything really finished?" is a question which seems to express their feelings, since so many problems, like the proverbial cat, keep coming back.

But one fact seems to be making itself very clear, and that is that since the public highway is the first link between the producer and consumer, the logical place to begin cutting down living costs is by eliminating permanently the time-consuming and fuel-wasting roads. To accomplish this purpose the construction of a national highway system with state and county systems is being looked upon with increased favor.

Bond Issues Pending.
Legislation to authorize good roads bond issues amounting to \$301,253,800 are pending with excellent chances of being passed.

Hard Surfaced Roads.
There will be a big development with hard surfaced roads in Kansas in the next five years.

Good Roads in Uruguay.
In Uruguay, one per cent of all taxes paid on real estate is devoted to the building of roads and bridges.

Father and Daughter Get Relief by E

R. J. Powell, Sweetwater says, "Eatonie helped me but it was my daughter who marvelous benefits. She even take a drink of water awful misery, but it relieved is feeling much better. All one box, so send me four once."

Hundreds of people eatonie; one or two tablets of meal keeps them in good feeling fine, full of pep, simply takes up the excess and poisons and carries them of the system. Of course, because of the misery is rem sufferer cannot help but you will find it a quick, safe for heartburn, indigestion, gassy, bloated stomach. It a trifle and your druggist will you. If you don't feel well, eatonie a test. Adv.

After Using.
The woman was the author cookery book that had been at her request with wide occasional blank pages for additional recipes.

Often she had expressed a see an old copy of the book to what use the blank pages been put. One day in a book store her husband announced old volume. Noticing that it annotated freely, he bought a day or two he said: "How about the notes in the book? Were they interesting?" "No," she said curtly; "amount to anything."

When he got a chance he through the book himself. He the book contained was a dyspepsia and kindred ailments Dallas News.

Cuticura Soothes Baby
That itch and burn with Cuticura Soap followed by anointments of Cuticura. Nothing better, purer, sweeter, especially a little of the fragrant Cuticura Talcum is dusted on it. 25c each everywhere.

Square.
"I owe you an apology, old thought you had gone home took your umbrella from the evening."
"That's all right. On account weather you left your new hook and wore that old cap kicking around. As it was hard, and you had my umbrella didn't want my hat to get wore yours home."

For Giving.
Betty, who is three, is always ing up words and phrases she nine-year-old John use. One she said, "Mother, will you me?"
"Forgive you for what, dear Betty was worried, but ed brightly.

Films Help to Foreign Trade

Motion Pictures a Silent Partner of Uncle Sam in His Export Trade.

CREATES DEMAND FOR GOODS

Latin People Disposed to Pattern After What They See on Screen That Pleases Them—Aids Live Stock Introduction.

Washington.—Uncle Sam has as a silent partner in his export trade the motion picture.

How the "movies" are developing trade and spreading confidence in American goods and American methods, and creating an Americanized atmosphere which should prove the strongest possible asset toward permanency of trade in South America, is told by Dr. Julius Klein, commercial attaché at the American embassy, Buenos Aires, who was formerly chief of the Latin American division, bureau of foreign and domestic commerce.

The Latin people, he points out, are disposed to pattern after what they see in the motion pictures that appeals to them. Thus the films have made them familiar with the appearance of American automobiles and of what they can do. The movies have created a demand for American-made office furniture by showing the fittings of a business magnate's office, which the South American merchants in their prosperity are eager to copy.

As regards ready-made clothing—the South Americans, particularly in Cuba, have gotten into the habit of ordering a suit of clothes like their favorite hero wear in a certain film. Thus the merchants have come to stock up with good lines of ready-made clothing, which are very popular. The movies have had a like effect on industrial development.

All this, Doctor Klein emphasizes, has happened naturally and has not been forced as trade propaganda.

Boom to U. S. Trade.

The more use that can be made of educational films introducing industries comparable with their own industries—such as agriculture, cattle-raising, mining—the more benefits to American commerce will result. Such films can and should carry a romantic scenario, such as appeals most strongly to the Latin temperament, with cuts on our methods in industries similar to theirs. As we show them a new and better method their confidence in us and the output of our industries grows cumulatively.

Germans and Italians particularly have been endeavoring to ingratiate themselves in South American countries, Doctor Klein says, and the influence of the Italians in the South American markets from an economic and commercial viewpoint must be reckoned with.

American manufacturers of farm machinery are now co-operating with the Philippine department of agriculture and natural resources, in an endeavor to arouse in the farmers of those islands a true appreciation of the possibilities by using such machinery. Motion pictures are being prepared to show the most approved methods of cultivation, preparation of seed, use of farm machinery, harvesting and storing crops, and methods of packing and handling where these processes are involved.

Aids Live Stock Introduction.

Introduction of American breeds of live stock and poultry into South America, particularly Argentina, is to be aided by the use of motion picture films, prepared for this purpose by the United States department of agriculture. These films also will show American methods of breeding live

stock and handling it in its many phases from the farm to the home table. The Argentine government has shown special interest in the introduction of American methods of handling live stock, as it has indeed in the agricultural practices of the northern half of the continent generally.

As evidence of this, the Argentine embassy in Washington has already purchased ten films on these subjects for educational use in Argentina and has frequently had United States department bulletins translated into Spanish for home consumption.

The Buenos Aires & Pacific railway has also been a heavy purchaser of such films for use along its system. Its representative in this country was recently negotiating with the United States department of agriculture for films showing the swine industry in the United States, and in making arrangements for the introduction of American swine in Argentina.

It is planned to show important

"Cut Pay, I'm Not Earning It," Says City Employee

Cleveland, Ohio.—"I am not earning the money I am getting and I want my salary reduced."

This is the request sent to City officials by Gottlieb Pfahl. He is sixty-seven.

He worked for the city for fifteen years. When he made the request he was foreman of a bridge repair gang.

Last March his right arm was affected by paralysis. He cannot use it now.

That's why he asked for a salary cut. His request was granted.

National Anthem Turned Policemen Into Statues

Boston, Mass.—By playing "The Star Spangled Banner" over and over an Italian band kept two policemen, who ordered them to stop, standing at salute in the Falls reservation, near here, until their arms dropped numb and helpless. A few Italian women and children, who were along for an outing cheered and applauded in great glee. Then the bandmen fled.

Soon after the tumultuous strains had begun resounding through the woods Policemen Jordan Frost and Roberts appeared and informed them they must stop, as they were in the state reservation. The leader at once ordered "The Star Spangled Banner" played.

swine-breeding farms, the work in the big Chicago packing houses and the preparation of the product for the table. Pictures will be made of the various types of American hogs, and an effort will be made to give some idea of the vastness of the industry in this country.

CATTLE RUSTLERS USE AUTOS

Cattle Are Now Taken Across the International Boundary by New Method.

Regina, Sask.—The motorcar, it seems, has achieved another success by winning its advent into the cattle rustling business. The old and well-known practice of cattle rustlers, when they used to drive their stolen herds before them, is now a thing of the past. A few days ago three calves were stolen from herds near Bengough and spirited across the international border by two motorcars. Three of the rustlers were arrested on this side of the line and two others in Montana and are now awaiting trial.

Adrianople Is a Beautiful City

Airman Describes Romantic Charm of Mosques and Gardened Homes.

DECADENCE OF CITY GOES ON

Strangers Treated Kindly in an Atmosphere of Friendship—City Endures Its Shabby Gentility With Pride and Calm.

Adrianople, Thrace.—The decadence of two centuries, present political and economic disintegration, wars without end, and an uncertain future, have been unable to destroy the ineffable charm the Turks originally gave to this city of eighty-odd thousand souls. Adrianople is still a holy city in faith and in appearance. Romance still abides here.

"The Orient is the only place left to Europe where cities seen at close range are beautiful," remarked Jules Sobotta, a French aviator, while visiting the most beautiful of all mosques, Sinan's masterpiece here the mosque of a thousand windows but one, erected at the order of Sultan Selim II, in the sixteenth century.

The first impression of the city has been one of infinite beauty. Arriving from across the lofty Balkans in an airplane, the city had been seen with a rush, a place of spires, and slate domes and red roofs, planted at the intersection of three rivers. It had been a welcome sight. It had come at the end of a four-hours' ride, and it

was the journey's end to a tired aviator.

Charming Aloft or Afoot.

Seen from aloft, the city, surrounded by poplars at its outer rim, its house gardens within the city showing green vines and flowers, its outlying fields bare, aroused memories of Maridin on mountains, Diarbekr by the Tigris and hosts of other Turkish cities, always sleeping in beauty, whether visited by sunshine or moonlight.

The longer the stay in Adrianople the more the charm of its beauty grows, a charm that is as great afoot as aloft.

Adrianople is a city that has the tone of country friendship about it, not unlike a county seat of the South. The center of the agricultural exchange business of Eastern and Western Thrace, it is frequented by peasants and traders of Turkish, Greek, Bulgarian, Jewish and Armenian nationalities. There is record of but one American ever having done business in the city, and he came here from Paris and bought up all the brooms.

While no day knows what the next day may bring forth in the way of political strife and crime, today the city preserves this tone of friendship and order. Strangers as they go along the streets or visit the shops are treated with kindly concern. The Turkish officers salute courteously and there is no glint of hostility in the eyes of the Turkish soldiers carrying their new rifles, recently distributed to them by Col. Djefer Tayar Bey.

The decadence of Adrianople goes at a dignified pace. There is little or none of the seething squalor and dirt and noise and poverty of Constantinople. There is none of the clamor of Constantinople's street cars and automobiles.

Pride in Shabby Gentility.

There are a few ragged beggar children who beset the stranger, but for the most part Adrianople endures its shabby gentility with pride and calm. Here there are none of the fallen houses and dusty streets which characterize the majority of the cities of Asia Minor.

Prayers are called from the minarets as of old; also the old and new bazaars do a slender business in selling American and European calicoes and homespun cloths and Turkish silver mounted pipes and cigarette holders, rugs, junk, to passing peasant customers; or else when these are lacking they swap with each other, after the happy manner of all the Orient.

Decadence seems to have heightened the beauty of the majestic old mosque of Sultan Bayzid. The windows are broken in, the locks are rusted in the doors, the grass is growing up between the flagstones, the fountain in the court no longer splashes its water in the sunshine, and the interior of the mosque itself is slowly deteriorating.

Few worshipers come here, but on the drowsy Friday afternoons, the Mussulman's day of worship, come a devoted band of musicians and singers. The aviator stumbled upon this group and one of the red-fezzed Turk saluted with the simplicity of the Turk and said, "Allah esmarladik."—"May God abide with you."

Remarkable Escape Due to Crotch of Tree

As B. A. Edgar was driving through Westfield, Mass., one of the oldest and biggest elm trees of the town suddenly crashed to the ground. By sheer luck Edgar stopped his car so that the crotch of the tree saved him from almost certain death.

Arctic Rescue Very Thrilling

Desperate Battle Fought by Icebreaker With Great Floes in Kara Sea.

SHIP DRIFTS FOR MONTHS

Captain Gives a Plain but Graphic Account of Perilous Voyage—Exciting Race in Ice-Laden Sea—Joy Hard to Describe.

London.—Capt. Otto Sverdrup's narrative of the rescue of crew and passengers from the Russian steamship Solovoi Boudimirovitch, which drifted helplessly for months in the Kara sea, is a thrilling tale of Arctic adventure. Captain Sverdrup's story, as printed in the London Times, follows:

It was in April last that I was entrusted with the task of planning, equipping and leading a relief expedition to the Kara sea in order to search for and if possible to rescue the crew and passengers on board the steamship Solovoi Boudimirovitch, which at the end of January had become jammed in the ice outside the White sea and afterward was carried in the ice through the Kara straits into the Kara sea. There the vessel drifted dangerously about. She had left Archangel provisioned for only two months, and food, coal and fuel were falling short.

The big, powerful icebreaker Sviatogor was placed at the disposal of the expedition by the British government and sent over to Bergen. Here she was quickly manned, equipped and provisioned for six months. We left Bergen on May 13 and arrived at Tromso on the 17th. There we lay until June 7—a very painful period of waiting for us and doubly painful for the Russians hungry and cold on board the Solovoi, who had been informed by wireless that we had started.

At Vardo we shipped 50 tons of supplies more, and having left on the evening of June 9 anchored on the morning of June 12 in Bielushya bay, Novaya Zemlya, where we took on board 500 tons of coal from the steamship Harde, which had been dispatched direct from Tromso.

Up Against Strong Ice Barrier.

We passed through Kara straits practically untroubled by ice until the morning of the 16th, when we encountered a large mass of old close-packed polar ice. It was clearly no use trying to force a passage through this; we had to try to find the never and more penetrable ice which had drifted from the west into the Kara sea through the strait. We steamed, therefore, in a northwesterly direction, but as there appeared no improvement in the conditions we turned about and went in a southeasterly direction until the polar ice was passed.

Then, fortunately, a breeze sprang up from the northeast and made a considerable improvement in the ice conditions. Then we steered north in the direction of the Solovoi, and about 8.30 in the evening, according to the last position received from her by wireless, we reckoned that we were within about eight or ten minutes distance.

On the 18th the weather cleared, and having taken the necessary observations in the morning and at noon we continued our voyage at 1 p. m. At the same time we received a wireless giving the position of the Solovoi, which was considerably further north than before.

A little later we suddenly caught sight of the Russian icebreaker Kanada, stemming after us. She had had the advantage of the strong northeast wind, which had parted the ice, and our long wait for the purpose of taking observations had also helped her to overtake us. On June 17 our wireless had picked up a call from the Kanada to the Solovoi, which confirmed the rumor we had heard at

Vardo that the soviet government was equipping a new expedition.

Soon afterward we received a direct inquiry from the Kanada as to our position, which we immediately telegraphed both to the Kanada and the Solovoi, at the same time asking them to give us theirs. The Kanada replied asking us to stop for a conversation, and in the conversation which followed with Commissar of Marine Mikhailoff and Captain Mokaloff of the Kanada it was explained that the vessel had been dispatched by the soviet government in order to give assistance if it would be necessary or in case there should be difficulties of any sort in consequence of the political changes which had occurred since the Solovoi had left Archangel. It appeared also that they had orders to bring the ship back to Archangel direct.

Exciting Race in Ice-Laden Sea.

After the conference was over, therefore, there began an exciting race between the two ships. The ice through which we had to force a passage was very different from that we had had to tackle before. This was the ordinary polar ice of the Kara sea, closely packed, with only a few small gaps of open water. I had very little hope of getting through, and that we did succeed was due only to the remarkable qualities of the Sviatogor as an icebreaker.

With full steam up from all of her ten boilers she burst her way splendidly through the strong pack ice. Now and then she was beaten and had to back and make a fresh attack at full speed. It was not often that more than two attempts had to be made, but it happened sometimes that the maneuvers had to be repeated nine or ten times where the ice was 20 feet thick or more.

At first the Kanada had a little start, but the roles were soon changed. The Sviatogor went ahead and continued to increase her lead, and when at last, at 7.30 in the evening, we sighted the Solovoi far away northward on the horizon, the Kanada had fallen far behind.

At about the same time we received the following message from the Solovoi: "We see your smoke in the south, 20 degrees east." We were delighted by this message, which made us realize that our hard-earned and anxious friends on board the Solovoi were in high hopes of relief.

Thrilling Night on Icebreaker.

In the Sviatogor all were keenly alive to the anxiety and seriousness of the situation, and followed with eager interest the display of prowess given by the icebreaker during these hours of the night. Of the crew all who were not actually keeping watch were on deck hour after hour discussing and marvelling at the carrying features of this extraordinary drama. Some stood leaning over the rails so as better to enjoy the sight of the great blocks of ice, now crushed into fragments before our bows, now hurled in a whirling mass along the sloop's sides—and all to a wild accompaniment of deafening crashes in the ice, and of groans and wails and shrieks from the hard-pressed vessel's hull and rig and engines.

Suddenly an ice floe would rise and threaten to fall over the ship's rail, and then the sailors were not slow in heaving a retreat to safer quarters. Others, who stood in groups right forward in bows, fared no better. When, as frequently happened, the ship crashed at full speed against a really high solid block of ice, and at the same time rose several feet in the air a shower of spray and ice splinters flew over the deck and forced the imprudent spectators to a headlong retreat.

In the meantime we were approaching the Solovoi, but it was a slow business. The ice became worse and worse in the last stages, and it was midnight when we reached her. An hour more was required before we could moor the Sviatogor by her side, so big and thick were the surrounding ice floes.

The whole crew of the Solovoi and all her passengers, 87 altogether, had gathered on deck and were greeted by us with a resounding hurrah, to which they responded in the same way. Their joy is not easy to describe. To drift without aim, almost without hope, in the darkness and cold of the Polar night, with bad and insufficient food, in cold and unclean quarters, and in constant dread of getting so far north that rescue would be impossible—that is an ordeal so hard that it is not every one who would come through it entirely unscathed.

Immediately after we arrived the captain of the Solovoi and his wife and all the passengers, seven in number, came on board. They were invited into the saloon and treated to refreshments, which they evidently appreciated. One of them said it was like coming into paradise after their anxieties. The passengers asked leave to transfer to the Sviatogor as they were greatly exhausted and needed medical attention and better diet, and I was glad to be able to grant their request. Then we set to work to put provisions and coal on board the Solovoi, so that the crew could at once prepare a proper meal with something better to eat and drink than they had had in the last few months.

Second Relief Ship Arrives.

About four o'clock in the morning we were awakened by loud hurrahs from the crew of the Solovoi, who were hailing the arrival of the Kanada, which had at last also gone through. Had the Kanada not been so fortunate as to get into the lane made in the ice by the Sviatogor, it would have been hardly possible for her arrival so soon. Next day we shipped more coal and provisions on board the Solovoi, and were helped with hearty good will by the crews of the two Russians.

This done we started in the afternoon of June 20 on our homeward voyage, the Sviatogor leading and the Solovoi and Kanada following. At first the ice was loose and fairly easy to get through, but afterwards it became closer and more difficult to force. There was fog, too, which made it impossible to keep proper observation of the ice conditions. Consequently we often had to stop a fairly long time, especially as the fog prevented the other two ships from keeping with us. It was evening on the 21st when we reached the Kara sea entrance, and there we were again obliged to stop for thick fog.

We resumed our voyage at 2 o'clock next morning steering for the middle of the Kara strait, but at 2.30 p. m. we were unlucky enough to ground on an unknown sandbank. We at once began to tranship coal to the Solovoi and Kanada in order to get the Sviatogor afloat again, and after unloading 650 tons of coal we at last got her off. A diver from the Kanada examined the ship's bottom and pronounced the damage not serious. So we continued our voyage to Bielushya bay, where we handed over more provisions and supplies to the Russians and took on coal from the Harde for our voyage back to England.

After a cordial leave-taking from our friends on the Solovoi and Kanada these vessels left us on June 29, shaping their course for Archangel. On July 1 we had completed our coaling and next day at 2 p. m. we began our homeward voyage.

Wife Deserted 40 Years Ago Applies for Divorce

Sunbury, Pa.—Claiming that her husband deserted her a year after their marriage forty years ago, Mrs. William S. Fenstermacher, sixty, brought suit in the Northumberland county courts seeking an absolute divorce. In all those years, she says, her husband never made any effort to make up their differences.

At the same time Charles H. Smith, sixty-eight years old, and Mrs. Sara S. Herb, sixty-six, of Ashland, were granted a license to wed. His bride-to-be has been married twice, while Smith, a building contractor, was wed once before.

Woman Rides in Motorcycle Derby

Mrs. Longdon afforded quite a thrill to a record crowd at Brooklands, England, recently when she donned her goggles and started in the 100-mile race. Mrs. Longdon was among the leaders when she was forced to retire on account of engine trouble.

FROM UNIVERSITY OF TEXAS

Austin, Texas, Sept.—It is indicated by reports received at the University of Texas and other colleges of the state that more young men and young women will attend these educational institutions this year than ever before. All of the colleges are preparing for an increase of attendance. Additions have been made to the instruction staffs, and the curricula revised to meet new conditions. In former years an average of about 5,000 youths of Texas attended colleges outside of their state, many of these students being attracted to the institutions of higher learning in the North and East. But the truth has finally been borne home to the young men and women of Texas that the University of Texas and other colleges of this state afford as good opportunities for educational advancement as are to be found in the United States, with the added advantage that the friends and associates which they make in school in their own state are a valuable asset to them all through life. Their studies and training in Texas colleges give them a better understanding of their State, a higher appreciation of its wonderful resources and possibilities along various lines of development.

When the coming fall session of the University of Texas opens on September 22 the students will find ready an instruction staff and laboratory facilities equal to any college of the first class in the United States. While there is a serious lack of physical equipment in the way of permanent buildings, this handicap is to be met in the near future. Plans are now being prepared for two new buildings, one to be occupied by the chemistry department and the other by the department of biological sciences. The erection of these two additional permanent buildings will be started this fall. In the meanwhile the present buildings, including many temporary frame shacks, will accommodate the students. It is asserted that in laboratory equipment of its mechanical engineering, chemistry, journalism and physics departments the University of Texas is the equal of any college in the country.

Students at the University of Texas are offered the choice of as wide a range of subjects as can be found in any college in the country. In the College of Arts there are thirty departments, including those of language, history, literature, science, mathematics, and vocational subjects, offer a total of 374 courses. The College of Engineering offers 96 courses, grouped in six departments. Students studying law will enter the School of Law after having completed ten courses in the College of Arts, and will find offered thirty-two law law courses. Work preparatory to the study of medicine is given, also, at the main University; a minimum of two year's work is required before a student is admitted to the School of Medicine at Galveston.

It is anticipated that the attendance at the University this fall will be approximately 4,500 students, and the total may reach 5,000. President R. E. Vinson announces that all students will be properly cared for, both as to housing and as to college instruction. The conversion of the comfortable buildings formerly occupied by the School of Military Aeronautics into dormitories for young men students will to a considerable degree relieve the housing situation, as these dormitories will care for as many as 1,000 students. The new Masonic dormitory for women students will further relieve any possible congestion in private rooming houses. The lowest possible rates for room and board will be charged.

An unusually large number of opportunities for students to work their way through the University are offered, and many young men and women come here with that expectation. Both the Y. M. C. A. and the Y. W. C. A. organizations of the University maintain employment bureaus in charge of this work.

**HOME PROGRESS CLUB HOLDS
FIRST MEETING OF YEAR**

The Home Progress Club met Thursday afternoon at the home of Mrs. H. E. Baird. This was the first regular meeting of our new year's work. The lesson for the afternoon was in charge of Mrs. W. H. Craig, assisted by Mrs. Sauls and Mrs. O'Loughlin, on Health which proved to be both interesting and beneficial. The afternoon was spent and greatly enjoyed by everyone.

Toward the later part of the afternoon delicious refreshments were served by the hostess. The invited guests were: Mrs. J. A. Meade and Frank Proenza.

The members present were: Mrs. J. L. Seiber, B. F. Jackson, C. S. Seiber, Miss O'Loughlin, J. A. Newman, J. K. McKenzie, C. T. Locke, L. B. Cross, N. S. Locke, J. E. Kinney, W. R. Ewing, W. A. Dyer, Olive Dixon, W. W. Davis, W. H. Craig, Thos. J. Boney and H. E. Baird. P. R.

FOR SALE A sixteen hole drill either Van Brunt or Emerson, in excellent condition and priced to sell. See W. C. Christopher.

CARD OF THANKS

We take this means of thanking the people of Miami and Vero Beach for their kindness and help in putting away the remains of our loved one. May Gods blessing rest upon each one.

Mrs. Marie Worthington,

PASTIME PROGRAMS

TO-MORROW, FRIDAY, last episode of that wonderful serial, LOST CITY, don't fail to see the climax of this great story. Also well mixed program including a Comedy.

**Tom Mix Saturday in
DESERT LOVE**

DESERT LOVE, is one of Tom Mix's very latest five reel features and being produced by Fox, we know that it will be snappy and interesting and if you like western stories, this will certainly please you.

MONDAY, next week, A Fox picture, THE DEVILS RIDDLE. A good little story.

**Doug Fairbanks Tuesday in
THE MOLLYCODLE**

Here is Doug's latest production, released through the United Artists, and has brought unlimited praise wherever shown. Hundreds of exhibitors have said it was the best Douglas Fairbanks ever produced. Don't miss it.

WEDNESDAY, next week, a Paramount picture, Lillian Gish in BOOTS. A dandy good story.

**FALL OF BABYLON
THURSDAY**

D. W. Griffith never produced a bigger picture than the FALL OF BABYLON, which is coming to us next Thursday. The greatest picture of the World's greatest Master in picture making. Griffith at his zenith. The gigantic description of the famous king and his court with spectacular brilliance. A stupendous, magnificent production that is not equaled by any other producer. Wonderful lesson of by-gone days elaborately portrayed with all the splendor and grandeur possible to put into a production. Don't forget the date, next Thursday, Sept. 23. Admission 25-50 cents.

New Fall and Winter suits.

Serge and Wool Dresses on sale at

STOCKER'S STORE

JEFFREY'S Styles

S. L. Ring had purchased the R. E. Daughettee brick residence located in Coffeyville, and will move over immediately.

Miss Lola Studer of Canadian visited Mrs. Lee Newman first of the week.

Mrs. John Webster and daughter, Evelyn came in this morning from a three weeks visit with relatives in Kansas.

Willie George came in this morning from Wichita, Kansas where he has been the past two weeks with his mother.

Judge L. C. Heare came in today from Fort Worth, where he attended the Democratic Convention. He also made stops at Wichita Falls and Memphis.

Mrs. Samuel Edge and daughter have gone to Mineral Wells to spend the winter, and Mr. Edge expects to go down in a few weeks.

Eld. and Mrs. I. L. Sanders came in last week from their summers work in Oklahoma in special meetings and report a very valuable summer spent and are back ready for work with the local congregation.

Eld. H. E. Sheets of Hugo, Okla., came home with Eld Sanders and will spend the winter in the panhandle.

The Ladies Bible Class of the Church of Christ met Tuesday afternoon with Mrs. C. P. Pursley with a splendid afternoon lesson. Their next lesson. Their next meeting will be at the W. A. Dyer home, next Tuesday afternoon.

J. J. Kelley of Ranger was here first of the week visiting Miami friends.

Miss Mabel Christopher left first of the week for an appendicitis operation.

Mr. and Mrs. Wes Byers and children came in yesterday from Rochester, Minn. Wes says his leg is very much improved and he hopes to be able to throw away his crutches in a few weeks.

G. M. Bullis, Seab Inspector for this territory who was recently transferred here from Glazier has rented the old Bakery building adjoining the Chief office and moved into it yesterday.

Ferdinand Sohns is here this week visiting his mother and sisters.

Miss Emma Sohns and Mrs. Mamie Kucha spent Wednesday and Thursday of last week visiting Canadian friends.

Ewell Powell and Miss Francis Duncan, both of Mobeetie were married there Tuesday, Rev. Saley performing the ceremony.

Mrs. J. W. Philpott went to Arkansas City Kansas, last week to visit her daughter, Mrs. Karl Certain who recently underwent an operation.

Mr. and Mrs. Frank Pursley are celebrating the arrival of a new son at their home Saturday.

W. S. Martin of Amarillo was down first of the week in interest of the U. S. Strader Grain Company.

Mrs. Olive Dixon entertained the depot force Monday evening with a big six o'clock chicken dinner in honor of her son Drews twenty-first birthday.

Mr. and Mrs. Frank Lee, Mrs. Dread Lee and Mrs. Doyle Jeffus of Mobeetie were Miami shoppers Tuesday.

Edd Blair and family of Mobeetie were visitors in our city Tuesday and looked over some residence property with a view of coming here for school.

ED BLAIR BUYS MIAMI HOME

Ed Blair of Mobeetie is in the city this afternoon closing a deal with D. Graham, purchasing from him the formerly D. B. Stribling property adjoining town on the west across the creek.

Mr. Blair recently sold his farm near Mobeetie and has been looking for a good school town since, but after investigating many, decided that Miami offered the best opportunities, which it does, and he will move his family here this week. Ed is well known here and needs very little introduction to our people. He served several years as County Commissioner of Wheeler County, and for the benefit of those who don't know him, we say that there is not a better citizen in the Panhandle, a bigger worker for community upbuilding in the state, or a truer friend to his friends to be found. We are indeed glad to welcome Mr. Blair and family to our city.

MEXICANS GETTING FIN! HOME

The Santa Fe Railway are preparing to build a very modern home for the Mexicans who work for them in Miami. Material is being placed on the ground for the erection of a 12 room house, costing about \$9,000 which will be located near the track west of town, across the creek, where their shanties now stand. A well has already been put down and the building will be started soon.

FOR SALE. A Singer sewing machine, excellent condition. Lurean Nelson.

FARM TRACTORS

Henry Ford set about building the Fordson tractor he had a thorough understanding of just what it should be and what it should do. His early life on the farm gave him a deep insight into the daily life of the farmer; his mechanical genius saw the type of tractor needed. He began work on a farm tractor thirty-five years ago, and for more than twelve years he experimented over more than 7,000 acres of land in different kinds of soil, with with different crops.

So he built the Fordson. It is so simple that a schoolboy can operate it. It is low in first cost. It is lowest in operating cost and Fordson parts and Fordson service are always to be had promptly from the dealer.

The Fordson is a profitable investment. It can be used every working day in the year. It is an inexpensive power plant that will lighten your farm work. It has proven its worth on more than one hundred thousand farms not only in operating implements in the fields but in belt and pulley work. And it doesn't eat when idle.

Don't delay ordering your Fordson tractor. The demand is greater than the supply.

PANHANDLE-PLAINS CHAMBER OF COMMERCE

Amarillo, Texas, Sept. 15, 1920. Believing that the redistricting problem of the Panhandle is a matter that should come ultimately before the State Legislature, the Panhandle-Plains Chamber of Commerce deemed to participate in framing the redistricting clause of the Democratic State platform in the convention held in Fort Worth last week, at the same time acknowledging the honor of an invitation to assist in the performance of that duty. Likewise the Agricultural & Mechanical College for West Texas is a problem to come before the State and with proper claims properly lodged we have little fear but that a stable and equitable legislation in connection will result. We have the utmost respect for confidence in the members of the Legislature of this state. It is easier to criticize their actions than it would be to perform the duty better.

The Panhandle-Plains Chamber of Commerce perfected plans almost a year ago by means of which the Agricultural and Mechanical needs of the Industrial Arts section of instruction can be rendered adequately to the Panhandle and Plains district economically and without burdening the effort on the part of the State. This plan has been endorsed by the

Board of Regents and by many of the Texas lawmakers as sane and sensible. This plan will be briefed and presented at the proper time before the next Legislature by the president and secretary of this organization.

Redistricting of the state will receive proper attention by this body at the proper time before the state legislature and all other matters of industrial, educational and social interest and concern to the Panhandle will be studiously and industrially presented before this honorable body of men.

In the mean time we would like to have any suggestion from you that may occur to you as profitable to the future development of this portion of the state.

Yours very truly, Panhandle-Plains Chamber of Commerce F. R. Jamison, Secretary-Manager

FOR RENT. A business space 15 by 40 feet in the Main Hotel building, front entrance. See Mrs. Nall at the Hotel.

For washing lace curtains use RUB NO-MORE WASHING POWDER. Do not rub but simply dissolve a small amount and whisk the curtains through the water. Note results.

Salisbury Cathedral

Salisbury Cathedral, From the Nearby Lake.

APRIL 28, 1220, Richard Poore, bishop of Old Sarum, took off his shoes, and, attended by a procession of church and state dignitaries, all barefooted, and followed by a crowd of humbler people, walked from his cathedral church of Old Sarum to a pleasant meadow by the riverside, a little more than a mile distant. There and then he founded the cathedral of New Sarum, which, in but a few years, was to spring from the greensward in the simple beauty associated with its newer name of Salisbury cathedral; to endure as the finest existing example of early English architecture, says the London Telegraph.

After consecrating the site of the future cathedral, Bishop Poore laid the first foundation stone in the name of Pope Honorius; a second for Stephen Langton, Archbishop of Canterbury, and a third for himself. William Longespée, first earl of Salisbury, whose altar tomb on the south side of the nave is a masterpiece of statuary art, laid the fourth stone; while the fifth was placed by his countess, Ela. Other stone laying followed, "amidst the acclamation," and old chronicler tells us, "of multitudes of the people, weeping for joy, and contributing thereto their alms with a ready mind, according to the ability which God had given them." So quickly did the work progress that three altars were consecrated in the new building within five years of the foundation ceremonies.

Why the Site Was Changed.
The founders of the new cathedral gave several reasons for abandoning the structure on the hill of Old Sarum. One reason mentioned in the bull obtained for the purpose from Pope Honorius, dated March 23, 1219, was that the hilly situation of Old Sarum placed the cathedral at the mercy of winds so stormy that not only was it often difficult to hear the words of the service, but the structure became in constant need of repair. Another trouble was the insufficiency of the water supply and a third was the most cogent of all, the military in the neighboring castle taking all possible pains to show that they, and not the ecclesiastics, were the lords of Old Sarum.

"What has the House of the Lord to do with castles?" asked Peter of Blois in support of the proposal to remove the See from Old Sarum. "It is the Ark of the Covenant in a temple of Balaam. Let us, in the name of God, descend into the meads. There are rich meadows and fertile valleys abounding in the fruits of the earth, profusely watered by living streams. There is a seat for the virgin patroness of our church to which the whole world cannot produce a parallel."

His conclusions as to the situation were in every sense correct, for among English cathedrals scarcely one—if any—can vie with the exquisite setting of Salisbury's aspiring loveliness of pinnacles and spire in the center of the greensward.

The Tower and Spire.
Without its spire the cathedral at Salisbury would still have been a marvel of architectural beauty; with its tower and spire it stands complete as the crowning triumph of English architecture throughout the ages. For over a century the building stood with a low, stunted central tower. Then, in 1330, came the daring conception of raising a tower and spire soaring to a height of more than 400 feet. The boldness of the idea, and the danger of it, inspired the builders with constant care. They knew that the riverside

earth on which they had to build was too marshy to bear the solidity usually connected with tower structures, and they planned and worked with extreme caution. Giving to the tower walls the lightest possible construction, banding the parts ingeniously, and even leaving within the building the wooden framework to serve as an additional support, the builders worked daringly on; but when they approached the spire construction they had not the temerity to give it a thickness of more than two feet at the base, and of nine inches from a little above the base to the top-most pinnacle.

Within and without they added flying buttresses. Even then the spire began to lapse from the perpendicular, and the worst was feared when a deviation of two feet occurred; but since the careful examination made by Sir Christopher Wren no further signs of insecurity have appeared.

What Salisbury Cathedral owes to the magic grace of its tower and spire it is easier to realize than to express. The whole building was transformed by the architectural daring which had enough poetic insight to picture what could be done by capping an already beautiful, but somewhat featureless structure, by an exquisitely proportioned tower, surmounted by a slender and soaring spire, the highest in England. Though constructed half a century later than the body of the cathedral, the tower and spire—so refined was the artistic perception of these early builders—were in harmony with the whole construction, in spite of their greater display of elaborate and decorative work.

With marvelous grace this triumph of early English art blends nave, choir, and transepts, tower and spire, in an architectural unity that has no compeer within our isles. Here we have a church of one period and of one design, not, as in most cathedrals, an epitome in stone of English history from the Norman on through the early English and decorated periods to the perpendicular.

Some Human Records.
Seen with effect from the height of Salisbury tower is a pleasant pastoral country, watered by several streams, broken by some low stretches of down and in places luxuriantly wooded; and here and there are places sacred in the story of our literature. Within the cathedral is a bust with tablet in memory of Richard Jefferies, born at Coate, in Wiltshire.

Less than two miles from Salisbury is Bemerton, a village containing the flint built parsonage where George Herbert wrote some of the poems in "The Temple." Within the altar rails of the little church is a modest tablet, with the simple inscription, "G. H. 1633," the only memorial in Wiltshire to "the sweetest singer that ever sang God's praise."

Within the cathedral, on the north side of the altar, lies the body of the sister whom Sir Philip Sidney loved to visit at Wilton, the ancestral estate of the Pembroke family, not much more than a mile to the west of Bemerton. It was at Wilton that Sidney wrote parts of his "Arcadia" to please, as he put it, "his dear lady and sister, the countess of Pembroke."

Interesting, too, are the cloisters, not only for the beauty of their window tracery, but for the memories they enshrine, for among those who lie at rest in this sanctuary enclosed by the cloisters are people whose names have a place of honor in the modern records of the Wiltshire minister.

RIBBONS GROW IN IMPORTANCE

RIBBONS, which have so long been accessory to everything in apparel, have progressed until they enter into the making of as many garments as they have adorned. They are present in every sort of dress, from the simplest street frock to the most complicated of evening gowns—not merely as accessories, but as a part of the garment, or as its trimming. At the same time they flourish in accessories and in millinery as never before. The new season will bring us tailored clothes with ribbon vests or with ribbon ruffles for trimming, or ribbon applique and simulated embroideries, and numberless ribbon garnishings and adornments on afternoon and evening dresses promise an interesting theme, of which we had the beginning in the early spring.

It plays a modest but indispensable part in the handsome afternoon dress of which a picture appears here. This model for the coming season is made of georgette crepe over a satin slip,

and one can imagine it in any of the season's rich, dark colors, livened by the introduction of touches of vivid color in the embroidery. A long tunic is box-plaited, divided at the sides from waist to hem and rounded at the bottom. The back portion overlaps the front at each side and this feature in the construction of the dress is brought out by the ribbon border that finishes the tunic about the edges. The bodice is cut in the kimono style, with three-quarter-length sleeves, also bordered with ribbon. An embroidered panel at the front of the bodice provides a pattern that is repeated at the bottom of the tunic. It is a large pattern and mainly in the same color as the dress and its ribbon border.

The same ribbon is used for an ingenious and pretty girdle. The girde slips under the ribbon border at each side and turns into two flat loops that make an unexpected and attractive finishing touch for the waistline.

Wide Variety in Blouses

THERE are two points on which the creators of blouses and smocks appear to agree; they are materials and the management of the neckline. In everything else each appears to be independent of the others, but these two items are enough to give the styles coherence. Voile, batiste, georgette provide the sheer materials; crepe de chine, silk shirtings and satin answer for heavier ones, and in style there is everything from very manly, high-necked shirts with narrow plaited bosoms, high collars, long sleeves, to elaborately embroidered georgette affairs with short sleeves and neck either round or having a collar. With all this variety the blouses, especially those of sheer cottons, are unusually tasteful.

The hand-made blouse, in fine cottons, continues to do honor to needle women, holding first place as a dainty utility garment for daily wear, in the estimation of the best dressed women. These blouses are prettily decorated with drawn work, hemstitching, fine tucks, plaitings and trimmings of lace, fllet still holding its own as the best

choice in laces. Many of the tailored blouses are long sleeved, as they should be, but there are plenty of exceptions to the rule in this matter. The three-quarter length sleeve is a happy compromise between the popular elbow and the long sleeve. The best liked collars are those that are high at the back, with "V"-shaped opening at the front. They are made of the same material as the blouse and trimmed to correspond.

One of the new blouses, shown above, emphasizes embroidery. The front is extended into a peplum and is covered with it. Since there is so much of it in this position it is necessary to practice some reticence in the rest of the blouse; therefore the sleeves have none and are finished with a binding. The round neck is allowed a very simple pattern outlining its shape. The color contrasts are not bold, but pleasing and soft.

Julia Bottomley

DADDY'S EVENING FAIRY TALE

By Mary Graham Donner

QUEEN BEE'S TALK.

"I was telling people about myself, the other day," said Queen Bee, "but now I must talk to the children. Some of them have been asking questions and so have the workers, and there are a few questions I want to answer. "In the first place we must not hibernate or go to sleep for the whole winter, for bees do not do such lazy things. They know how to keep warm by eating food, the right kind of food. Ah! no, bees know how to look after themselves in the winter time.

"And so we must not only gather honey, but we must store it for the long winter ahead. That isn't my work, it is the work though of all the worker bees.

"And here in this hollow tree where our honeycomb is, we'll store our food and the young will be taught what they must do.

"They will be taught that they are the wax workers while the older and wiser bees will go to the flowers for the nectar and for the pollen.

"Another thing, we must never be lazy. There is a saying of how the little bee improves each shining hour. That is a true saying, and we must never let it be said of us that we have not lived up to that saying.

"No one can copy the wax comb we make. No one has ever been able to do the work we can do, and of that, we should be very proud.

"But it is not enough to be proud. We must make the pride we feel a true pride and not a false pride, a pride which we deserve.

"You see, bees, I am a Queen, but as I spend my time laying eggs and thinking of the bees, I am more of a mother than I am a queen. I care for little bees, I want to see that they come into this busy, interesting world, where bees live and work, and where they do things which no people have ever been able to copy.

"And we live and work and let others work and live. We do not destroy other animals in order to live, or other insects or other life at all. We make our own life, we get our own food from flowers and without robbing anyone, for the honey from the flowers would go to waste were it not for us.

"True, the humming birds and the butterflies sip of the honey from the flowers, but we live on the honey and make it last us through the whole winter.

"Yes, we're of no trouble and no expense to any other creatures. We make our homes, our own living, our own home and colony life.

"There are always thousands of worker bees who look after the home and there are the daddy bees who help to form new colonies or bee villages.

"The little bees come out in several days and they are fed milk jelly, a beautiful food, by the nurse bees. These little ones grow fast and in six days they begin to spin their cocoons. Then they take no food for almost two weeks and at the end of three weeks from the time I have laid the egg, the bee comes out and begins her real life, a little nervous at first, but soon strong and ready to work.

"I do not look after my children, for I am too busy seeing that many of them get the chance to come into this beautiful world, and there are nurses who will look after the little ones.

"For in the lives of the honey bees there is work for everyone, special work. The drones or Mr. Bees are in larger cells until they come out, and they take twenty-five days to come out.

"Yes, I have answered many questions that have been asked me by the little bees just coming into the world, but while I can buzz as I work, I cannot stop and chat. No, the honey bees must always work, always, always. Even the Queen has much to do."

Pa Should Be Glad.
Willie, aged five, had asked his mother for a second piece of pie at dinner.

"When I was your size," said his father reprovingly, "my mother allowed me to have only one piece of pie."

"Say, papa," rejoined the little fellow, "aren't you glad you board with us now?"

Both Ends Against the Middle.
Alice—Why do you always go to the show right in the middle of the picture?
Maude—Oh, because I can wonder how it will end, but also how it will begin.—Judge.

Live Stock Facts

SELECT BROOD SOWS IN FALL

Animals Should Be Fed in Manner Different From Way They Are Prepared for Market.

Early fall is the time of year when hog growers should select from the spring crop of pigs the sows to be used as next year's dams. From now on until the breeding season these sows should be fed in a manner different from the way they were to be fattened for market purposes. Good forage crops are practically a necessity. A self-feeder containing a good quality of thrashed oats makes good feed for these sows. In addition, they may be fed a small amount of corn and some shorts or middlings, and fish meal or tankage.

Careful attention should be given to the selection of sows for breeding purposes. First, they should be selected from a good-sized litter and from a litter whose dam has good suckling qualities. The brood sow should be

Profitable Type of Sow and Litter.

of a good rangy type, with a good, strong arched back, deep sides, rather thin neck, and not too broad in the face. By all means she should be a "good-footed" animal with good, strong legs and pasterns and rather upright standing from the ground.

The sow that takes plenty of exercise freely is the one that is most likely to make a desirable brood sow. Do not select a sow from a litter whose dam is cross and irritable. The sow should be gentle and easily handled.

Attention should also be paid to the eyes. A blind sow is likely to step on and injure her pigs. Careful attention to these details at this time will have a tendency to add to the number of pigs that may be brought to maturity.

CHILDREN TO STUDY STOCK

Wyoming Teacher Asks for Pictures of Different Breeds and Types of Animals.

Times have changed. The sequel of the incident, Mary had a little lamb, which was turned out of school, etc., is the desire of a Wyoming school teacher to display in the schoolhouse framed pictures of well-bred animals. In a request to the United States department of agriculture a teacher at Fremont county, Wyo., has asked for—and will receive at the cost of the prints—approved photographs of the different breeds and types of horses, cattle, hogs, sheep, and poultry.

The display of such pictures at schoolroom walls will do much, it is believed, to encourage the keeping and breeding of well-bred stock in the locality.

DISPOSE OF ALL POOR EWES

Animals With Bad Udders or Broken Mouths Should Be Discarded Before Breeding Season.

Ewes that have had udders or broken mouths, or ewes that have previously failed to breed, will make no money and have no place in the breeding flock. It is a sign of poor management where they are not marked that they may be identified and thrown out before the breeding season. Sometimes the end of a teat is clipped off in shearing, the shearer neglects to mention it, and unless a close inspection is made before breeding the owner knows nothing about it until lambing time. Such details do not escape the successful shepherd.

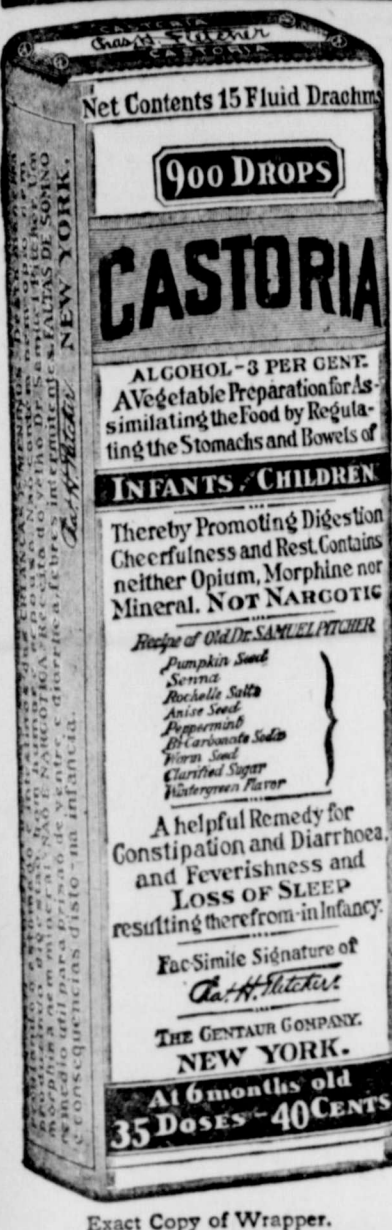

FEED THIN HOGS ON PASTURE

Several Combinations of Grain and Skim Milk Enumerated That Are of Much Benefit.

For thin hogs on pasture, try the rations: Equal parts of wheat middlings and corn; equal parts of ground rye and skim milk; equal parts of corn and ground oats; equal parts of corn and skim milk; equal parts of rye and ground oats; ten parts of corn to ground rye and one part of tankage.

IMPROVEMENT OF STOCK

Choose a breed and stick to it. Breed with the correct type in mind. Study pedigrees for inherited characteristics, relative merit and value. Keep your herd or flock free from disease. Develop the young animals and maintain the breeding animals through wise feeding and management.

CASTORIA For Infants and Children. Mothers Know That Genuine Castoria Always Bears the Signature of Dr. J. C. Hutchins. In Use For Over Thirty Years CASTORIA

CONDENSED CLASSICS THE SEA WOLF By JACK LONDON

Jack London was born with the love of adventure in his veins, at San Francisco, Jan. 12, 1876. He started his education at the University of California, but did not finish it there, for the strenuous life was to be his school, and all humanity were to be his teachers...

expected to be put aboard a passing vessel. But no! The Sea Wolf had other plans. She was added to the crew as Humphrey was, and likewise "for the good of her soul." Maude received the news in wonderment. What kind of a man was this mocking master of the Ghost? She was soon to find out. The cook had offended Larsen. A rope was coiled around the offender and he was cast overboard in the wake of the ship. A shark rushed for him and Larsen ordered him pulled in. Despite the maddened haste, the shark in the final rush tore away the foot of the victim.

Millions of Tiny Germs Cause Your Catarrh. Real Relief Comes Only by Cleansing the Blood of the Germs. You must realize that your blood is loaded down with catarrh germs, and these germs must be removed from your blood before you can expect real, rational relief from the disease.

FAMOUS OLD BOSTON ABODE MISTAKEN IN HIS SURMISE. Province House, Once One of the Most Famous Colonial Mansions, Has Been Partially Preserved.

There stands today on Bosworth court in Boston but a portion of the old Province house, a most interesting relic of colonial days; and the rest of the court is lined with modern office buildings. But in 1820 it was considered a very genteel part of town. Oliver Wendell Holmes lived in the old Province house for 18 years.

He Was Rich. Deception is a bad policy during the courtship days, since it is so often followed by the storm of disclosure. This was happening in the Smith household. "You always seemed to have plenty of money before we were married," flibbed Mrs. Smith.

Mr. Brown Somewhat Hasty in Blaming the Gramophone for Those Unearthly Sounds.

Perfect peace reigned in the Browns' household. The head of the family, his day's work over, was reading, in blissful anticipation of the evening meal which Mrs. Brown was busy preparing in the kitchen.

A Self-Starter. "Are you an expert salesman?" asked the manager. "Can sell anything from an ice pick to an automobile. For instance, that car of yours outside—" "Yes, yes."

The High Price of Sugar makes one welcome foods which are rich in natural sweetness. Grape-Nuts - the ready-cooked cereal. Requires no added sweetening, for it contains its own pure grain sugar, developed from wheat and barley by twenty hours' baking.

THE keen eyes of Wolf Larsen, master of the sealing schooner Ghost, bound for Japanese poaching grounds, spotted the bobbing head of Humphrey Van Weyden amid the waves of San Francisco bay, into whose waters Humphrey had been thrown as a result of a shipwreck.

Rescued, he faced his rescuer with thanks and a request to be put ashore. The skipper eyed him curiously. "What do you do for a living?" he asked. "I—I am a gentleman," Humphrey stammered. "Who feeds you?" "I have an income."

And thus Humphrey passed into the servitude of Wolf Larsen, the Sea Wolf. His blinking eyes, half revealing and half concealing his terror, surveyed his master and thus appraised him: "Massive of build, like a huge gorilla; with a strength, savage and ferocious; features of no evil stamp; eyes of baffling protean gray, sometimes as chill as an Arctic landscape, sometimes all aglow with love-lights—intense, masculine and compelling— which at the same time fascinate and dominate women until they surrender in a gladness of joy and of relief and sacrifice."

His crew, the mighty will which engined Wolf Larsen, was short. "Life is a mess," he declared. "The big cat the little that they may continue to move; the strong eat the weak that they may retain their strength. The lucky eat the most and move the longest, that is all."

Like Humphrey, she came to the Ghost from the sea, saved from a wrecked liner. Like Humphrey, she

YOUR GROCERY ORDER

Will be appreciated if placed with the Sanders Grocery Company. We are here to serve you in a manner acceptable and fair to both of us. We appreciate the many new customers that are coming to us weekly, and will be glad to serve you, if not already buying your eats from our store. Prompt deliveries, Courteous treatment and fair profits.

Sanders Grocery Company

KEEP YOUR MACHINERY UNDER COVER
We recommend by all means that you arrange for your header. A good load of wheat will probably pay for the shed and it would last many years and save you the price of at least one new header in that time.

STRIBLING & COFFEE

CONFECTIONARY

The nicest place in town to keep cool and get cream, drinks and cigars. We invite you or your party of friends to visit us.
OPEN UNTIL 10 P. M.

HIGHWAY MEETING SEPT. 20.

The Abo Pass Highway Association which meets at Enid, Okla., Monday, Sept. 20th, promises to be one of the largest Road Conventions ever held in Oklahoma. This meeting is called for the purpose of designating the route of the Abo Pass Highway from Enid to Kansas City and also to formulate plans for thoroughly advertising the road to all tourists to California. The Highway has been thoroughly marked from Belen and Socorro, New Mexico to Enid. The marking crew will start from Enid immediately after the Convention and mark the Highway the Kansas City. Practically every city from Kansas City to Belen have promised to have representatives at the meeting. In the evening, the delegates will be the guests of the Enid Chamber of Commerce at a "Good Roads" dinner. Gov. Robertson will be the principal speaker of the meeting and will be assisted by several other prominent Good-Road Men.

The Abo Pass Highway is the newest and shortest of the trans-continental highways. It starts at Kansas City and is two days shorter to its western terminal than any other existing route. At Belen and Socorro it connects with the National Old Trails and the Ocean to Ocean Highway. It crosses the Rockies through the Abo Pass, from which the Highway derives its name. The Abo Pass has the lowest altitude of any pass over the mountains and is free from snow at all seasons of the year. The sponsors of the Highway are very confident that this Highway will prove one of the most popular of the tourist routes to California. Plans are being made for a race between a popular make of cars running on the time of the Santa Fe Limited, which will demonstrate the shortness of the Highway and the conditions which will make it popular for tourists.

What could be more appropriate than a ring of solid gold, set with the birthstone for the month? Especially do we recommend the well known W-W solid gold gem-set rings. The stones are pure and flawless—emeralds, rubies, topaz, aquamarines—all the precious and semi-precious stones—and in settings of unequalled beauty and correctness. W-W Rings have established a quality standard which is known throughout the United States. They are famous among jewelers as "the rings in which the stones do stay."

W-W Rings
Come in today and let us help you make your selection. We can tell you the correct birthstone for the month and we will take pleasure in showing you as fine an assortment of rings as you could wish to see.

THE BEST ADVERTISEMENT.
The best advertisement any merchant can have is a satisfied customer. No greater recommendation can be given an article than the following by E. B. Milburn, Prop., Guion Drug Store, Guion, Ark. "We have sold Chamberlain's Cough remedy for years and have always found that it gives perfect satisfaction."
Send the CHIEF to your friends and Relatives, they will appreciate it.

Why man—
we made this
cigarette for you!

CAMELS fit your cigarette desires so completely you'll agree they were made to meet your taste!

Unique flavor, fragrance and mellow-mild-body due to Camels quality and expert blend of choice Turkish and choice Domestic tobaccos are a revelation! You will prefer the Camel blend to either kind of tobacco smoked straight!

With Camels you can go the limit without tiring your taste. They leave no unpleasant cigarettery after-taste; no unpleasant cigarettery odor!

To get a line on why Camels win you so completely compare them puff-for-puff with any cigarette in the world at any price. You'll prefer quality to coupons or premiums!
