The girl dropped into a chair and buried her face in her hands.

"I can't," she whispered. For some time she remained in the same attitude, while her mother studied her silently. At length the girl lifted herself erect.

"I can't explain," she broke out, and I suppose you're thinking all kinds of things. I can't help it if you do. You'll have to give me the money I need, if you want me to marry Marc. PUBLIC ROAD CONSTRUCTION

About One-Half of All Highways Being Built Are Being Aided by the Government.

(Prepared by the United States Department of Agriculture.) What the new federal highway ap

propriation to be expended under the direction of the bureau of public roads, United States Department of Agriculture, will mean to the country is accurately gauged in a synopsis prepared by the bureau, showing the use to

construction of a Rock Road.

which the \$275,000,0000 previously appropriated by congress has been put Up to December 31, \$212,077,246 had been put to work in projects either entirely complete or under construction To match that amount the states ap propriated \$2\$5,379,312, making a total of \$497,456,558.

If placed end to end the roads to be paid for by this money would encircle the earth at the equator and extend as far as from New York to San Francisco on the second lap. The total mileage of roads under construction and completed, the department's records show, was approximately 27,000 miles. Of this milage 9,555 miles was in projects entirely completed. The balance of 17.445 miles was in projects which were still under construction out reported 69 per cent complete October 31. In those projects there was the equivalent of 12,000 miles of completed roads, so that the completed on, "I haven't got it. I don't own this road to date was more than 21,000 miles, or nearly enough to encircle

Prior to five years ago the federal government took no active part in the road construction of the country. Today about one-half of all roads under construction are being aided financialconstruction is subject to inspection and approval of federal engineers.

APPROVE HIGHWAY PROJECTS

According to Announcement of Bureau Every Type of Construction Is Represented.

Ninety-three road construction proj. ects in 28 states were approved for federal aid during October by the bureau of public roads, United States Department of Agriculture, according to a compilation just made public. Virtually every type of construction is represented in the approved projects.

The states in which these projects were approved and the number of projects approved in each state follow: Alabama, 3; Arkansas, 3; California, 2; Colorado, 1; Florida, 1; Idaho, 1; Kansas, 8; Maryland, 5; Massachusetts, 2; Minnesota, 15; Mississippi, 6; Missouri, 4; Montana, 1; Nebraska, 2; Nevada, 1; New Mexico, 2; North Dakota, 2; Ohio, 2; Oklahoma, 1; Pennsylvania, 5; South Carolina, 5; South Dakota, 1; Texas, 3; Utah, 1; Virginia, 12; Washington, 1; Wisconsin, 2, and Wyoming, 1. The longest single stretch of rocdway approved in one project during the county, Misssissippi, 35.3 miles long; remembered how my folks used to rethe shortest, 0.9 mile, was a brick road in Stark county, Ohio,

GOOD USE FOR SUBSTITUTES

Gravel and Macadam Can Be Employed Until More Durable Type of Road Is Built.

It will require several years for the United States to carry out the plans for a comprehensive system of hardsurfaced highways. Until such time as the main highways can be built of the durable type, gravel and macadam may be used as substitutes, but what the whole country wants and demands are real honest-to-goodness good roads.

One of Largest Industries. Road building in the United States s one of the nation's largest industries, a million men being employed last year throughout the construction

season at building or repairing the country's highways. Asphalt Streets in Majority. Virtually 61 per cent of all the municipal streets in the United States have an asphalt top. As a consequence of heavy truck traffic many of these

\$525 IN PRIZES FOR THE BEST RHYMES

A new contest is just being started which will interest every woman and girl who reads this paper. Any woman or girl can enter this Contest-anyone can win! All it is necessary to do is to write a 4-line rhyme on Dr. Price's Phosphate Baking Powder, using only the words which appear either on the label of the Dr. Price can (front and back) or on the printed slip which is found in each Dr. Price can.

Isn't that easy? Everyone likes to make rhymes and here is a chance to spend a fascinating hour or two writing rhymes on this popular Baking Powder and perhaps winning a substantial prize for your efforts.

59 CASH PRIZES For the rhyme selected as best a prize of \$100 will be given; for the second, third and fourth best rhymes prizes of \$75, \$50 and \$25, respectively will be given. And besides these prizes there will be 55 prizes of \$5 each for the next 55 best rhymes. With such a long list of prizes as these, it would be a pity not to try your hand

Here is a 4-line rhyme as an example:

Two teaspoons of this powder make Biscuits, muffins, pie or cake, The Price's Co., guarantee No alum in the cans to be.

As Dr. Price's Phosphate Baking Powder sells for only 25 cents a 12 can at grocery stores, some rhymes could play up the remarkable economy of this pure and wholesome baking powder which contains no alum.

All rhymes must be received by May 1, 1922. Only words appearing either on the label of the Dr. Price can (front and back) or on the printed slip contained inside the can may be used. These words may be used as often as desired, but no other words will be allowed. If you haven't a can of Dr. Price's, a copy of the label and the printed slip will be sent to you free upon request.

Any woman or girl may enter the Contest, but only one rhyme from each will be considered. ties, the full amount of the prize will be given to each tying contestant. Write plainly on only one side of a sheet of paper and be sure to give your name and address.

Send your rhyme before May 1st to ly by the federal government, and the Price Baking Powder Factory, 1007 Independence Blvd., Chicago, Ill .-- Advertisement.

IT'S MOTHER'S DAY

Next Sunday. We wonder what your attitude toward Mother's Day? To us it is the most beautiful of our holidays, the one that is dedicated to the one person in all the world. We have all felt the hallowing touch of a mother's love, it is a love that is awfully near like the divine. To you who have had the companionship of a mother all your life, ever since you can remember, the word holds a meaning all its own. Mother's prayers, her hopes and her sacrifices, have all done their little share, making you he man or woman you are today. Now make this one day, of the whole year, that is dedicated to her alone, a day she will remember The flower of manhood was transas one of the happiest she ever spent. And if Mother has gone on to the land of rest, make the day a happy one for somebody's mother, in loving remembrance of Her.

No matter what kind a carnation you are wearing next Sunday, whether a red one, if Mother is with you, or a white one, if Mother has gone on beyond, wear it with a loving respect for Her, the best friend and comrade you ever had.

It was accepted that the play-the last of the Shakespearean works-was not written by him in its exact final form, but was somewhat modified by Burbage and his company in preparing it for the stage. This, if done, probably was with Shakespeare's consent.

When received in large numbers these wethers usually sell at about 60 per cent of the price paid for sheep wethers.

The reduced price of goat meat is doubtless attractive to the consumer, whether he knows what he is getting or thinks he is buying mutton. According to Farmers' Bulletin 1203, The Angora Goat, recently issued by the United States Department of Agriculture, goat meat is usually superior to mutton that can be bought at the same price. Some consumers say that they are able to distinguish it from lamb and mutton by a characteristic sweet-

The dweller in the country town may be as poorly off from a financial standpoint, but he is rich be yond comparison in his possession of the free gifts of nature which alone tend to relieve the human mind of the bitterness and discomfort of overcrowded environment.

Benefits of Painting.

Painting adds charm to the environment of the farm home. As the leaves unfold and the blossoms burst forth the buildings need to conform to the surroundings. But this is not all. paint preserves wood, keep out moisture, and arrests the burning rays of summer heat. A good covering of paint will prolong the life and utility of a building to a considerable extent. It will also add much to the attractiveness of the farmstead and show neighbors that the farm buildings are not being run down.

ARENA BATTLES FOR LEGION

Castillian Matador, Ex-German Fighter, Stages Bloodless Conflicts With Angry Bulls.

To show that bull-fighting is really as simple, and as bloodless, and as refreshing as a quiet game of golf, Senor Charlot Molino, famous Castillian

matador, has been staging arena battles all over the country for the benefit of the American Legion. Molino is an ex-German fighter. besides being a bull-fighter. When he goes into the ring with

his fire-breathing animal, he carries a small red cloth to make the animal wroth. He carries no sword and trusts entirely to his adroit footwork to save him from embarrassment at the horns of the bull. He wears a genuine costume of red velvet trimmed with gold, valued at \$2,000.

The Legion has picked up the idea of "bloodless bull-fighting," and recently staged an encounter in the Jersey City stock yards with the matador armed with a fence picket. Although the matador had to jump the fence on several occasions in order to keep the true "bloodless" nature of the affair, he succeeded in putting on a good

Magnetizing Steel.

Magnetism is put into steel or fron by induction from some other magnet or by electric action. If a piece of steel is brought into the field of a magnet it becomes magnetized, and if it is touched or stroked with one end of the magnet it retains this magnetism. Another method of magnetizing is to wrap the steel in a coil of wire, through which is passed an electric current. The steel gradually and slowly loses its magnetism, particularly if it is heated to a high temperature or is subjected to mechanical treatsympathy and abundant good ment such as hammering, twisting, etc.
