

CONTINUED MILD AND FAIR IS FORECAST FOR COUNTY AREA

W. H. Cox, 85, Ex-Rancher, Dies In Cisco

W. H. Cox, 85, pioneer West Texas rancher, died early Sunday in a Cisco hospital after a month's illness.

His daughter-in-law, Mrs. Ollie Cox, said Cox was stricken when he learned that his grandson, Billy Cox, died in the wreckage of his private plane near Sweetwater Dec. 28.

Cox's plane crashed after he argued at length with friends and Civil Aeronautics Administration officials by radio about crashing; his plane.

W. H. Cox had been in a coma in the hospital for 10 days. He had been living with a daughter, Mrs. C. P. Chick, in Cisco six months.

He was born Oct. 24, 1867, in Youngport in Bell County.

He is survived by two sons, Ollie Cox of Sweetwater and Emerson Cox of Mertzon; four daughters, Mrs. Richard Beare of Eldorado, Mrs. Chick, Mrs. J. M. Nance of Fort Worth and Mrs. W. W. Wellbourne of San Angelo; 14 grandchildren and 16 great-grandchildren.

Funeral services were held at 2 p.m. Monday in Mertzon Church of Christ. Burial was in Mertzon.

Jerry Bolknap Is Rushed To Dallas Hospital Tuesday

Jerry Bolknap, 11-year-old son of Mr. and Mrs. J. T. Bolknap, who reside on Eastland Hill, Ranger, was rushed to the Baylor Hospital, Dallas, in a Morris Funeral Home ambulance this morning.

The young Rangerite had been taken to the West Texas Clinic, Ranger, but the seriousness of his illness made it imperative that he be rushed to Dallas.

The youngster has been suffering from internal head injuries as a result of having been struck by an automobile four years ago. He has received treatment in Ranger on numerous occasions, and has been in the Dallas hospital for the same ailment on three other occasions.

His condition has been reported as critical.

PEAK POLIO YEARS
Join the MARCH FOR DIMES

Continued fair and mild weather was forecast for the Eastland County area Tuesday and Wednesday by the U. S. Weather Bureau.

Thus residents were assured that, for the next few days at least, they'll continue to enjoy an unusually warm winter, oddly following the pattern of a year ago.

The mercury got up around the 80-degree mark over the section Monday. And warm temperatures were recorded over most of the state.

At Abilene, at 86 degrees Monday afternoon, was reportedly the "hottest city in the United States." San Angelo recorded a high of 85 degrees Monday. Junction also had 85. And Wink's high temperature was 83 degrees.

According to the Tuesday a.m. forecast, the mercury is again due to soar into the upper 70s and lower 80s this afternoon. It'll be a little cooler tonight, with the nocturnal low predicted in the mid-40s.

For Wednesday, it'll be somewhat cooler with the day's high around 70—about 10 degrees under the afternoon high readings for Monday and Tuesday, weather men said.

The unreasonable climb of the mercury at Abilene and other points Monday posted the second highest mark for any January since the weather bureau started keeping records in the area in 1886.

The highest January mark in this section was 90 degrees recorded on Jan. 31, 1911.

Monday was the hottest Jan. 26 in the weather bureau's 67 years of operation. Previous high for Jan. 26 was 82 degrees—in 1912.

The forecast for West Texas: Clear to partly cloudy, colder Wednesday and in Panhandle a w/d South Plains Tuesday.

Charles Burnett Now Stationed At Kingsville

KINGSVILLE, Tex. (FHTNC)—Recently reported to the U. S. Naval Auxiliary Air Station here was Charles R. Burnett, ship's serviceman third class, USN, grandson of Mr. and Mrs. B. W. Burnett of 402 South Oak St., Ranger.

Kingsville is recognized as the home of Naval air jet training and training center for many of this country's Navy fighter pilots.

Kingsville, located in South Texas, a few miles inland from the Gulf of Mexico, trains pilots in TV-1 and TV-2 jet trainers, F8F Bearcat fighters, F6F Hellcat fighters, and TRM torpedo bombers.

In addition to training naval cadets and student officers, many foreign students from nations participating in the North Atlantic Treaty Organization receive instruction here.

SISTERS WILL STAR AT FORT WORTH RODEO

The three Hereford sisters and the Herefords they have trained—two bulls and a cow—will be featured in the world's greatest indoor rodeo at the Southwestern Exposition and Fat Stock Show in Fort Worth, Jan. 30 through Feb. 8. The three girls—including twins who are still in high school—live at Campbell in Hunt County. The Herefords do just about everything that a trained horse can do.

Kokomo First Community To Fill Dimes Quota

The citizens of Kokomo won the distinction today of being the first community in the Eastland County area to complete their 1953 March of Dimes drive—and to successfully fill their quota.

Mrs. J. A. Bates of Ranger, chairman of the county fund-raising effort, reported early today that citizens of Kokomo had raised their quota—\$50—under the leadership of Mrs. L. R. Higginbotham.

"Time is getting short," Mrs. Bates said, "and we hope all other community groups, clubs and organizations will get into action and complete their fund-raising activities before the end of the drive on Jan. 31."

The county's quota in the polio drive has been set at \$1 per capita. Funds are very badly needed this year, since the county polio organization which finances all-important treatment and care of cases in the area, is \$10,400 in debt as a result of the terrific polio epidemic of last year.

A total of 13 cases of polio, most of the victims of the dread crippling being children, were reported in Eastland County last year.

"You can help, too!" is the slogan of the 1953 March of Dimes drive.

Pay Your Poll Tax Now; Jan. 31, Is Last Day

If you have not paid your poll tax, and plan to vote this year, you must do so this week, January 31, is the deadline.

Of course, there is no general election this year, though in all probability there will be several elections. We have a city election coming up within a few weeks, and with building and growing, expanding and enlarging on every hand, a bond issue might develop before the close of the year. School elections may be called most anytime, so just to be safe buy that poll tax right now. Saturday of this week will be your last day.

Moving Box Car Proves To Be A Real Fire Hazard

When you build a fire in a box car be sure the car is not moving, otherwise you may find it difficult to land.

During a recent cold snap a "drunk" discovered that the box car he was in was no longer on a West Texas siding, but right in the middle of a rapidly moving freight train. It was cold, so he decided to build a fire out of loose straw. It didn't take long for the fire to spread, and in minutes the car was burning. The fellow saw what was happening and it had a very sobering influence, he said.

There he was in the car, and the car burning. Also it was moving at the rate of about 60 miles per hour. Jumping would have meant instant death. But luck was with him, for as the train passed through Olden, a citizen saw there was the man's predicament. He jumped into his car and headed for Ranger, and arrived in time to flag the train. The man in the car lost no time getting out, and started running. Others gave chase, and he was arrested.

He was broke of course, but is now in the Eastland county jail "laying out" his fine.

Final Rites For A. C. Underwood Held Today

Funeral services were held at 2 p.m. Tuesday, January 27th for Andrew Conway Underwood in the Church of Christ at Carbon. W. E. Moore, Church of Christ minister, officiated.

Mr. Underwood died Sunday in the Gorman hospital following an illness of several days. He was born October 19, 1887 at Duster.

Survivors include his wife, a daughter, Mrs. Jack Stubblefield of Bartlesville, Okla., and a son, Dean of Morenci, Ariz., two sisters Mrs. Etta Finley, Carbon, four brothers, L. C. J. N., Mack and Jim Underwood, all of Gorman.

Pallbearers, nephews of the deceased, were Homer, Elmer, and Charles Underwood, Almus, and Heulen Lasater, Billy Jack and Charles Harrison.

Habeas Hearing For Brown Set Today At Dallas

A habeas corpus writ hearing for Donald Hawkins Brown, charged with the gun-torch slaying of Joe Campbell, Dallas finance company collector and son of Mr. and Mrs. Charles A. Campbell of Ranger, was scheduled for this morning at 10:30 a.m. today in Dallas.

The setting was made for Judge Henry King's criminal district court by Criminal District Judge Robert A. Hall. Judge King has been ill for several days, but is expected back at work this week.

Brown, a former bus driver, was indicted in a special report Thursday by the Dallas County grand jury.

He is charged in the New Year's Eve death of Campbell, who had been trying to locate the red-haired Brown to collect three long overdue payments on the latter's Buick sedan. Campbell was beaten, shot four times in the head with a .25-caliber revolver, and his body drenched with gasoline and set afire in a business car owned by the finance company in the 3400 block of Gunter in a South Dallas residential area.

Grand jury action Thursday deprived Brown of a scheduled hearing in justice court which would have given his attorneys some idea of the state's evidence against him.

Rotarians Hear CJC Singers At Monday Meeting

Ben Hamner had the program at the Rotary Club Monday, and he brought over a musical program from Cisco Junior College. Robert Clinton, Music Director for the college, had his Beauty Shop Quartet, and those girls are really developing into good singers. The quartet is composed of Misses Gene Huestis, Barbara Shafer, Ruth Beauty and Patsie King.

Their program consisted of three songs, though later they were accompanied by Calvin Grung on his steel guitar. He also rendered two instrumental selections.

Jack Chambliss, voice teacher at the college, rendered two baritone solos.

The program as a whole was exceptionally good.

Officers For County Stock Show Named

Officials for the 1953 Annual Eastland County Livestock Show to be staged at the old airport near Eastland on March 27 and 28 have been named, according to C. M. McCain, general superintendent of the show.

N. B. Eaves, Carbon and F. L. Spurlen, Eastland, were named as superintendent and assistant superintendent of the swine division, while Marshall Berry, Carbon, and Lloyd Freeman, Pioneer, were chosen as superintendent and Assistant superintendent of the dairy cattle division. Both Berry and Freeman are prominent dairymen in the county. McCain, an Eastland rancher, said.

Henry Fry, Cisco, Polled Hereford breeder, and R. E. Hartell, Ranger, were named to have charge of the beef cattle division. Hartell is a breeder of Hereford cattle. Both men served in the same capacity in the 1952 show.

Sheep and goat division superintendency went to Homer Boyd, Cisco while H. C. Wilkerson, Ranger, was selected as assistant superintendent. Both men are sheep and goat ranchers.

Boyd Hilley and Ed Harrison, Gorman, were selected as superintendent and assistant superintendent of the boys and girls Fat Stock Division. Both are prominent livestock men in the southeast part of the county.

The 1953 show is expected to be the equal if not better than the show held last year according to Sutton Crofts, Cisco, president of the Eastland County Livestock Raisers Association, sponsoring organization.

Maverick Girls Drop Two Games At Rising Star

The Rising Star basketball tournament, held in that city last week, didn't help the Mavericks (girls) very much as they dropped both games.

The first game played Friday night between Eastland Mavericks and the Rising Star sextette, resulted in a final score of 49-25 in Rising Star's favor. Norman Gene Robinson won high score with 16 points.

Saturday morning the Mavericks went back and this time to clash with the DeLeon group. Again they were defeated to a tune of 36-15. The girls put up a good fight, and played high grade ball, but they were unable to win.

VFW Head Is Visitor Here Mon. Morning

Monday forenoon the Karl and Boyd Tanner Post, Veterans of Foreign Wars, was agreeably surprised by a one hour visit by V. F. W. Commander-in-Chief, James W. Cothran, of Bishopville, S.C., and his personal aide, J. C. Lonon, of Kilgore, Texas. T. C. Commander-in-Chief is touring the United States and was on his way to Abilene when he and his aide stopped in Eastland.

Seven V.F.W. members visited the Abilene Post last night where they witnessed a ritualistic initiation of eight new members and heard an inspiring patriotic address by the Commander-in-Chief.

New Gas Well Is Brought In Near Pioneer

A new gas well has been drilled in Eastland County.

It's the No. 1-Armstrong, a wildcat located four miles north of Pioneer, bottomed at 3,802 feet, which has been completed by Ralph Lowe of Midland.

The gasser is located in the Sam Damon survey.

The No. 1 Armstrong was gauged at 1,475,000 cubic feet of gas daily. The operator set the casing at 3,076 feet.

Three Billions In Federal Taxes Is Texans' Share

Texas taxpayers would be required to pay out approximately \$3,355,664,800 in federal taxes as their share of the cost of the federal spending program of \$76.6 billion proposed by former President Harry Truman for the fiscal year 1953-54. This statement was released by the state and national affairs department of the West Texas Chamber of Commerce.

The WTCC pointed out that the \$3,355,664,800 which would be borne by Texas taxpayers to support the proposed budget submitted by Truman to the new Congress is more than seven times the amount of taxes collected by Texas last year to finance the entire State government. Total cost of Texas government was \$650 million, of which \$185 represented federal grants.

Rotarians Hear CJC Singers At Monday Meeting

Ben Hamner had the program at the Rotary Club Monday, and he brought over a musical program from Cisco Junior College. Robert Clinton, Music Director for the college, had his Beauty Shop Quartet, and those girls are really developing into good singers. The quartet is composed of Misses Gene Huestis, Barbara Shafer, Ruth Beauty and Patsie King.

Their program consisted of three songs, though later they were accompanied by Calvin Grung on his steel guitar. He also rendered two instrumental selections.

Jack Chambliss, voice teacher at the college, rendered two baritone solos.

The program as a whole was exceptionally good.

The Panhandle - Plains section of Texas has this country bested in more ways than one. We know they have bigger and better sandstorms than we do, and according to the press, they get a lot more sleet and snow. Now we are not kicking about that, for they are as dry up there as we are, and they really needed the snow. When that snow melts they will have had the equivalent of a one inch rain—the kind of rain that puts moisture in the ground, and makes crops grow.

Sometimes we wish we might bid in about a 30-inch snow. It would be cold and sloppy for a few days, but after that we might get up enough courage to plant a few seeds.

As we study our present situation we find it hard to see the "funny side," yet there must be one. We can be thankful for one thing, and that is, we do not live in a swampy country where it rains all the time. We much prefer to breathe sand than water, for you will last longer. Rains and floods will kill one almost instantly, but so far we have never heard of a sand storm killing anybody.

They may beat your hide down to the core, and your eyes will finally look like a couple of blood spots, but you won't die. Cattle will get so thirsty they will eat cactus and prickly pear, but they live over it. Horses get so thin you can read a newspaper through them, but they manage to hold on. And so far it has never failed to rain just before it was too late.

Also we notice that when you find a real double-distilled Texan, he is a fellow that a drouth will not run out. Some of the tenderfeet, with little or no experience, will leave the country after it fails to rain for two or three months, but these old pioneers just keep hanging on. If they run out of groceries they merely take up a notch in their belts and whistle La Paloma. As long as livestock have a few prickly-pears and tumble weeds, they have nothing to worry about.

And after thorough examination we find the pioneers are the winners. They stay here and freeze and starve it out, but we notice the law of averages has taken care of most of them. By the time they get ready to retire they usually have a pretty good nest-egg. They own land, cattle and other properties, and are as independent as a hog on ice. Whereas, the tenderfeet, who got scared, and "went back east," is still down there making a share crop, if the chills and chiggers haven't killed him.

That's why we do not fear drouth. Of course we dislike them very much and at times we get a little jittery, but we have noticed that the fellow who hangs on always is the winner.

We still have plenty time for a rain. It is not too late to expect a good crop this year, and this is just what we are looking for. We have quite a little moisture in the ground at this time, and some farmers are sowing grain. It will not stay dry forever, but in due time it will rain.

Roving Reporter In Ozarks—

Arkansas Hill Folk Going Modern, Too

By IZZY DIZZY
The Roving Reporter

LITTLE ROCK, Ark., Jan. 26—Over the weekend this vagabond correspondent motored over into the Ozark hill country for a brief sojourn (defined in terse Americanese as "Howdy—Nice Dinner—So Long!") with our Uncle Zeb, Aunt Hattie and their 28 children. Which, at the outset, reminds us that Zeb had a good year in 1952 and bought his ever-loving wife a brand, spanking new adding machine for Christmas.

There's plenty of progress during this modern era—even up in the hills.

After dinner we were sitting on the rickety front porch basking in the warm rays of the Sunday afternoon sun when Uncle Zeb got sorta confidential with this kinsman. "Izzy," he confided, "scouting his bailing-wired rocker closer to my apple box, 'you know folks 'round here are a-spreadin' an awful rumor 'bout me. Why, they're a-sayin' I'm the laziest critter in town.'"

"That ain't so!" I exploded, filled with sympathy. "That sure ain't so—no with 28 children, you ain't."

Our confidential confab ended right there, though, because about that time a gawky hillbilly youth strolled leisurely up to the tumbled-down porch.

"Say, feller," Uncle Zeb called to him. "Yourse face looks familiar, Sure I ain't seen you b'fore?"

The youth grinned. "Sure ya have, paw. Why, 'course ya have—I'm your 19th child!"

Old Zeb spat out a stream of amber fluid and scratched his head. "Nineteenth child?" he exclaimed. "Th-en : "No wonder I didn't recognize you, son—I never did have much truck with distant relatives!"

Moving Box Car Proves To Be A Real Fire Hazard

When you build a fire in a box car be sure the car is not moving, otherwise you may find it difficult to land.

During a recent cold snap a "drunk" discovered that the box car he was in was no longer on a West Texas siding, but right in the middle of a rapidly moving freight train. It was cold, so he decided to build a fire out of loose straw. It didn't take long for the fire to spread, and in minutes the car was burning. The fellow saw what was happening and it had a very sobering influence, he said.

There he was in the car, and the car burning. Also it was moving at the rate of about 60 miles per hour. Jumping would have meant instant death. The man in the car lost no time getting out, and started running. Others gave chase, and he was arrested.

He was broke of course, but is now in the Eastland county jail "laying out" his fine.

Major Accidents Take 1,550 Lives In Nation In 1952

Catastrophe accidents, defined as those killing five or more persons—claimed approximately 1,550 lives in the United States last year about 250 less than the 1951 total, Metropolitan Life Insurance Company statisticians report.

Most costly in loss of life was the series of tornadoes which ravaged the Mississippi Valley on March 21st and 22nd and caused 229 deaths—the heaviest toll in a single disaster since 1947. Six other accidents taking 25 or more lives in 1952 were:

Military plane crash near Moses Lake, Wash., Dec. 20, 87 lives;

Military plane crash at Tacoma, Wash., Nov. 28th, 37;

Scheduled passenger plane crash in Elizabeth, N. J., Jan. 28th, 33;

Scheduled passenger plane crash in Elizabeth, N. J., Jan. 22nd, 30;

Nonscheduled passenger plane crash near Los Angeles, April 18th 29.

Collision of two buses near Waco, Tex., Aug. 4th, 28.

The improved record for catastrophes in 1952 as compared with 1951 was traceable largely to the marked drop in the number of lives lost in railroad and civil air accidents, according to the statisticians.

The Peacock Path
By Edwin Rutt Copyright 1952 by NEA Service, Inc.

THE great wrought-iron gates guarding the entrance to Windsor opened into a straight tree-lined driveway almost broad enough to be called an avenue. Far down at the end of a red-and-yellow tunnel formed by interlocking branches and Autumn leaves I could see the house.

She said into my ear, "Hi! I hope you are Jim Orth, or I'm going to look darn silly."

It was a very big house, long, low-lying, beautifully-proportioned. It looked solid and substantial, as if the builders—carefully placing brick upon brick—had intended it to endure for centuries. Centuries had not yet passed but the house gave the impression of beginning to grow old gracefully. Ivy had crept halfway to the roof. The shutters were pale blue, the front door with its huge antique knocker a shade in between white and cream.

The driveway ran in a circle before the door. Going around this I saw on my right an expanse of lawn which seemed to run, sloping upward slightly, to bluffs overlooking Long Island Sound. Under and around a green-and-white garden umbrella on the lawn was a group of people. I braked, glad that I had hired this smart blue convertible for the occasion.

There came a cry, "Hello, there, Jim," in a clear strong voice. A tall blonde girl detached herself from the crowd under the umbrella. She ran across the lawn. She could take long strides with those long, slim, tanned legs. The legs were highly visible, because she wore white shorts.

I noted unsuspectingly her good shoulders and, presently, wide gray eyes with a hint of the

tawny in them. That was all, before she swooped upon me and threw both arms around my neck. To my regret, she omitted a kiss. But she was satisfactorily close.

She said, into my ear, "Hi! But I hope you are Jim Orth, or I'm going to look darn silly."

I got myself together and reassured her. She let go of me, stepped back. Her nose was cute, with a splatter of freckles across its bridge. "All right, Jim. You know the routine. Remember—Bernuda and my name's Sally, Sally Cravath."

"I've got it straight," I told her. She took my hand; began leading me. "Good. Now come along and meet the people."

I WENT, wishing fervently that that lovely, warm greeting had not been a complete phony—just a gag to explain my presence at Windsor, the magnificent home of Mr. Marston Cravath, stockbroker, socialite and sportsman.

Marston Cravath, Marney, as he was known to his intimates, arose as Sally brought me up. The movement disclosed a chocolate-brown dachshund, with a back like a shoshibin, which had been curled at his feet. The dachshund gave my ankles a brief sniff and walked off disdainfully.

I'd met Cravath off the record the day before, when he came to my cubbyhole office in the West Forties. Now no hint of recognition showed in his sea-blue eyes. He

was, I thought, a fair actor. Likewise a fine figure of a man. Well over six feet and built like a light heavyweight. But he'd gone to fat a little, the way former athletes often do, and his strongly-chiseled face was a mite too florid. I'd already figured him for around 50.

"So you're Sally's Bermuda discovery," he said, smiling. "Well, we're glad to have you." Running to fat or no, he still had a grip like a beartrap.

"Only one of her discoveries. I'm afraid, sir," I said. "And I was in a bad way when she discovered me. On a lonely road, with a flat bike tire, and no pump. But she had a pump."

"Just a flagrant pickup, Uncle Marney," Sally laughed. "Well, now for the rest of these characters."

I MET in quick succession Dolly Dumont, a fading redhead with slanty green eyes, and a languorous brunette whose name was Eve Wheeler. Then Jack Dumont, thickset, mobile-faced, visibly balding, and obviously belonging to the redhead. The last member of the party was Ames Warburton, a slight yellow-haired guy in his early thirties.

Sally couldn't have been more than 24. I found my eyes straying involuntarily to her left hand. It was bare of diamonds and platinum bands—and why I should have derived comfort from the observation I didn't know. I had a job to do.

"Well, that's that," Sally said. Her tone was just right, friendly, casual, and as if we were old pals.

A little Filipino in a white jacket was circulating with a Martini shaker. He brought me a drink as Sally sat me down in a chair beside the dark languid Wheeler woman.

"Watch yourself, Jim," Sally said. "Eve's a man eater."

Momentarily the Wheeler woman ignored both of us. She held out an empty glass to the Filipino who stood, shaker poised, a grin on his face. "While you're at it, Manila." Then, to Sally, "Run away, small fry. I won't hurt Orth, much." Sally disappointed me by running. She dropped onto the grass

New Model Pigs Give More Meat, USDA Reports

Leaner pork chops may be in the cards for meat consumers. New hog grades adopted by the U. S. Department of Agriculture for pigs are designed to lop off the fat.

The National Live Stock Producer says the new emphasis in hog production and marketing will be on lean, lardless pigs. The development of "meat-type" hogs and higher quality pork products is a result of a shift in consumer preference, the magazine said.

The basic problem facing the farmer, according to the magazine is to raise a 200 to 230-pound barrow that will yield 51 per cent of its dressed weight in the four lean cuts.

The magazine said some packers are paying premiums for top quality hogs, and the hog industry agrees that hogs are being "firmed up" in a manner that makes for more attractive product.

Studebaker's popular and economical 6-cylinder engine powers the Champion series while the Commander series features the sensational V-8 engine which has set outstanding performance and economy records.

Studebaker's famed "miracle" ride finds new expression in the '53 models as the result of lower centers of gravity, greater road-hugging stability, and improved weight distribution. Contributing to outstanding riding comfort, and roadability are improved rear springs, shock absorbers with a new type of valving which improves cushioning action, and anti-roll away bars.

Chassis changes on both the Champion and Commander consist for the most part of refinements and modifications, many of them occasioned by the jaunty changes in style and design.

Ground Beef and Green Beans In A Zesty Combination

Ground beef shows up on menus in lots of ways, but none more interesting or appetizing than in a new beef, green bean and rice combination called Beef Pattie Ring Around. Easy-to-use canned foods are the key to this easy and economical dish. Canned evaporated milk helps extend the meat, and tomato soup is used in the sauce which gives the canned green beans that extra zip.

- Beef Pattie Ring Around**
- 1 pound ground beef
 - 1/2 cup evaporated milk
 - 1/2 cup rolled oats
 - 1/4 cup finely chopped onion, divided
 - 1 1/2 teaspoons salt, divided
 - 1/4 teaspoon pepper, divided
 - 2 tablespoons shortening
 - 1 1/2-pound can green beans
 - 1/2 cup liquid from beans
 - 1 can condensed tomato soup
 - 2 teaspoons vinegar
 - 2 cups hot cooked rice

To ground beef add evaporated milk, rolled oats, half of the onion, 1 teaspoon of the salt and half of the pepper; mix well. With wet hands shape meat mixture into 8 flat patties. Brown patties in hot fat in frying pan. Drain 1/2 cup liquid from beans; add to soup with vinegar, remaining onion, salt and pepper; pour over patties. Cover and cook over very low heat 30 minutes. Remove patties to warm platter. Add green beans to sauce in skillet and heat beans to serving temperature. Arrange rice in a ring around patties. Place green bean mixture around rice ring. YIELD: 4 servings.

Growling Boss May Be Insecure And Need To See A Psychiatrist

CAMBRIDGE, Mass. — Office workers aren't nearly as scared of their disgruntled boss as he is of his job, according to a psychologist, Robert N. McMurtry.

"Executive neurosis," he said, "is now a major responsibility of those who control the destiny of a business or industrial organization." McMurtry, an industrial psychologist, wrote in the Harvard Business Review that when an executive starts growling at his workers it probably is the result of an "inner feeling of insecurity and frustra-

tion" due to overwork. He needs a psychiatrist, but that can't be mentioned because it would "create tremendous new anxieties which can be critical," McMurtry said.

"Any suggestion in this direction must be handled with extreme tact and should be advanced, wherever possible, by an authoritative figure — for instance a physician in whom the individual has implicit confidence," he said. If this fails, the neurotic executive should be "kicked upstairs" and made "executive assistant to the president" or given a well-paid

Job as "consultant" where he won't have so much to do but will keep his "prestige" and regain a feeling of security. If neither step is taken, McMurtry said, the worn-out boss will develop heart disease, suffer a nervous breakdown or start drinking too much.

NORTEX WATER-FLOOD UNIT

Another Nortex "Packaged Unit" to serve the needs of the oil industry in our territory. This unit is built around a high-pressure plunger-type, all bronze fluid end pump, capable of a maximum pressure rating of 900 pounds with an adjustable output from 250 to 1,000 barrels per day.

This unit is powered by an efficient LeROI engine. Electric powered models are also available.

This special Nortex unit is equipped with a combination pressure gauge, HI-LO safety shut-down switch and pulsation dampner, all welded fluid-end connections with adjustable bypass and bronze check valve. This Nortex unit is field engineered and proved. It makes an ideal unit for pilot floods, or by adding another unit as capacity requirements increase, provides for a flexible as well as an efficient water pressure plant.

We engineer these units to fit your specific requirements.

Setting a new trend of European styling in American production automobiles, the 1953 Studebaker Champion hardtop reflects the Continental influence by its low silhouette and graceful contours. The car is only 56 5/16 inches high, and has an overall length of 201 15/16 inches. Power steering, now available at extra cost in the Commander series, will be offered in the popular Champion line later in the year.

'53 Studebaker Has Many Major Changes, Claim

SOUTH BEND, Ind., Jan. 26—Mechanical power steering—the first time it has been offered for passenger car use—tops the engineering improvements revealed today for Studebaker's 1953 models. It will be currently available as extra-cost optional equipment on Commanders and Land Cruisers and will be offered later in the year on the Champion series.

Developed by the Borg-Warner corporation, Studebaker's power steering system differs from others now in use in that it is mechanical rather than hydraulic and obtains its power directly from the engine.

Chief elements in the new steering system consist of a power unit mounted on the steering gear, a power input shaft, and a pulley assembly. The power unit, heart of the steering innovation, is a compact 6" x 6" device weighing only 22 pounds. Inside it are a gear train and two multiple disc clutches rotating in opposite directions. One of the clutches provides power for turns to the left, the other for turns to the right.

Power is delivered to the steering unit direct from the engine by means of a V-belt pulley on a small auxiliary shaft running parallel to the engine and back to the steering mechanism.

The ring gears inside the power unit revolve constantly while the engine is running, but do so at only one-fourth the speed of the engine. When the driver turns the steering wheel to the right, the lower ring gear and clutch come into play and transfer power from the engine to the steering gear, reducing by 75 per cent the effort that would normally be expended by the driver to make the turn. When a left turn is made, the upper ring gear and clutch swing into action and accomplish a similar transfer of power.

Borg-Warner and Studebaker engineers point out that mechanical power steering can increase four times the steering effort put forth by the driver. Put another way, if 12 pounds of effort are required by the driver to make a turn, power steering will reduce this effort to only three pounds. The additional power does not come into play, however, until the driver has expended at least two or more pounds of turning effort. If for any reason the power steering should become inoperative, conventional manual control is immediately available so that the driver is at all times in complete command of the car.

Mechanical power steering as offered on Studebaker's '53 models is simple in construction. There are no valves, no hydraulic lines or pump, no fluid reservoir. A gear lubricant is used, and drivers whose cars are equipped with mechanical power steering will be asked to have this lubricant checked whenever the car undergoes a general chassis lubrication.

Our Resources Must Be Increased If Living Standard Is To Climb

If the American standard of living is to resume the steady climb that was interrupted by depression and war, our resources— from which income is created— must be increased tremendously, an editorial appearing in all McGraw-Hill publications of New York, states.

During the past four years it has taken about \$3.60 of national wealth to yield \$1 of income after taxes. If, by 1960, the income of the average American is to be increased from about \$1490, where it stands at present, to \$2000, \$310 billion must be added to the national wealth. This is nearly three times as much as has been added to the nation's wealth since the end of World War II, seven years ago, the editorial, third in a series on U. S. prosperity, points out.

Because we have made large additions to our productive equipment in recent years, fears are frequently expressed that we shall soon be plagued by an excess of such equipment. But the facts about our national wealth—factories, farms, mines and equipment of

Get Absorbed In Your Work And You're Ninety Before You Know It

PHILADELPHIA — Dr. Henry Augustus Pilsbry, 90-year-old scientist, says the secret of living long is "getting so absorbed in your work that it never entirely leaves you."

For 64 years Pilsbry has been active as curator of mollusks at Philadelphia's famous Academy of Natural Science. He hasn't given a thought to quitting.

"I've got 10 or 15 years' work stacked up in front of me now," said the white-haired scientist with the Van Dyke beard. "When I get it finished, there will be just that much more waiting to be done."

Pilsbry observed his 90th birthday recently at work at his cluttered desk in the Academy, writing busily with a quill pen and studying the snails, clams, oysters and other mollusks which are his specialty.

He has explored the Andes, the Australian reefs, the South Seas and Central America during his long career as one of the world's leading authorities on mollusks. He has written 30 volumes during that time and classified thousands of mollusks.

Emperor Hirohito, who wrote a

book on Japanese marine shells before the war, put the U.S. Army to work in 1945 locating Pilsbry to present the dean of conchologists with a copy of his work. The Iowa-born "mollusk man" is known throughout the world.

Pilsbry keeps busy every day. He walks one mile from his suburban Morton, Pa., home to the railroad station to go to work and frequently takes his "mollusk problems" home with him at night. Some of his best solutions come to him while he is asleep.

"Of course, you only get inspirations like that—when you are thoroughly soaked with the subject," he admits.

Right now Pilsbry is working on a paper dealing with land and fresh-water snails of Ecuador. Then he'll take up Ecuador's marine shells. He has no expeditions lined up—beyond wintering in Florida—but thinks he "might" explore Europe a bit one of these years.

The Royal City, the Ancient City, the City of the Holy Faith, are some of the terms given the nation's oldest capital, Santa Fe, N.M., whose original title in 1609 was La Villa Real de la Santa Fe de San Francisco (The Royal City of the Holy Faith of Saint Francis).

ASTHMA COUGHS

Don't let difficult breathing, coughing and wheezing, due to recurring attacks of bronchitis, asthma or emphysema, rob your sleep and energy without trying MENDACO. Works through your blood to help loosen and remove thick, strangling mucus. Thus usually allows coughing when you're free breathing and sounder sleep. 'Pitch' Is Still Very Popular Up In Sooner State

MOUNTAIN VIEW, Okla. — If "Bones" Davenport hadn't been so lucky at cards one evening 12 years ago, there probably wouldn't be an annual pitch tournament this year for 112 southwestern Oklahoma pitch players.

"Bones" luck was so good that night 12 years ago that a pitch club of eight Mountain View Men was organized to see if someone couldn't beat his score as champion of that first all-night session. Word of the pitch club traveled fast in Kiowa county. A group of pitch players from Saddle Mountain heard about it, organized a club of their own and challenged the neighboring team.

One by one in the years that followed pitch addicts in other communities formed local clubs — Cooperston, Green Valley, Sedan, Star, Oakdale, Cottonwood. The eight teams have worked out a 56-game season with the first of seven sessions starting early each December. The winning club at each session receives five points which will be tallied up for the tourney March 6 when high scoring teams will face each other across the table at Sedan schoolhouse.

Stock Show Will Sponsor Sunday School Classes

Parents of the youthful exhibitors in the junior show of the

Southwestern Exposition and Fat Stock Show at Fort Worth, need not worry that the boys and girls will miss Sunday School — for a breakfast - Sunday School class will be held at the exposition.

The occasion will be held on Feb. 1 in Pioneer Palace and will be sponsored by the First Nation-

al Bank. J. Lee Johnson, Jr., president, declared that the bank considers it a great privilege to be the host on such an occasion.

There will be a bountiful breakfast to which all the Future Farmers and 4-H Club members who will exhibit animals are invited, as well as their county agents and vocational agriculture teachers.

After the meal which will begin at 8 a.m., there will be special music and the lesson will then be conducted by an outstanding teacher.

Stock Show officials declare that the breakfast and Sunday School class is the only occasion of the kind held by a livestock exposition anywhere.

Competition
gives you the best petroleum products in the world at the lowest prices

The U. S. oil business is one of the most highly competitive industries in this country and, for that matter, in the world. Every time you buy a gallon of gasoline or a quart of motor oil, there are at least 100 companies that would like you to buy from them.

Your purchase stimulates competition far beyond the service station driveway where you make it. It stirs scientists to find more oil for your use. It urges production men to produce oil more efficiently and economically and with less waste. It extends through low-cost transportation pipe lines to refineries that seek better ways to make more and better petroleum products to compete for your business.

Is this competition a good thing?

It certainly is. It's a good thing for you because you get the best petroleum products in the world at the lowest prices. It's a good thing for the country because it stimulates the continuous development and conservation of a vital natural resource. And it's a good thing for the oil business: competition keeps the industry strong, vigorous, progressive.

Competition begins with the search for oil.

Improved drilling and producing methods increase supplies of oil at reasonable prices.

Pipe line companies seek to improve their service and to reduce the transportation cost of oil and finished products. Their success is a major factor in keeping prices of petroleum products low.

Competitive refineries never let a day pass without trying to find a better way to make more and better petroleum products for your use.

Your service station dealer competes in product quality and service with all the other dealers in your neighborhood.

Texans Organize New State Angus Cattle Group

The 16th Aberdeen-Angus Breeders' Association to be organized in Texas held its first meeting recently at the Windsor Hotel in Abilene. The group will be known as the West Central Texas Angus Association.

Milton Miller, fieldman for the Aberdeen-Angus Breeders' Association, presided at the meeting. The breeders elected Ray H. Boothe of Sweetwater as their first president, and Maxin B. Simpson, Robert Lee, was named vice president. James L. Hays, Abilene, was elected secretary-treasurer.

Texans named to the board of directors for a one-year term were Dick Chick and Leo Fry of Abilene, and L. R. Witt, Hamilton Rush, Callan, Rofan, Dr. J. B. Reneau, Munday, and Joe McFarlane, Brownwood, will serve for two years, and Joe Lemley, San Angelo, James C. C. Roby, and Albert Thoms, Haskell, for a three-year term.

Mr. Chick, who is manager of Sears Roebuck and Company in Abilene, was named publicity and promotion man for the association.

A temporary constitution and laws were adopted by the members. The directors were advised to prepare an amended form for approval at the next meeting of the association.

The 15 area associations cooperating with the Texas Aberdeen-Angus Breeders' Association cover

TELEVISION ON WHEELS—You won't find it in the dealer's showrooms but something new in automobile body design and construction has been worked out by Fisher Body engineers for NBC television which for the first time will permit the immediate televising of pictures taken from a moving car. Here shown is a Cadillac 75 sedan engineered especially for the televising of General Eisenhower's Presidential inauguration parade. A full crew, four technicians and a driver can ride in the car while telecasting. The camera man works through a turret opening cut through Fisher Body's famous turret top at the right front corner while the transmitters send out a beamed wave to a receiver worked by a man in the turret opening at the left rear of the body. This picture, in turn, is relayed to a fixed receiver and then by coaxial cable to the network. The car carries almost a ton of special television equipment.

City Stops Costly Dog-Catching Job

PHILADELPHIA, Pa. — The

Demand!
7up
ALL THE WAY TO THE SERVICE.

Women's Pennsylvania S.P.C.A. has gone back into the business of dog-catching this year because the city decided the organization can do the job cheaper.

The city took over the task of rounding up wandering canines in 1949 when the S.P.C.A. asked for \$60,000 to do the job. The administration figured the police department could do the job cheaper, but Police Commissioner Thomas Gibbons estimated later it was costing the city more than \$60,000 annually.

According to the society's figures and the city's costs, the S.P.C.A. spent \$3.75 per animal against \$7.71 spent by the city.

Bread Truck Is Home On Wheels

CLEVELAND, O. — Spare time \$200 and an old bread truck were the ingredients of Ridley Watts, Jr.'s recipe for happiness.

Watts calls his creations a "land yacht." Since he came here from Short Hills, N.J., it has been attracting much attention. It is equipped with running water facilities, a studio couch, a hammock, and cooking paraphernalia.

Watts said it is superior to a trailer because it will go many places where you couldn't pull a trailer.

Watts bought the truck for \$95 and spent about \$200 for equipment. "I've been offered \$1,000 for it," he added.

SOCIETY

Mrs. Horton Calls Meeting For Organization

Mrs. James Horton, who was elected by the Civic League and Garden Club to organize a ladies auxiliary for the Eastland Memorial Hospital, said that she would especially like to have the church women join the auxiliary.

Organization will take place at 2:30 p.m. Wednesday in the annex of the First Christian Church, and all women of the town are invited to become members.

Social Calendar

Jan. 27th—South Ward P-TA 8:15 p.m. South Ward School. Mrs. Horace Horton, speaker.

Jan. 27th. The Zeta Pi chapter of Beta Sigma Phi will meet at 7:30 p.m. in the home of Mrs. Ed Hooker, 903 South Halbryan.

Science Students Are Analyzed

ST. LOUIS, Mo. — Most superior science students come from middle-class families and small communities, according to the conclusion of E. G. Williamson, professor of psychology at the University of Minnesota, based on a survey to identify the characteristics of scientists.

In a report at a conference on scientific manpower here, Williamson said his findings show research workers are more individualistic than other persons, although the need of teams carry out projects of modern experimentation have made the "lone wolf" researcher a thing of the past.

PERSONALS

Miss Dale Strickland, room-mate of Miss Catherine Cooper at Texas Christian University in Fort Worth is the guest here of Miss Cooper in the home of her parents, Mr. and Mrs. W. H. Cooper.

Mr. and Mrs. J. F. Compton of Stamford were the weekend guests here in the home of her daughter, Mrs. H. C. Westfall, Mr. Westfall and Betty. The group all visited

Sunday with friends in Itasca.

Mr. and Mrs. C. J. Langlitz attended the funeral of C. O. Sevier in Goldthwaite Tuesday. Mr. Sevier was a brother-in-law of Mr. Langlitz.

Mr. and Mrs. Ray B. McCorkle and granddaughter Jo Lynn Frederick, spent the week end in Terrell, in the home of Mrs. McCorkle's brother, I. J. Williams and family.

WASHDAY'S A BREEZE

... SIMPLE AS

1-2-3!

1. WASH CLOTHES AUTOMATICALLY!
2. DRY 'EM QUICK-- IN ANY WEATHER!
3. REST... WHILE YOU IRON 'EM!

You never dread washday when your home is equipped with the electric laundry triplets... an automatic washer... dryer and ironer... for Reddy Kilowatt and these labor-saving appliances do the hard work for you. Just put that pile of family laundry into the electric washer... set the dial and forget it. That wash will come out fresh and clean... all ready to pop into the sun-pure automatic dryer. Now, for the finishing touch... sit comfortably before your electric ironer and quickly iron all pieces from dainty baby things to Hubby's shirts. Reddy Kilowatt has the One-Two-Three count on washday worries with the electric laundry triplets.

Banish washday work with the three electric appliances that save you laundry toil. See your favorite electric appliance dealer this week for a convincing demonstration.

Mrs. Jack Horn, Recent Bride Honored At Nuptial Shower

A group of friends honored Mrs. Jack Horn, recent bride and the former Miss Joyce Urban of Way-toka, Okla., when they entertained Saturday evening with a miscellaneous shower in the home of Mrs. H. E. Williams on West Highway 80.

Other hostesses were Meses. Wilby Harbin, Jack Cole, Lou Horn, M. B. Griffin, G. L. Wingate, J. E. Turner, Ben Matthews, B. G. Blair, Marvin Hood, Johnnie Hart, S. L. Bourland, Harold Durham, and Ed Layton.

Guests were received informally by the hostesses and registered in the bride's book by Mrs. Hood. The refreshment table was laid with a white Maderia cutwork lin-

Eat a Good, Good Breakfast

Head off hidden hunger caused by being a breakfast skipper or a breakfast hurrier. Get a good start each day by eating an adequate breakfast and end mid-morning doldrums.

Here is a breakfast menu that will make those hurriers and skippers take time to stop, look, and eat . . . chilled, plump apricots . . . ready-to-eat cereal with milk . . . tender, scrambled eggs with chopped bacon . . . milk or coffee . . . and hot butterscotch pecan rolls.

This taste-enticing breakfast is simple and easy to prepare. Everything can be turned out in a matter of minutes . . . even the hot butterscotch pecan rolls. To save time, get the rolls ready for the oven the evening before by spreading a loaf pan with a mixture of melted butter or margarine, brown sugar and chopped pecans. Place Brown 'n Serve rolls upside down in the butterscotch mixture and keep in a cool place over night. First thing in the morning, preheat the oven to 400° F. and then bake the rolls for fifteen minutes while you prepare the rest of the breakfast meal.

Butterscotch Pecan Rolls

3 tablespoons melted butter or margarine
1/2 cup brown sugar
Combine butter, brown sugar and pecans. Spread over bottom of 1 quart loaf pan. Place rolls with tops down over sugar mixture. Bake in a moderate oven (400° F.) for fifteen minutes. Serve immediately. Yield: 8 Butterscotch Pecan Rolls.

3 tablespoons chopped pecans
8 Brown 'n Serve dinner rolls

en cloth and decorated with an arrangement of pink and white carnations. Appointments were of crystal and silver. Mrs. Layton presided, assisted by Mrs. Bob Blair.

White cake squares with pink topping, lime frosted punch, mints and nuts were served. Gifts were displayed on game tables covered in pink and green, carrying out the bride's chosen color theme.

An arrangement of pink gladiolus and greenery decorated the register table.

About one hundred and twenty-five guests called during the hours seven til nine p.m.

Mr. and Mrs. Horn are making their home here in the Hillside Apartments.

Janie Arther Gives Donation To Start March of Dimes

Janie Arther made a donation of \$20.00 to Mrs. E. E. Garner last week to start the March of Dimes fund rolling. Janie is the daughter of Mr. and Mrs. S. J.

Arther, Sr. She suffered an attack of polio last spring and spent many weeks in the Hendricks Memorial hospital in Abilene.

In her talk with Mrs. Garner, Janie said, "If people could only realize the great need for funds, and the wonderful work being accomplished by the foundation. The foundation helped her and the many children that were in the hospital when she was. It would be impossible to have the equipment and drugs, special nurses and other things needed by the patients, which are furnished by the foundation free of charge to any child stricken."

Every dime counts, Janie continued in helping the children back to a normal life, and she urged everyone to give generously to the March of Dimes.

Husbands Are Guests of Gleaners Class

The Gleaners Class of the First Baptist Church entertained their husbands Friday evening at their regular monthly social meeting held in the Fellowship room of the church.

Rev. C. Melvin Ratheal led the group in the singing of several favorite hymns, accompanied at the piano by Mrs. Ratheal.

Mrs. J. D. Pittman, president, presided and introduced Mrs. Ed Layton as new teacher of the class.

Mrs. E. E. Garner, fellowship chairman, presented Mrs. Hazel Sullivan, who gave the devotional, and led in several suitable games.

Mrs. E. H. Culbertson and her group were hostesses for the social hour and served pie and coffee.

Others present were Messrs and Meses. Henry Sims, Howard Upchurch, James Stephens, Miss Florence Barber, Mrs. B. H. Green and Meses. Ed Layton, E. E. Garner and J. D. Pittman.

PERSONALS

Mrs. Artie Liles and Patricia Ann spent the week end in Fort Worth with their husband and father, who is temporarily employed there.

Mrs. J. O. Jackson of Gorman was a visitor in Eastland Monday.

Herman Hassell, Jr., student at A&M College is here with his parents, Mr. and Mrs. Herman Hassell, during spring semester.

Herby Weaver was guest here over the week end in the home of his parents, Mr. and Mrs. H. T. Weaver, and brought as his guest a fellow Baylor University student, Bill Cressman of Miami, Ariz.

It's easy to make "WASH DAY" DRUDGERY a thing of the past

FRIGIDAIRE'S
New and Wonderful
Porcelain Pair
Automatic Washer and Filtra-matic Dryer

IT'S A DREAM COME TRUE!

EXCLUSIVE Lifetime Porcelain Finish

Cleans as easy as a china dish. Stays snowy white for life!

Resists scuffing

Heat won't scorch it

Iodine won't stain it

Scouring powders won't scratch it

Porcelain Finish on Cabinets—also on Washer Tub and Dryer Drum!

Automatic Washer with Live-Water Action gets clothes clean as new!

New Filtra-matic Electric Clothes Dryer ends lint and moisture problems!

Gets out the "deep-down" dirt ordinary washing actions can't touch! Frigidaire's Live-Water Action is gentle on nylons, woolsens and rayons, too! In this washer clothes are in water all the time not half-in, half-out . . . and your hands need never touch water! See a demonstration today! See how Live-Water Action works, how the new Float-over rinse carries away all the dirt, how Rapidry Spin dries many clothes ready for ironing. There's nothing else like a Frigidaire Automatic Washer.

A completely new and different clothes dryer that leaves no sticky lint on the walls, no steamy moisture in the room and on windows. And it needs no costly plumbing fixtures or venting pipes. You can dry clothes as fast as you wash them . . . fluffy-soft and sweet-smelling to any dryness you prefer . . . all automatically. Remember—it's the only Clothes Dryer with Lifetime Porcelain Finish on cabinet and drum for lasting beauty and protection against rust. Get this new Frigidaire Filtra-matic Electric Clothes Dryer now!
