Our 97th Year

City-MISD receive notices of estimated tax values

The City of Merkel and MISD have both recently received their estimates of 1985 taxable value from the Central Appraisal Office. The city's taxable value for 1985 is \$39,127,262 while the school district has a taxable value of \$164,830,257. The city has \$956,278 in new or reappraised taxable value over 1984 and the school has \$7,750,958 in new taxable value. Both the city and the school will begin working on their tax rates in late summer. According to the estimates, the

city could set a tax rate of .2918 per \$100 evaluation and raise the same amount of money raised last year. The school district's estimated tax rate is .9626 per \$100 evaluation. According to the taxable values for the city, the net real estate value of \$34,781,785. An additional \$4,345,477 exists in personal property while \$827,112 was exempt under ag value deductions and \$58,500 was exempted for disabled veteran exemptions. For the school district, real estate market value stands at

\$171,029,072. Deductions subtracted included \$65,314,255 in ag value; \$9,156,489 in homestead deductions, \$129,163 in disabled veteran deductions and an additional \$4,165,814 in value lost to frozen taxes for those over 65. The district also has an estimated \$49,417,864 in personal property and \$30,900,000 in mineral production value. The school and the city will use these figures to help determine their tax rates for the 1985 tax season, which will begin in October.

Drug-alcohol awareness films available from police here

In a continuing effort to make Merkel a better, safer place to live, the Merkel Police Department has purchased three new audio-visual films. These award winning films were developed for the Department in its fight against drug abuse. The programs may be obtained through the Department's Community Relations Office and are available for showing,

free of charge, to schools, civic clubs, churches, and parent groups. DRUGS OF ABUSE is an overview of America's drug problem, explaining the five classes of abused drugs, and the symptoms, and the paraphernalia associated with each. It will be easier to determine if a youngster has been smoking marijuana after viewing Marijuana In The Classroom, which is a look at

the marijuana problem among today's youth. The combination of drugs, alcohol and driving kills more young people each year than any other cause. Steering Straight teaches young drivers the danger of driving under the influence. For addition information, or to schedule a free showing of any of these films, contact, Chief Ray Pack, Merkel Police Department, 928-4766.

Farmers and taxpayers can benefit from Farm Policy Reform proposal

(WASHINGTON, D.C.) -- Texas Agriculture Commissioner Jim Hightower said that "The Farm Policy Reform Act" introduced in Congress "is a country-fresh, commonsense approach to farm policy that can save America's family farm system and also get America's taxpayers off the farm-subsidy treadmill." Hightower participated in a Capitol Hill conference for innovative legislative proposals, which was introduced by Senator Tom Harkin (D-Iowa), Senator Edward Zorinsky (D-Nebraska), Senator James Exon (D-Nebraska), Representative Bill Alexander (D-Arkansas), Representative Lane Evans (D-Illinois), Representative Tom Dashiell (D-South Dakota), Representative John Conyers (D-Michigan), Representative James Weaver (D-Oregon), Representative Charles Hayes (D-Illinois), and Texas Representatives John Bryant (D-Dallas), Ron Coleman (D-El Paso) and Mickey Leland (D-Houston). The bill is the culmination of a series of farm-policy forums and grassroots farm meetings that Hightower and others have held all across the country during the past two years, to devise a new national farm program that will reward the efficiency of America's family farmers, while also meeting the needs of taxpayers, consumers, conservationists and hungry people throughout the world. "For the past dozen years, our national farm program has been written for brokers and speculators, processors and marketers--rather than for the dirt farmers," Hightower said. "This time, we wanted to make sure that a true 'farmer proposal,' written by and for farmers, was put on the table and given full consideration. This is it. It's not some hand-me-down from a think tank or lobby group--it's straight from the countryside, percolating up from the grassroots. "We wanted a fresh approach that could attract broad-based support and have a chance of passing. A successful farm bill must have beansprout eaters behind it, as well as snuff dippers, and

this bill has that kind of appeal built into it," Hightower said. But most importantly, we wanted a bill that actually will work... that will put real profit back into agriculture... that will save billions for the taxpayers... that will assure a stable supply of reasonably priced food for consumers... that will maintain a competitive and efficient system of food production in the U.S. ... that will conserve soil and water conservation... and that will meet U.S. responsibilities for meeting world hunger needs. That's a lot for one package, but we've managed to get it all in here. "The guts of our program is to extend good supply management tools to American family farmers so they can bring their production into line with real world demand. Instead of using taxpayers' dollars to solve the farm crisis, this approach lets farmers solve it themselves by producing only what they can sell in the marketplace. The beauty is not only that this bill gives us a way to preserve the productive genius of our family farm system, but it also allows us to do so without paying a dime's worth of crop subsidies. "This is our chance to turn around more than a decade of farm-policy failures," Hightower said. "Unfortunately, since 1973, we have seen America's agricultural policies--and in turn our food export programs--go from 'Butt to nuts.' These costly, inefficient, misdirected programs have produced a painful economic disability of America's family-run agriculture. Farmers continue to plant virtually fencerow-to-fencerow in a desperate effort to stave off foreclosure; the price of 22 of 28 major farm commodities is below what it costs to produce them; the inability to earn a fair price is driving 1,600 of our most efficient producers off their land every week; and we are losing 1.7 billion tons of irreplaceable topsoil a year because these farmers are too hard-pressed by debt to afford new conservation practices. "What these blunders have also done is leave over 85 million metric tons

of grains and powdered milk in the storage elevators and warehouses of America at a time when the world adds 79 million more people to feed every year. America's response has been to reduce concessional food aid to its lowest level in nearly a decade. "Unless we turn the country's farm programs around this year, the U.S. will lose the independent mid-sized family farm that now produces over 60 percent of our food and fiber. Given the current course, the Farm Credit Administration predicts that 75 percent of our food and fiber will be produced by only the largest six percent of our farm corporations before another decade passes. "What is being presented to Congress is a commonsense policy to allow efficient farmers to get their surplus production back in balance with demand. Only then can farmers get a fair price in the marketplace, rather than constantly overproducing and having to take payments from taxpayers. As outlined at the news conference, there are seven basic provisions to the Farm Policy Reform Act: • Mandatory production controls, subject to producer referendum, that will effectively balance supply and demand in agriculture; • A federal price floor, or loan rate, at the actual cost of production, giving farmers a chance to make a profit; • Targets small and medium-sized farm operators, using a progressive scale of production allotments as a disincentive to conglomerate and tax-loss farming ventures; • Mandatory soil and water conservation practices, requiring all producers to set aside a portion of their base acreage to protect the long-term productivity of the land; • Debt restructuring by government lenders for good farmers, including a temporary moratorium on foreclosures.

Wheat harvest, mom & dad, taxes, Disney's fixed, ... more

by Cloy A. Richards

It's been hectic around here lately. With the wheat harvest in full swing, Merkel seems to be a lot busier of a place and there is a whole lot of cotton planting going on. Both Whisenhung Grain and Jack South Elevator have been working until 2 a.m. some mornings. None if this is news to farmers, their families, or allergy sufferers. The price was \$2.85 per bushel Friday. Cal Tex Feed Yards in Trent was offering \$2.94. My parents were in town this weekend, along with my brother and his wife. As usual, we spent most of the day at the office, planning our next project and the rest of the time was Little League or visiting. It was nice to have them around, for a visit. A man stopped me last week at Merkel Drug and said he couldn't believe that he had read I agreed with a President Reagan's tax plan.

I mentioned it last week in this column and I said I was happy to see the President address an issue with confidence. The President's tax plan is just that, a plan. It may no more represent the tax bill in its final form as all of the grand ideas that are included now. As long as we get a simpler, more fair (everybody pays their share) type IRS law, we will be making progress. The problems with the sound system at the Walt Disney movies at the Old Lions Club Building have been worked out and shows are set for 2 and 7 p.m. each Friday. The movies are open to everyone who enjoys Walt Disney movies. MISD superintendent Bill Everett was all set to attend a seminar dealing with all of the changes made in House Bill 72 by the Texas Legislature, but there was just one problem. There weren't any changes made and he learned Monday the seminar was cancelled. He told me Monday "I didn't expect to see real changes.

They are going to give the bill a chance to work." I asked him if he had any idea how many students the B-1 coming to Abilene will add, especially to the elementary school at Tye and he said he had not received any estimates from anyone concerning local impact. We all know it wouldn't take too many additional students at Tye to require additional classrooms at that campus. Fun Day is less than a month away and groups and organizations that have not made their reservations for space had best do so, pronto. You can make reservations by calling 928-5722. Also, reservations need to be paid for prior to Fun Day. Payments can be made at Boney Insurance Agency here. Our publication of the new zoning ordinance continues this week. Most of the people here seem to have received the message that zoning is in effect and that people need to check with City Hall before they carry out remodeling or building plan.

MISD hires six teachers

MISD has hired six teachers and accepted the resignations of three. Hired at the last school board meeting were Kay Dearing, Katny Malone, Doug Handley, Delbert Dearing, Donnay Ray and Mi-

chelle Harris. Resignations were accepted from Nina Lee, Sherry O'Neil and Laura Motes.

A & M group spreading trees

Virtually everyone is involved in forestry, at least urban forestry. Urban forestry is the management of trees in areas where man has significantly affected the "natural" ecosystem by his structures or manipulations, says a forestry specialist. This includes large cities, small communities and even areas outside of municipal boundaries. Everyone should be interested in urban forestry since trees provide many benefits, points out Dr. Michael Walterscheid with the

Texas Agricultural Extension Service, The Texas A&M University System. In the summer, trees help moderate temperatures by controlling solar radiation. They also aid in moderating air temperatures through evapotranspiration (water vapor evaporating from leaves). For example, a large tree with sufficient soil moisture can give off about 88 gallons of water in one day. This is comparable to five room-size air conditioners. In the winter, trees reduce wind

velocity and create sheltered zones. Proper planting of shelter belts can reduce windspeeds by 50 percent for distances up to 20 times the height of the tallest trees, says Walterscheid. When planted close to a house on the prevailing wind side, conifers (cone-bearing evergreen trees and shrubs) create a "dead air space" that can reduce heat loss from the house. In northern areas, this can mean a 23 percent fuel savings. See Page 2

Extension service helps communities plan for more trees

From Page 1

Many communities in the north-eastern and midwestern United States have had active forestry programs for years, but Texas town officials are just now realizing the advantages of trees, notes the specialist. However, tree planting programs may prove to be a future burden if little consideration is given to future maintenance problems, drought resistance, size or adaptability to the planting site.

To aid in this effort, a system of tree management has been developed which can be used in any community, Walterscheid points out. The system involves consideration of these questions:

1. What kinds of trees are now growing in the community.
2. How are insect, disease and man-caused problems affecting these trees identified and corrected.
3. What are trees worth.
4. Are the right trees planted in the right place.
5. What are priority tree management plans.

6. What would the community be like without good trees.

Developing an urban forestry program involves several basic steps, according to the specialist. First, leadership must be assigned for implementing and administering the program. This can be done through an existing park board or other city board or by appointment of a tree commission. An effective ordinance developed by the group should establish authority over public trees if this does not already exist.

Next, existing community tree resources should be inventoried since a necessary step in management is to know the resources. The inventory can be a simple listing of species, size and condition, or it can involve a sophisticated computerized list, including location

and suggested maintenance work.

Once the inventory is complete, objectives and work plans can be developed. A goal should be established not to allow any one species to make up more than 20 percent of a community's trees, notes Walterscheid. This will help avoid future disasters should a disease or insect attack a particular tree species. An example is oak wilt on live oaks in parts of the Texas Hill Country.

Maintaining an urban forestry program must be a continuous concern. New plantings are not the only consideration, existing trees also need care, notes the specialist. Properly cared-for trees are damaged less by ice and windstorms. Trees along right-of-ways need to be pruned for clearance and safety reasons. This includes

removing all dead and damaged limbs

Walterscheid notes that the assistance in the development of Extension Service can provide community tree programs.

Middle school honor students

The Merkel Middle School Honor Roll is as follows:

8th Grade: A Honor Roll: Walter Best, Anissa Jones, Steve Leve-rich, Phoebe Mills, Pam Neff, Chad Strange, Wade Toombs, Diem Tran. A-B Honor Roll: Michael Adkins, Stephanie Ashorn Michelle Barnett, David Biera, Martha Davila, Michele Dudley, Jennifer Gaona, Scott Graham, Greg Hale, Richa Hill, Jeff Hobbs, Julie Koflanovich, Maxi Lang, Teresa Lucas, John McNeal, Melissa Morris, Kim Richards, Glyn Ann Rutledge, Robert Turner Twyla Wilburn.

7th Grade: A Honor Roll: Eric Ascencio, Laura Baker, Dayna Bently, Diana Brown, Mi Hwa Chon, Lisa Donaldson, Anjanette Girtz, Susan Hammond, Jennifer Hatley, Stephen Jacobs, Lee Kotrlik, Melissa Messick, Sheri Miles, Shawn Miller, Laurinda Powell, Penny Smith, Chip Townsend. A-B Honor Roll: Bridget Acuna, Steven Bauer, Susie Brandon, Richard Bryan, Lisa Cannon, Angela Carson, Amy Coleman, Misti Doan, Robyn Dudley, Toby Dupont, Chance Ferguson, Tricia Garrett, Chris Gaona, Lynn Gregory, Shannon Jones, David Miller, Scottie Myers, Tricia Newson, Kevin Pilgrim, Christy Reynolds, Gay Lynn Robertson, Randy Toombs, Angela Whaley, Suzy Wiloth.

6th Grade: A Honor Roll: Jana Daniel, Kenneth Fickle, Dennis Griffin, Brandon Toombs, Phuong Thao Tran, Daniel West. A-B Honor Roll: Melannie Baker, Jamie Beasley, Ava Bohannon, Brandon Boyd, Robert Frazier, Jayma Goldsmith, April Griffith, Cara Kelso, Sean Leamon, Mike McFadden, Renee Melendez, Christi Moore, Kenny Nault, Neil Newman, Renae Paulsen, Shawanda Warren.

67 at Bland reunion

Mrs. David Seymore will head the Bland family reunion for 1985-86.

Also elected, Sunday during the family's eighth annual reunion at Heritage Hall, were Mrs. Randy Carson, vice president, and Mrs. R.L. Bland Jr. of Trent, secretary treasurer. Mrs. Jack L. Bland, of Abilene, will continue as historian.

Preceding the business session, the historian presented a memorial tribute to the late Fae Bland.

The eldest person present was 87 year old, H.E. Bland, of Rogers, Ark. The youngest was Joyce Fay Veal, 8 month old daughter of Mr. and Mrs. Donald Veal of Brecken-ridge. Traveling the furthest was J.W. Gray from Prudhoe Base, Alaska.

There were 67 relatives attending the Saturday evening and Sunday gathering were from Merkel, Trent, Abilene, Potosi, Baird, Elk City, Okla., Rule, Post, Wichita Falls, Houston, and Colorado City and from Rogers and Bentonville, Ark.

An investment in Your Future ...ATTEND CHURCH

"For where your treasure is, there will your heart be also"

KEEPING UP

These are serious times. Communism is all around us, and threatens to stamp out our freedom of worship. We should keep ourselves informed on the world situation at all times. We should know more of the threats that they make, and we should know more of what they are trying to take away from us.

Attend church "and take the helmet of salvation, and the sword of the Spirit, which is the Word of God: Praying always with all prayer and supplication in the Spirit, and watching thereunto with all perseverance and supplication for all saints."

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God.

Collum-Owen repeat vows in Friday ceremony here

Kimberly Diane Collum, of Abilene, and Terry Dean Owen were married Friday in the United Methodist Church of Merkel with John Waggoner officiating. Given in marriage by her father, the bride is the daughter of Mr. and Mrs. Greg Collum of Abilene.

The bridegroom is the son of Mr. and Mrs. Bobby Owen. Delores Sawyer, of Hawley, was maid of honor and Debbie McLaughlin, of Abilene was bridesmaid. Cliff Owen, brother of the groom, was ring bearer and Kristi Smith was flower girl. Candles were lit by Jeff Collum, brother of the bride, and Shannon Taylor, of San Angelo. Chris Cox was best man and Dusty Barnhill was groomsmen. Ushers were Michael Quave of Abilene, H.T. Wilson and Donny and Michael Tutt. Mr. and Mrs. Collum hosted the

reception and Mr. and Mrs. Owen hosted the rehearsal dinner both in the fellowship Hall of the church. The bride attended Cooper High School and the groom is a graduate of Merkel High. Following a trip to South Padre Island, the couple will live in Abilene.

Oak Wilt fungus plaguing trees in 31 Texas counties

(WACO)—Oak wilt, a serious fungus disease which can kill oak trees in just four weeks to six months, has been identified in 31 Texas counties, according to an article published in the May/June issue of *Texas Gardener* magazine.

The article, written by Dr. Jerral Johnson, a plant pathologist for the Texas Agricultural Extension Service, says the affected counties can be identified by drawing a line on a map from Dallas to College Station to Cuero to Pleasanton to Bandera to Kerrville to Weatherford and back to Dallas.

"With the chemicals now available, chemical control of oak wilt is not possible. Losses to this devastating disease can be reduced by following a series of cultural practices. The basic principle is to stop the spread of the fungus," writes Dr. Johnson.

The first step in control is to identify the disease as soon as it moves into an area. Trees infected with oak wilt develop distinct foliage symptoms. The leaves on live oaks turn a brown or yellow color along the veins. Areas between the veins also may turn yellow,

or remain green. Also, some leaves turn brown, either all over or just on the margins. Leaf symptoms of Shumard and Texas red oaks are different. Their leaves develop a wilted appearance and then brown tips are formed.

On all trees, symptoms first appear on a single limb, but quickly spread throughout a tree. Leaves defoliate soon after symptoms are observed. At death, there will be only a few leaves left on the tree, the article states.

Insects are a primary culprit in spreading the disease from one tree to another. If your tree has an open wound, caused by damage to the bark or by pruning, insects can carry the oak wilt fungus from an infected tree and deposit it in those wounds. Thus, all tree wounds should be treated with a wound paint, according to the article.

Other controls include trenching, which involves cutting the roots between trees to prevent the disease from spreading from one tree to another through roots. Other cultural practices also are outlined in the article, which also discusses oak decline and hypoxylon canker, two other major oak tree diseases.

Christopher Ryan was born Monday, May 27th around 3:00 a.m. and weighs 8 1/4 lbs. 10 oz. Maternal grandparents are Mr. and Mrs. William Norred of Sweetwater.

Frazier reunion set here

There will be a Frazier Reunion June 17 at the Center, the Heritage Hall. Everyone is invited to bring a covered dish and attend.

trict Court, Taylor County, Texas, at the Court-house of said County in Abilene, Texas at or before 10 o'clock a.m. of the Monday next after the expiration of 20 days from the date of service of this citation, then and there to answer the petition of Christian Homes of Abilene, Inc., Petitioner, filed in said Court on the 29th day of May, 1985, against Unknown Biological Father Respondent, and said suit being numbered 225-CX on the docket of said Court, and entitled "In The Interest of Baby Boy Wilson, a Child", the nature of which suit is a request to the Court to determine what parent-child relationship is existing between the child and the unknown biological father, that such parent-child relationship be terminated and that an attorney Ad Litem be appointed to represent the respondent. Said child was born the 24th day of May, 1965, in Abilene,

Taylor County, Texas.

The Court has authority in this suit to enter any judgment or decree in the child's interest which will be binding upon you, including the termination of the parent-child relationship and the appointment of a conservator with authority to consent to the child's adoption.

If this citation is not served within ninety days after the date of its issuance, it shall be returned unserved.

The officer executing this writ shall promptly serve the same according to requirements of law, and the mandates hereof and make due return as the law directs.

Issued and given under my hand and the seal of said Court at Abilene, Texas, this the 29th day of May, 1985.

Rilla Mahoney, Clerk, 326th District Clerk, Taylor County, Texas. By Jo Ann Lackey, Deputy. 116-11c-84

STATE OF TEXAS

To: Keelie Ridgeway, Defendant in the cause herein described.

You are hereby commanded to appear and answer before the 350th Judicial District Court in the Courthouse in Abilene, Taylor County, Texas, at or before 10:00 a.m. on the first Monday after the expiration of 42 days from the date of issuance hereof, being at or before 10:00 a.m. on Monday the 24th day of June, 1985 then and there to answer the petition of Weldon O. Steen, Steena Beth O'Kelly Woodal, Robin Ridgeway, Ruby Higgins, Medford McCain, Elva Griffin, Dawson McCain and Retha Martin, in Cause No. 714-D, styled Weldon O. Steen, ET AL Vs. Keelie Ridgeway, in which Weldon O. Steen, ET AL are Plaintiffs and Keelie Ridgeway is Defendant. The

said petition filed may 8th, 1985, discloses that the nature of said suit is as follows:

The Plaintiffs seek partition through sale of the following described tract of land:

All of Lot Number One (1), Block "F", Replat of Western Heights Addition to the City of Abilene, Taylor County, Texas.

If this citation is not served within 90 days after the date of its issuance, it shall be returned unserved.

Issued and given under my hand and seal of said court on this the 8th day of April, 1985, at Abilene, Taylor County, Texas.

Rilla Mahoney, Clerk of the 350th Judicial District Court of Taylor County, Texas.

By: Debbie Berg Deputy 116-41c-64

Walla's have new grandson

Nikki and Jason Walla are proud to announce the arrival of their new baby brother, Aaron Josef Walla. Aaron was born at Rolling Plains Hospital in Sweetwater May 30, 1985 at 11:19 p.m. He weighed 9 lbs. 1 oz. and was 21 inches long.

His parents are Mike and Katherine Walla of Colorado City. Paternal Grandparents are Alf and Clara Walla of Merkel and Maternal grandparents are Joe and Hope Patterson also of Merkel.

Brady is recent

McMurry grad

Christina Lynn Brady received her B.S. Degree in Education from McMurry College in ceremonies held May 12, 1985.

Miss Brady is a 1981 graduate of Merkel High School. She is the daughter of Mr. and Mrs. John Brady.

With our multi-step wheat conditioning process.

Bring your harvested wheat to Bronco Seed Company in Stamford for our top quality conditioning process. First, our air screen machine removes weed seeds, trash, underdeveloped and oversized seeds and cracked or broken seeds. Quality continues as our three indent cylinders separate the wild oats from the good seed by length sizing. For final finishing and improvement of germination, our gravity table separates immature, lightweight seed from mature, heavy seed to improve seed vigor. We can treat your wheat seed with Vitavax®-200, the systemic fungicide that controls loose smut, bunt, seed rots and seedling diseases. Since Vitavax is patented as a growth stimulant, you should be able to graze your cattle earlier because Vitavax-200 treated wheat normally emerges faster and shows more vigorous growth. And, we offer you bulk grain storage before cleaning, and bag seed storage after cleaning.

Bronco Seed Co.

Box 789, Airport Plant • Stamford, Texas 79553 • (915) 773-2741

Adams-Fisher repeat vows Saturday

Donna Lynetta Adams of Abilene and Michael Gene Fisher of Merkel were married Saturday at the 7th Street Baptist Church in Abilene with the Rev. Darel Bunch of Countryside Baptist Church here officiating.

Given in marriage by her father, the bride is the daughter of Mr. and Mrs. Donald Adams of 2033 Sycamore. The bridegroom is the son of Mr. and Mrs. Billy A. Fisher, of Merkel.

Matron of honor was Mrs. Connie Hawkins and bridesmaid was Lisa Lanham, both of Abilene. Stephanie Bunch, niece of the bridegroom and the bride's sister, Mary Adams, were flower girls. Amanda Bunch, niece of the bridegroom, was ring bearer. Bestman was Jorge Rangel, of Abilene, and groomsman was Stevie Reiling, of Wylie. Bill Fisher, brother of the bridegroom, served as usher.

The bridegroom's mother was hostess for the reception and the rehearsal dinner, both in the church fellowship hall.

The bride attends Cooper High School and is employed by Armstrong Electrical Supply. Fisher graduated from Merkel High School and attended West Texas State University.

Following a trip to Dallas, the couple will live at 3602 Rolling Green Drive, Abilene.

Nominations due on June 1st for conservation award

(AUSTIN)—June 1st is the deadline to submit nominations for the annual awards program sponsored by the National Endowment for Soil and Water Conservation and the Dupont Company that recognizes new and cost-efficient methods that conserve the nation's natural resources.

Nominations may be submitted to the Texas Farmers Union, which is coordinating the program in the state.

TFU spokesman Pete McRae says state producers interested in entering the program have until the end of this month to submit their applications.

"We're asking individual farmers and agricultural organizations to submit entries for whatever they feel

like is an outstanding soil and water conservation farm," McRae said.

Last year Larry Sullivan, a farmer from Ennis, was among the three winners. He garnered the award for his use of techniques that helped reduce the amount of water needed to raise his crops.

According to McRae, Sullivan employed a technique called minimum tillage and further utilized a concept called grassed waterways, which helps alleviate evaporation.

Winners will receive \$1,000 certificates and will visit Washington to receive awards presented by President Reagan. National finalists will be selected from nominees from the 50 states. For more information, contact the Texas Farmers Union at (817) 776-4700.

Mail continues publication of new zoning ordinances

2-65. **Parking Space:** A surfaced area of not less than one hundred sixty-two (162) square feet exclusive of driveways, permanently reserved for the temporary storage of one automobile and connected with a street or alley by a surfaced driveway which affords satisfactory ingress and egress for automobiles.

2-66. **Planned Unit Development:** PUD may be defined as: a) land under unified control planned and developed as a whole; b) in a single development operation or a definitely programmed series of operations including all land and buildings; c) for principal and accessory uses substantially related to the character of the district; d) according to comprehensive detail plans which include streets, utilities, lots, building sites, site plans, floor plans, and elevations for all buildings as intended to be located, constructed, used, and related to each other.

2-67. **Porch:** A roofed space open on three (3) sides, one (1) or more stories in height.

2-68. **Regulatory Flood:** A flood which is representative of large floods known to have occurred generally in the area and reasonably characteristic of what can be expected to occur on a particular stream.

2-69. **Restaurant:** Any establishment whose principle business is the sale of foods and beverages to the customer in a ready-to-consume state.

2-70. **Rooming House:** See "Boardinghouse."

2-71. **School:** Includes grades one (1) through twelve (12) and may or may not include kindergarten.

2-72. **Sign:** See ARTICLE II, SEC. 3.

2-73. **Stable:** A structure with a capacity for more than four (4) horses or mules.

2-74. **Story:** That portion of a building included between the surface of any floor and the surface of the floor next above it, or if there is no floor above it, then the space between such floor and the ceiling.

2-75. **Street:** A public or private thoroughfare which affords the principal means of access to abutting property.

2-76. **Street Line:** A dividing line between a lot, tract or parcel of land and a contiguous street.

2-77. **Structure:** Anything constructed or erected, the use of which requires more or less permanent location on the ground or attached to something having a permanent location on the ground, including but not limited to advertising signs, billboards, lighting standards, etc.

2-78. **Structural Alterations:** Any change which would tend to prolong the life of a supporting member of a structure such as bearing walls, columns, beams or girders.

2-79. **Tourist Home:** A building, other than a hotel, where lodging is provided and offered to the public for compensation for not more than twenty (20) individuals and open to transient guests, with which there is used only one sign not more than two (2) square feet in area, the lighting of which shall be regulated by the inspector of building.

2-80. **Townhouse:** A single family dwelling unit constructed in a series or group of not less than three (3) nor more than six (6) contiguous units.

2-81. **Trailer Court:** A vacation travel trailer park.

2-82. **Vacation Travel Trailer:** A vehicular portable structure designed for a temporary or short-term occupancy for travel, recreational or vacation uses. Such vehicles shall include vacation travel trailers, pick-up campers, converted bus, tent trailer, or smaller device used for temporary portable housing.

2-83. **Vacation Travel Trailer Park:** Any tract of land under single ownership, two (2) or more acres, where accommodation is provided for transient trailer use. One (1) mobile home is permitted for residence purposes for the manager or owner in said park.

2-84. **Variances:** A grant of relief by the Board of Adjustment from the terms of this Ordinance.

2-85. **Water Storage:** Includes impounded surface water areas or surface tanks used for storage.

2-86. **Yard:** An open space at grade between a building and the adjoining lot lines, unoccupied and unobstructed by any portion of a structure from the ground upward, except as otherwise provided herein. In measuring a yard for the purpose of determining the width of a side yard, the depth of a front yard, or the depth of a rear yard, the minimum horizontal distance between the lot line and the main building shall be used.

2-87. **Yard, Front:** A yard extending across the front of a lot between the side lot lines, and being the minimum horizontal distance between the streets or place line and the main building or any projections thereof other than the projections of uncovered steps, balconies, or porches. On corner lots the front yard shall be considered as parallel to the street upon which the lot has its least dimension.

2-88. **Yard, Rear:** A yard extending across the rear of a lot and being the required minimum horizontal distance between the rear lot line and the rear of the main building or any projections thereof other than the projections of uncovered steps, balconies, or porches. On all lots the rear yard shall be in the rear of the front yard.

2-89. **Yard, Side:** A yard between the main building and side line of the lot, and extending from the required front yard to the required rear yard, and being the minimum horizontal distance between a side lot line and the side of the main buildings or any projections thereto.

2-90. **Zoning District:** A classification within which the regulations specified are uniform and which is assigned to a particular area of the City by delineation upon the Zoning District Map which is a part of this Ordinance.

2-91. **Zoning District Map:** The official, certified map on which the boundaries of the various zoning districts are shown and which are an integral part of this Zoning Ordinance and together with this zoning text, make up the Zoning Ordinance for the City of Merkel.

SEC. 3. ZONING DISTRICTS: The City of Merkel, Taylor County, Texas, is hereby divided into nine (9) zoning districts, as follows:

ABBREVIATED DESIGNATION	ZONING DISTRICT NAME
AO	Agricultural Open Space District
SF-1	Single Family Residence District
SF-2	Single Family Residence District
MF-1	Two-Family Residence District
MF-2	Multiple-Family Residence District
C-1	Local Business District
C-2	General Business District
LI	Light Industrial District
HI	Heavy Industrial District

3-1. **"AO" Agricultural Open Space District:** This district is composed primarily of unsubdivided land within the corporate limits of the City that is vacant or in agricultural use, with some dwellings and accessory uses.

3-2. **"SF-1" Single Family Residence District:** SF districts consist mainly of areas containing single family dwellings and open space areas where single family development appears to be desirable. The "SF-1" district is designed to provide the lowest residential density allowable and is therefore the most restrictive of the residential classifications.

3-3. **"SF-2" Single Family Residence District:** The "SF-2" district is designed to provide a medium residential density while, at the same time, preserve the character and interest of the single family neighborhood.

3-4. **"MF-1" Two-Family Residence District:** MF districts are designed to encourage the provision of conveniently located rental accommodations and to protect the residential character of the neighborhood by excluding commercial activities. The "MF-1" provides for a two-family dwelling density.

3-5. **"MF-2" Multi-Family Residence District:** The "MF-2" district provides for apartment dwelling density.

3-6. **"C-1" Local Business District:** The regulations of the "C-1" district are designed to provide a range of retail services to residents within the City, and associated with Central Business District development, but to exclude those businesses and advertising devices which would attract customers and traffic from outside the immediate area.

3-7. **"C-2" General Business District:** The "C-2" district regulations are designed to permit development of commercial activities including those which because of the sale, service, display, and storage characteristics may not be compatible with the Central Business District development and which may serve to attract customers from outside the City. Good automobile accessibility is essential in this district.

3-8. **"LI" Light Industrial District:** The "LI" district consists of land and improvements involved in manufacturing, wholesale, and medium intensity activities of a non-nuisance or limited-nuisance type. Residential uses are not considered to be compatible with light industrial activities.

3-9. **"HI" Heavy Industrial District:** The "HI" district consists of land and improvements used mainly for manufacturing and industrial activities whose generation of nuisance effects are greater than those of other industries. Residential uses are not considered to be compatible with heavy industrial activities.
