## To Begin Plans For New Bank Building

According to an announcement last week end by A. W. Anderson, Executive Vice President of the Security State Bank, plans are going forward to begin active planning shortly on a new building for the bank.

The new officers and directors of the bank feel that the community is entitled to the best and most modern banking facilities, and believe that the new quarters, after a complete remodeling, will enable them to serve their customers much more efficiently.

This project also indicates a very gratifying faith in the Hedley area and its future growth, for which the bank is to be highly commended.

Further announcements will be made as the project develops.

**Farm Facts**

Richard E. Bell of the U. S. Department of Agriculture's Economic Research Service reminds us the Russians need a farm labor force 6½ times bigger than ours—or about 45% of the available Russian labor—to supply a population only 20% greater than ours.

The American farmer is supplying 182 million of us with nearly all of our food and fiber and there's enough left over to export one-sixth of his cropland output.

The U.S.S.R. had 501 million acres of sown cropland in 1960. The United States had 329 million.

Russia's 53,400 collective farms averaged 6,785 sown acres. Their 6,500 state farms averaged 22,485 sown acres. The average collective had 386 households, and state farms had an average of 753 workers.

The United States, by contrast, prefers smaller but more efficient farm units. This country had over 3.7

## A. S. C. News

Premeasurement For 1962 Cotton Applications for premeasurement of 1962 cotton allotments are being taken. The cost of premeasuring has been set at 10¢ per allotment acre, 9¢ per mile round

trip to the farm, 15¢ per stake used in staking off the measured acres, \$8 50 for first plot and \$3 00 for each additional plot. The final date for applying for premeasurement is March 30, 1962.

If you do not intend to plant all of your 1962 cotton allotment, please release it to the county committee and it will be reapportioned to other farms in the county. This will not only help the farmers temporarily that receive the additional allotment, but it will help you in the future by maintaining the cotton history for your farm

at its maximum. The final date for releasing cotton is April 13, 1962. To be eligible to share in any cotton acreage released, you must make a written application in this office not later than April 13, 1962. The released acreage will be reapportioned not later than April 27th.

See Myrtle Kirkpatrick for flowers or leave order at Wilson Drug.

## Farm Facts

According to the Economic Research Service of the U. S. Department of Agriculture, the average American is eating more fruit than he did 50 years ago.

One person ate an average of about 172 pounds of fruit per year during 1910-14. Today the average person eats about 200 pounds of fresh fruit equivalent yearly.

Today 50% of the fruit we eat is processed, compared to only 13% back in 1910. The increase in use of processed fruit—particularly canned and frozen—has been about fivefold and has more than offset the per capita decrease in fresh fruit consumption since 1910.

Back in 1910 folks were eating a lot of dried fruit. It accounted for about 78% of the processed fruit in those days. Use of dried fruit has been declining since 1920.

In the 100 pounds of processed fruit we consume annually, 53% is canned fruit and fruit juice; 35% is frozen

fruit and fruit juice; and 12% is dried fruit. Citrus accounts for about half the processed fruit we eat.

Consumption of frozen fruits and juices has more than made up for a decline in use of canned fruits.

MEDICINE CHEST

"LEFTOVERS"

There's but one good place in the home for "leftovers." That's the refrigerator—and the "leftovers" should be foods, not medicines.

Medicine chest "leftovers" are risky at best, and often downright dangerous. The medicine your physician prescribed a year or so ago was intended to be used then, not now. Avoid serious danger—dump old medicine at once.

Each illness requires scientific diagnosis—and, usually, specialized medicine is indicated.

See your physician. Let him decide what's best. Call on us to provide your medication.
