VOL. 52

HEDLEY, DONLEY COUNTY, TEXAS, JULY 6, 1962

NO. 37

Hedley-McLean Road To Wed July 15

Following is a letter received last week by County Judge R. E. Drennan from Palmer Massey of Childress, district highway engineer:

Dear Sir:

We have just received word that the Highway Commission today approved a program of work which includes the remainder of the project from Hedley to McLean. This means that the entire length, including a bridge over the Salt Fork of Red River is now on approved program of work.

The contract for the north 8.6 miles has been awarded to Gilvin-Terrill Inc., of Amarillo and work on this portion is now underway. You have been previously advised of this fact.

The Highway Commission on May 2, of this year approved an extension of 7.4 miles to approximately two miles north of Salt Fork. Now the further extension approved today will complete the project.

C. B. Hudson of Clarendon will be in responsible charge of this work. He probably will start surveys within the next few weeks. After surveys have been completed, plans will be prepared. Actual construction will probably start early next year.

Yours very truly
Palmer Massey

This is the 100% meeting honoring the new officers and all local Lions are urged to attend. Dixon Latham will have charge of the program.

Eighty Lions and guests attended last week's 20th Anniversary banquet including five charter members. Also several representatives from out of town clubs and former members were present.

twister, and Earl Wheatly collected the fines.

The earliest sweetheart present was Mrs. Letha Springer and she and the Gilliam trio of Memphis were the program. J. M. Baker gave the invocation and Aubrey Cherry introduced the guests and speaker Boyd Meador. The prayer in memory of the departed Lions was led by Dixon Latham.

Summer Performance Work

Reporters have started measuring cotton, feed grains, soil bank base crops, diverted acreage and etc and you must assist the reporter when he visits the farm so that fields will be accurately measured

Fields originally planted to cotton that have been flooded out should be designated so credit can be given for this acreage as cotton history if it is needed. As you know, if less than 75% of the cotton allotment is planted the history for future years will be reduced; therefore it is very important that we include all cotton acreage destroyed beyond the producers control. Acreage diverted under a Conservation Reserve or Great Plains contract contributes to cotton history; also cotton acreage released is considered as acreage planted. Most revisits to farms after the original measurements must be paid by the producer.

The following rate will apply for revisits to farms to check disposition of cotton, feed grains, diverted acreage and soil bank base crops: \$4.00 per farm, plus \$2.00 for each plot over one. To have a farm remeasured for error will cost \$10.00 per farm, plus \$4.00 for each plot over one.

Diverted Acreage

Remember that all acreages designated as diverted under the wheat stabilization and feed grain programs must be planted to an eligible cover crop unless you have obtained approval from the county committee to summer fallow the land.

Again we wish to remind you that no crop can be harvested from the diverted acreage and no grazing will be permitted unless it is authorized later this year.

Now why would Martha put laundry in the freezer?

Flameless electric living is a way of life, nowadays.

Sometimes this wonderful way of life in the world of women brings about strange sights—sights that are incomprehensible to the mere man. Often, a man sees things more marvelous, even, than laundry in the freezer.

That's because Martha . . . and all the Marthas served by West Texas Utilities Company . . . knows better than anyone (even us) the many ways to live better, electrically.

All right, Mister — why does she put laundry in the freezer? Ask the inventor; she will also show you other ways her family uses flameless electricity for a better life.
