# PHARMACY—part of your health team

physician

prescription drug manufacturer

It is not by chance that your pharmacist has the proper drug ready for you when your physician prescribes it. The American people today enjoy a level of health far higher than ever before, and a large part of it may be attributed to the dramatic advances made by the "health team": pharmacist, physician and prescription drug manufacturer.

We call the complex process by which a drug moves from manufacturer to patient "the miracle of drug distribution." The teamwork of prescription drug manufacturer, drug wholesaler and pharmacist assures that you will receive the medicine you need. This miracle of drug distribution—the fact that the medicine you need is in your community pharmacy when you need it—is just one reason why prescriptions are today's best bargains.
