## Greenbelt Dam

The directors and engineers of the Greenbelt Water Authority met with the City Councils of Quanah, Childress, Paducah, Hedley, Memphis and Clarendon last Thursday and Friday.

The meeting with the local council was held in the community room of the bank and was well attended. Both Cok Si Freese, senior member of the engineering firm of Freese, Nichols and Endress of Fort Worth, and Dr. S. H. Townsend of Childress, President of the Authority, commented on the enthusiasm and interest of the Hedley citizens.

The dam can be financed with only the key cities of Quanah, Childress, Hedley and Clarendon without an increase in taxes or water rates even if the other cities do not choose to buy water from the Authority. Since no taxes are involved and the cost will be paid by the revenue received from the lake only one election will be needed. This will be to vote the water contract between the cities and the Authority and will be held in the interested cities on the same date, probably in August.

## A Resolution

We, the City Council of the City of Hedley, Texas, do hereby endorse the Greenbelt Dam project of the Greenbelt Municipal and Industrial Water Authority, as set forth in the report of the project's engineers, Freese, Nichols and Endress of Fort Worth, and believe that said project will be of large and lasting benefit to this community and the entire area involved.

Witness our hands this 10th day of June, 1963.

What  
 a  
 difference

Grandma may talk about the good old days, but a whole team of horses couldn't drag her back to an old fashioned kitchen. When you compare the two pictures, you observe an important fact. All the marvelously improved conveniences you see are made possible by electricity — every single one. Yes, electricity makes the difference, and what a difference it makes! It eliminates drudgery and creates more leisure time by performing countless tasks in the home at the flip of a switch. It turns factory wheels, lights the darkness, and does all these things effortlessly and economically. That is one of two reasons why the use of electricity is increasing here in the Center of the Southwest. The other is that more people, more businesses, more industries are coming our way. Our expansion program is keyed to this increase, for we are convinced our service area faces GROWTH UNLIMITED.
