New Hunting Regulations

Austin—A new regulation requiring retention of one fully feathered wing on dressed migratory game birds as a ready means of field identification has prompted some questions by Texan, according to J. B. Phillips, law enforcement coordinator for the Parks and Wildlife Department.

"This regulation was adopted by the Parks and Wildlife Commission from the framework supplied by the U S Fish and Wildlife Service and applies to all migratory game birds," he said. "That means the average hunter will be primarily concerned about mourning doves, white-winged doves, wild geese and ducks. Likewise the new rule applies to rails, gallinules, jacksnipe and woodcock which also are migratory birds."

Phillips said the wording of the regulation speaks for itself. It is: "The retention of one fully feathered wing on dressed migratory game birds as a ready means of field identification of species is required."

Hunters are also reminded that the shooting hours for mourning dove are from noon until sunset.

The daily limit is 12 and the possession limit is 24. The north zone season is from Sept. 1 to Oct. 30.

Vehicle Inspection

Austin—Col Homer Garrison Jr., director of the Texas Department of Public Safety, has announced that the time has arrived for Texas motorists to have their vehicles inspected again.

Garrison said Sept 1 marked the beginning of the 1965 vehicle inspection period as prescribed by the Public Safety Commission. As in previous years, the period will end on April 15, 1965.

"This means that between now and April 15 1965, more than 5,200,000 Texas registered vehicles will have to be inspected at the 5,200 official inspection stations in Texas," he said.

Garrison urged motorists to have their vehicles inspected in the routine visits to garages for ordinary maintenance and repairs and thereby eliminate the necessity of having to wait in line at a later date for an inspection sticker.
