### FREIGHT RATES REVISED BY ORDER OF I. C. C.

Washington, Dec. 23.—Orders of the Memphis-Southwestern investigation made public today by the Interstate Commerce Commission revise virtually all freight rates between Memphis, St. Louis and Oklahoma and in effect reaffirm the decision in the Shreveport rate case that there must be no discrimination or prejudice in interstate rates as compared with intrastate rates as compared with new maximum scale rates for application in the Southwest the commission fixed the charges higher than the Arkansas intrastate rates, and it is expected the railroads will undertake to obtain an increase in the Arkansas intrastate rates from the corporation of that state in accordance with the principle laid down in the Shreveport case and upheld by the United States Supreme Court.

### PERSHING VISITS BOYHOOD HOME IN MISSOURI

Laclede, Mo., Dec. 23.—Pershing, the general, laid aside military formality today and visited this village, his birthplace and boyhood home. When he stepped from his special car there was a rush by dozens of his boyhood chums and others to shake hands. The general seemed to enjoy the situation, giving a shout as he recognized some old friend.

### EXCHANGE OF RATIFICATIONS IMPOSSIBLE THIS YEAR

Paris, Dec. 23.—Exchange of ratification on the German peace treaty before the end of the year is considered impossible. This opinion was formed today when the head of the German delegation announced that he would be obliged to return to Berlin to consult with his government on the latest Allied communication.

### INDICTMENT BEEN FRAMED AGAINST THE EX-KAISER

(By Associated Press)  
London, Dec. 23.—Law officers of the crown held a consultation with French and Belgian law officers today with regard to the former German emperor. It is reported the conferees made out a case against the former kaiser and framed an indictment.

### WEALTHY TEXANS ROBBED IN NEW YORK HOTEL

New York, Dec. 23.—Two burglars attacked Mr. and Mrs. Aloysius Broderick, wealthy residents of Dallas, Texas, in their apartment at the Knickerbocker today and escaped with \$4,000 worth of jewelry. The two men were arrested later in a grill room of the hotel.

### MINERS' OFFICIALS HAD NOT HEARD OF STRIKE

Indianapolis, Ind., Dec. 23.—Officials at the headquarters of the United Mine Workers said today they had not heard of the strike of Kansas miners as a protest against the action of United States Judge Anderson, who ordered Howat remanded to jail.

### BRITISH PREVENT TURKS ENTERING THE CAUCASUS

London, Dec. 23.—British forces have occupied Batak and Baku to prevent the Turks from penetrating the Caucasus region, according to a Moscow wireless.

### RUSSIAN SOLDIERS FOUND FROZEN IN HOSPITAL

London, Dec. 23.—Seven hundred soldiers of the army commanded by Admiral Kolchak was found frozen to death in a hospital near Omsk, according to a wireless from Moscow.

### ALL RUSSIANS SURROUNDED

London, Dec. 23.—The troops of Gen. Petlura, anti-Bolshevik commander in the Ukraine, have been surrounded by Soviet troops in the vicinity of Berdikeff, in the province of Kiev, according to wireless dispatches from Moscow received today.

### POET-WARRIOR HAS LEFT SCENE OF ACTIVITIES

Rome, Dec. 23.—N'Annunzio has left Fiume on the steamship Pannonia, according to newspaper reports.

### AMERICAN TANK STAMER AGROUND NEAR TAMPICO

Tampico, Dec. 23.—The American tank steamer John D. Rockefeller is aground at the shore end of the jetty here. A high sea is running and it will be impossible to communicate with the tanker until it moderates.

### KANSAS MINERS PROTEST IMPRISONMENT OF HOWAT

Pittsburgh, Kan., Dec. 23.—Seventeen mines, employing 3,000 miners, were idle today, the result of a strike in protest of the action of Judge Anderson in sending Alexander Howat to jail.

### DEPLORABLE FATE OF BRILLIANT GIRL LINGUIST

Lawton, Mich., Dec. 23.—A signed statement accusing Joseph Virgo of performing an illegal operation upon Maude Tabor has been made by Mrs. Sarah I. Tabor, the 80-year-old mother of the brilliant linguist whose body was found in a trunk in the basement of her home here, Assistant Prosecutor Glenn Warner announced today.

### DALLAS SALESMAN SHOT AND KILLED BY WIFE

Dallas, Texas, Dec. 23.—Andrew Ott, a salesman, was shot and killed by his wife on a crowded business street today.

### TRANSATLANTIC FLYER STRATS FOR MOBILE

Galveston, Dec. 22.—The United States Commander A. C. Reed commanding, left at 9:35 this morning for Mobile. The plane had been here since Tuesday.

### JUDGE GOES ON FIRST-OFFENSE SOLDIERS

(By Associated Press)  
Dallas, Texas, Dec. 24.—Municipal Judge Felix D. Robertson, who has won state-wide reputation for his "one-dollar-per-mile-fines" against speed ordinance violators, is becoming equally well-known for his leniency to former soldier first-offenders.

Recently two negro chauffeurs, one of them an ex-soldier, were up for racing on the Oak Cliff viaduct. The former service man was discharged and the other fined \$25. "The only reason I'm not fining you," Judge Robertson said to the ex-soldier, "is because you served your country. Don't let me catch you speeding again."

The negro dice gamsters, whose defense was that they had served in France, also were discharged with the admonition that it was their first and last chance for clemency in municipal court.

Another former soldier, arrested for vagrancy, likewise was discharged when he convinced the court that he had served at Fort Sill. He was closely questioned as Judge Robertson himself served at the school of fire at Fort Sill.

"I believe in giving a former soldier a chance on his first offense, provided it is not of a serious nature," said the judge when court closed for the day, "but if he is arrested again it is another story."

### TEXANS DECORATED BY KING OF ROUMANIA

Bucharest, Roumania, Dec. 23.—Two Texans have been decorated by King Ferdinand for their work as members of the American Red Cross Commission in Roumania. They are Major George W. Bird of Dallas, who has been made an officer of the crown, and Lieut. Albert Knox of Takota, who becomes Chevalier of the Crown. Major Bird has served as chief of administration of the affairs of the commission since the armistice. Lieut. Knox, who is 20 years old, has the distinction of being the youngest Red Cross officer in Europe. He was a soldier in the American Expeditionary Forces serving throughout the St. Mihiel, Argonne and Verdun offensives. In the first drive in the Toul sector, the lieutenant was cited for bravery. At the close of the war, he joined the Balkan Commission of the American Red Cross.

### OVERCOATED NATIVES IN TROPICS SURPRISE MARINES

St. Thomas, V. I., Dec. 23.—United States Marines garrisoning these new possessions of Uncle Sam can't understand the fashions affectet by the natives. Just why a negro or Cha-Cha Indians should wear an overcoat when the thermometer stands at 100 in the shade still mystifies the "sea soldiers."

Many of the Marines down here have seen service in the neighboring island of Hayti, where clothes are the least consideration of the natives. But as soon as a new arrival reaches these shores he is approached by natives begging for his cast-off clothing.

For some strange reason the native Virgin Islander believes in wearing every article of clothing he can lay hands on. All American holidays are now celebrated by the natives, who spend the day parading about the streets, some if them wearing overcoats, capes, two or more pairs of trousers and a red bawanna handkerchief about the neck. Also they frequently adorn themselves with the horns of cows or oxen attached to the head just in front of the ears.

### TEACHERS AIDING IN SALE OF THRIFT STAMPS

Dallas, Texas, Dec. 23.—Co-operating with the Savings Division of the Treasury Department headquarters at Dallas, Texas, more than 25,000 school teachers in the Eleventh Federal Reserve District are now giving weekly instructions in Thrift economy to the students in their care. Practically every school room in the District has been organized into a Thrift Club, and the children alone this District now own more than \$16,000,000 of Government Thrift Stamps and War Savings Stamps.

### EX-SOLDIER SHOULD HOLD WAR RISK INSURANCE

Dallas, Texas, Dec. 24.—Emphatic denial is made by W. H. Kemper, district superintendent of the War Risk Insurance bureau, to reports in circulation that the war risk insurance is to be turned over to private insurance companies. The war risk policies will be maintained by the government and Mr. Kemper says the name of anyone circulating stories to the contrary will be appreciated by his office.

"The responsible officials of all large insurance companies have cautioned their agents to encourage soldiers, sailors and marines to keep their government insurance," said Mr. Kemper. "If any man advises a former service man to drop his life insurance which he has with the government or advises him not to reinstate it, the name and address of such a man would be appreciated by this office. If this is done the agent will not write any more insurance in Texas."

"The new converted insurance policies carry a high cash and loan value. They are now being held in the bureau pending the passage of the Sweet bill, which will permit the insured to exercise his option by having the proceeds of the converted insurance paid in a lump sum. The Sweet bill passed the house of representatives and is now before the senate."

### WOLF, FOX, LION, BEAR, ENLIST IN THE MARINES

Buffalo, N. Y., Dec. 24.—"Wolf, Fox, Lion, Bear" called the sergeant as he ushered three recruits into the Marine Corps Recruiting office here. "It sounds like a menagerie," said the recruiting officer to the sergeant. "Do you think we're signing up animal acts for a circus?" "No sir," replied the sergeant. "but there is still one more man to sign up, captain."

"Bring him in." "Baer!" shouted the sergeant and the fourth recruit entered.

### NEW USE FOR ARMY TANK

Houghton, Mich., Dec. 24.—The army tank which had a big share in revolutionizing methods of warfare during the late world conflict is to find a new sphere of usefulness in the snowy waste of the far northern states, according to plans of the Keweenaw county, Michigan, highway commission.

In Keweenaw county, it is proposed to use army tanks for packing the deep snow on the public highways during the long, hard winter season. Great rollers of woden construction have been used for years past for this purpose, the only disadvantages being that the horses hauling the packer had to flounder and wade through deep snow ahead of it. The tank, carrying its own motive power, will do the work much more rapidly and, because of its strength, much better than was possible with the rollers, the highway commissioners believe.

No trouble in getting the tanks over the snow is anticipated and it is proposed to have them driven by Keweenaw county young men who were soldiers in the tank service during the great war and who are, therefore accustomed to the ways and vagaries of the tanks in slimy mud and clay—not unlike, in the difficulties provided for locomotion, the snows of the north. Snow falls to a depth of several feet and drifts, in places, ascore or more feet in depth in the passes and along the trails or the cliffs and little mountains of Keweenaw.

The government, in turning army automobile equipment over to the states that have road improvement programs, will give Michigan, it is said, several army tanks and caterpillar tractors and Keweenaw's road commission will seek one.

### INSURGENT LEADER IS MURDERED IN ASIA

Rome, Dec. 23.—Mustapha Kemal, leader of the Turkish insurgents in Antolia and head of the Turkish Nationalist movement in Asia Minor, has been assassinated, according to a Smyrna dispatch to the Times.

**THIS** Christmas, the waxen candles and the tinsled fir herald the dawn of a new and more auspicious era. Let us meet it on the threshold with an abiding faith in mankind and in our own future.  
**MAYER & SCHMIDT, INC.**

JUNE C. HARRIS

In the columns of this paper has appeared the request signed by the Nacogdoches Bar asking Mr. June C. Harris of Nacogdoches to become a candidate for Judge of the Court Civil Appeals for the Ninth Supreme Judicial District of the State of Texas, to which request Mr. Harris yielded by making formal announcement for the office.

Mr. Harris is well qualified in every respect for this responsible position, having been admitted to the Bar in 1898, since which time he has been actively engaged in the practice of civil law exclusively, having a varied experience of twenty-two years as a practitioner.

Mr. Harris was born and reared in the town of Nacogdoches. When a youth of 17 years of age he read law and prepared himself to enter the practice with his uncle, the late Col. William Clark, but on account of the death of his uncle, and feeling that he was unable to bridge over the starvation period through which young lawyers must pass, he continued to work as a salaried man until 1894, when he was elected county clerk of Nacogdoches county, which office he held for two terms, during which time he resumed his study of the law, and entered the practice in 1898. Mr. Harris had the distinction in 1896 of being the only democrat, who had an opponent, elected, save Chas. Hoya, who was elected county surveyor. Since this time he has never been in politics. Mr. Harris spent many years in the newspaper business, beginning as a printer's devil and finally, only a few years ago while editor of the Redland Herald, severed his connection with the newspaper business.

TOO MUCH JINGOISM.

William Randolph Hearst is a great newspaper man, and owns a string of great newspapers. The greatest thing about Mr. Hearst's greatness is that he has sense enough to employ the best brains among the writers of the country, realizing that he is not overly well supplied with that kind of gray matter himself. But he has not sense enough to let them go ahead and run his papers as they ought to be run, without injecting into them his own egotistical personality. Without Hearst the Hearst newspapers would be truly great, but he himself is the drop of bluing in the tub of water.

As everybody knows, Mr. Hearst has been trying for years to rib up trouble between the United States and Japan. There is always lots of so-called and alleged "Yellow Peril" in Mr. Hearst's papers, when in point of fact there is no yellow peril, and never has been any, and is not likely to be any, and it would not amount to a row of pins if there was.

We all know, also, that Mr. Hearst was bound and determined to bring about war between this country and Mexico, and advocated a war of conquest on the part of the United States in that country. The general supposition is that he was actuated in that by his own personal holdings in Mexico, amounting to several millions of dollars, and wanted the government to protect that, no matter whether such a course should be right or wrong. What his reason is for wanting war with Japan, we cannot imagine, but, judging Mr. Hearst by his general reputation he has some ulterior motive. Mr. Hearst, by his own actions and utterances, has caused the people to believe that his patriotism is of the dollars and cents variety.

Mr. Hearst also had it all fixed

up that the United States and the allies were going to be whipped by Germany.

THE OUTLOOK

In a few days the old year will pass out, and a new one will take its place. Its coming is being looked for by some with a tinge of doubt, while others are expecting one of the most prosperous years in the history of the county. So far conditions in the county are in fairly good shape; money is plentiful and credit, the life of trade, is more than good. Merchants of the city are buying liberally for another year's trade, quietly evincing a profound confidence in the future.

The past year has been one of the most trying. Yet it cannot be consistently disputed that it has not been a prosperous one. Money has been in plenty, wages have been good, and despite the strikes, tie-ups and knock-outs, Nacogdoches has continued to sail as serenely as though nothing ever happened.

The next year heralds what promises to be one of the most sensational campaign years in the country has ever known. The democrats will engage in a great combat with the republicans, and mighty will be the crash. Usually campaign years are years of unsettled finances; but in view of what the country has gone through in the way of strikes and other disturbances and remained serene, no apprehensions need be entertained over politics.

Building in Nacogdoches for another year will take on a new aspect. Some fine homes are being planned for construction. Nacogdoches has outside capital interested in its resources, and no doubt before another year passes things worth while will make themselves felt.

The year 1920 promises unusual interest in the science of agriculture. Farmers over the country are buying modern machinery for the facilitation of better working conditions, and with this improved, up-to-date machinery in action better crops can hardly be avoided. It is a mighty long trail that ever turns, and it cannot be expected for the coming year to be a repetition of the past year. Bollweevils, worms and other troublesome pests may not be heard of another year. And if they are, farmers are contemplating an extensive poisoning program which is said to give most satisfactory results.

For the most part everyone is looking for advantageous crop conditions during the coming year.

Too, live stock is offering a new field, more than ever, for citizens the county. Livestock are reported to be in fine shape, and no doubt this will be a good source of revenue in the year to come. "Raise what you live on at home," seems to be getting more than ever the motto of the average home in Nacogdoches county, and with that uppermost in the typical life of a people, prosperity cannot help but exist.

So, for the most part, the year 1920 holds beckoning hands. It is thought by the best minds of the country that it will be a very prosperous one, and the man who makes extensive plans for 1920 will no doubt be a fortunate one. At any rate, do not be a knocker; have confidence in the future and the future will have confidence in you. Be a booster.—E. S.

MEXICO CITY THOUGHT  
CATAclysm ARRIVED

Mexico City, Dec. 18.—Earthquake shocks at 6 o'clock last night caused some excitement among the people following the publication of numerous reports that the end of the world was due. No damage resulted, although the shocks were more severe than commonly felt in Mexico City.

Count shows Kentucky dry by 10,717 majority on the vote cast November 8.

FLU

can generally be warded off by keeping the bowels open and the liver working actively. Now is the critical time to cleanse the body of lurking malaria germs. Purify the blood now and at the same time guard against influenza.

SCHAPP'S LAXATIVE  
CHILL TONIC

does this by destroying malaria germs and making the blood pure and vigorous. Acts on the liver, and moves the bowels without taking calomel.

For sale by most druggists. Failed direct for 60 cents, if your druggist can't supply you. 60c a bottle at Drug Stores JOHN SCHAPP & SONS Fort Smith, Arkansas

CURE OF MARVELOUS POWER

Bayard Taylor's Description of Sensations Under the Influence of Hashish is a Classic.

Hashish may be reckoned one of the most classic of all intoxicants. Herodotus, the "Father of History" speaks of its use among the ancient Scythians, and it was doubtless the drug referred to by Homer as "the assuager of grief" in the house of Menelaus. Bayard Taylor's account of his sensations on first taking it at Damascus is memorable. It put him in a state of mental exaltation wherein all sensations as they arose suggested more or less coherent images in a double form, one physical, the other spiritual, and the latter revealing itself in a series of indescribably brilliant metaphors. A few minutes after taking the drug he found himself at the foot of the Great Pyramid. It was instantly transported him to its summit, far above the palm groves and wheat fields of Egypt. Then, looking down, he observed that the pyramid was not built of stone, but of gigantic blocks of "red" tobacco! For a moment he writhed in a perfect paroxysm of laughter at this ludicrous discovery. Then his senses were ravished with delicious perfumes, and there came to his ears divine melodies and harmonies such as Beethoven might have dreamed. Time and space seemed vastly extended, so that a minute seemed an hour and an hour a year, while his friends in the same room with him seemed miles away, as though he were viewing them through a reversed telescope.

ANIMALS POINT OUT RICHES

Innumerable Instances Where Prospectors Have Been Aided in Search for Earth's Treasures.

A very large gold nugget is said to have been found the other day in a wild bee's nest in Australia. The story seems likely enough for Australia has yielded all the really monster nuggets to date—the "Welcome" weighed 2,395 Troy ounces and was valued at \$43,500—and one of the biggest was discovered by a prospector who stubbed his toe against a projecting angle of it.

On the Wind river Indian reservation, in Wyoming prospectors look for grains of gold brought to the surface of the ground by ants. And in Arizona anthills are a common source of excellent garnets which are fetched to the surface by the industrious insects.

During the war we had grievous need of antimony to harden shrapnel bullets. The latter are of lead, but require the addition of 15 per cent of antimony to enable them to hold their shape when the containing shell explodes.

Accordingly, the government sent out experts to look for deposits of the metal, and the most productive antimony mine that we now have in this country was located by the help of a badger, earth thrown out of the creature's burrow showing a glint of the precious stuff.

TNT Wins Contest With Dynamite.

A contest was recently staged between 40 per cent dynamite and trinitrotoluene, and the latter won, says the Scientific American. Two concrete piers had to be blasted out and this gave an opportunity for a comparative test of the two explosives, with the result that 14.9 cubic feet of concrete were removed per pound of TNT, and only 14.1 per pound of dynamite.

TNT is no doubt destined to be used extensively in engineering work, as it is less sensitive than dynamite, but greater precautions must be taken to ventilate after a shot, owing to the large amount of carbon monoxide which is one of the principal products of combustion.

More Than Master of Languages.

Wilfred Stevens, one of the chief translators of the state department at Washington, speaks 33 languages, although he has never been outside of the United States and has never been to college. One of the languages is an invention of his own, which he says is an improvement over Esperanto. Among his list of languages are Chinese, Japanese, Persian, Turkish, Armenian, Arabian, Bulgarian, Croatian, Russian, German, Portuguese, French, Spanish, Italian, Yiddish, Swedish, Norwegian, Dutch, Hungarian, Finnish, Ancient Greek, Latin, Hebrew, Polish and Roumanian. He has also mastered three so-called universal languages—Esperanto, Ido and Ufano, the latter his own idea.—Detroit News.

For Repairing Punctured Hulls.

The cement for repairing apertures in submerged ships of a Cardiff patent consists of five parts by weight of crude rubber dissolved in naphtha, three of rosin, two of white lead, nine of coal pitch, and one-fourth part of shellac. The heated mixture is used for cementing metal surfaces and may be applied to cloth to form an adhesive patch. The material may be thinned with naphtha, when it is suitable for paint.

Placing Blame Where It Belongs.

"It's h'm, h'm" grumbled Farmer Hornbeak, gazing down the rows. "So that's the way you planted the corn, eh? Looks like you were staggering full of hard cider when you done it!" "Aw, them rows was straight when I planted 'em," doggedly replied the hired man. "The hot sun has warped 'em; that's all."—Kansas City Star.

WATER OF PECULIAR VIRTUE

Trouble With Philadelphia Visitor Was That He Didn't Understand Just How to Use It.

Harry N. Taylor, president of the National Coal association, said in Washington:

"It takes an optimist to look at the situation hopefully—an optimist like Rittenhouse Walnut of Philadelphia.

"Rittenhouse Walnut, in the days before Philadelphia got a filter plant, laughed heartily one evening at a friend who complained that the Philadelphia water was too muddy to bathe in.

"Why, my boy," said Rittenhouse, "our Philadelphia water is the best in the world for bathing purposes. Why, it beats Marienbad."

"But it's so muddy."

"That's the point," said Rittenhouse. "It's medicinal mud, full of phosphates and chlorides and things. Tonight you try a Philadelphia water bath, a good, long bath, and you'll feel like a new man. Let me caution you, though, to use no towel!"

"No towel?" sneered the other. "No towel, eh?"

"No, sir; no towel," said Rittenhouse. "Just stand before the radiator and let the water dry on you. Then brush it off."

IRREPARABLE LOSS TO WORLD

Treasures of Louvain Library, Destroyed by the Huns, Can by No Possibility Be Replaced.

The completeness with which the famous library of Louvain was destroyed comes out in the report of the American committee which has been visiting the ruin with a view to building a new library of Louvain, which is to be the "free gift of the United States." Some of the walls, pillars and buttresses remain standing, and even retain their carvings and sculptures, but the idea of rebuilding the library has been abandoned. Of the contents of the Louvain library nothing at all is left; the few volumes that were found still retaining their shape crumbled when touched. Aside from the thousands of volumes that can be replaced the ruin contains the ashes of at least a thousand manuscripts that were priceless, because it would be impossible to replace them. There were, one may admit, more widely important things in the world, for example, than the two autograph manuscripts of Dionysius Carthusiensis, but Louvain was proud to possess those specimens of his handwriting, and all the wealth of the United States cannot give them back.—Christian Science Monitor.

ORIGIN OF "DICKENS NAMES"

Pursuit Long a Favorite Amusement of the Admirers of Writer of Immortal Fiction.

One of the most interesting of semi-literary hobbies is the search after the origin of "Dickens names." It is especially interesting, no doubt, because nobody can prove to demonstration that his particular "solution" is the correct one, and, as a consequence, the long list of potential discoveries is seldom reduced, much less exhausted. One of the latest "strikes" is a possible origin for the old favorite, "Chadband." A recent writer tells how, a few years ago, in one of the small hamlets between Sutton and Epsom, there stood a small tailor's shop bearing in large letters the name of "Chadband." And he goes on to wonder whether Dickens, "going down by road Dorking, noticed the name, and kept it for future use," for on that route he would have passed the very door of the shop. The writer seems to think it highly likely; while, in proof that Dickens actually made the journey, was it not in the town of Dorking that there stood the Marquis of Granby? And was it not the hostess of the Marquis of Granby who ultimately became Mrs. Weller?—Christian Science Monitor.

Beauty in Seaweed.

Contemplating seaweed, the curator of this department in the New York botanical gardens has made a suggestion, timely with regard to the present exhibition of specimens in the Metropolitan Museum of Art, that here may be found many a charming suggestion, hitherto unnoticed by artists, for the creation of decorative designs. One is reminded of the passage in the movement of ocean waves; and wonders that Ruskin himself, with his keen appreciation of art suggestions in nature, did not deal with the varied beauty of design discoverable in the different seaweeds. Perhaps he did, and one has forgotten it; at any rate seaweed has not, it seems, yet supplied suggestion for the design of lace, tapestries, prints, and architectural ornament, and the idea adds material for the work of designers.

Mortgage on a Cat.

There was filed in the office of the recorder of deeds in Stockton, Mo., the most unusual chattel mortgage ever presented at the office. The articles mentioned to secure a debt of \$40 were as follows: One shotgun, one Winchester rifle, two violins, one black tomcat with white feet, named Tom. It was not specified that the guns had hammers nor the fiddle with bow, but the identification of the tomcat was considered by the mortgagee the most valuable part of the security.—St. Louis Republic.

DON'T OVERLOOK THIS

Service, that is good, substantial service coupled with both owning and operating, and including both the first cost and after cost is what you receive in the New Oakland Sensible Six for 1920.

And the price is not a boosted war price, as the car is only \$85.00 higher now than it was 2 years ago, however you get all the improvements that a large corps of engineers have tested and found practical.

The upkeep on the New Sensible Six is the very minimum that is possible on any car. The car is built right and every piece in the entire car carries a 12 months factory guarantee.

We operate and maintain an up to date Service Station and carry all the parts in stock for the owners convenience. Come around and see this new car and see the merits of construction.

It is the lowest priced Six Cylinder car sold today and it has a 44 horse power Valve-In-Head Motor.

350 ANTI-BOLSHEVISTS  
SHOT AT PETROGRAD

Helsingfors, Dec. 19.—The discovery of an anti-Bolshevik plot is reported in Petrograd. Nine hundred persons, including several French and English citizens, have been arrested, and 350 have been executed following trial by a revolutionary tribunal.

EXPLOSION AND FIRE  
AT U. S. ARSENAL

Dover, N. J., Dec. 18.—Causes of a spectacular fire which swept part of the Picatinny arsenal following an explosion in the research laboratory last night was made the subject of an official investigation by army officers today. Four buildings were destroyed entailing a loss estimated at \$1,000,000.

DIRECTOR GRAND OPERA  
DIED IN CHICAGO

Chicago, Ill., Dec. 19.—Cleofonte Campanini, director general of the Grand Opera Company, died of pneumonia this morning.

GASTON GIRLS RENDER  
SPLENDID PROGRAM

Those at the Queen Theatre last night enjoyed a treat when Misses Mattie Eula Gaston, Ouida Jho Gaston, Maude Gaston, Lila Gaston, Oient Gaston rendered an exceptionally brilliant musical program. The singing and playing done by the young ladies was hugely enjoyed by the entire house.

The girls will do some additional playing some time in the future. Everybody fortunate enough to hear them expresses the greatest appreciation of their talent.

Mr. and Mrs. Ed Ragland of Chicago were in the city trading Wednesday.

COTTON GIN REPORT

Washington, Dec. 22.—Cotton ginned prior to December 13, the Census Bureau announced today, amounting to 9,402,520 running bales, including 103,926 round bales, 27,806 bales American-Egyptian and 6,129 bales sea island.

TRYING TO REACH AN  
AGREEMENT WITH GERMANY

Paris, Dec. 22.—The supreme council, it became known today, is making every effort to reach an agreement with Germany on the question of reparation for the sinking of the German fleet at Scapa Flow so that the protocol may be signed and ratifications of the treaty of Versailles exchanged before Christmas.

PALMER SAYS VICTORY  
FOR GOVERNMENT

Washington, Dec. 19.—The termination of the soft-coal strike was not a settlement, but was a victory for the government, Attorney General Palmer today told the senate subcommittee investigating the strike. "The government has won its fight," Mr. Palmer said. "There was no settlement in actuality. The men and the union officers have complied with our demands and returned to work."

The cavalry boys who a few days ago departed for Austin, at which place they were to engage in some expert target practice, have returned. They all report an extremely fine time and assert the record made by the 'Doches squad was a good one. Twenty men from Nacogdoches took part in the exercises. It is not known just what rating the gunners from here made, but Capt. W. W. Lee states that he will be able to give out the information in a few days.

Freezing Weather  
or Muddy Roads

Don't forget that we have a good supply of Johnson's Freeze Proof

and know exactly how to put it in your radiator to keep it from freezing in cold weather, and it is not expensive. It does not matter whether you have a Ford car or any other kind, we can serve you along this line.

Tire and Mud Chains

We have a full stock of all size Weed and Rid-O-Skid Chains for Fords or any other kind of cars and our prices are right. Don't fail to see us.

FORD

SALES SERVICE

The railways of the United States are more than one-third, nearly one-half, of all the railways of the world. They carry a yearly traffic so much greater than that of any other country that there is really no basis for comparison. Indeed, the traffic of any two nations may be combined, and still it does not approach the commerce of America borne upon American railways.

## Ask Any Doughboy Who Was "Over There"

and he will tell you that American railroads are the best in the world.

He saw the foreign roads — in England and France, the best in Europe — and in other Continental countries — and he knows.

The part railroads have played in the development of the United States is beyond measure.

American railroads have achieved high standards of public service by far-sighted and courageous investment of capital, and by the constant striving of managers and men for rewards for work well done.

We have the best railroads in the world — we must continue to have the best.

But they must grow.

To the \$20,000,000 now invested in our railroads, there will have to be added in the next few years, to keep pace with the nation's business, billions more for additional tracks, stations and terminals, cars and engines, electric power houses and trains, automatic signals, safety devices, the elimination of grade crossings — and for reconstruction and engineering economies that will reduce the cost of transportation.

To attract to the railroads in the future the investment funds of many thrifty citizens, the directing genius of the most capable builders and managers, and the skill and loyalty of the best workmen — in competition with other industries bidding for capital, managers and men — the railroad industry must hold out fair rewards to capital, to managers and to the men.

American railroads will continue to set world standards and adequately serve the Nation's needs if they continue to be built and operated on the American principle of rewards for work well done.

*This advertisement is published by the Association of Railway Executives*

Those desiring information concerning the railroad situation may obtain literature by writing to The Association of Railway Executives, 61 Broadway, New York.

### ARRESTED FOR STEALING AMERICAN ARMY STOCKS

Paris, Dec. 22.—The police authorities at St. Nazaire have arrested French, Spanish and American hold-up men who have been stealing American army stocks and arming them away in automobiles.

### LETTER FROM HIGH SCHOOL STUDENTS

Dear Santa Claus: I know you are very busy but we sincerely hope you will receive his plea of remembrance before you set out on your Christmas tour. I know that out of the goodness of your heart you will grant our plea. In the 'Doches High School all of the classes are fine, of course, but one of the very best classes is 10th. There are forty students in this class and they are real students, too. But Santa, 10th is very unhappy. There are 40 students and only 35 desks to accommodate them. Five students have to shift along the best they can, with their beloved school-books on the window sills. Santa Claus, if you would only bring this class this much needed necessity we would be SO happy. In behalf of the deskless students, 10th Students.

Ganella Pack of Chireno was in the city trading Wednesday.

Dr. George Campbell of Douglass was in the city trading Wednesday.

John Commander of Appleby was in the city trading Wednesday.

Mrs. Richard Bessa of Mayotown was a shopping visitor in the city Thursday.

Miss Jessie Leslie of Cushing was a business visitor in the city Thursday.

Mr. and Mrs. J. T. Gregory of Sacul were in Nacogdoches Friday.

Eddie Page of Chireno passed through the city Thursday on Royal on his way to Chireno.

Mr. and Mrs. L. M. Mangham of Appleby were in the city trading Friday.

Miss Anna Mast arrived Wednesday from Houston, where she had been spending a few days.

Mrs. W. O. Serrett left Wednesday for St. Selma to spend a few days visiting friends and relatives.

Mr. and Mrs. Claibe Johnson and little son Claibe are in the city for the holidays.

Miss Margaret James, who had been visiting at Paris, Texas, returned home Wednesday.

Neil Weatherly of Appleby passed through the city Friday on his way to San Antonio.

Cards are out announcing the marriage of Miss Pearl Lloyd of Beaumont to Mr. John Franklin Willis of the same place. Miss Pearl is the daughter of Mr. and Mrs. T. J. Lloyd of our city and will be remembered kindly with great hopes of untold happiness by Nacogdochians.

The football game Christmas between the present 'Doches football team with the ex-stars promises to be as live a game as ever staged by any college. Both sides of the contest are confident that their side will be the winning side. Those who know say that the present team of 'Doches is one of the best she has had in a number of years.

Sergeant Bullock of the army recruiting station, Cooger Pierce, Elmer Summers and Max Hart made a quick trip to Appleby Sunday afternoon in Mr. Hart's new Nash. They found the road in very good condition.

Tom Simmonds of Appleby was in the city Thursday attending to business.

Jack Y'Baro of Chireno was in the city Thursday attending to business.

**Cataract Deafness Cured**  
by using a special medicine they cannot reach the diseased surface of the ear. There is only one way to cure cataract deafness, and that is by a constitutional remedy. **Cataract Deafness** is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a ringing sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be removed and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by cataract, which is an inflamed condition of the mucous surface. Hall's Cataract Medicine acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Cataract Deafness that cannot be cured by Hall's Cataract Medicine. Cures guaranteed. All Druggists. 75c. **H. J. CHENEY & CO., Toledo, O.**

### CURRENCY MELTED IN CHINA

Chinese "Cash" Has Gone the Way of Many Other Forms of Money in That Country.

With the end of the war comes the end, one may believe, of an odd spectacle sometimes seen in the neighborhood of Tsinan, Tsingtau, and doubtless of other Chinese cities—the sight of a Chinese coolie pushing a wheelbarrow loaded with coins on their way to be melted down for the metal. War conditions raised the price of brass and copper to such an extent that it was found profitable to purchase coins and melt them, a practice which brought inconvenience, for it materially reduced the circulating medium. Laws were passed against it, but they seem to have been more or less successfully evaded, and wheelbarrows continued to be used in supplying the smelters. Thus is added another incident in the long history of Chinese "cash," which began 3,000 years and more ago with the circulation of coins that had the shape of knives, still to be seen used as paper knives by foreigners in China who have picked them up searching for antiquities. Other shapes were introduced, and before the Chou dynasty, about 600 B. C., the Chinese currency was ax-shaped and spade-shaped as well as knife-shaped. At that time round coins with a hole in them, so that they might be held together with a cord, were introduced and found much more convenient.

### HAS VAST STORE OF GOLD

Nearly a Million and a Half Pounds of the Precious Metal at Kolchak's Command.

Something of the Arabian Nights, a memory perhaps of All Baba when he discovered the treasure cave, is suggested by the story of Kolchak's gold supply and the visit of inspection by foreign correspondents under the guidance of the Omsk government's minister of finance. About 1,440,000 pounds avoirdupois of gold: such is said to be the reserve of the Kolchak government at Omsk. Its value in American money is placed at about \$475,000,000. "In one room there were about thirty tables loaded down with gold in all forms, requisitioned by the bolshevik from the people. . . . Conspecifics in this lot was a set of solid gold dishes, formerly the property of Mr. Tereschtschenko, one of the wealthiest of the Russian nobility." The set of gold dishes, in the upheaval of Russia, had passed through several hands before falling to the bolshevik, and eventually to the Omsk government; and at least one of the possible heirs had renounced the title to it in view of its use by that government in the restoration of Russia. Most of the gold, however, was displayed in coins and ingots, and its exhibition was meant to inspire confidence in the ability of the government to finance some of its immediate operations.

### She Told the World.

Getting on a car I hustled into a window seat for comfort, and unconsciously crossed my legs, placing my foot against the forward seat to brace myself back as I opened my newspaper.

Later on I was suddenly brought back to self-consciousness by the terrifying scream of a woman in front of me as "rip" went the back of her clothing.

When I planted my foot against the forward seat I inadvertently anchored the two tails of her jacket, or whatever it was, that had slid down through the opening, and caused her to arise with such disastrous results. And when she told the world what I had done it was hard telling which of the two was most embarrassed.—Chicago Tribune.

### Puzzles.

"Charley, dear," said young Mrs. Torkins, "everything you see in print now refers to some problem."

"I have observed it."

"I wish we could go back to the style of literature that prevailed in our parents' time and keep all the puzzle pages in the back part of the magazine."

In Washington.

"I wish," said the head of the department, "to let some of my clerks go."

"Why?"

"I have nothing for them to do."

"Huh," said Senator Graball, "that's a queer reason for wanting to let clerks go."—Louisville Courier-Journal.

### An Early Riser.

"Do you find the same old trouble in getting your boy awake in the morning?"

"No. It's the other way around now. Since he was in the army Josh has made it his business to wake up everybody at daybreak, blowing a bugle."

### Sweden Using Wooden Corks.

Owing to the scarcity of true cork in Sweden wooden corks are being used in that country, the substitutes being made from quick growing pine. This wood has wide annual rings and one of its characteristics is its tendency to swell somewhat after it has been fashioned into stoppers.

The Bargain Rush.  
"One would think those women were rushing to get a husband," growled the man in the department store.  
"No," said his wife, sweetly, "they're after hairpins at 3 cents a paper. Something useful."—Louisville Courier-Journal.

**Ford**  
THE UNIVERSAL CAR

Ford Delivery Cars are used in fleets by many of the largest business firms of the country. This is because the Ford Delivery Car has solved the problem of safe and quick delivery with the smallest possible expense. Easy to understand, easy to drive, and durable. A faithful servant giving years of faithful service. We can give you any style of body you want. One thing is sure—every retail merchant will make money by having a Ford Delivery Car. Come in. Let's talk it over. We assure you genuine Ford service with genuine Ford parts.

### WRECK KILLS MANY ON CANADIAN PACIFIC

Oraawa, Minn., Dec. 21.—Thirteen persons were killed or burned to death and many sustained burns and other injuries when a freight train collided with a special train from St. Johns, New Brunswick, loaded with stowage passengers from the steamship Empress of France on the Canadian Pacific railway today near here. The freight telescoped the engine and forward cars of the passenger train and the wreckage burned. . . . Members of both trains went among the killed. The bodies of eleven were removed from the wreckage to the snow-covered embankment and are awaiting identification.

### Gives Permission to Use Name

Eugene Palmer, Lawrence, Mass., writes: "Foley's Honey and Tar relieved me of a cough from which I suffered for weeks. You have my full permission to use my name in an advertisement." Foley's Kidney and Tar checks colds, cuts the phlegm, soothes inflamed membranes, clears breathing passages.

### \$20,000 WORTH LIQUOR Poured INTO STREETS

Kansas City, Mo., Dec. 15.—Whiskey valued at \$20,000, taken in raids, was poured into the street by Roy Hubbard, assistant attorney general of Kansas.

### If your digestion is bad, your bowels constipated and you don't eat or sleep well, you need Prickly Ash Bitters.

It purifies and invigorates the vital organs, restores appetite, energy and cheerful spirit. Price \$1.25 per bottle. Stripling, Haselwood & Co., Agents.

### The army recruiting station of this city reports that the government is making an unusual demand for men in the Panama zone.

The Panama zone is romantic enough for the "romanticist," and the young fellow looking for some all-round good excitement should find all this is looking for in the picturesque Panama.

### If the kidneys are ailing, use Prickly Ash Bitters.

It is a fine kidney tonic. Relieves backache, bladder troubles, indigestion and constipation. Price \$1.25 per bottle. Stripling, Haselwood & Co., Agents.

### T. F. Rogers of Cushing spent Thursday in Nacogdoches attending to business affairs and feeling of the political pulse.

**FERRY BROS.**

CHRISTMAS GREETINGS

Tomorrow is the day of the days. It is a day for every one to love and respect. It is a day on which our nation is supposed to have been born. A people who are Christians all over the world give themselves over to rest and celebration on the 25th of December.

Tomorrow no Sentinel will be published. It will be recalled that you got your Sentinel Thanksgiving. There were numerous papers that suspended publication on that day, but the Sentinel put out an edition. But tomorrow everyone connected with the Sentinel is going to celebrate. They are going to have the time of their lives. And after the day shall have passed, they are going to be able to put out a bigger, better and more deserving paper than ever. Why not you, yourself, enjoy the day to its fullest? It comes only once a year. The Sentinel wishes you, however, one and all, a merry Christmas and an early paper Friday. Christmas Greetings.

JUST CHRISTMAS

Monday was one of the most busy days in the history of the year. People from all parts of the county swarmed the streets, going hither and thither in their efforts to purchase their coveted Christmas necessities. Stores were packed to the limit with buyers and prospective buyers, and all of the stores carried an increased clerical force.

Christmas should be a happy day for all. There is no time in any part of the year that commands the respect and reverence that the day supposed to be the birthday of Christ does. All over the world, all people bow their heads to the time we know as December 25.

From all indications, Nacogdoches is going to have indeed a merry Christmas. There has been a reasonable amount of prosperity in the county, and for the most part the citizens of the county are all happy. Weather conditions promise to be favorable for a mild Christmas, and there is nothing that brightens a time like bright, sunny weather.

So why not have a great time on the 25th? Why not throw all cares to the winds, and be happy? Why not step out of the old channels of grind, and drink a little of the elixir of happiness? You will be a bigger soul by it, you will think better of yourself for it, and the world will think better of you.—E. S.

Eugene Palmer, L.L.D., writes: "My day's health is believed me of a cough from which I suffered for weeks. I was given permission to use my name in an advertisement." Foley's Kidney and Bladder Pills, cuts the phlegm, soothes inflamed membranes, clears the urinary passages.

**SURGEONS** agree that in cases of Cuts, Burns, Bruises and Wounds, the **FIRST TREATMENT** is most important. When an **EFFICIENT** antiseptic is applied promptly, there is no danger of infection and the wound begins to heal at once. For use on man or beast, **BROZONE** is the **IDEAL ANTISEPTIC and HEALING AGENT.** Buy it now and be ready for an emergency. Price 25c, 50c, \$1.00 and \$1.50. Sold by Stripling, Haselwood & Co.

**Chamberlain's Cough Remedy.** Do not imagine that because other cough medicines failed to give you relief that it will be the same with Chamberlain's Cough Remedy. Bear in mind that from a small beginning this remedy has gained a world wide reputation and immense sale. A medicine must have exceptional merit to win esteem wherever it becomes known. Sold by Stripling, Haselwood & Co.

**About Croup.** If your children are subject to croup, or if you have reason to fear their being attacked by that disease, you should procure a bottle of Chamberlain's Cough Remedy and study the directions for use, so that in case of an attack you will know exactly what course to pursue. This is a favorite and very successful remedy for croup, and it is important that you observe the directions carefully. Sold by Stripling, Haselwood & Co.

HAVE SIMILAR FINGER MARKS

Important Discovery Made by California Professor as to Peculiarities of Family Groups.

Prof. J. A. Larson, instructor of physiology in the University of California, announced a new discovery in connection with finger prints which is likely to have a remarkable influence on many important cases that concern the law courts of California.

Briefly Professor Larson's discovery indicates that a similarity of finger prints among members of a family is sufficiently marked to enable scientists to trace family groups and determine positively whether a given individual is really a member of the family to which he claims relationship.

The importance of the discovery in probate cases such as the Slingsby case is obvious.

Should Dr. Larson's new discovery be accepted by law and science, the Slingsby decision may be reversed, as well as many other analogous cases.

Dr. Larson's investigations began in 1913 at the Boston University.

"Since that time I have examined prints of members of approximately 100 families," he said, "and I am satisfied in my own mind that such a means of identification is possible. I am preparing detailed reports of my work now in order that science may be benefited by my discovery. Before I complete this, however, I expect to investigate the prints of fifteen or twenty additional families so as to remove all doubt as to the accuracy of my discovery."—San Francisco Chronicle.

AMBER FORMED BENEATH SEA

Natural Resin of Pines Turned Into Precious Material by the Action of the Elements.

The world's supply of amber, that rare and therefore precious substance, the "gold of the north," as it has been called, comes from the coast of Samland in the eastern Prussian peninsula, between the towns of Burstrort and Palmnieken, and here the shafts of a famous mine run out under the Baltic and the miners are actually working under water. Ages ago the country was a land of pine forests which the ocean overwhelmed; the pine trees vanished beneath the surface of the sea, and then, century by century, the wood became fossilized and the natural resin of the pines was turned into amber. Millions of years were needed to transform the resin into amber, and the search for amber has developed romantic and picturesque episodes like those that have become part and parcel of the story of gold and diamonds. An amber mine, however, is not necessarily under water, and there is an open-air mine at Palmnieken where amber is dug for in much the same way as diamonds are sought in the mines of Kimberley. In normal times this one mine provides occupation for about 3,000 amber workers.

**Our Own Masters.** We have been told that Angora is to save the world and rescue civilization from dissolution, but we must do it in our way. In the way that has made us, in a little more than a century, the most unified, the most virile, and the most potent single power in the world. And when we ask ourselves what it is that has given us this unity, this virility, and this potency, the answer is, that we have founded this nation upon principles of law, and upon the guarantees of individual rights under the law. That is our great contribution to civilization; and if we are to be of use to other nations, old or new, our first thought must be to remain our own masters, to preserve our independence, to control our own forces as a nation by our own laws, and to protect our heritage of organized liberty from any form of destruction or perversion.—David Jayne Hill in the South American Review.

**Giant Warrior of Middle Ages.** The pride and magnificence that played their part in the days of chivalry can hardly have a better illustration than the suit of equestrian armor which has recently been placed on exhibition in the Metropolitan Museum of Art, in New York city. Sieur Jacques Gourdon de Genoulhac wore the suit in the sixteenth century, and Sieur Jacques was an uncommonly large and powerful warrior, who served under Louis XII and Francis I of France. As may be deduced from their armor, the knights of the period were not noticeably large men, and Sieur Jacques must have seemed a veritable giant for a six-foot attendant at the museum has tried on his armor and is said to have "merely rattled around in it."

**Sea Moss.** Owing to the war the supply of "sea moss," of which several hundred thousand pounds, valued at almost \$50,000, have been imported annually, for the most part from France and Germany, has virtually come to an end. Sea moss (not seaweed) is the popular name of several kinds of small marine animals that grow in colonies of a branching, plantlike form. Their commercial value arises from their having a horny skeleton which preserves the general plantlike shape of the growth.

**Difference of Custom.** "In old England people showed their excitement by saying 'Zounds!'" "And in New Jersey the commuters say 'Zones!'"

POULTRY

REDUCE WASTE BY CANDLING

Difficulty in Determining Quality of Certain Classes of Eggs in Commercial Plants.

(Prepared by the United States Department of Agriculture.)

Although the candling method of determining the quality of eggs in the field is the best known for commercial grading, recent investigations conducted by the United States department of agriculture show that one group of eggs of inferior quality cannot be detected by this system, and that if it is inadequate in grading still another group. The investigations, reported to Department Bulletin 702, show that experienced candlers and those using extreme care do not make many mistakes in grading eggs. Eggs with green whites and those having a normal appearance but bad odors are not recognizable by candling. White rots, more particularly mixed rots, eggs with yolks slightly stuck to the shell, blood rings and eggs with bloody whites are not always detected, and are included in the group most frequently miscandled by inexperienced or careless workmen. Eggs with brown shells or light-colored yolks make detection between good and bad specimens more difficult.

In the studies with skilled candlers, who candled a number of cases of 30 dozen eggs each, the average proportion of bad eggs miscandled per case varied from 0.2 in spring flocks to 10.77 in very low grade cold-storage eggs. The percentage of bad eggs which could not be found by recandling ranged from none to 6.93 per cent per case and depended on the grade of the eggs examined. In the commercial candling of 128,587 eggs, 5,985 bad eggs were found, of which 71.65 per cent were recognized by candling and the balance, or 28.35 per cent, were not found until the eggs were opened and examined individually. Then it was observed that the 28.35 per cent was divided between a group of 17.02 per cent bad eggs, which in many instances are distinguishable by candling, and a second group of 11.33 per cent consisting of types of bad eggs which cannot be discovered until the eggs are broken.

The accuracy of candling depends upon the quality of the eggs and the skill of the candler, according to the bulletin. In plants having poor management and poor candling the number of good eggs in the discard sometimes reached 11 dozen to the case. The en-

Candling Eggs in a Government Poultry Demonstration Car.

forcement of a system of checking the work of individual candlers, particularly in plants employing inexperienced help, was found to be the best way to maintain high efficiency and thus eliminate waste by grading marketable eggs as rejects.

**Minister Wants to Help.** It is only natural that one who has been relieved from suffering should feel grateful and want to help others. Rev. W. F. M. Swyndole, 818 Elm St. Macon, Ga., writes: "My kidneys gave me much trouble before I took Foley Kidney Pills. I am ready at any time to speak a word for Foley Kidney Pills."

**Eight Children Had Croup.** "I have eight children and give Foley's Honey and Tar to all of them," writes Mrs. P. Rehkamp, 2404 Herman St., Covington, Ky.: "They all were subject to croup." It loosens mucous and phlegm, stops that strangling cough, makes easy breathing possible and permits quiet sleep. Contains no opiates. Children like it.

**Sleep and Rest.** One of the most common causes of insomnia and restlessness is indigestion. Take one of Chamberlain's Tablets immediately after supper and see if you do not rest better and sleep better. They only cost a quarter. Sold by Stripling, Haselwood & Co.

To Our Friends and Customers:  
We want you to know that it is not on account of cold blooded business that our thoughts turn to you just now.  
If there was nothing more than the lifeless dollars in business it would not be worth while.  
From the depths of our hearts we wish for you  
A Merry Christmas  
and  
A Prosperous and Happy  
New Year  
Sincerely  
CASON, MONK & CO.

BEST WEIGHT FOR LEGHORNS

Three and One-Half Pounds for Hens and Four and One-Quarter for Cocks is Average.

There is no standard weight given for Leghorns, though the average may be said to be three and one-half pounds for hens, and four and one-quarter pounds for cocks. Pullets and cockerels are a trifle under these weights. Some strains run heavier, which is obtained by introducing Minorca blood. It is thought that some of the English breeders have crossed a little Wyandotte blood, for their Leghorns are of a much different type.

SELECT HENS FOR BREEDERS

Choose Individuals That Are Layers and Meet Standard Requirements as Far as Possible.

In selecting for egg production include in the breeding pen hens that laid in November, December and January. Choose individuals having constitutional vigor and meeting standard requirements so far as possible.

**PRINTING**  
Exceptional Facilities Enable Us to Guarantee Our Work  
The kind you ought to have and when to have it, that is when you really need it. We have contracted the habit of satisfying our customers. Our work is of the highest quality and our services are always at your instant disposal. We are especially prepared to turn out letterheads, billheads, notehands, statements, folders, booklets, envelopes, cards, circulars, and many other jobs. Come in and see us next time you need something in the printing line.

**The Proof**  
of the pudding is in the eating. So the proof of good printing is in the satisfaction of the user. The kind of printing we do is the kind of printing that is secured. We are the kind of printing men and are so anything in this

To market, to market, to buy a fresh fish!  
Serve it for dinner as Hoover would do!  
To market, to market, to purchase some beans!  
Bake 'em and learn what economy means.

**USE HONEY, SAVE SUGAR.**

The keeping of bees is becoming a greater money-maker for both men and women. The late sugar shortage brought many to realize the value of a good working bee hive. Men who are busy in offices all day find the care of bees both healthful and interesting, keeping them out-doors and affording some recreation.

Honey is an unknown sweet to many of our families, due to the scarcity and often the price. Honey is equal in sweetness to sugar and may be used as a substitute. In using honey the liquid in any recipe is reduced one-quarter of a cup. Honey contains protein and some soluble minerals which are invaluable in rebuilding the broken-down tissues of the body. It is a good substitute for fats, which are scarce, high-priced and hence precious, and may be used on cereals and breakfast foods in place of sugar and cream.

**Fruit Pudding.**—Take one-half cupful each of grated raw potatoes, carrots, chopped suet, raisins, honey, currants, one tablespoonful of grated orange peel, one-eighth of a teaspoonful of soda, one-half teaspoonful of salt, one-quarter of a teaspoonful of cloves, a half teaspoonful of cinnamon and one cupful of flour. Mix and sift the dry ingredients, adding more flour if needed to make batter stiff as for fruit cake. Oil a mold and pour the mixture into it, leaving space for expansion. Steam four hours.

**Honey Sauce.**—Boil together for 15 minutes one cupful of honey, one-quarter of a cupful of water, one tablespoonful of sweet fat, a pinch of salt, one-quarter of a teaspoonful each of nutmeg and cinnamon, the juice of one lemon and one orange, one-quarter of a cup of raisins. Serve hot for dessert on hot mush or boiled rice.

**Italian Honey Candy.**—Take one cupful of sirup, four tablespoonfuls of honey, one teaspoonful of vinegar or lemon juice. Boil until brittle when dropped in cold water. Pull while still warm.

Hate always hurts the hated most—for in many cases the hated are big enough not to let the hate in.—Adams.

**DISHES SWEET AND OTHERWISE.**

The season for small cakes and candies is here and with the desire to conserve as much sugar as possible we will be glad to use the various sirups for sweetening.

**Coconut Sweets.**—Take a pound package of coconut and a pound can of Eagle condensed milk. Mix thoroughly and make into small flat cakes, then bake in a slow oven until brown. The reason for naming the bread is because of its consistency; it makes a more satisfactory cake.

**Cornmeal Brittle.**—Take one cupful of sorghum and boil it until brittle in cold water. Let it cool, then mix with the best oil one-fourth of a teaspoonful of soda. Turn this into a shallow greased pan.

**Peanut Candy.**—Boil together three-fourths of a cupful of corn sirup and one-fourth of a cupful of sorghum until it forms a hard crack in cold water. Stir in one cupful of chopped peanuts and pour into a well-buttered pan. Mark in squares.

**Peanut Brittle.**—Take one cupful of corn sirup, one teaspoonful of vinegar, one-fourth of a teaspoonful of salt, one teaspoonful of vanilla, one cupful of peanuts. Cook sirup, vinegar and salt until it forms a soft ball when dropped in cold water. Add the peanuts to the sirup and cook in an iron kettle, until the sirup becomes golden brown, stirring all the time to keep from burning. Add vanilla and pour into a shallow pan. Break in pieces when cold.

**Honeyed Orange Peel.**—Boil the peel of two oranges in water until tender; then drain and remove as much of the white as possible. Cut in narrow strips with scissors. Boil one-half cupful of honey with the peel for five minutes. Pour on a shallow plate to cool.

**Hermits.**—Cream one cupful of fat, one and one-half cupfuls of sugar, three eggs, one cupful of minced raisins, one teaspoonful of soda, one-half teaspoonful of nutmeg, and a teaspoonful of cinnamon, flour to roll. Cut with a cookie cutter and bake in a

**MOST PRODUCTIVE HEN TYPE**

Poultry Keepers Aim to Combine Economy and Efficiency—More Eggs From Fewer Hens.

(Prepared by the United States Department of Agriculture.)

American poultry keepers as a class have always aimed to combine economy and efficiency in poultry production. In war-time patriotism impels them to extraordinary efforts in this direction, moving them to do everything, and to leave nothing undone that will help to quickly increase the nation's supplies of poultry and eggs. It is not the high cost of feed alone, since America entered the war, that has led to more careful attention to the routine work in poultry keeping, and to greater judgment and skill in feeding. The saving of money has been an incentive, but, above and beyond that, every poultry keeper realizes that getting better production from less feed is doing double duty in conservation and production—saving feed and at the same time increasing food.

That American poultry keepers are, on the whole, more efficient in egg production seems to be plainly indicated by the fact that, as compared with the period before the war, market receipts of eggs increased more than receipts of poultry. Reports from persons in touch with production in many localities agree that more eggs are being produced from the usual numbers of hens kept, and in many instances from smaller numbers. It may well be presumed that such efficiency in one line of production extends to others closely co-ordinated with it, and that poultry meat is being grown more economically—though no common statistics indicate it, and it is not so readily observed in common practice.

Among professional breeders of standard poultry the first result of war-time conditions was to emphasize fresh, and more effectively than ever, the benefits of rigid selection of breeding stock and severe culling of the young stock while growing. The high cost of feed hit this class of poultry keepers hardest because, even under normal conditions, a considerable part of their stock must be carried for quite a long time after coming to maturity before it is sold. The concentration of interest and industry upon things immediately relating to the conduct of the war and the production of food tended to decrease the demand for their stock.

So, with stock actually costing a great deal more than in normal times, they had to face the problem of either reduced sales or lower prices on good grades of stock to attract trade. Some chose one alternative, some the other; but all adopted the policy of using only

Barred Plymouth Rock Hen.

breeders of the very best type, and so reducing to the lowest practical point the waste of feeding inferior young stock.

Professional breeders were compelled to do this, because no other plan of economizing comparable to it in efficiency was open to them. Good feed in abundance had to be used, whatever the cost, or their birds would not attain full development and command profitable prices.

Their methods generally are so well adapted to their work that no considerable saving of time and labor is possible. The only solution of their problem was the exclusive production of poultry of the quality that would bring profitable prices, for in feed and care birds of high quality cost no more to produce than those of greatly inferior quality.

For the professional breeder this exact adaptation of the stock to the end for which it is designed is a necessity. In the matter of producing eggs and meat there is not the same absolute necessity. The volume of production can be maintained, and even greatly increased, by the continuance and extension of those better practices which have made possible so much of the increase which has already been attained. But if the producers of eggs and poultry for the table are to do their utmost to increase the supplies of those products, the easiest, the shortest and the surest way is through general use of the most productive types; that is, by the use on the part of every poultry keeper of the most productive types in his stock. It is not meant that there should be wholesale replacement of ordinary stocks by stock of strains celebrated for extreme high production. That may be done to advantage in many instances. But with the great majority of poultry keepers immediate gain in production must be made by good use of such stock as they have

**IMPORTANT KIND OF POULTRY**

Common Economic Classification is Based Upon Adaptation to Certain Lines of Food.

(Prepared by the United States Department of Agriculture.)

The first step toward the increase of supplies of poultry products through the use of the type best suited to production is to get a correct understanding of type. In fowls, the most important kind of poultry, the common economic classification is based upon the adaptation of certain types to certain lines of food production. Three such distinct types are recognized—the egg type, the meat type and the dual-purpose type, which is commonly considered an intermediate of the other two, though in reality it is the primary type of which the others are modifications.

Because the smallest standard breeds are distinctly of the egg type, the largest breeds are good layers only

Chickens Are Usually More Healthy When Kept on Open Range.

under expert care, and the best known of the dual-purpose breeds are of medium size and weight, small size and great activity are commonly supposed to be characteristic of the egg type, large size and an indolent temperament are supposed to characterize the meat type, and medium size without either marked energy or great indolence is supposed to be characteristic of a mediocre dual-purpose type. These misconceptions arise from a too literal acceptance of the designation of a type as the definition of that type. Not only do breed types tend to change but ideas of breeders as to the most desirable type for a breed change. In fact the breeders are rarely in full agreement as to the precise type which should be preferred, and consequently nearly every breeder of superior ability has his "strain," which while conforming to the general description of the standard presents distinctive peculiarities in points where a standard cannot be rigid. Such elasticity in the application of standards is, in the nature of the case, inevitable. It is not at variance with the purpose of standards in stock production but is in harmony with their function of securing general progress toward approved ideals.

Within the range of each breed type there exist, on a much smaller scale but still in marked degree, the same differences which distinguish the three general types—the egg type, meat type and dual-purpose type. Observation of individual differences along these lines gives insight into the properties of type which affect production.

**SLACKER FOWLS NOT WANTED**

Connecticut Bureau Arranging Demonstrations Showing How Loafers May Be Detected.

(Prepared by the United States Department of Agriculture.)

Sell your slacker hens and buy War Savings stamps is the advice of the county agent in Middlesex county, Conn. The county farm bureau is arranging slacker-hen demonstrations showing how these hens may be detected and disposed of to advantage. Good fat hens will bring 35 to 38 cents per pound, live weight, at the present time. In these days when idleness means direct loss the farmer cannot afford to support loafers on the job, says the county agent.

**PRODUCING EGGS IN WINTER**

Comb of Laying Hen Is Bright and Red and Pin Bones Well Spread Apart—Mate Layers.

If winter egg production is desired, only winter layers should be bred, it is easy to select the laying hen. Her comb is bright and red and her pin bones will be well spread apart. Observations should be made during the winter so that the poultry keeper will know which of his hens are good layers. These should be marked so that they may be used for mating next spring.

If love is the greatest thing in the world, then hate is the greatest evil, for hate is the opposite of love. Love attracts, hate repels. Love is life, hate is death. Hate is the worst waste that can enter a human soul.—George Matthew Adams.

**OYSTERS IN VARIOUS WAYS.**

Oysters are usually liked by most people and when reasonable in price add variety to the diet, although the nutritive value of the oyster is not especially high. In using oysters buy the largest you can as they are far more economical than the smaller variety as usually served.

**Oyster Toast.**—Take half a dozen large, fat oysters; stew them in their own liquor, adding seasoning to taste. Have ready as many rounds of well-toasted bread lightly buttered. Pour the oysters and their broth over the toast. Serve at once.

**Stewed Oysters.**—Cook a pint of oysters in their own liquor until the edges curl; season well, after removing from the liquor, add rich milk or thin-cream to the hot broth and when boiling hot add the oysters and serve. When the oysters are removed from the broth add plenty of seasoning. Then when the milk and broth are added they will be ready to serve.

**Steamed Oysters.**—Place well-washed oysters in a steamer with the shells placed to save the liquor when open; set over a kettle of boiling water and steam until the shells open, when they are ready to serve. Serve in the shells with butter and salt to season.

**Panned Oysters.**—Lay in a pie plate or dipping pan a half-pint of oysters; have the dish large enough so that each oyster lays flat on the bottom; add a little oyster liquor and put into the oven; just heat through until thoroughly hot, but not baked, which will be in about five minutes. Prepare toast lightly buttered and moisten with the oyster liquor. Pour the oysters over the toast and serve at once.

**Oyster Pie.**—Line a deep pie tin with paste, put in a pint of oysters, season with salt, pepper and butter, sprinkle with flour and cover with a crust, leaving an opening for steam to escape. Bake until the crust is brown in a quick oven.

If every one were wise and sweet,  
And every one were jolly;  
If every heart with gladness beat,  
And none were melancholy,  
If none should grumble or complain,  
And nobody should labor,  
In evil work, but each were fain  
To love and help his neighbor—  
Oh, what a happy world 't would be  
For you and me, for you and me!

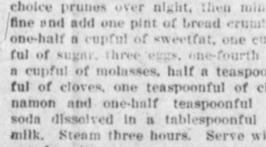

**OLD-FASHIONED GOOD THINGS.**

This is the season of the year when grandmothers' recipes are looked over for the family dishes which in each home are especially cherished. "No one makes mince pie that tastes like our mince pie," and the fruit cake and plum pudding are equally as good. Each cook adds a bit of flavor or seasoning which makes the dish individual, therefore it is often difficult to get just the required taste. If some of the small and important details have been omitted. Most of us have had experience in trying to get a delightful dish put down in terms of cupfuls and tablespoonfuls; it is next to impossible as bowls and cups differ in households as well as hands and pinches. These days with the standard measuring equipment we should be able to pass on a satisfactory recipe.

**Suet Pudding.**—Take one cupful each of molasses, sour milk and chopped suet. Add three and one-half cupfuls of flour, one cupful of chopped dried fruit, two eggs, well-beaten, and such spices as one likes. Add one teaspoonful of soda and steam two hours.

**Prune Pudding.**—Soak a pound of choice prunes over night, then mince fine and add one pint of bread-crumbs, one-half a cupful of sweetfat, one cupful of sugar, three eggs, one-fourth of a cupful of molasses, half a teaspoonful of cloves, one teaspoonful of cinnamon and one-half teaspoonful of soda dissolved in a tablespoonful of milk. Steam three hours. Serve with any favorite sauce.

**Pork Pudding.**—Take one cupful of fat salt pork, chopped fine, one cupful of chopped raisins, two cupfuls of sifted flour, three and one-half cupfuls of lard, one and one-half cupfuls of sour milk, one teaspoonful of soda, one teaspoonful of cinnamon and one-half teaspoonful of cloves. Mix and beat well and steam four hours. Serve with a rich fruit sauce.

Winter egg production is desired, only winter layers should be bred, it is easy to select the laying hen. Her comb is bright and red and her pin bones will be well spread apart. Observations should be made during the winter so that the poultry keeper will know which of his hens are good layers. These should be marked so that they may be used for mating next spring.

**TIMBER SUPPLY IN DANGER**

Expert Points Out What Seems to Him Imperative Need of a National Forest Policy.

"One of the most interesting things to come to my knowledge is the seeming lack of interest on the part of the people of the United States to save our forests," said Charles Lathrop Pack, president of the American Forestry association. "Our new growth of timber is not more than one-third of the amount being used or destroyed every year. There is an end to all things," continued Mr. Pack, "and the timbermen, lumbermen and wood-using industries must get together with the foresters on a national forest policy of some kind. We all know about locking the stable door after the horse is stolen, and we can all stand around and wonder what to do when the well runs dry, but what are we going to do when the forests give out? Place your finger on something into which the use of wood in the making does not enter. Rather hard for you to do it, I will say. The newspaper owner knows about the mounting cost of print paper and the cost of the barrel in which you find your flour has gone away up. You cannot eat the paper or the barrel, but they figure big in the high cost of living you bear so much about. We must have a national forest policy in this country, and that soon."

**CHANGED FOR THE BETTER**

Conditions, Especially in the Holy Land, Have Been Much Improved in Recent Years.

Whoever has journeyed to Cairo and from there desires to go on to Jerusalem may now buy his ticket in the Cairo railway station and look out of the windows of the train at the scenery of the plain of Sharon as he makes his trip. The rail connection has been completed by a new line from Ludd to Haifa, passing the ruins of Athlit, where the Templars long ago had their last stronghold in Palestine. The journey from Egypt to the Holy land is greatly simplified; one need no longer land at Jaffa, nor wonder how much one's plans will be interfered with by uncertain conditions of wind and sea. More than that, Jerusalem is a much less dubious place for the tourist to visit, and its points of interest may be much more conveniently inspected than they used to be. Good order is maintained, the city is under British discipline, the chance of "falling among thieves," more or less an accepted risk under the Turkish regime, need hardly be considered. One may visit the mosque of Omar without the undesired companionship of a Turkish soldier. A good deal of respect has been heard that "Europe would never be the same again" for tourists to look at, but in some respects at least it will be much changed for the better.

**Embers.**

Winter fuel is being gathered up wherever it may be found this autumn. In Paris the coal carts which all day lumber along the Avenue de Versailles on the edge of the Seine are followed by a troop of women and children armed with sacks and baskets. The soil is worn, there are many holes, the joints are frequent and bits of coal will come tumbling down. There is a rush and eager hands thrust the black treasure into grubby baskets and gaping sacks. The gleaners organize themselves into shifts—it's worth doing—they get as much as a sackful—one hundredweight—in one quarter of an hour. Thus Paris is taking in its coal—in good time. In London where all the streets, or nearly all, have been up this August and September there has been a harvest of half-worn tarred wood blocks—little heaps of them along the side of the road. No lack of customers either, and in areas and back yards tidy little stores of blocks have been put by for use in the coming winter.

**Paternal Wisdom.**

"Pa, what is an 'impresario'?"  
"An impresario, my son, is—er—er—a man who runs a restaurant."  
"But, pa, I thought he had something to do with a theater."  
"That's right, my son. He's a man who runs a restaurant in connection with a theater."—Birmingham Age-Herald.

**Fashion's Power.**

"Some of the most fashionable people are going to wear old clothes."  
"That's terrible news," wailed the man with shiny sleeves.  
"Why terrible?"  
"If old clothes become fashionable they'll cost so much that nobody can afford to buy a second-hand suit."

**Father's Punishment.**

"Out after hours again, eh?" said the father.  
"Only ten minutes," replied the son.  
"Well, go at once to your room, sir, lock yourself in, and bring me the key. This thoughtlessness must be checked."—London Tit-Bits.

**Water Iris Good Fertilizer.**

High value as a fertilizer is found in the water iris. The material is partially dried before stacking, and after becoming well rotted it proves to have about the same composition as farm yard manure, except that it is richer in potash.

**Only One Thing to Do.**

Three-Finger Sam says the only way to reform a man who has learned to deal off the bottom is to keep him good and scared.

**GOT INSPIRATION AT PIANO**

Immortal Melodies Evolved by Masters While Their Fingers "Wandered Idly Over the Keys."

A story is told of Mendelssohn to the effect that the charming arpeggio figure in the Spring song of his "Song Without Words," came to him on a day when he played with his children at the piano, and allowed them to catch his hands, as they wandered over the keys; and it is a fact that many of our most beautiful musical productions owe their origin to extemporizing on the piano.

This is not to be wondered at for many of our greatest musicians have poured out their heart's deepest feelings as their fingers have flitted, in a desultory fashion, over the keys, producing corresponding notes and chords to their ever-changing moods; finding at the keyboard a vent for their inmost thoughts and desires, often meeting with that triumphant response that time can never diminish.

We can see in the works of Chopin and Schumann a proof that in the piano is the origin of many of their most beautiful productions, while in the great symphonies of the old masters their shape, form, and color have been gained at the piano where their fingers "wandered idly over the noisy keys."

This is not so hard to understand when we consider that the method of composing a melody is, in essence, but the picking out and assimilating some melodic tune to which the harmony is afterward added. From this primitive instinct is ultimately produced the immortal tone pictures of the great musicians.

**FISH LIAR WORKS OVERTIME**

Here is One Concerning a Salt Heron That is Challenge to the Imaginative.

That is the worst of those fish stories. Somebody always comes along with a better one. Recently the Evening News told the V. A. D.'s story of the frozen fish that came to life in the cooking pot. Then a correspondent—a naval officer, it should be said—easily puts that to shame.

"An interesting experiment was tried some little time ago," he writes to us, "with an ordinary heron."  
"The fish was put into a large bowl of salt water and every day a small quantity of water was removed and an equal quantity of 'fresh' was substituted, until eventually the fish lived and thrived in purely fresh water."

The experiment was a success, with the success of his experiment at the end, he tried remaining a long while in the water until one day he saw the fish was dead and he had to be put into the salt trough and was dead.

**Verse and Music.**

The value of words is being up, at least in Rome. There the words have a value that they do not have in the words and music of a poem are equal. At present in the United States and Canada the writer of the words of a song gets only a pittance on the royalties of a song written outright at the start. In England many of the most popular ballads have brought their writers no more than two or three guineas, while the composer goes on cashing his royalty checks for years. What measure publishers apply to the two arts thus combined to make words so much less valuable than music is rather hard to understand. Verse writers might well send a little gold medal to the just-minded citizens of Rouen who have ruled it a false one.

**Unusual Methods Used.**

With the end of the war have come many revelations of the unusual methods used by the Germans to spread their harmful propaganda in the countries arrayed against the central powers, and of the clever work which often frustrated their well-laid plans. In one case, mentioned in Popular Mechanics Magazine, what appeared to be an old and worn copy of the works of Homer proved to be a volume of attacks on British rule in India. Only the first few pages of the book were printed with the words of the ancient poet. The remainder, though in Greek type like the beginning, was filled with the diatribe. The volume was addressed to an educated Hindu capable of translating the Greek into an Indian dialect.

**Costly Parking Space.**

Tired of being taken into court by traffic policemen, because at the time he goes to business his car has to be parked in the street, as day storage is at a premium and access to a public garage at those hours is difficult, Philip Rosenbach, art connoisseur of Philadelphia, has just paid \$10,000 for a stable property which will convert into a private garage for himself. It is near his place of business.

**Babies More Plentiful Than Houses.**

"It is easier to find a baby than a house in Sydney now," reports the bulletin of that Australian city, concluding thusly: "Writer knows a young bride who went to live with her father pending the discovery of a suitable residence. She has two infants now and is still living with her mother."

# CALLED HER FAMILY TO HER BEDSIDE

Six Years Ago, Thinking She Might Die, Says Texas Lady, But Now She Is a Well, Strong Woman and Praises Cardui For Her Recovery.

Boys City, Tex.—Mrs. Mary Kilman, of this place, says: "After the birth of my little girl... my side commenced to hurt me. I had to go back to bed. We called the doctor. He treated me... but I got no better. I got worse and worse until the misery was unbearable... I was in bed for three months and suffered such agony that I was just drawn up in a knot... I told my husband if he would get me a bottle of Cardui I would try it... I commenced taking it, however, that evening I called my family about me... for I knew I could not last many days unless I had a change for

the better. That was six years ago and I am still here and am a well, strong woman, and I owe my life to Cardui. I had only taken half the bottle when I began to feel better. The misery in my side got less... I continued right on taking the Cardui until I had taken three bottles and I did not need any more for I was well and never felt better in my life... I have never had any trouble from that day to this."

Do you suffer from headache, backache, pains in sides, or other discomforts, each month? Or do you feel weak, nervous and fagged-out? If so, give Cardui, the woman's tonic, a trial.

J. 71

## ACTION COAL OPERATORS MAY CAUSE EMBARRASSMENT

Washington, Dec. 22.—The refusal of the coal operators to accept the government's strike settlement terms, it was pointed out today might embarrass the operation of the commission appointed Saturday by the president and authorizing an investigation of miners' wages and working conditions and increase coal prices if necessary. Further effort probably will be made to induce the operators to accede to the government's proposals despite renewed insistence of the operators' committee that neither had they accepted nor indicated they would accept the terms.

## Stiff? Sore?

A lame back, a sore muscle or a stiff joint often is considered too lightly by the sufferer. It should be remembered that backache, rheumatic pains, stiffness, soreness, swollen skin and puffiness under the eyes are symptoms of kidney and bladder trouble—and these certainly should not be neglected.

**Foley Kidney Pills**  
help the kidneys eliminate from the system the poisonous waste and acids that cause these aches and pains. They act promptly and effectively to restore weak, overworked or diseased kidneys and bladder to healthy, normal condition.

J. E. Simmons, 400 E. 50th St., Portland, Ore., writes: "I was troubled with backache and urinary trouble. I tried Foley Kidney Pills and will say that I highly recommend them to any one troubled in that way, as they are excellent."  
Stripling, Haselwood & Co.

## TO RESTORE HISTORIC SPOT

City of New Orleans Taking Steps to Preserve and Beautify Bienville's Landing Place.

An effort is being made in New Orleans to restore the old historic spots around the city. With the restoration of the old Place d'Armes, the rehabilitation of the Cabildo and the Pontalba apartments which surround it, and the preservation of all as an artistic center for the old French and Spanish quarter, an effort is being made to restore and preserve the landing place of Bienville, where he first set foot on the high land in 1720, at the place he was destined to convert into Nouvelle Orleans. This landing place, which lies on the river directly facing the Place d'Armes, which is now Jackson square, is covered with the switch tracks of the Southern Pacific and public Belt railroads, and with a part of the large steel warehouse belonging to the board of commissioners of the port of New Orleans.

Supporters of the Louisiana State museum have appealed to the mayor and the various civic organizations to have these sheds and railroad tracks removed at once, inasmuch as the land, clear from the Cabildo to the river itself, was expropriated some time ago to be put in historical and artistic reserve. As all the water front of New Orleans and the east bank of the river belongs to the city and state forever, the completion of the artistic center is sure of accomplishment.

## ACCEPTED MANDATE OF FATE

Young English Soldier Proved Himself Worthy When Called to Position of Responsibility.

When Rudyard Kipling's "The Man Who Would Be King" was published it was regarded as an excursion into the improbable, if not the impossible. It was the Anglo-Saxon imagination accepted by the colorful Hindu civilization.

But the sober chronicles of the war have outdone Kipling. Thorneycroft, a twenty-two-year-old British trooper, found himself stranded in Turkey after Townshend's ill-fated offensive. Nothing daunted, he accepted his predicament as a mandatory of Fate. He proceeded to rule over a territory containing 60 villages and 60,000 people, and he ruled them until relieved by the martial law brought by Allenby's troops. The son of a hotel keeper of Bristol, he proved at the test that he was of imperial fiber.

Truth is stranger than fiction. It always has been and always will be, with Tommy Atkins or his first cousin, the doughboy, as protagonist. Each possesses the comic spirit that means adaptability, no matter what the emergency.

## Marshal Joffre a Catalanian.

Possibly with more reason than the seven claimants to the birthplace of Homer, Catalonia makes out a good case for asserting that Marshal Joffre belongs to her by right of birth. The great estopier of the German first offensive is a native of Perpignan, where the Catalanian race predominated in past ages and where today are found many families which still retain Catalanian customs and language. Leading business firms of Catalonia, seeking to establish a tangible claim, have appointed a committee which is to proceed to Paris and present a sword to the great warrior, unless he fulfill a promise made at the peace conference that he will visit Catalonia, in which case the presentation will be made at Barcelona. This, of course, would be the occasion of a great celebration.

## Mexicans Hold Strange Beliefs.

Few countries are richer in strange beliefs than Mexico, writes Charles Bernard Nordhoff in the Atlantic Monthly. There the witches assume the eyes of cats and sit through the night on vampire's wings. A brisk business is done in love potions and candle flames still point the way to buried treasure. The Mexican inherits his cruelty to domestic beasts from both the Spaniard and the Indian, and his superstitions may be traced to the same double source.

Eccentricity is not understood in Mexico. The native is a lover of formality, and one is judged largely by external things. Each man dresses according to his station, and it is unthinkable that a well-to-do man should wear a straw sombrero or carry a serape; the peons would be the first to jeer at him.

## Painstaking Work.

A French critic who complained of the hasty composition and lack of the writing among his compatriots drew from M. Pierre Louys, the author of "La Femme et le Pantin," a pained and precise denial of the charge. M. Louys, who has not published anything in several years, says that he has been diligently occupied on a work which he rewrites and corrects a hundred times to each page. This and other works which he has not yet considered worthy of publication have accumulated until he has on hand more than 200 pounds of manuscript.

## The Croix de Guerre.

The croix de guerre, corresponding to the military cross of Britain and the iron cross of Germany, will be noticeable henceforth on the breasts of Frenchmen, civilian as well as military, who have been distinguished by being mentioned in the dispatches. It is made of Florentine bronze, about an inch and a half in diameter, with crossed swords between the arms.

# GET READY FOR "FLU"

Keep Your Liver Active, Your System Purified and Free From Colds by Taking Calotabs, the Nauseless Calomel Tablets, that are Delightful, Safe and Sure.

Physicians and Druggists are advising their friends to keep their systems purified and their organs in perfect working order as a protection against the return of influenza. They know that a clogged up system and a lazy liver favor colds, influenza and serious complications.

To cut short a cold overnight and to prevent serious complications take one Calotab at bedtime with a swallow of water—that's all. No salts, no nausea, no griping, no sickening after effects. Next morning your cold has vanished, your liver is active, your system is purified and refreshed and you are feeling fine with a hearty appetite for breakfast. Eat what you please—no danger. Calotabs are sold only in original sealed packages, price thirty-five cents. Every druggist is authorized to refund your money if you are not perfectly delighted with Calotabs.—(Adv.)

## MR. HARRIS REPLIES

To Hon. Geo. F. Ingraham, S. W. Blount and members of the Nacogdoches County Bar, Nacogdoches, Texas. Gentlemen:

Coming as it has, without thought or invitation from me, your request that I become a candidate for the position of Associate Justice of the Court of Civil Appeals of the Ninth Judicial District at Beaumont, is a district compliment to me, which I appreciate more deeply than you may ever know.

To be esteemed by my neighbors and fellow citizens is my first ambition as a citizen.

Will you accept my sincerest thanks for the honor you have bestowed upon me by your endorsement?

This shall be my announcement as a candidate for the high place you have proposed.

I shall do my best by the use of honorable and becoming means to win the place and should I be successful I will never, if I can help it, bring discredit upon the office or cause my friends to regret their expression of confidence in me as a man and a lawyer.

Sincerely,  
JUNE C. HARRIS.

## Eight Children Had Croup

"I have eight children and give Foley's Honey and Tar to all of them," writes Mrs. P. Rehkamp, 2404 Herman St., Covington, Ky.; "they all were subject to croup." It loosens mucous and phlegm, stops that strangling cough, makes easy breathing possible and permits quiet sleep. Obtain no opiates. Children like it.

## GOVERNMENT WILL CONTROL SUGAR FOR YEAR 1920

Washington, Dec. 22.—By a vote of 50 to 12 the senate today adopted the compromise bill continuing government control of sugar during 1920, accepting the reuse amendments increasing the authority of the United States Sugar Equalization Board by limiting its licensing power to next June 30.

## PERFECT HEALTH IS EVERY WOMAN'S BIRTHRIGHT

Houston, Texas.—"I was in a terribly run-down condition of health after a stage of ptomaine poisoning, and then the Rich-Tone." I could not seem to regain my strength and was really not able to do my household work. I knew I needed a good tonic and builder and remembered how my folks used to regard Dr. Pierce's Remedies in my girlhood days, and then I decided to take Dr. Pierce's Golden Medical Discovery. I am now taking the second bottle and it is doing me a world of good. My strength is returning rapidly and I feel better in every way.

## "I Was So Weak That I Could Not Walk"

Rich-Tone Is Making Me Strong and Healthy.—Says F. Maese.

## Take RICH-TONE and gain new energy

Not one penny will Rich-Tone cost you, if it doesn't prove of genuine worth in treating your case. You are to be the judge—try this famous tonic—if it doesn't bring to you new energy, a splendid appetite, restful sleep, peaceful and quiet nerves—if it doesn't destroy that tired feeling and build you up, then Rich-Tone will be free to you—it will not cost you anything—not one penny.

You owe it to yourself to try this marvelous remedy. You owe it to your family and friends to be strong, well, happy, bright of eye, brisk of step, ruddy of cheek, able to go about your work with a smile on your lips!

Try Rich-Tone entirely at our risk. Get a bottle today on our money-back guarantee. Sold and guaranteed locally by

SLIPFING, HASELWOOD & CO.

## CHICKEN SUPPER GIVEN FOOTBALL BOYS

Another one was given last night. It was the fourth since the defeat of Lufkin on Thanksgiving. It was served at the restaurant of James & Spies, the scene of no less than two other football feasts.

To make the affair the more interesting, two former high school and football boys from Nacogdoches, but who are now at college, Collis Davis and George Millford, were there to make merry with the boys.

In addition to these, Dr. T. P. Holt with his abundance of kindly humor and pleasing geniality was present as a guest of honor. Answering questions right and left, keeping at the same time the boys' spirits in high gear, Dr. Holt's presence was greatly appreciated.

Collis and George expressed themselves as being especially delighted at being back in their old town with the old bunch. Both seemed very much surprised at the physical showing of this year's football team. "Boys, all I have to say is that when you play us Christmas, treat us sorter like ladies," was one of the remarks made by Collis. "I am proud of you boys, but we are going to beat you Christmas," was the substance of remarks made by George Millford.

Mr. Hunt made a short talk in which he counted some of the old times he had experienced with the former students now present. Mr. Hunt said that he would not go back to his home in Tennessee during the Christmas holidays, but would stay here and see the big battle. Mr. Hunt was loudly cheered by the boys at the conclusion of his speech.

Mr. Ware could not be induced to say much, stating that he did not have his speechmaking clothes on.

The ones present were: Guests: Dr. T. P. Holt, Collis Davis, George Millford; school: Prof. R. F. Davis, L. B. Dav's, Prof. W. C. Ware, Prof. H. H. Hall, Capt. Sherrill Sullivan, Floyd Woodlan, Jesse Summers Jr., Casor, Sullivan, Herman Sullivan, Herman Sullivan, Max Goleb, Burk Summers, Eldridge Gaston, Edwin Gaston, Elmer Summers, Raymond Hagan, Blake Liles, Allan Langford, Lloyd Lacy, Tucker Mast, Hollis Parish, Elmo Brown, C. B. Davis, Frank Shoffner, Roby Thompson, Cecil Maxey, Arnold Mueckleroy, Eugene Mueckleroy, and Melton Smith. One or two others whose names could not be obtained were present.

"This is the best thing I have experienced in a long time" was the unanimous verdict of all at the conclusion of the banquet.

## Cut This Out—It Is Worth Money

DON'T MISS THIS. Cut out this slip enclose with 5c to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for coughs, colds and croup, Foley Kidney Pills and Foley Cathartic Tablets.

Mrs. Eola Basrett and daughter, Mrs. S. A. Cordova, left Friday for a short visit with Mrs. B. I. Grant of Alexandria, La.

## Was Restless With Pain

E. W. Kitt, R. F. D. 2, Box 9, Shorters, Ala., writes: "I took Foley Kidney Pills as I was restless at night with pains in my back and side, and they did me good. I can truthfully say Foley Kidney Pills is the medicine for kidney trouble." They relieve rheumatic pains, stiff, swollen joints, lameness, soreness.

Miss Greta Cunningham arrived Friday from Millford, where she is attending school, to spend the holidays with her parents, Rev. and Mrs. J. N. Cunningham.

## FATS FOR ENERGY

It's all too true that many children have a dislike for animal fats, yet the same children will readily take and relish

# SCOTT'S EMULSION

This choice is instinctive and is linked up with the fact that Scott's is assimilated when other forms of fat are a disturbing element. Give your boy and girl plenty of energizing and warmth-imparting Scott's Emulsion. It will build them up!

The Norwegian cod-liver oil used in Scott's Emulsion is super-refined in our own American Laboratories. Its purity and quality is unsurpassed.

Scott & Bowne, Bloomfield, N.J. 19-20

## DIRECTORS OF C. OF C. GIVEN LECTURE LAST NIGHT

Speaking in a quiet but convincing manner, Dr. Howell of the state board of health and Mr. W. E. Hardenburg, assistant sanitary engineer of the United States Public Health Service, told the directors of the Nacogdoches Chamber of Commerce last night how, with the expenditure of a few hundred dollars, Nacogdoches could be entirely rid of mosquitoes, to say nothing of a great economic gain resulting from better health conditions.

Dr. Howell said that he was pleased with the progressive spirit which was so obvious in Nacogdoches; and that personally he would like to see this town secure some of the benefits of the big anti-mosquito campaign which the state has given him the privilege to wage.

He stated that he wanted to get the doctors interested in the matter, and that he wanted wide publicity given the undertaking, so that all might have an opportunity to take a part of the campaign. He called attention to the fact that country people should be especially interested in the matter, for often, he stated, they were straggled down with malaria and doctor bills that caused them frightful economic loss.

Dr. Howell then invited Mr. Hardenburg, who has had wide experience in the eradication of the mosquito, to express himself. Mr. Hardenburg began by stating that he was very favorably impressed with Nacogdoches, and that it offered a splendid location for staging of one of the anti-mosquito campaigns at a minimum of cost.

He stated that ten or twelve towns would be selected by the State Board of Health in which to give one of the anti-mosquito demonstrations; and the town that had one of them staged in it would get thousands of dollars worth of free advertising.

Mr. Hardenburg said that while he had not made a survey of the town, he had seen towns of the general size and topography of Nacogdoches put on a non-mosquito basis for as little as \$2,000. He stated that the town would have only the cost of some ditching and oil to meet; that the government paid the salaries of the men who would supervise the work. He stated that there were a number of ways by which to raise the necessary funds required for the financing of the demonstration, but private subscription was the method most commonly resorted to. To this Mr. Tom Baker stated that \$2,000 could be obtained for the campaign in two hours by private subscription.

Mr. Hardenburg recounted the economic loss resulting from malaria. He stated that on the average one case of malaria cost no less than \$20.00 and that in towns of this size five hundred cases frequently occurred in a year. He gave some other interesting facts too lengthy to enumerate here, but which were greatly appreciated by the board of directors.

His work, he stated would, if Nacogdoches was selected, commence about the first of March, and that after the extensive draining program was over the major cost would be eliminated. The oil necessary for the oiling, he stated, would be significant in cost.

At the conclusion of his speech, the directors voted Mr. Hardenburg and Dr. Howell an expression of thanks, and assured them that Nacogdoches was profoundly interested in getting rid of malaria and that prompt action would be taken on the matter by the citizens of the town. Accompanied by several business men, Dr. Howell and Mr. Hardenburg will make a tour of the town today, which will give them a better idea of the cost of the work which probably will be staged here.

The work is commendable, and is thought that every good citizen should be alive to the benefits which accrue from it. "Throw your hammer and get a hot

## Inside Facts

It's what's inside your battery that makes it live long or wear out quickly.

Inferior insulation wears out before the plates do, and re-insulation is necessary.

Threaded Rubber Insulation eliminates the need of re-insulation, makes a battery last much longer under equal conditions, and reduces the liability to any other kind of repairs.

It's the one biggest battery improvement in ten years—demonstrated now by four years of use.

You can't afford not to know about it, for some day you'll need a new battery.

Call and let us tell you all about it.

### THE STONE FORT NATIONAL BANK

NACOGDOCHES, TEXAS.

Greatly benefited by Chamberlain's Tablets.

"I am thankful for the good I have received by using Chamberlain's Tablets. About two years ago when I began taking them I was suffering a great deal from distress after eating and from headache and a tired, languid feeling due to indigestion and a torpid liver. Chamberlain's Tablets corrected these disorders in a short time, and since taking two bottles of them my health has been good," writes Mrs. M. P. Harwood, Auburn, N. Y. Sold by Stripling, Haselwood & Co.

#### MARRIED SATURDAY

Mr. Ora Numan, son of Mr. and Mrs. J. F. Numan of Garrison, and Miss Pearl Perritte, also of Garrison, me. were quietly married at the office of

county clerk by Justice of the Peace Frank Huston Saturday morning at 11:30 o'clock. The young people are well known Garrison folks, and have a host of friends who, with The Sentinel, wish them a life unparalleled happiness.

Wheezing in the lungs indicate that phlegm is obstructing the air passages. BALLARD'S HOREHOUND SYRUP loosens the phlegm so that it can be coughed up and ejected. Price 25c, 50c, and \$1.00 per bottle. Sold by Stripling, Haselwood & Co.

LOST—Light red cow branded ES on hip. Will pay \$5.00 reward for return or for penning and notifying Mrs. J. F. Numan, Garrison, me. 18-2w

## WANTED 900 MEN and WOMEN in good health, from 16 to 35 years of age, residents of Nacogdoches county only, to join our Third club of NACOGDOCHES COUNTY HOME BENEFIT ASS'N A MUTUAL BENEFIT ASSOCIATION

#### ACCEPTED NOMINATION PRESIDENCY MEXICO

Washington, Dec. 19.—Ambassador Bonillas is said to have cabled from Washington his acceptance of the presidential nomination tendered him by the Mexican National Civilian party and asked the president of that organization for the political platform formulated for its candidate.

**Chamberlain's Cough Remedy.** Do not imagine that because other cough medicines failed to give you relief that it will be the same with Chamberlain's Cough Remedy. Bear in mind that from a small beginning this remedy has gained a world wide reputation and immense sale. A medicine must have exceptional merit to win esteem wherever it becomes known. Sold by Stripling, Haselwood & Co.

#### WILL INVESTIGATE CAUSES OF FRICTION

New York, Dec. 19.—The appointment of non-partisan commission of Americans and Mexicans to investigate the causes of the present friction between the two nations will meet urged by speakers at an amass meeting tonight at Carnegie Hall. The call for the meeting was issued by a citizens' committee consisting of educators, churchmen and women prominent in civic movements and newspapers and magazine writers.

**Sleep and Rest.** One of the most common causes of insomnia and restlessness is indigestion. Take one of Chamberlain's Tablets immediately after supper and see if you do not rest better and sleep better. They only cost a quarter. Sold by Stripling, Haselwood & Co.

#### COMMISSION INVESTIGATE THE COAL INDUSTRY

Washington, Dec. 19.—John P. White, former president of the United Mine Workers, and Rembert Peale, an independent coal operator of Pennsylvania, will be named members of the commission of three which is to investigate wages and prices in the bituminous coal industry, according to unofficial reports. Peale and White assisted Fuel Administrator Garfield during the war.

If your children are subject to coughing fits, you have reason to fear they are being attacked by that disease. You should procure a bottle of Chamberlain's Cough Remedy and study the directions for use, so that in case of an attack you will know exactly what course to pursue. This is a favorite and very successful remedy for croup, and it is important that you observe the directions carefully. Sold by Stripling, Haselwood & Co.

#### REPORTED DENIKIN WON IMPORTANT VICTORY

Halifax, Dec. 19.—Denikine has gained an important victory between Tattin and Kainahas, in the Volga valley, according to newspaper dispatches. It is said he has taken 10,000 prisoners, five cannons and 25 machine guns.

#### SURGEONS agree that in cases of Cuts, Burns, Bruises and Wounds, the FIRST TREATMENT is most important. When an EFFICIENT antiseptic is applied promptly, there is no danger of infection and the wound begins to heal at once. For use on man or beast, BROZONE is the IDEAL ANTISEPTIC and HEALING AGENT. Buy it now and be ready for an emergency. Price 25c, 50c, \$1.00 and \$1.50. Sold by Stripling, Haselwood & Co.

**COW HIDES WANTED**  
We are paying 23c per pound for salt cured hides and 20c per pound for green hides shipped to us by express. It is the best to salt hides as soon as they are skinned off to prevent them from spoiling. We also buy horse hides. Put one tag with your name and address inside of the container and one on the outside. Prices subject to change without notice.  
A. Guttmann & Co., Tyler, Texas.

#### ANTI-MALARIA CAMPAIGN

If the citizens of Nacogdoches desire it, they may have a mosquito-less and malaria-less city next year at slight cost. This was Anti-Malaria slight cost. This was the statement Saturday of W. E. Hardenburg, director of the Anti-Malaria Campaign initiated by Dr. C. W. Goddard, State Health Officer.

As a result of negotiations carried on by Dr. Goddard with the U. S. Public Health Service and the Rockefeller Foundation Health Board these organizations have agreed to give a certain amount of aid to the 8 or 10 Texas cities which most desire to eliminate mosquitoes and thus do away with malaria next year.

In accordance with this agreement, Mr. Hardenburg and Dr. R. L. Howell of the State Board of Health today made a preliminary survey of Nacogdoches to determine the amount of malaria here, the approximate cost of the proposed work and the sentiment of the people here toward the project.

"Nacogdoches was selected as one of the places to visit because it was spoken of as a progressive city," declared Mr. Hardenburg. "Malaria however, is reported to be quite common here, but I am satisfied it could be eliminated at comparatively slight cost, slight, that is, as compared with the annual economic loss that it occasions."

"It is estimated that each case of malaria results in a loss of time amounting \$20 at the least calculation. In addition, there is the doctor's bill, the druggist's bill and the loss occasioned by the reduced efficiency, often lasting several months, that results from malaria."

"We have demonstrated in other states and expect to demonstrate in Texas that it costs a community less to eliminate malaria and the mosquito nuisance than it does to keep on having them. In addition to benefiting in this way, the towns selected for the demonstration will receive hundreds of dollars worth of free publicity through the health organizations. Furthermore, when a town can say that it has no malaria and no mosquitoes it has a big advantage over neighboring towns that cannot say this."

"Now, in order to have the demonstration put on here, it will be necessary for the town to put up some money, as Dr. Goddard cannot do it all himself. However, all we want to do now is to present the proposal. Then later if the citizens decide they might like to have the work done here, they should get together and write Dr. Goddard that they are interested and desire an estimate of the cost. This would not commit them to anything, but would give us a chance to return, figure out the cost then lay the matter formally before the people for action."

"All arrangements should be completed, so that the work may start by March 1. As surveys and estimates will be made at several other towns, it is suggested that if the people here want to get in on the work, they take action without undue delay."

#### NOTICE

The regular annual meeting of the stockholders of the Stone Fort National Bank of Nacogdoches, Texas, will be held in the banking room of said bank on January 13th, 1920, for the purpose of electing a board of directors for the ensuing year and the transaction of any and all other business that may properly come before said meeting.

L. E. Mast, Cashier.

#### MANY LIVES LOST WHEN SHIP FOUNDERS

Halifax, N. S. Dec. 19.—Forty-three members of the crew of the British steamer Marxman were drowned yesterday when the ship foundered in midocean, according to a radio from the British steamship British Isle picked up here today. The rest of the crew to the number of more than a dozen been picked up by the British Isle, which is due in New York Monday. Among those lost, the message said, were the captain, the first mate, the fourth engineer and the wireless operator.

A. W. Daniel was in the city Monday talking politics. Mr. Daniel will probably be in the race for Justice of the Peace of precinct one.

Catarrhal Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surface. Hall's Catarrh Medicine acts through the blood on the mucous surface of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. City sales free. All Druggists. Dr. J. C. HENRY & CO., Toledo, O.

### FAMOUS OLD TONIC BREAKS UP MALARIA CHILLS IN 3 DAYS

So Good That Prominent Physicians Everywhere Are Prescribing It.

The next time you get an attack of malaria, ague etc., go to your dealer and get a bottle of Swamp Chill and Fever Tonic. It will break up the chills in three or four days, and give you relief as you've never had before.

Swamp Chill Tonic does its work quickly and surely, without any unpleasant effects. It contains no calomel, and is tasteless. It is made of purely vegetable ingredients iron—exactly the combination for the effective relief of malaria, ague, chills fever, colds, grippe, etc.

Hundreds of people write letters about Swamp Chill Tonic like J. T. Nelson of Bivens, Texas, who says, "Swamp Chill and Fever Tonic has always cured the chills for me and I know it is the best chill tonic on the market."

You, too, will say the same, once you have tried this famous old remedy. At your dealer's—60c a bottle. Get one today.

### COTTON IN 1920

The number of bales of cotton produced in 1920 will largely depend upon two factors, climate and the disposal of the 1919 cotton stalks and other crop refuse left in the fields. The climatic conditions whatever they may be during the coming year are not within our control, but the preparation of the soil and the cleaning of all trash left over from the previous crop can be handled by the farmer.

The Mexican Boll Weevil caused thousands of dollars loss to the farmers of our county this past season, and if the same methods of farming are followed this coming year, especially should it be a wet year, Nacogdoches County will again have a short crop of cotton.

In order to lessen the damages by weevils, all of the stalks, dead bolls and crop remnants should be destroyed. This can be done either by burning the stalks or plowing them under during the winter, after the cattle have eaten off the dead bolls and leaves.

All trash in the fields and fence corners should be burnt, because they form places in which the insect may hibernate during the winter months, ready to work upon the young cotton.

Under ordinary conditions I do not advocate the burning of crop remnants as this practice depletes the soil of much needed humus, but under the existing conditions it would provide winter quarters for insects. Early plowing, and planting in reasonable wide rows, plenty of good fertilizer so as to stimulate at fast growth, will also assist in the fight which the farmers of this County, and all East Texas will have to fight during the coming season, if they expect to produce a normal crop of cotton. More attention should be paid to the selection of varieties of cotton, not only for their lint production, but also their habit of growth. In this year's test of forty-three varieties of cotton, all of which was damaged more or less by weevils, it was noticed upon weighing the yields of seed cotton from each row, that some varieties produced more cotton than others under boll-weevil conditions. The Acala cotton yielded almost normal while other varieties grown in the same acre with it were badly damaged by weevil. This was undoubtedly due to the fast and heavy fruiting qualities of this variety of cotton, as all other conditions under which these forty-three cottons were grown were equal. During the war, we had a very popular and patriotic song: "Keep the home fires burning." Now the advice of the Experiment Station is to keep the Farm trash burning.

Geo. McNess, Texas Experiment Station.

Was Restless With Pain E. W. Kitt, R. F. D. 2, Box 3, Shorters, Ala., writes: "I took Foley Kidney Pills as I was restless at night with pains in my back and side, and they did me good. I can truthfully say Foley Kidney Pills is the medicine for kidney trouble." They relieve rheumatic pains, stiff, swollen joints, lameness, soreness.

Emmet Wisener was in the city Tuesday on business. He was on his way from Douglass to Coleman, Texas, his new home.

Whoezing in the lungs indicate that phlegm is obstructing the air passages. BALLARD'S HOREHOUND SYRUP loosens the phlegm so that it can be coughed up and ejected. Price 25c, 50c, and \$1.00 per bottle. Sold by Stripling, Haselwood & Co.

### SO WEAK SHE'D FALL TO FLOOR

Found No Relief In 20 Years—Like Different Women Since Taking Tanlac

"I gained eight pounds on two bottles of Tanlac, which I think is wonderful for a woman who had been such a miserable condition as I was for twenty years," said Mrs. Pearl Sullivan, of 1319 N. Main Street, Houston, Texas.

"My appetite failed years ago," she continued, "and for the last five years I never ate a bite for breakfast. What little I ate at other times made me so miserable I could hardly stand it. Indigestion brought on gastritis and dizzy spells, my system was undermined by rheumatism and my back ached terribly. My nerves were worn out and I felt so tired and worn out that I had to give up doing my house work and more than once I fell to the floor when I tried to walk across the room."

"A number of my friends who had been taking Tanlac induced me to try it and it was a surprise when I began to pick up almost from the first. I just kept it up till now my relief is something wonderful. I can eat anything I want and never have any trouble. I have taken up my housework again and have even done a full day's washing and gone out visiting afterward without feeling tired. My rheumatism is all gone and I really feel like a different woman."

Tanlac is sold by all druggists.

### ASKS AID OF SCHOOLS IN COLLECTING 1920 CENSUS

The schools are asked to aid the Census Office in collecting the 1920 census, which begins January 2, in an appeal to teachers issued by Dr. P. P. Claxton, United States Commissioner of Education.

In his statement, Dr. Claxton says: "Teachers and school officials, and the children in the schools as well, can help the Government with the Fourteenth Census of the United States, which begins January 2, 1920, by making clear to all the people in the community how important the census work is."

"The enumeration of the population during a census of the United States always presents numerous difficulties—among them apprehension on the part of the people, particularly those of foreign birth or extraction, that their answers to the enumerator's questions will cause increased taxation, legal entanglements or other consequences injurious to their welfare. The schools can assist materially in quieting such unfounded fears and at the same time acquaint all persons with the duties and questions included in the census schedules."

"It is, therefore, earnestly hoped that school teachers will see the opportunity presented them as public servants who come in contact with large numbers of people to correct any erroneous opinions about the census which they may hear. It is no less earnestly hoped that school children will convey to their homes the information that taking the census is a gigantic task that can only be successfully carried out if all the people cooperate by giving the census enumerators correct and complete answers to all questions."

A special circular for the use of schools has been prepared by the Census Bureau and will be distributed to teachers in the larger cities.

Greatly Benefited by Chamberlain's Tablets.

"I am thankful for the good I have received by using Chamberlain's Tablets. About two years ago when I began taking them I was suffering a great deal from distress after eating, and from headache and a tired, languid feeling due to indigestion and a torpid liver. Chamberlain's Tablets corrected these disorders in a short time, and since taking two bottles of them my health has been good," writes Mrs. M. P. Harwood, Auburn, N. Y. Sold by Stripling, Haselwood & Co.

Joe Stone of the Leggville community was in the city trading Tuesday.

Heartburn is a symptom of indigestion. Take a dose of HERBINE in such cases. The pain disappears instantly. The bowels operate speedily and you feel fine, vigorous and cheerful. Price 60c. Sold by Stripling, Haselwood & Co.

## GREETINGS

IN THIS SEASON OF REMINISCENCE AND RESOLUTION, WE LOOK BACK WITH SINCERE GRATITUDE UPON THE FAVORS YOU HAVE SHOWN US IN THE PAST AND RESOLVE TO MERIT TO THE UTMOST OF OUR ABILITY THE CONFIDENCE YOU HAVE PLACED IN US. MAY THIS FRIENDSHIP DEEPEN AND ASSOCIATION DRAW US CLOSER IN THE DAYS TO COME.

### DEATH OF GOOD MAN

News was received here Monday afternoon that Mr. Jim Lucas, a well-known Sacul man, died suddenly at his home in Sacul Monday morning.

Mr. Lucas was a native Texan, and has lived the major part of his time at Sacul. Any one can quickly see that Sacul is named after Mr. Lucas by just reversing the letters.

Mr. Lucas was at the time of his death 64 years of age. He is survived by five children; three of whom are married. He is also survived by his aged mother, Mrs. Mary Lucas, who is nearing the eighty-year mark. The married children are Mrs. Johnnie Duke, of Cleveland, Texas, J. W. Lucas Jr., Sacul, and Gabe Lucas of Sacul.

The unmarried children are Misses Ida Lucas, who is at present teaching school at Jacksonville, and Lula Lucas, who is at Sacul. Mr. Lucas is also survived by Mr. John Lucas, his only brother.

Quite a number of relatives and friends from here attended the funeral Tuesday.

Mr. Lucas was a man well known to all as a good man. And he had a host of true friends who, with The Sentinel, profoundly mourn his absence.

Two days court were held at the courthouse last week. The case involved mandatory proceedings in which Henry Hoya was the plaintiff and Mrs. Addie Hoya was the defendant. More than eighty witnesses were in attendance, and at the conclusion of the proceedings, which commenced Friday afternoon and ended Saturday night, the injunction asked for the plaintiff was denied.

The Flatwoods school is staging tonight a play "Topsy-Turvy." The school is said to have been practicing a considerable length of time on the play, and it is thought it will be exceptionally good.

The census takers held a meeting at the courthouse Monday morning over which District Manager J. W. Shotwell if Center presided. The census will be taken commencing January 1.

Miss Faith Luckeybaugh, who is at present engaged in teaching school at the Douglass High School, is in the city enjoying her vacation. The Douglass school dismissed Friday for the holidays, and, according to Miss Luckeybaugh, will enjoy only one week for vacation.

At high school Monday the eight grades, rooms two and three, had a most enjoyable Christmas tree, off which every student received some kind of present. The room came together in purchasing a beautiful present for their instructor.

A play is to be held at the Douglass schoolhouse Friday night named "Around the World." Proceeds help the school.

Burdard Menifee of Chireno, who had been some time employed at the City Bakery, resigned his position Monday and returned to his home.
