Liberty Elm Camp Meets in New Home

Three hundred and fifty loyal members of Woodcraft joined in a huge celebration here Tuesday night for the formal opening of the new \$40,000 W. O. W. building. This building, situated in the business district on East Main street, was erected by Liberty Elm Camp, No. 210. The building, 60x100, three stories high, is pronounced by competent judges as one of the best structures of its kind in the entire Southwest. The first floor consists of two 28x100 store rooms with connecting arches and strictly modern plate glass fronts. The second floor contains the W. O. W. auditorium proper, together with a kitchen, serving room, library, club rooms and the clerk's office. The third floor is arranged specifically for the three local Masonic bodies, Milam Lodge, No. 2, Nacogdoches Chapter and Nacogdoches Commandery, No. 55, together with accommodations for the local Eastern Star Chapter, LaNana Lodge, No. 106, K. of P., and Nacogdoches Lodge, No. 118, I. O. O. F., will also have quarters in the new building. The three hundred and fifty "choppers" present for the formal opening Tuesday night heard Consul Commander Arthur A. Seale tell in part the story of achievement represented by the magnificent structure. To the four hundred loyal members of Liberty Elm Camp he gave all the credit Consul Commander Seale is also Head Consul Commander of Texas. A. A. Seale, Robert Lindsey and S. M. Adams composed the building committee.

ESCAPING CONVICTS LEAVE STOLEN AUTOMOBILE HERE

Three escaped white convicts from the Huntsville penitentiary played an engagement here Sunday night, or rather early Monday morning. They had stolen a Ford car for their getaway, and they ran into the mud and abandoned the machine near the West End school. They then went to the home of Grover Miles, near the Meador store, and endeavored to negotiate the purchase of overalls and jumpers to take the place of their prison uniforms. Mr. Miles was unable to supply them and they disappeared. Former Constable Wade Walters suspected something wrong when he learned of the abandoned car, and upon investigation discovered in the machine a Winchester rifle and blanket, the latter bearing the legend, "Texas Prison." Mr. Walters took charge of the car and contents, placing the former in a garage for safekeeping. A telephone message from Huntsville stated that parties would be here Tuesday to identify the car and take charge of it. A reward of \$25 is said to have been offered for the recovery of the machine, and this will go to Mr. Walters. Nothing has been heard of the convicts, who are supposed to have boarded a T. & N. O. freight train at the crossing south of town.

WARNING IS GIVEN

Essen, March 13.—The German population of the Recklinghausen district have been warned by General Laignelot, commander of the district, that in the event further French troops are assassinated or ambushed, the burgomaster of Buer will be held as hostage, with four other town officials, who will be shot at once in retaliation, it was announced today.

The case of Louis Watts, colored, set for Friday, the 16th, will be disposed of without trial on account of a faulty indictment found last year. The veniremen subpoenaed for this trial on Friday, therefore, will not be needed and have been notified they need not appear.

Mr. T. L. Burks of Tyler, who has been operating an auto line from Tyler to Rusk, has extended his service to Nacogdoches, which will prove a great convenience to those of our people having business at Rusk, Jacksonville or Tyler. Cars will arrive and leave twice daily, the Redland Hotel being the arriving and leaving point. Mr. Burks was in to see the Sentinel Wednesday afternoon and left his schedule, which will be found in another column. He certainly is filling a long-felt want. Success to him. The service starts Thursday morning.

A college education has its good points, but too close application to books may injure one's batting eye.

MAN SLAYS WIFE, THEN KILLS HIMSELF

Houston, Texas, March 13.—A chubby baby boy, a child that has just passed the milestone of 14 months and whose little lips were just learning to mumble the audible sound of "papa" is today without a father and mother, following a double tragedy at Goose Creek late Sunday afternoon when the father, for some unknown reason, killed the mother and then took his own life, leaving the baby, their baby, to its lonely existence.

John Graff, about 27 years old, a painter employed at the Baytown refinery company of the Humble Oil Company, between 3:30 and 4:30 o'clock Sunday afternoon shot and killed his wife, aged 19, and then turned a revolver on himself. A shotgun was used to kill the mother, the charge taking effect on the left side of the neck just back of the ear. The bullet from the revolver entered the man's forehead just above the right eye. The mother died instantly, but the father lingered until 6:30 p. m.

STICKS TO CALL FOR EXTRA SESSION THURSDAY

Austin, Texas, March 13.—In a message to the legislature today Governor Neff stated he will stand by his proclamation calling a special session Thursday and said if the legislature saw fit to adjourn immediately Thursday he would not call another session until April or May.

The house passed over the governor's veto the Witt bill creating the Tenth Court of Civil Appeals at Waco by a vote of 91 to 17.

The senate overrode the house emergency miscellaneous appropriation bill amounting to approximately \$250,000 and then refused to suspend the rules to pass it, probably killing it for this session.

The house passed the senate bill authorizing the adoption of the county unit system of schools and passed the bill increasing the salaries of county commissioners.

CONSOLIDATION AUTHORIZED

Austin, Texas, March 13.—The house bill authorizing the consolidation of the International-Great Northern and four other Texas roads with the Frisco passed the senate this morning by a vote of 27 to 1. This is the final step in the legal requirements for consolidation, Governor Neff being expected to approve. It involves more than 1,400 miles of line, including the Fort Worth & Rio Grande, the Brownwood North & South, the Quanah, Acme & Pacific and the Paris & Great Northern. Opposition to the consolidation bill disappeared when Senator Stuart of Fort Worth withdrew his amendments seeking to relieve the consolidated lines from locating their general offices at a specified place in Texas.

EXPERT PREDICTS 40c COTTON

New York, March 14.—Cotton at 40 cents sounds like a nightmare, but Dr. Miller Reese Hutchinson, "manager-director of the national campaign for boll weevil control, said Monday that unless the boll weevil is checked during the coming growing season, that price will be reached and held within a year.

A warm winter, combining with inadequate extermination facilities now on hand will result this summer in the greatest boll weevil menace the United States has ever experienced, according to Dr. Hutchinson. The national campaign for boll weevil control is attempting to raise sufficient funds to finance an active campaign against the weevil.

It is being confidently asserted among woolen jobbers that English manufacturers backed by cheap labor and a low price for foreign wool, will this fall enter the United States as active competitors in men's clothing if domestic prices rise as much as 25 per cent.

CATTLEMEN AT EL PASO

El Paso, Texas, March 13.—The Southwestern Cattle Raisers Association convenes here today for its forty-ninth annual convention. The annual report of the executive committee followed by the address of President C. B. Lucal of Berclair is the first business on the program. Thousands of delegates are attending.

As we understand it, the new statesmanship consists in the knowledge that minorities are portable.

EVIDENCE IN MURDER CASE IS COMPLETED

From the Timpson Times:
 Telephone information to the Times this afternoon to the effect that Judge Brachfield has not rendered a decision in the matter of granting Jim Bailey bond.

Center, Texas, March 10.—Testimony in the case of ex parte Jim Ballew, charged with murder and robbery with fire arms of Tom Musselman, near Timpson, Texas, on February 20th, was concluded Thursday. District Judge Brachfield has the matter under consideration and is expected to render an opinion about Monday. Tom Musselman, whose home was in Ohio, originally had been living for a short time at Richmond and Houston, Texas. He came to Timpson about November 1, last, and was married to Miss Pearl Jones on November 6. Before marriage he made application for a policy for \$5,000 in the Modern Brotherhood of America in favor of Miss Jones. The policy afterwards was issued to Mrs. Musselman. His body was found February 24 near the home of his mother-in-law. He had been shot in the back of the neck supposedly on February 20th. He was buried but the body was exhumed on the following Tuesday and a careful examination made. The neck was powder burned and shot and wadding were found in the head. On Tuesday following the discovery of the body, Mrs. Pearl Musselman, her mother and two sisters were arrested and placed in jail at Center. On Thursday Jim Ballew and John Jones, brother of Mrs. Musselman, were arrested and placed in jail. The grand jury was convened and returned bills against Ballew, charging murder and robbery with firearms. A charge of murder was made against Mrs. Musselman. The state's theory is that Musselman was killed for the insurance.

STUDENTS WILL ENROLL AT MEXICAN NATIONAL SCHOOL

Austin, Texas, March 14.—For the third year a summer school of the National University of Mexico will be held this year, beginning June 5 and continuing for a period of six weeks. The work is offered especially to American teachers and students of Spanish, according to a statement of Dr. Charles W. Hackett, adjunct professor of Latin-American history in the University of Texas.

"Many letters inquiring about the work and rates offered are being received," said Dr. Hackett. "The National railways of Mexico have offered half fares to students from the border and from the coast and back, Brownsville, Eagle Pass, Laredo, El Paso, Manzanillo and Vera Cruz being the points of entrance. The Ward Steamship Line has likewise granted special rates from New York to Vera Cruz and return to groups of twenty or more students. These discounts can be had by presentation to the ticket agents of the enrollment card, which the summer school will mail to the candidates on receipt of the application blank and by the presentation of a credential from a Mexican consul."

Application blanks can be furnished by Dr. Hackett, as well as the Mexican consuls in cities where consulates are maintained, the director of the University of Mexico, the Mexican Embassy at Washington, D. C., and the University of Utah, California, Iowa and Arizona. Students are entitled, for \$30 gold as tuition fee, to take four or more courses besides general courses in Spanish and Mexican art, Mexican archaeology, and Mexican folk song. Dr. Hackett explained. They can get board and room at rates varying from \$2.50 to \$4 a day. The climate is said to be delightful, the thermometer seldom rising above 60 degrees Fahrenheit. Excursions are conducted to points of historical interest by an expert guide and instructor.

WALTHALL PROMOTED

Austin, Texas, March 13.—R. B. Walthall, secretary to Governor Neff, appointed chief supervisor for the oil and gas division of the state railroad commission to succeed J. W. Hassell, has resigned, effective March 15.

INFANT MURDERED

Fort Worth, Texas, March 13.—Detectives today were unable to throw light on the finding of the body of an infant on the doorstep of an apartment on West Texas street. Its throat had been slashed. Every doctor here was communicated with in an effort to learn the identity of the parents.

TEXAS WOMEN HONORED FOR WAR SERVICE WORK

Washington, March 14.—The names of 21 women have been approved by Acting Secretary of the war department and will be official noted on the army's roll of honor for distinguished and exceptionally meritorious service during the world war. Approval of the new list brings the total number of names to 33.

Mr. Davis announced that distinguished service medals would be given to those on the new list, which includes: Mrs. Clarence Cash, San Benito; Mrs. Lillian J. Ryan, Denver Colo.; general hospital; Miss Mary E. Sheehan, Beaumont Hospital, El Paso; Mrs. Theodore Falconer, Marlin, Texas, and Miss Sophy Burns, Fort Sam Houston, Texas.

ABILENE GETS COURT

Austin, Texas, March 13.—On motion of Senator Burkett the senate rescinded its action in refusing to concur in house amendments to the Burkett bill establishing the Eleventh Court of Civil Appeals, and concurred in such amendments. Under an amendment Abilene was designated as the seat of the new court. The conference committee had been deadlocked on this point.

While it took 3,500 years to hear from King Toot, it might have been longer if he had put in a phone call.

NORTH TEXAS FARMER FIRES FATAL VOLLEY

Wichita Falls, Texas, March 13.—Pouring a stream of leaden missiles into the home of Harry C. Budd of Bellevue, Clay county, B. L. Gullede, farmer, aged 55, yesterday killed his daughter-in-law, Mrs. Ed Gullede, and her 20-months-old son; wounded Budd, who is Mrs. Gullede's father; fired at other members of the family, then returned to his home and, while possemen made preparations to storm the place, took his own life with the same gun.

A disagreement with his son, Ed Gullede, over the latter's refusal to sign an oil and gas lease is said to have caused the tragedy.

THE STORM'S TOLL

Chicago, March 13.—Gradual restoration of telephone and telegraph facilities in the storm-swept area between the Rocky and Appalachian Mountains today brought reports of total dead nearing 40, injuries approximately 200 and damage of millions of dollars.

Tennessee suffered the heaviest toll, nearly 100 injured and damage of several millions. Twenty are dead at Pimston and Deanburg.

Central Kentucky counted its dead at nine, injured at about 50 and property damage close to a million.

Two were killed in Ohio and scores injured. One was killed at El Dorado, Ark., and two in Mississippi.

BY GILES M. HALTOM

DOES IT PAY TO ALWAYS
TO TELL THE PLAIN TRUTH

Only a short time ago the editor of a paper in Indiana grew tired of being called a liar and announced that he would tell the truth in the future and the next issue of the paper contained the following items:

John Coyle, our groceryman, is doing a poor business. His store is dirty and dusty. How can he do much?

The Reverend Sty preached Sunday night on "Charity." The sermon was punk.

Dave Cankey died at his home here Tuesday. The doctor gave it out as heart failure. Whiskey killed him.

Married—Miss Sylvia Rhodes and James Collins, last Sunday at the Baptist parsonage, by the Rev. Gordon. The bride is a very ordinary town girl, who doesn't know any more about cooking than a jackrabbit, and never helped her mother three days in her life. She is not a beauty by any means and has a gait like a duck. The groom is a very up to date loafer. He has been living off the old folks at home all his life and is not worth shucks. It will be a hard life.

Died—Aged 56 years, 6 months and 13 days. Deceased was a mild mannered pirate with a mouthful of whiskey. He came here in the night with another man's wife and joined the church at the first chance. He owes us several dollars for the paper, his meat bills, and you could hear him pray for six blocks. He died singing "Jesus Paid It All" and we think he is right—he never paid for anything himself. He was buried in an asbestos casket and his friends threw palm leaf fans into his grave, as he may need them.—Big Sandy Advertiser.

INTERESTING SALARIES

These are halcyon days for folk who delight in sticking their noses into other people's business. Women have always been regarded as possessing abnormally developed bumps of curiosity, but it is the men in congress who have just been eliciting so much information concerning the other fellows' salaries. And what subject is more thrillingly interesting? Even when it is none of our business, and it generally isn't, we are avid for details of the incomes of our neighbors.

A congressional committee recently required the Standard Oil Company to tell what it paid its principal officers, starting with the president and chairman of the board to the New Jersey corporation, who receives \$125,000 a year. Everybody read the whole list with a sort of feeling of being, unbidden, behind their scenes. And now the public is treated to the figures of our leading railroad presidents' salaries ranging from \$25,000 to \$100,000.

If the intent of these "harrowing disclosures" is to stir up the indignation of the public, then the performance has been a failure. The news has not caused a ripple. It is pretty hard to work up excitement over railroad presidents' pay when it is reported that in some cities plasterers get \$25 a day and transportation to and from work. The great army of railroad employees isn't getting excited either. It knows that reducing the chief executives' salaries to the pay of a track-walker wouldn't increase the average wage more than a few cents, at the most, a week.

The intelligent ones, who do their own thinking, know also that it would be a mighty expensive experiment to all concerned, since the efficiency of every big enterprise depends on having the right sort of men directing its affairs. No corporation pays fancy salaries for fun. If the big salaries weren't earned, they wouldn't be paid.

SEED SELECTION TO INCREASE
CORN YIELD IN EAST TEXAS

Results in corn variety tests at Substation No. 11, Nacogdoches, for 1922, have given further evidence of the value of "Nacogdoches" corn which was developed at the Nacogdoches station by Superintendent Geo. T. McNess from Texas Blue Grain, a native corn, improved on the station. This is the second year in which Nacogdoches has proved to be a high yielding and specially adapted for the region in which it was developed. Nacogdoches led all other varieties on the station last year. It is being tried at other stations to determine if it will be valuable in any other of the agricultural regions where stations are maintained. It is also being used by a number of farmers who were able to get small lots of the seed for last year's planting. It has not been possible to learn what success these farmers had with the new variety the past season, nor whether any of them increased the seed for further planting, or kept it pure by proper roguing. Superintendent McNess, however, made as large an increase planting of

this variety as he could last season and has a small supply of the seed for distribution at a nominal price to farmers desiring it. Farmers desiring this seed should communicate with Mr. McNess at once, as the season is approaching when the corn should be planted.

RIVER THAT BLOWS BUBBLES

Near a town in the oil fields of Pennsylvania there is a sluggish stream to the surface of which rise hundreds of bubbles, glistening like iridescent glass. Some of these float on the water. Others soar away above the tree-tops like gorgeous toy balloons. A writer in The Illustrated World gives the following explanation of the phenomenon which was discovered only after considerable search:

A gas line and an oil line pass under the stream at this point; each pipe had a small leak. The oil spread a film over the water, which was infiltrated here and there by the gas. The fact that the bubbles were full of gas caused them to ascend more swiftly, and the film of oil made them unusually high-colored and tough.

The strength of the bubbles may be imagined by the fact that small twigs and leaves, floating on the surface of the water, are frequently carried up in the larger bubbles.

THE UNKNOWN CONSTITUTION

From the Shreveport Journal.

The newly elected feminine member of one state legislature proposed as her first measure a bill advocating compulsory study of the federal constitution; and that of the state, in the seventh and eighth grades of the public schools. Some adverse opinion was voiced and a general apathy appeared where active opposition was lacking. Then some simple-minded member asked how many of the legislators present were themselves honestly familiar with the documents in question. Observers reported that a strangely furtive expression appeared on the majority of faces, and that there was a slight shuffling of feet as of people a little ill at ease. Presently the motion was put to the assembly and the bill passed unanimously.

Most high school courses include a superficial study of the federal constitution. Few schools of any grade bother with the state constitution, for all its intimate relation to the affairs of citizenship. This is a weakness which needs remedying. The remedy properly begins in the high grammar grades, so that pupils who can not attend school may have the benefit of it.

VETO WAS RIGHT

From the Center Champion.

The present legislature has passed several bills creating new district courts. The governor proceeded to veto the bills as fast as they reached him, but in several instances, the measures have been passed over the veto of the governor. The governor was right in the vetoing of the measures. The legislature should not create any more district courts, but should organize the judicial districts of the state and provide enough work for the courts to do, and should they do that they could reduce the number of district courts and at the same time secure better results. The trouble with the judiciary of the state is they do not work. The courts idle along and put in time, leaving the dockets crowded and each two years is a plea for new courts. The legislature should simply stop the extravagance.

NACOGDOCHES TRADITIONS

When the Southern Confederacy ended there were peculiar legal attitudes arose as to official status of the states. The officials and laws of the Confederacy were not accepted nor recognized as lawful by the United States authorities. Texas made an effort to resume her place in the Union. She elected Governor O. M. Roberts to the U. S. Senate. He was not permitted to take his seat. The procedure was not lawful.

Changes in offices were frequent, and often radical in a political sense. At first, all who engaged in the so-called rebellion were disfranchised and displaced from office, and loyal parties took their places. These latter were in some instances acceptable to the generality. One instance was that of James Clark, district clerk, who was T. H. Durrett, county clerk, re-constructed from the Confederate soldier class. After all, we got along fairly well. But we often were in doubt as to who was who, and why.

Then after we were straightened out, we got up squabbles and factions among ourselves. Under the convention system, from precincts to president we nominated candidates who were not acceptable to the mass of voters. Then followed popular opposition.

One instance of this kind was where regular nominees were unsatisfactory, caused a big contest. A mass meeting was called to take steps in opposition. Captain M. Mast, who was always a popular favorite, was a candidate for sheriff, and quietly he was made the bone of contention. The mass meeting was held at Melrose. It was a rousing meeting and it landed. And all went well. Mast served many years as sheriff, and did it well. He was a most worthy man, and had shown it as a captain in the Confederate army, where he was badly wounded in one forearm.

One peculiarity of elections in Nacogdoches county is that very, very few members of the legislature ever got a second term. Once for all seemed to be the rule.

Squire Crossland, a popular and leading farmer of the Looneyville vicinity, was a one-term member in the long-ago. He was a staunch old Roman and stood pat on equal rights for all, etc. He was awfully disgusted at Austin. He had been proud of his nick name among his admiring neighbors at home, "Old Plow Handies." But it got no votes at Austin.

Uncle Bill Skillern was elected on the populist ticket. This was not so popular at Austin. He found so many ugly things there that it made him sick. Big guns would drink whiskey, play cards and use profanity on Sunday. So he bade the gang adieu.

But there were others, to-wit: F. Ingraham, E. B. Lewis, V. E. Middlebrook, R. W. Haltom. They never went a second time. Their reasons may be guessed at.

Judge Peyton F. Edwards was elected state senator. One term was enough. Tom R. Jennings was elected once to the legislature.

The list in full of these and other officials, of the long ago, would be too long, if "the truth, the whole truth and nothing but the truth" were told.

An exception to the one-terms was State Senator W. H. Swift of Melrose. He held several terms and he made good. He was a big bodied, big hearted, big brained man. Melrose could have left off her rose better than her Swift. W. H. Swift, Sr., left "foot prints on the sands of time." J.E.M.

COUNTY'S FINANCES

By June C. Harris
Article 8, section 9, of the Constitution of the State of Texas provides that no county shall levy more than twenty-five cents upon the one hundred dollars of taxable property values for county purposes.

The words "county purposes" mean for the purpose of paying the general current expense of the county.

The total taxable property values of Nacogdoches county for the year 1922 amounted to twelve million dollars in round figures.

Therefore, for the year 1922 we had the sum of thirty thousand dollars with which to pay the general current expense of the county.

The records show that we expended for the year 1922 for general current expense of the county twenty-five thousand dollars in round figures.

The record shows that during the year 1922 Nacogdoches county issued its warrants (or promissory notes) against the general fund in the total sum of seventy-five thousand dollars bearing interest at the rate of 6 per cent per annum running ten and twelve years. This created an added expense item against the general fund for 1922 interest in the sum of four thousand five hundred dollars.

Another new item of expense in 1922 against the general fund was the item of thirty thousand dollars, for dipping cattle.

This Bad Weather Will Not Last Always

When Spring does come you will need to do things in a hurry.

Are you fixed up with all the necessary tools, such as

**Harrows, Planters
Distributors, Etc.**

We have complete and standard lines of all these and many other tools you may need.

All we ask is a chance to show you our goods of quality and then let you say whether our prices are in line or not.

Come in and look them over. We are always glad to show you.

You do not obligate yourself in the least by looking at our goods.

Drop in when in town and take a look.

Yours to please.

Tucker-Sitton Hardware Co. The Quality Store

able cash with which to pay this aggregated sum was thirty thousand dollars. We, therefore, spent during the year twenty-nine thousand five hundred dollars more than we had, besides borrowing seventy-five thousand dollars at 6 percent interest and selling the warrants at a discount.

The year 1923 opens with the same prospect ahead of us, if we continue the same practices.

Our supreme court in the case of Carroll vs Williams has declared that "in no event and under no circumstances may there be expended legally for one purpose or class of purposes tax money in excess of the amount raised by taxation for that particular purpose or class of purposes."

In view of the constitutional inhibition found in Article 8, Section 9, of the Constitution of Texas and the declaration of the supreme court quoted above, how are we going to do business after this fashion and stay within the law?

We are face to face with one ore of two remedies, either spend less money or raise property values year after year.

DALLAS FIRMS MAKE
LOWEST PAVING BID

Contract for the paving of Pacific avenue will likely go to the Central Bitulithic Company or Smith Bros., according to opinions expressed around the City Hall Tuesday, following announcement that the bids made by seven competing companies had been tabulated and showed that the two Dallas companies offered more favorable propositions than did the outside concerns.

The Central Bitulithic Company's bid of \$106,838 for bitulithic paving appears to be the most favored by the property owners in the territory involved, as they do not care for paving with which they are not familiar, it was explained.

Tabulated bids were as follows: On vertical fiber brick, Smith Bros., were lowest with \$104,737, with the Central Bitulithic second with \$110,828; James Company \$124,821, R. J. Eastep \$127,955, Fuller Company \$118,845, Vallett-Toomey \$118,289. On Uvalde Rock asphalt the Uvalde Paving Company bid \$108,275 and the Fuller Company \$109,618. On bitulithic the Central Bitulithic Company's bid was at \$106,838. On asphaltic con-

crete Smith Bros. bid \$106,981, and the Fuller Company \$104,879. On sheet asphalt the Fuller Company bids \$107,373.

H. L. McKnight made a trip to the Angelina river bottoms west of Douglas Thursday, where the highway has been impassable for the last few days. The Good Roads Committee of the chamber of commerce, headed by Ben T. Wilson, authorized Mr. McKnight to have the necessary repairs made at once so that through traffic would not be held up by this important piece of our highway. The members of the good roads committee are Ben T. Wilson, Horace Wilson, A. H. Smith, Marvin Echols, Link Summers, John Comstock and L. W. Jacobi.

Rev. George L. Parks, pastor of the First Christian church, and Mrs. Parks were surprised Wednesday night when the congregation of that church visited their home and "pounded" them in a manner which met with their entire approval. The number of good things brought was legion, and the recipients wish their friends to know they greatly appreciate this token of their good-will.

LETTER FROM W. H. WOOD
Georgetown, Texas, March 8, 1923.
Editor Sentinel:

I notice in late issues of the Sentinel that Nacogdoches is having an epidemic of influenza (or flu).

I note with sorrow the passing away of some of my life-time Christian friends—that of Mrs. Mary Anne Weaver, whom I learned to love as a good and great Christian character. She was good in her greatness and great in her goodness, by wisdom, perseverance, precept and example. She raised, educated and influenced a large, interesting and useful family, to bless the world, while they mourn her loss.

I note also that of Bro. John Windsor, whom I had known and loved for 38 years. We never met but what we talked of the Saviour and His love. I loved him because he loved my Lord, I shall miss them much. My health is good, notwithstanding I am 76 years old today.
W. H. Wood.

It will be definitely known that the country is approaching a presidential campaign when candidates start to go farming in the Sunday supplements

Dying Men and Women Do Your Duty

Your first duty is to make your peace with God. Your next duty is to provide for those who are dependent upon you for support and while living procure Life Insurance for your loved ones, should you be called to Eternity. The uncertainty of life and the certainty of death prompt thoughtful men and women to procure Life Insurance. The "Dorsey Plan" and the "Dorsey Management" is sound, reliable Life Insurance Protection that is in reach of the poorest people and the poorer you are the worse your loved ones, need protection should you be called to the Great Beyond from whence no man ever returneth.

Bear in mind, all County Life Insurance is not the same, it is the management that assures success or failure in every business enterprise. Beware of imitators who tell you it is the same thing. That's what the Secretary and Agent said about the One Hundred and One Club and they had good directors, but the thing failed in just a few months regardless of the directors.

See or write us. We have a place for you in Orders that have passed the experimental stage and that is worth \$1,000.00 the day you get it should you die. Separate Orders for the young and middle aged and elderly people. See or write to us today.

YOUNG LADY! YOUNG MAN! HOW WILL YOU USE YOUR MONEY AND TIME

It is just as important to be able to take care of your money after you get it as it is to be able to get it. We had a great time while it lasted. We made more money in 1919 and 1920 than ever before in our lives. We spent it with the recklessness that always follows "easy money." We bought things we didn't need, generally going into debt for them, and paid prices entirely beyond reason. We loaded ourselves up with things that we couldn't use, and debt we couldn't pay. During 1922 we struggled to get out of our bad situation. We fought hard, and the fight is over and better times are here. Every great authority on business says that we are getting back to normal.

Capital in this country is seeking investment, and when money is at work, prosperity follows because money at work means industrial activity and industrial activity means large buying power on the part of working people. Beyond question, prosperity is with us, and wise people, both young and old, will get ready for it. New oil fields are being developed every day right in our midst. Buildings are going up every where. Charters are being issued for large corporations. The tomato, berry, fruit and many other marketable crops will be money in a short time. The cotton market is better than it has been for several years. Every young man and woman ought to know that the big opportunities in prosperous times go to those who are best trained to serve them. Business training makes the difference between small earning power and large earning power.

We are entering a period in which a thorough business education is more necessary than ever. You must have some special ability you can offer that will enable you to put it over. You must also get your training as soon as possible and in a thorough and practical manner.

The Tyler Commercial College, Tyler, Texas, the largest and most progressive commercial school in the country, located in the most healthful part of the state, being the highest point between the Red River and the Gulf, is ready at all times to give you a thorough business education. You can't afford not to investigate our courses of General Secretarial, General Business, General Banking, Gen-

eral Railroad, Bookkeeping, Business Finance, Shorthand, Cotton, Telegraphy, Radio and Civil Service. The only school in the South giving seven complete business courses. Fill in and mail coupon for large free catalogue.

DISEASE DISTRIBUTION

Austin, Texas, March 14.—It has been definitely proven that flies and mosquitoes are responsible for a number of diseases, said Dr. Z. T. Scott, secretary of the Texas Public Health Association. A great amount of money is spent every year in Texas to repair the damage wrought by these pests.

Flies are known to spread typhoid fever, tuberculosis, diarrhoea, dysentery, etc. A single fly has been known to carry 600,000 germs on its body at one time. The best way to kill flies is to destroy their breeding places, remove all filth, screen, trap and "swat."

There are many different species of mosquito. Some are disease carriers and others are not. Malaria, dengue fever and yellow fever may be transmitted by mosquitoes. The best plan is to kill all species. Mosquitoes must have water in which to lay their eggs, without this the mosquito could not live. All standing water should be drained where possible. In other cases the water should be covered with oil or surface minnows placed in the water. Dwelling places should be screened against these pests.

The time to start these campaigns is now, and everyone should lend their assistance in exterminating these pests. Much more can be accomplished if the campaign starts early before the flies and mosquitoes have an opportunity to increase.

THE SHERIFF EXPLAINS

Correction to Wade Walters' write-up regarding stolen car from Huntsville.

The sheriff's department had information and also a telegram about the car and escapes. The sheriff's department merely wants to make this correction, as we are the ones who recovered the car and received reward. However, we give Mr. Walters credit for going along with us.

T. G. Vaught, Sheriff,
R. E. Booth, Deputy.

REO ESTABLISHES BRANCH IN DALLAS

R. C. Langley Heads New Texas Distributing Organization.

BUILDING IS LEASED

Five-Passenger Models and Speed Wagon in Line to Be Shown

The first factory branch of the Reo Motor Car Company of Lansing, Mich., to be located south of Chicago, has been established in Dallas with the organization of the Reo Motor Car Company of Texas, according to an announcement by R. C. Langley, president. The company has taken a long-term lease on the three story automobile building at 2113-15-17 Main street, and is ready to distribute Reo Passenger cars and the Reo "speed wagon" in Dallas and throughout the Southwest territory, which comes under the supervision of the new branch.

Officers of the new company are R. C. Langley, president; C. A. Triphagen of Lansing, vice president, and J. J. Coleman, secretary-treasurer. G. A. Langley will represent the company in the wholesale department. In assuming the presidency of the new Reo branch, R. C. Langley is giving up the management of the Dallas Buick Company, of which he has been in active charge since 1915. His partner in the Buick agency, W. E. Hipp of Waxahachie, who has come to Dallas recently and taken an active part in the management of the firm, will become the active head.

Mr. Langley entered the automobile business nineteen years ago at the Cadillac factory in Detroit. After spending one year at that factory, a year in the automobile business in Joliet, Ill., and two years at Aurora, Ill., he entered the service of the Buick Motor Company and has been connected with the distribution of that car continuously since that time. Mr. Langley came to Dallas with the establishment of the Buick branch here in 1909 and served in the mechanical and sales departments for several years before being elevated to the position of assistant branch manager, which he relinquished in 1915 to organize the Dallas Buick Company. He has long been active in the work of the Dallas Automotive Trades Association, serving two years as secretary of that organization and four years as a director before being elected to the vice presidency, which he now holds. He was chairman of the committee that arranged the successful spring and fall automobile shows last year.

Confidence in Reo

"It took a great faith in the Reo Motor Car Company, its policies and its products and in the possibilities for its distribution in this territory to induce me to change from my past connection," Mr. Langley said. "My decision was reached only after going thoroughly into the merits of the products and meeting the officials of the Reo company on a recent visit to the factory, but after doing so I was so fully sold on the car and the organization that I lost no time in organizing the Dallas branch."

C. A. Triphagen, vice president of the new organization, has been with the Reo company for many years and is a resident of Lansing. J. J. Coleman, secretary and treasurer, was associated with Mr. Langley in the Buick Motor Company, being at the head of the accounting department of that firm for the last thirteen years. He is a director of the Wholesale Credit Men's Association and chairman of the membership committee. G. A. Langley is also an old Buick man, having been with the Dallas branch for fourteen years. He was manager of the parts department for many years before joining the sales department.

A carload of new Reo models already has been delivered to the new Dallas branch and several carloads are en route. A large stock of parts for all models, both passenger cars and commercial cars, manufactured by the Reo company, have also been shipped and will be available for Reo owners in the Dallas territory as soon as the branch is fully settled in its new home, Mr. Langley said.

Founded by Olds

The Reo Motor Car Company was founded at Lansing, Mich., nearly twenty years ago by R. E. Olds, a pioneer in the automobile industry and its growth and expansion since that time has been steady. The Dallas factory branch, the first to be located in the South or Southwest, is the tenth to be opened by the company. Other branches are located at New York, Chicago, Detroit, Los Angeles and San Francisco.

In becoming associated with the Reo company, Mr. Langley is doing the same as was done by Byron Foy, a Dallas boy, who is now president of the Reo Motor Car Company of California. Mr. Foy received his first training in the automobile business under Mr. Langley, who appointed him the first sales manager of the Dallas Buick Company.

The Reo line of passenger cars consists of five popular models, all

mounted on the same six-cylinder chassis. The chassis has a wheel-base of 120 inches and the engine has an S. A. E. rating of 24.3 horsepower, but develops 50 horsepower at 2,000 revolutions per minute. The body styles are the five and the seven-passenger touring cars, the new four passenger coupe, the five passenger sedan and the five-passenger brougham.

The Reo "Speed Wagon" which is the popular commercial car made by the company, has a four-cylinder engine and a wheelbase of 128 inches. It comes in stripped chassis and is twelve standard body styles. The car has been successfully built for seven years and is regarded as a pioneer in the commercial car field. All models are equipped with pneumatic tires, and the car is generally spoken of as "a good truck on pneumatic tires with the speed of a passenger car," Mr. Langley said.

MILLINERY OPENING

Miss N. L. Jackson's millinery shop is a thing of beauty, following the formal opening Monday in her new location, and the tasteful display of hats, etc., in their handsome glass cases and on racks is sure to catch the eye of discriminating buyers. During her recent visit to the markets, Miss Jackson exercised her usual good judgment in the selection of her stock, and her painstaking choosing is very apparent in the array now on display.

An innovation is what is known as "French Rooms," booths daintily furnished with mirrors and other toilet accessories, where ladies may try on hats in private. "Hubby" is not forgotten, either, for Miss Jackson has installed a lounging place for him, where he can be comfortable while his women folk make their selections and attend to the fittings. There is no excuse for a man to "step up the street" while his wife is engaged with her purchases. He couldn't find a more attractive place in East Texas to spend his time.

In one of the show windows is a manikin dressed in the costumes of the 60s, showing the long skirts, tight waists and crinolines in vogue in those old days.

Every department is attractive, and every taste can be satisfied right here at home.

FOR SALE—Second hand wood cook stove in good shape, cheap if taken at once. Phone 321, Nacogdoches. 15-1wd2.

Mrs. Jahu Kay of Winona is here for a visit with Mrs. K. P. Branch.

Mr. E. L. Hall of Lufkin was among the visitors in the city Tuesday.

Sheriff R. V. Watts of Angelina county was in the city Monday on business.

J. D. Bright has begun the construction of a handsome bungalow on Walker street.

Mr. R. O. Lout, connected with the supply department of the E. & W. at Lufkin, was a business visitor in the city Tuesday.

Attorney Audley Harris was at his office Monday for the first time since he succumbed to the flu several days ago.

In district court Monday the case of Arlington Caldwell, colored, charged with murder, was continued for the term.

Mrs. Lola O'Dell of Houston is here to be with her aunt, Mrs. Mattie Council, whose serious illness has been noted.

The case of A. D. Haltom, indicted for murder, was dismissed in district court Tuesday morning, there being insufficient evidence to sustain the charge.

Claud Nix of Garrison was placed in jail Monday by Judge Guinn for refusal to answer questions propounded by the grand jury. He "squared" himself with the court Tuesday morning, however, and was released.

The grand jury reported three felony indictments Tuesday, among them one against Elro Malone, charged with killing another negro, Arthur Weaver, last week.

Mrs. Edgar Harrell of Martinsville, accompanied by her fine baby boy, Garland, is visiting the Misses Turner and other relatives and friends in the city.

TWO ARE HELPED IN SAME FAMILY

Mrs. Lee Says She is Rid of Dyspepsia That Made Her Nearly Helpless—Praises Tanlac

"For the first time in three years I can enjoy a hearty meal without suffering afterwards. All the thanks belongs to Tanlac, and I cannot say too much in praise of this wonderful medicine, as not only myself but my daughter has been greatly benefited by it." This grateful statement was made the other day by Mrs. E. J. Lee, of Arcadia, Okla.

"Before I got Tanlac, indigestion wouldn't let me eat, excited nerves wouldn't let me sleep. I suffered severe headaches and dizzy spells and my kidneys bothered me a great deal. My food soured and gas pressed on my heart and chest till I could hardly get my breath. I was always tired out and so run-down that at times I was just about helpless.

"My troubles began to leave me on my first bottle of Tanlac, and now I am feeling like a new person, free from indigestion, my nerves steady and able to get plenty of restful sleep. The Tanlac treatment is simply wonderful."

Tanlac is for sale by all good druggists. Over 35 million bottles sold.

SINGING CONVENTION

The East Texas District Singing Convention convenes for its spring session at Appleby, Texas, Friday, night before the third Sunday in this month, which will fall on March 16, 17 and 18. It will be remembered that this is the convention which met at Fairview last March, which created so much musical interest in this section.

This convention is comprised of nine counties around Nacogdoches and their best vocal talent is sent; besides, many of the music houses send special representatives, usually quartettes and other special talent.

This convention will put Appleby on the map, for it brings hundreds of people from all over East Texas together, and Appleby folks are already making elaborate preparations to take care of the visitors. This convention bids fair to excel anything of its kind ever undertaken in East Texas, for it is widely advertised and many of the land's best singing men have promised to be present.

The public is cordially invited to attend all services, especially all who are in any way interested in music of any kind.

The committee will thank any newspaper in the county to copy this. W. M. BYRNE.

MRS. KARLE WILSON BAKER TO VISIT DENTON C. I. A.

Denton, Texas, March 14.—Mrs. Karle Wilson Baker of Nacogdoches is planning to visit, the last of this month, the new club at the College of Industrial Arts named in her honor. Mrs. Baker is a poet of wide reputation. Mrs. Baker has sent the club a book of poems in token of appreciation for the use of her name in connection with it. The organization has for its purpose the development of its members along literary lines. Miss Bernice Nussbaum of Corsicana is president of the club.

AIRPLANES TO LOCATE LAKES

Plan to Use Flying Machines in the Finding and Photographing of Alaskan Inland Waters.

Locating and photographing undiscovered lakes in the national forests of Alaska are the latest uses to which the airplane has been put, says American Forestry, quoting the United States forest service. We read:

"It has long been known that there are many lakes on the headlands and islands traversed by the inside passage between Seattle and Skagway that do not appear on any map. During the New York-Nome flight made by army aviators, lakes were frequently sighted which could not be found on the latest and most authentic maps of the territory. Tales of unknown water bodies are constantly being brought in by trappers and prospectors. Less than a year ago a lake four and one-half miles long and one-half mile wide was discovered at the head of Short bay. This lake has over 1,000 acres of surface area and is less than one and one-quarter miles from tidewater, yet because of the surrounding territory's rough topography has remained unknown and unnamed. Recognizing that many others of these 'lost lakes' may be sources of valuable water power, the forest service has laid plans to map this no man's land of the North by means of aerial photographs. A few days' flight, it is said will be sufficient to cover the area with a degree of accuracy that would require many years and great expense to accomplish by ordinary methods. The work, which has been approved by the federal power commission, will be done by seaplane, flying from Ketchikan as a base."

The Great Bell of Atri

THE village of Atri had a great bell that was rung only in time of need. For years it had been unused, for Atri was prosperous and content. Its rope, covered with green vines, trailed to the ground. One day a starving horse, turned out to shift for himself, seized the fresh, green tendrils in his teeth. The bell above him began to ring, attention was called to the predicament of the poor beast, and he became a well-fed ward of the town.

Advertising is a bell that is continually ringing to call your attention to something you need and ought to have.

Merchants and manufacturers, who are making and selling something they think you will want, are using its clarion notes to attract you to their wares.

Do you read the advertising? Many people do. They are wise shoppers—the economical buyers—the ones who are strictly up-to-date on the opportunities for saving money or spending it to greatest advantage.

Read the advertisements. They will tell you of many things you need. Read them to save steps—to save money. Read them because they place before your eyes a moving panorama of business progress. Read them to keep yourself informed.

It's a good habit to read the advertisements.
It's a profitable habit, too.

BOOSTER MEETING

The Booster Club held its regular weekly luncheon Monday night at the Lockety Tea Room with only two members absent, Guy Stripling and A. T. Mast.

Guests—Mr. Marvin Stegall of Lufkin and Mr. Holland M. Smith of this city.

W. D. Burk being one of the five-minute speakers for this meeting, begged to be excused due to having been sick.

The other five-minute speaker for this meeting was that affable gentleman in the person of Mr. T. D. Hill, who expounded at some length on some of the accomplishments of the Booster Club, and who, like Dallas Feazell, always has a subject. It is well understood among the boys that when Dallas Feazell captures the floor at a meeting he boasts a brass band for Nacogdoches, while T. D. Hill's subject, however, is usually awnings, and while the brass band is yet a dream, the subject of modern awnings has proven a reality, as can be readily noticed along East Main street, and still more improvements along this line will be noticeable within the next few days.

Very interesting talks were made by both our guests present, Messrs. Marvin Stegall and H. M. Smith.

Nominations for officers for the ensuing year were made at this meeting. The Nacogdoches Rotary Orchestra, which is famed for having carried the strains of Nacogdoches jazz as far west as the Pacific coast, rendered a few snappy selections, adding much to the pleasure of this meeting.

The Boosters.

DIVORCES GRANTED

In district court Monday decrees were granted the plaintiffs in the following pleas for divorce:
Arthur R. Green vs. Cora Green, Wesley McCoy vs. Lucille McCoy, A. T. Rusche vs. Maggie Rusche, Georgia Neely vs. B. E. Neely and Amanda Cleaver vs. Henry Cleaver.

The Western Union Telegraph office has turned over a new leaf, and hereafter will be closed at 6 p. m. For the information of the public it is stated that messages may be filed at the E. & W. station at any time after that hour. The Western Union office will not be closed at the noon hour, giving continuous service throughout the day.

Subscribe for the Sentinel

Dock Sowell, the negro who recently burglarized a boxcar in the railroad yards here and who was convicted by a jury last week, was on Monday adjudged insane and sent to the asylum at Rusk. Attorneys Audley Harris and A. T. Russell were appointed counsel for the negro on the insanity charge, and Dr. W. J. Johnson, superintendent of the Rusk asylum, came over Monday afternoon, examined the man and pronounced him insane. The court set aside the verdict in the burglary case and Dr. Johnson left about 6 o'clock with his patient and will hold him as of unsound mind.

Love is something which enables a young girl to look on an anemic youth smoking a cigarette and imagine she has found a Prince Charming.

INGROWN TOE NAIL

How to Toughen Skin so Nail Turns Out Itself

A few drops of "Outgro" upon the skin surrounding the ingrowing nail reduces inflammation and pain and so toughens the tender, sensitive skin underneath the toe nail, that it can not penetrate the flesh, and the nail turns naturally outward almost overnight.

"Outgro" is a harmless antiseptic manufactured for chiropodists. However, anyone can buy from the drug store a tiny bottle containing directions.
