CAPITAN, LINCOLN COUNTY, NEW MEXICO, DECEMBER 29, 1905.

NUMBER 43

FOREST SERVICE CIRCULAR.

The following circular from the Department of Forestry, to the various supervisors of forest reserves, has been received by Supervisor Hightower; and as it contains a new ruling on the grazing of stock on reserves, and many of our readers are interested in this subject, the circular is herewith presented:

"In accordance with the forest-reserve rules and regulations, on and after January 1, 1906, a moderate fee will be charged for the privilege of grazing all classes of live stock.

"The forest reserves belong to all the people, but of necessity, under proper management, their use for grazing purposes can only be allowed to a limited number. Therefore it is fair and just that those who receive the grazing privilege should pay a small fee which will go toward helping to pay the running expenses of the reserves.

"In order to protect and assist home builders, a special concession will be made in the grazing fee on cattle for of 1906 as follows:

"The permits of each state or territory for the year 1905 will be listed in order of the number of the cattle covered; then beginning with the smallest, one-half of the permits will be counted off, and the number of cattle shown by the largest of these will be taken as a basis for this concession.

"Applicants for grazing permits will be charged only half rate on cattle up to the number thus established for their state or territory, but all cattle over this number will be charged for at the full rate.

"In determining the amount to be charged, the advantages of the locality, method and cost of handling stock, transportation facilities, market conditions, and demand for range will be considered and the rate established accordingly. The number of stock to be allowed on each reserve will be fixed on the basis of mixed stock as they are usually owned and ranged in the locality.

"In calculating the number for which permit will be required, and the amount to be paid for the privilege of grazing cattle and horses, all animals six months old and over at the time of entering will be counted, but no charge will be made for calves and colts under six months of age at the time of entering, or for those born during the year for which permit is granted. The intent is that the calves and colts raised during any calendar year shall be charged for during the following year.

"The fact that young stock require less feed than old stock is taken into consideration in fixing the rate, and in all cases the charge will be reasonable in comparison with the advantages of the reserve.

"In counting sheep and goats, all animals six months old and over at the time of entering will be counted as grown stock, and each two head of lambs or kids under six months old will be counted as equal to one head of grown stock.

"When sheep or goats enter a reserve for the purpose of lambing or kidding there, an additional charge of 2 cents per head will be made on the grown stock, and the permit number required and amount to be paid for grazing the lambs or kids raised will be estimated on the average per cent of lambs or kids usually raised in the locality, two head to count as one. Thus, a person who wishes to drive in 1,000 ewes for the purpose of lambing on a range where the average lambing is estimated to be 80 per cent would be required to have a permit for, and pay the grazing fee on, 1,400 head. The 80 per cent increase on 1,000 ewes or 800 lambs to be raised would be counted as equal to 400 grown sheep.

"It will be the aim of the forest service to restrict the allowance for each reserve to a number of stock which experience shows to be the actual grazing capacity of the range under normal conditions, to make such range divisions among applicants and different classes of stock as are for the best interest of the reserve and commonwealth, and to divide the grazing privileges fairly. The advantages given in the use of a protected range are considered to be full compensation for the money collected, and the earnest cooperation of stockmen is solicited to carry out the policy of a conservative use of the range under such restrictions and regulations as will insure its permanent utility.

ARTICLES OF INCORPORATION TERRITORY OF NEW MEXICO.

Office of the Secretary.
INCORPORATION CERTIFICATE.
I, J. W. Reynolds, Secretary of the Territory of New Mexico, do hereby certify that there was filed for record in this office at nine o'clock, a. m., on the twenty-third day of November, A. D. 1905, ARTICLES OF INCORPORATION OF ENTERPRISE PLACER MILLING AND MINING COMPANY, (No. 4167.):

Wherefore: The incorporators named in the said articles and who have signed the same, and their successors and assigns, are hereby declared to be from this date until the 23rd day of November, Nineteen hundred and fifty-five, a corporation by the name and for the purpose set forth in said articles.

Given under my hand and the Great Seal of the Territory of New Mexico, at the City of Santa Fe, the Capital, on the 23rd day of November, A. D. 1905.

J. W. RAYNOLDS,
Secretary of New Mexico,
By W. V. WHITE, Assistant Secretary.

ARTICLES OF INCORPORATION.
Know all men by these presents: That we, the undersigned citizens of the United States, desiring to form a corporation for pecuniary profit under the laws of the Territory of New Mexico, do hereby enter into and adopt for ourselves, our associates and our successors the following articles of incorporation:

ARTICLE I.
The name of the corporation shall be "Enterprise Placer Milling and Mining Company," and its principal place of business shall be Jicarilla, in the county of Lincoln, Territory of New Mexico with a branch office in such other place or places as the Board of Directors shall determine for holding stockholder's meetings and the transaction of such business of the corporation as the Board of Directors may direct and determine.

ARTICLE II.
The general nature of the business of this corporation shall be to acquire, own, buy, sell and lease mines and mining and petroleum and natural gas claims and properties and the mining, treating, reduction and extraction of gold, silver, copper and other mineral ores, also coal, and the developing of petroleum and natural gas wells from and on the property or claims owned or leased by this corporation; to acquire and use tramways, roads, telegraph and telephone water power and water ways, in connection with the operation of said mines, claims and properties; and to do and to perform all other acts as are usually done and performed by a mining, development and reduction company.

ARTICLE III.
This corporation shall commence business on the filing of this certificate of incorporation as provided by law, and continue fifty years from said date, unless sooner dissolved in a manner provided by law.

ARTICLE IV.
This corporation shall have and possess all powers, right, privileges and immunities prescribed and permitted by law, including the right to take, hold and dispose of property, real and personal, to make, perform and enforce contracts, to transact any lawful business, consonant with the purpose of its organization, to sue and be sued in its corporate name, to have a common seal, to render the interest of its stockholders transferable, to do any and all acts necessary and proper to carry out the purpose of its organization, the same as a private individual might do, and to possess and exercise these powers, privileges and immunities, within the Territory of New Mexico and elsewhere that it may lawfully transact business.

ARTICLE V.
The amount of the capital stock shall be One Million Dollars, divided into one million shares of one dollar each, of which two hundred thousand shares shall be set apart and held and known as contingent treasury stock and shall remain unsold as a contingent fund for further use, until authorized by a majority vote of the capital stock actually issued and shall not be voted while held as such, but when sold or any part thereof and entered upon the books of the corporation, and cash paid into the company's treasury therefor, the shares so sold shall have the same voting right and power as each and all other shares have.

Three hundred and fifty thousand shares of the Capital stock shall be held and known as Treasury Stock, such part or all of said stock to be sold in such amount and at such price, to be used in the development of claims and property and such other business of the corporation as these articles provide and the Board of Directors may determine.

Four hundred and fifty thousand shares may be issued in payment of the certain mining claims, properties and capital stock which the corporation may purchase.

The aforesaid mining properties and capital stock to be taken by this corporation at the face or par value of the shares issued therefor at the time and date of their location and purchase, and to be received and accepted by this corporation in full payment for said stock, and such stock, when so issued shall be fully paid and forever treated and considered as non-assessable, and it shall be conclusively presumed as against all persons dealing with this corporation, whether creditors, stockholders or others, that the amount paid for said mining properties and capital stock was at the date of said location and purchase, the value of the same, and all person shall be forever barred and estopped from claiming or setting up any proceeding at law or equity, that the said stock is not fully paid up.

ARTICLE VII.
The capital stock of this corporation shall be non-assessable and the par value of each share shall be one dollar.

ARTICLE VIII.
The affairs of this corporation shall be managed by a Board of Directors consisting of five or more members, not exceeding nine, stock-

Her relatives claim that a woman who did not leave her \$8,000,000 to them was insane. Of course she was; she left it to the man she loved.

Coats are to be long, and are to fit close, say the tailors, whose decrees are indisputable. That's all right for everybody but the long slim Jims.

The attempt to naturalize Hawaiian poi in this country is one of doubtful result. Who would care for poi when he can have hot mince pie for breakfast?

Breast pockets on our evening clothes? Pipe our frocks? Velvet collars on the gallus dinner coat? Nay, nay, not until black socks give place to red.

"The Igorrote," remarks the Portland Oregonian, "is visible to the naked eye." He is, dear boy. Also, if memory serves us, he is naked to the visible eye.

What riles us is, when we are trying to make up for lost time to have to waste ten or fifteen minutes listening to some good advice about the foolishness of wasting time.

A dispatch from Wall street says it is feared that money may before long be too plentiful. This undoubtedly is the worst case of trouble-borrowing that has ever been reported.

"Eternal Feminine" writes to say that she thinks it but just that "angels here below should be representative of the masculine gender, as there will be few, if any, of that sex above."

There was a time when China tore up the railways built by foreigners and threw the rails into the sea. Now it is buying their railways. The heathen Chinese is losing some of his peculiarities.

Once there was a man who suspected his wife of flirtation, but before he blarneyed his woes to the world he discovered that she was merely trying to buy him a birthday present without his finding it out.

Robert Golet, the well-known Newport society man, has filed his application for admittance to the bar of Rhode Island. If he gets all the society cases he will have a large and remunerative practice.

"Who is the foremost man in the world?" asks an esteemed contemporary. The foremost man in the newspaper world, as any fair minded person will concede, is the man with the longest nose for news.

The country's postoffice business for the year ending June 30, last, shows an increase of \$10,000,000, over the preceding year. And yet the average man probably did not notice any increase in his correspondence.

Gay old King Leopold sends word to our President that the Roosevelt portrait adorns a bureau in the royal dressing room. There's a large and fascinating variety of portraits on that royal bureau, according to persistent gossip.

All hands howled in chorus at the critics of Borglum, sculptor of angels. The Providence Journal demands to know whether the critics ever saw an angel, thus manifesting an intention to interview somebody—if not the angel, perhaps the critic.

OPENWORK MUST GO

COMFORTABLE, BUT ALSO TANTALIZING AND SINFUL.

Mrs. Katharine Stevenson Leader in Crusade Against Fashion—Highly Popular During the Warm Weather—Many Diverse Views Expressed.

Diaphanous ladies must go! Unsuspecting man is hereby warned that the curiosity aroused by the pink revelations of perforated stockings and shirt-waist transparencies is of the morbid variety. It is not a matter of the neck or the ankle, to be

guessed at by the imaginative mind! Both may be entirely within the proprieties, rounded to a turn—that is to say, just what they should be. It is the wicked little holes through which they peep out at you! They are tantalizing and sinful.

Mrs. Katharine Stevenson, State President of Massachusetts, in her annual address at the convention held in Cambridge, roundly condemned "the steadily growing tendency to immodest, unnecessary display of woman's person."

"Our purity crusade," she said, "will be directed against the dangers of immodest dressing. Openwork has its place, but that place is not in public and it is seen altogether too frequently out of place.

"When we remember who sets the fashions to the world, we may well question if an insidious purpose, deadly to the highest womanhood, may not run through it."

The Boston Mothers and Domestic Science Leagues have enthusiastically endorsed Mrs. Stevenson's views and will begin the crusade in the families of their membership.

New York women fail to see the connection between openwork and original sin. They admit there are openworks and openworks, but cry out that the woman, determinedly im-

modest, would be so if she wore a sweater and overgaiters, says the New York World.

"It seems to me," said Mrs. John Fowler Trow, the parliamentarian, "that the W. C. T. U. members have missed the most glaring need of their crusade in fastening their eyes upon women's openwork stockings. Why not agitate against the socks that children weep, which not only dis-

play a bare leg, but as often injure the child's health. I see no objection to showing a glimpse of the flesh as long as it is modestly done."

"It all depends on the discretion of the openwork," said Miss Velma Swanston of the New Century Theater club. "If the openwork is notoriously inclined all the dignity in the world could not circumvent it. Properly applied it is one of the greatest comforts ever invented for the summer season, and I doubt if even the exaggerated bows of ribbon beneath are sufficiently distracting to demand its suppression."

"Though I do not take that way of cooling myself," said Mrs. J. L. Niver, of the West End Republican club, "I cannot see anything wrong in it. If I desired to wear an openwork waist I should certainly not hesitate on the score of being immodest. I think the proportion of women who wear it immodestly must be very small or public attention would have been called to it before this."

Vegetation Defies Cold.

"People in far north latitudes would have a bad time of it if vegetation was wholly dependent upon the heat of the sun," says a scientist. "As a matter of fact, wheat will grow in soil that even in midsummer is not thawed more than a foot below the surface. In Norway oats ripen under 69 degrees of north latitude, rye a half degree and barley a whole degree farther north. In Hammerfest, in latitude 70 degrees, the grass grows underneath the snow. It has been found by experiment that in latitude 65 degrees north barley will grow two and a half inches and peas three inches in the twenty-four hours for several consecutive days. Barley is harvested in ten weeks after being sown."

Made 1,000 Years Ago.

Carving on bone by a prehistoric American, representing the long haired elephant that once lived on the continent.

Sultan Has Many Freaks.

The sultan of Morocco plays both tennis and cricket. At cricket he takes a turn at the wicket more often than the strict rules of the game allow; but, though his play is often eccentric, he never cheats. Once at tennis he stopped to take a bulky handkerchief from his pocket, and tied it to the net. A few minutes later a ball from his opponent knocked it off and a handful of diamonds fell out. He owns about 200 bicycles, some with gold and silver fittings, and it is said that he could make his living as a trick rider. One of his favorite amusements is to ride at full speed up narrow inclined planks. The sultan also has a weakness for motor cars and grand pianos.

A Plant Within a Plant.

At Brookdale, Santa Cruz county, Cal., a fine specimen of the sequoia, or redwood tree, was blown over in a recent storm. The tree is estimated to be over 330 years old. Ten feet from the top of the tree, and at a distance of 165 feet from the ground, was found a hole somewhat less than two feet deep. It had once been the nest of a woodpecker. In this hole had grown a sturdy, three-stalked huckleberry bush, two feet tall. Its roots, extending six feet into the heart of the tree, had absorbed the sap of the redwood. The huckleberry had flourished and borne fruit.

Needed Ax to Remove Weeds.

S. E. Ford of South Hanson, Mass., sent a man out to mow weeds. When the man returned for an ax Mr. Ford went to the scene of operations to investigate. He found one pigweed eight feet high with a spread of six feet.

GRATIFYING PRAISE.

Letter from Marcus Mayer, the Great Patron of Music and Drama.

Marcus R. Mayer, who brought to America Mme. Patti, Duse, Salvini, Coquelin and other famous singers and actors, writes:

Gentlemen: I wish as many suffering men and women as I can reach to know the excellence of Doan's Kidney Pills. I was greatly benefited by this remedy and know it cured several who had kidney trouble so badly they were agonized with pain in the back, head and loins, rheumatic attacks and urinary disorders. I am glad to recommend such a deserving remedy.

(Signed) MARCUS R. MAYER.

MUCH UNKNOWN LAND

VAST PORTION OF THE EARTH'S SURFACE UNEXPLORED.

Around the Two Poles Lie Continents Awaiting the Tread of the Surveyor—Mission of Capt. Amundsen May Be Accomplished.

Of an estimated land area of the earth of 142,000,000 square miles, 20,000,000 square miles are entirely unexplored, and one-half of this unknown surface lies around the two Poles, says the Philadelphia Ledger. After many centuries of geographical progress, one-seventh of the estimated land surface of the world remains hidden from knowledge. Around the

Map of North Polar Region

North Pole almost 3,000,000 square miles of area is yet to be surveyed, and at the South Pole lies a continent more than twice the size of Europe awaiting exploration.

Not only are the terrestrial poles awaiting the adventurer, but the even more important magnetic poles, of which there are also two, are not yet accurately charted. Ross discovered the north magnetic pole in 1831, but his instruments were primitive compared with those now made, and the knowledge of magnetism seventy-five years ago did not equal that of to-day. Ross may have discovered the north magnetic pole, and he may not have done so. Capt. Amundsen left Norway on an expedition two years ago to rediscover it and to accurately chart this important spot. A few months ago word was received that the intrepid Norwegian had accomplished his purpose, but the report awaits confirmation. So far as the south magnetic pole is concerned, it has never been reached. As yet no explorer has held a magnetic needle over the spot, although Borchgrevink in 1898, in the Southern Cross expedition, claimed to have determined its location. Dr. Frederick A. Cook, who was a member of the Belgica Antarctic expedition, says that no fewer than six positions are assigned by

Map of South Polar Region

experts to the south magnetic pole, and these are from 100 to 500 miles apart.

Remarkable Fortress.

In the northern part of Madagascar is the most remarkable natural fortress in the world. It is occupied by a wild tribe who call themselves the People of the Rocks. The fortress is a lofty and precipitous rock of enormous size, 1,000 feet high and eight square miles in area. Its sides are so steep that it cannot be climbed without artificial means. Within it is hollow, and the only entrance is by a subterranean passage.

Trails in Forest Reserves.

During the coming winter and spring many miles of trails will be built in the government forest reserves. One of the chief cares of the forest service in the management of the reserves is to protect them against fire. The trails will afford a means of reaching all parts of the forest reserves on horseback and the fire lines will form vantage points from which the fire may be attacked and there controlled.

The trails will be carefully planned and constructed with an easy grade. This does not involve much expense, for in many sections a perfectly good trail can be built for \$20 a mile and many miles will cost less than \$5. The rangers themselves will perform most of the work.

Sunday for Rest.

The Chicago & Alton Railroad has come to the conclusion that a workingman makes a better employe for having one day of rest every seven days and will arrange its forces and schedules to enable every man it employs to rest one day a week. As far as practicable that day will be Sunday so as to make sure the day of rest is not made a day of dissipation.

Ask Your Neighbors.

Gelatt, Pa., Nov. 6th (Special)—Mrs. H. W. Sterns, a well respected resident of Gelatt, tells in convincing words, what Dodd's Kidney Pills have done for her. She says:

"I was a great sufferer from Rheumatism, caused through my Kidneys being out of order. I was subject to it for years. It would take me without warning, and while the attack lasted I was so lame I could not get around. So I had to send for Dodd's Kidney Pills. I took them for three days, but didn't feel much benefit, but on the fourth day I noticed a great change, the lameness in my back was gone, and the pains I used to suffer were less. I kept on with Dodd's Kidney Pills and now I am glad to say I have no lameness nor pain of any kind. I feel as if I didn't know what Rheumatism was. I shall never be without Dodd's Kidney Pills in the house, and I bless the day I first heard of them.

We are told that Opportunity knocks once at every man's door, but opportunity never ceases knocking.

CAPT. GRAHAM'S CURE.

Sores on Face and Back—Tried Many Doctors Without Success—Gives Thanks to Cuticura.

Captain W. S. Graham, 1321 Eoff St., Wheeling, W. Va., writing under date of June 14, '04, says: "I am so grateful I want to thank God that a friend recommended Cuticura Soap and Ointment to me. I suffered for a long time with sores on my face and back. Some doctors said I had blood poison, and others that I had barbers' itch. None of them did me any good, but they all took my money. My friends tell me my skin now looks as clear as a baby's, and I tell them all that Cuticura Soap and Cuticura Ointment did it."

Possibly the proper study of mankind is man—but there is more fun in studying woman.

More Flexible and Lasting, won't shake out or blow out; by using Defiance Starch you obtain better results than possible with any other brand and one-third more for same money.

Like other trees, there is usually something shady about the family tree.

The Snow.

The heaviest snow for twenty years has fallen the past week, and, as a consequence, traffic of all kinds has been impeded, and in many instances stopped entirely. The snow in Capitan was about two inches deep, and in the Parsons country it was over three feet, while the plains in the Block ranch country it measured 33 inches on a level.

We have had only one mail from the railroad in the past eight days, and that was but a small one; and we have had no train over the branch line since Thursday, the 21st, and what is worse we are not likely to have one for a still longer time. The drifts in Indian canyon are about ten feet deep, and it will probably require the use of snow plows before a train can make its way up.

The weather has been extremely cold at times, too, during the storm, the thermometer registering 14½ degrees below zero last Saturday morning, and another morning after that date the indicator sought the bulb. This was almost unprecedented for this section, and makes us a little shy now when talking about our fine "Etalian" climate.

The information came over the phone from Lincoln Monday night that the store building and its contents of W. A. Hyde, at Hondo, 12 miles below Lincoln, was destroyed by fire Monday. No particulars are obtainable, on account of the deep snow, which stopped communication between places not having phones, and we therefore only able to give the bare report. Our readers will recall that this same family met a similar disaster near the same place a little over three years ago.

Notice for Publication.

Land Office at Roswell, N. M., Nov. 17, 1905.
Homestead Application No. 5406.
Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before E. W. WELCH & TITSWORTH

James R. Brent was over from the Block ranch Christmas day. Welch & Titsworth are in the market for apples.

Jesse Mundell came in through the snow this week from Las Cruces, to spend the holidays with homefolks.

Stetson hats, Welch & Titsworth.

A Christmas gift, although one day late, was presented to Mr. and Mrs. Clifford Hulbert at their home below Lincoln, in the shape of a bouncing baby boy.

Meadow Gold butter at Welch & Titsworth.

R. E. (Bud) Wingfield and wife came over from the Agency Monday through the snowdrifts and passed Christmas in Capitan. They returned, or rather started, home the following day.

Barbed Wire for sale at Welch & Titsworth's.

In a letter to the Nrxs W. B. Puckett, who left here with his family last summer, says he has bought a place in Hemphill county, Texas, one mile west of the Oklahoma line, and asks that his paper be addressed to Antelope, Oklahoma.

A telegram came Wednesday to Guy H. Herbert stating that his brother-in-law, Arthur Williams, had died in Mexico, from drinking water which contained a strong solution of cyanide. The telegram conveyed no particulars other than that deceased drank the poison through mistake, and that the remains were on their way to El Paso for interment.

K. P. Entertainment.

Myrtle Lodge No. 19, Knights of Pythias, Capitan, will give an entertainment, lunch and dance Monday night, January 1, 1906. This date has been chosen so as not to, if possible, conflict with entertainments elsewhere during the holidays.

The price of admission will be \$1.00 per couple, or if any gentleman is so unfortunate as to be unable to secure "company," he will be required to "cough up" the coin just the same. Remember the date, the place and the cause, and come running.

Wanted.—Hides, sheep pelts goat skins, etc. Highest market price paid by Welch & Titsworth.

James Yates met death by freezing at his home, near Nogal, during the recent storm, and his body was found Wednesday. It seems, from the best information obtainable, that he left his home, three days previous to the finding of the body, to go out to look after some stock, and never returned. The body was found within a stone's throw of the house. He was partially blind, and is supposed to have lost his way in the storm. The deceased was a brother of William and Samuel Yates, residents of this county.

There was stolen from warehouse a small butt of SLEDGE tobacco, about 4 in. by 4 in. 12 in. long. Will give another like it to know who took it.

HAS NON-REFILLABLE BOTTLE.

New Yorker Claims to Have Solved Problem in Simple Manner.

A scientist some weeks ago stated in an interview that a bottle that could not be refilled had never been invented, that it probably never would be invented, and that many inventors had gone insane over the problem.

The interview went the rounds of the country. Other scientists agreed the non-refillable bottle was in a class with perpetual motion.

A young man in working clothes called at the Sunday Telegraph office Tuesday afternoon.

"My name is Frank Waters," he said. "I am a molder. In my spare moments I invent things. I read in the Sunday Telegraph that a non-refillable bottle could not be invented. I wondered if I could do it. I sat down and thought diligently. The problem baffled me. I thought harder. And harder.

"One evening I suddenly laughed aloud. The easiest and most natural way had suddenly come to me.

"Then I made the non-refillable bottle.

"I took an ordinary bottle whose neck was slightly bulged and filled the neck with stone cement so that when hard it could not come out. Then I ran tiny pipes through the cement, one extending to the bottom of the bottle, which I had already filled. Then I turned it upside down. The water ran out of one of the tubes. So far so good. I took a small funnel and did my best to return the water to the bottle. It was no use. I had invented the non-refillable bottle."

The water is forced from the bottle by air, which gets behind it through the tube which extends to the bottom of the bottle. It is air also which prevents the water from being returned. It cannot be forced through either pipe because of the air which gets in through the other.

The principle can be understood by

This is Walter's idea. studying the accompanying diagram. —New York Telegraph.

Bird Hawk Trapped by Grass.

A Bangor man while passing through a field near Branch Pond, last Sunday afternoon had a peculiar experience with a hawk.

Hearing a fluttering in the grass, he investigated, thinking that a bird had become caught in a trap. What was his surprise to find a bird hawk with a yellow hammer. The hawk had killed the yellowhammer, pecking its head nearly to pieces, but in the struggle in the tall grass a number of stout pieces of grass had become tangled around one of the hawk's legs.

Try as he would, he could not free himself, and the man easily secured him. He will be mounted, and is as fine a specimen as one will often see, as he has not a mark on him. —Bangor News.

Good Money from Small Flock.

William R. Curtis of Island Pond, Vt., has a flock of nineteen sheep. From them he has sheared this year 167 pounds of wool which, at thirty cents a pound, gave him \$50.10. Thirty lambs when sold brought \$127.30. This gives the total income from the flock for the year \$177.40.

DANGERS OF FOOTBALL.

It Can Only Be Properly Played By Gentlemen.

Football has always been a gentleman's game, because no one but a gentleman can be trusted to play the game honorably and fairly and with due regard for the rights of his opponents. The spirit of the "slugger," in football, is the spirit of the thug and the assassin, and it is just as criminal to kick an opposing player in the back, or jump on his body, or "foul" him in some other way, for the purpose of winning the game or retaliating for some unintentional injury, as it would be to sandbag him in an alley to get his watch and pure or to avenge an injury.

The number of accidental injuries in football is not large enough to warrant giving up a game that possesses most valuable training features, which are not possessed by any other game. But the number of injuries that arise from malice, or passion, or brutal indifference to the rights of other players and the courtesies of the game, is sufficient to warrant the demand that the game shall be played better, or not at all.

No game can be "just as good as football," unless it makes the demands upon self-control, courage, strength and endurance that football makes.

Football is a game that should be played by gentlemen, or it should not be played at all. No boy has learned the principle of football playing until he has learned self control.

Present day football is dangerous because it is dirty football. The only kind of football worth playing is clean football, and clean football is not dangerous. —Pueblo Chieftain.

An Important Treaty.

One of the most important international treaties ever signed was that between twelve European countries for the doing away of the white slave traffic, the treaty going into effect July 18th. It was agreed that each country establish bureaus for collection of information and to exchange information.

OLD FASHIONED FARE

Hot Biscuits, Griddle-Cakes, Pies and Puddings.

The food that made the fathers strong is sometimes unfit for the children under the new conditions that our changing civilization is constantly bringing in. One of Mr. Bryan's neighbors in the great state of Nebraska writes:

"I was raised in the South, where hot biscuits, griddle-cakes, pies and puddings are eaten at almost every meal, and by the time I located in Nebraska I found myself a sufferer from indigestion and its attendant ills—distress and pains after meals, an almost constant headache, dull, heavy sleepiness by day and sleeplessness at night, loss of flesh, impaired memory, etc., etc.

"I was rapidly becoming incapacitated for business, when a valued friend suggested a change in my diet, the abandonment of heavy, rich stuff and the use of Grape-Nuts food. I followed the good advice and shall always be thankful that I did so.

"Whatever may be the experience of others, the beneficial effects of the change were apparent in my case almost immediately. My stomach, which had rejected other food for so long, took to Grape-Nuts most kindly; in a day or two my headache was gone, I began to sleep healthfully and before a week was out the scales showed that my lost weight was coming back. My memory was restored with the renewed vigor that I felt in body and mind. For three years now Grape-Nuts food has kept me in prime condition, and I propose it shall for the rest of my days.

"And by the way, my 2½ year old baby is as fond of Grape-Nuts as I am, always insists on having it. It keeps her as healthy and hearty as they make them." Name given by Postum Co., Battle Creek, Mich. There's a reason.

IF YOU ARE A WOMAN

What Mrs. Ford Says Concerning Dr. Williams' Pink Pills will Surely Interest You.

"I wish I could help other women get rid of certain physical troubles as completely as I have succeeded in getting rid of mine," said Mrs. B. B. Ford, of Pushmataha, Miss., recently. "You know," she continued, "that a woman's health depends chiefly on the regularity of just one function. If she fails to keep that properly regulated she has no end of physical misery. I suffered from that one cause for two wretched years, during one of which I was kept in bed all the time. I tried medicines enough to cure any illness, but nothing gave me the slightest benefit until I began using Dr. Williams' Pink Pills for Pale People. They cured me. Why, I was suffering all the time practically from sickness of the stomach, dizziness or swimming in my head and pain in my back. Now I am entirely free from discomfort of that sort. I am not only able to keep on my feet, but to do my work as a teacher, and to enjoy the pleasures that come through the possession of sound health.

"Within three weeks after beginning the use of Dr. Williams' Pink Pills I experienced such relief that I knew they must be adapted to the needs of my case. After using them for a short while longer I became and have since remained a well woman, and the reason why is simply that I took Dr. Williams' Pink Pills."

These pills make uterine action regular and painless, banish headaches, languor, nervousness, create appetite, promote digestion, put color in the complexion, build up strength and health.

Every woman should send to the Dr. Williams Medicine Company, Schenectady, N. Y., for a valuable booklet, entitled "Plain Talks to Women." It will be mailed free in sealed envelope to the address of any applicant. Dr. Williams' Pink Pills are sold by all druggists.

Sanitarium for Consumptives.

One of the most extensive works in behalf of the poor of New York City ever undertaken is about to be started by the Department of Charities, in the form of a sanitarium for the exclusive treatment and care of persons suffering from tuberculosis. Plans for the sanitarium are complete, and the actual work of building will probably be started early next spring.

Situated on the highest hill on Staten Island, overlooking New York harbor, and with accommodations in its wards for 800 patients, the sanitarium is planned to be the finest of its kind in the world. For its construction alone \$2,000,000 will be necessary.

Insist on Getting It.

Some grocers say they don't keep Defiance Starch because they have a stock in hand of 12 oz. brands, which they know cannot be sold to a customer who has once used the 16 oz. pkg. Defiance Starch for same money.

It is far better to take people as they are than to waste valuable time in trying to make them as they should be.

The Kind You Have Always Bought.

Dress some men up in feminine apparel and you couldn't tell them from women.

Superior quality and extra quantity must win. This is why Defiance Starch is taking the place of all others.

An Indiana farmer who while attending a county fair lost his wife and pocketbook offers a reward for the return of the latter.

VALUABLE FOR FIRE FIGHTERS.

Portable Breathing Apparatus an Invention of Much Merit.

In Europe a respiratory and life-saving apparatus has been used with considerable success by miners, firemen and others, who are required to penetrate mines or apartments that are filled with smoke or unbreathable gases, especially after accidents such as explosions. With this apparatus sufficient air and oxygen are carried to support respiration for two hours, even while the individual is working. The apparatus consists of a mask or helmet, which completely covers the face, but exposes the ears, so that while the eyes of the wearer are protected from the smoke he can hear distinctly.

There are connected with the mask two rubber bags—one for the exhaled air and the other connected with the oxygen and the regenerated air. The former is contained in steel cylinders, and by means of proper reducing valves acts on the air after the carbonic acid which has been exhaled is absorbed by granulated potash. The instrument weighs about twenty-eight pounds, but is sure in its action, and has been used successfully by the Paris fire department, where, in addition, portable electric lights with flexible cables form a part of the equipment, and thus allow firemen to penetrate dark and smoky rooms and cellars to save life or cut off gas or electricity, or perform some other useful duties. In mines the apparatus is valuable in case of accidents due to fire-damp or explosion, and it is coming into extensive use for this purpose.—Montreal Herald.

Paints Wild Beasts' Eyes.

One of the oddest ways a young woman artist of this city has of adding to her income is the painting of the glass eyes that are fitted into the heads of wild animals sent to a taxidermist to be stuffed and mounted, says the New York Press. She is not called upon to paint these special eyes for the ordinary run of our native beasts. She only gets one of these orders when some sportsman has killed a panther, a grizzly, or a tiger—animals noted for the savage glare of their eyes. Then she takes all the pains she is capable of to get the "glare" just as savage as she can. Before she begins work she learns in just what attitude the beast is to be mounted, for it would never do to represent the animal with his eyes ablaze with the light of battle if he was to be postured as lying half asleep. The work does not pay well. Sometimes the artist gets only a dollar a pair for the eyes, while now and again she gets as much as \$2 a pair.

The Ideal Wife.

A Chicago clergyman preached a practical sermon on the ideal wife. The necessary attributes he dwelt on especially were truth, gentleness and pleasing appearance.

To attain the realms of the ideal a wife must be absolutely truthful to her husband; she should never criticize her husband, nor be a scold; she must look her best at all times, and it is a sin for her to be careless about her personal attire in the presence of her husband.

These are the quite sensible points made during the course of the sermon, but there was one essential virtue omitted. The reticence that will prevent a woman from ever confiding to people outside her home what troubles she may meet with there.

But when are the clergymen going to tell the world what the ideal husband should be?

Feathers from the Ostrich.

Apropos of the vexed question of wearing feathers plucked from living birds in hats. It is comforting to know that the wearer of long ostrich feathers need have no qualms on the subject. The larger and more valuable feathers, which are in the wings and tail of the bird, are carefully cut off with scissors and the ends are left in the skin till they drop out.

Safety in Proprietary Medicines.

Replying to the charge that certain popular proprietary medicines contain narcotic drugs, an authority says:

"Some years ago one of the leading pharmacists of America, in connection with some official work, undertook to ascertain, by an elaborate inquiry in representative cities of the country, what percentage of physicians' prescriptions contained a narcotic drug of some kind. Out of 100,000 representative prescriptions, dispensed in drug stores in all parts of the United States, it was found that 70 per cent contained opium or some one of its preparations.

"Proprietary medicines are almost invariably accompanied by the most detailed and specific directions for use, while the directions accompanying physicians' prescriptions are generally very brief and sometimes illegible. It is also true that but a moderate proportion of proprietary medicines contain any poison or narcotic, and, when they do, it is generally in such small quantities or so protected by accompanying antidotes, as to carry with it no danger whatever."

"What do you think of co-education in our colleges?" "I think from the flirtation one hears of, it is co-education."

TEA

Both wine and tea make talk, but not both make wisdom!

"Did they name the baby after its rich uncle?" "No; when he saw it he offered them \$10,000 not to."

Every housekeeper should know that if they will buy Defiance Cold Water Starch for laundry use they will save not only time, but because each package contains sixteen ounces—one full pound—while all other Cold Water Starches are put up in three-quarter-pound packages, and the price is the same, 10 cents. Then again because Defiance Starch is free from all injurious chemicals. If your grocer tries to sell you a twelve-ounce package it is because he has a stock on hand which he wishes to dispose of before he puts in Defiance. He knows that Defiance Starch has printed on every package in large letters and figures "16 ounces." Demand Defiance and save much time and money and the annoyance of the iron sticking. Defiance never sticks.

The policy holder will not feel that all is lost so long as the insurance company sends him a nice calendar every year.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Sold by Druggists, 75c.
Take Hall's Family Pills for constipation.

The beef trust is still doing its best to make us heed Mr. Edison's warning against eating too much.

Piso's Cure cannot be too highly spoken of as a cough cure.—J. W. O'BRIEN, 322 Third Ave. N., Minneapolis, Minn., Jan. 6, 1900.

When a man is down he need fear nothing but kicks.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. Send for FREE \$2.00 trial bottle and treatise. DR. R. H. KLINE, Ltd., 931 Arch Street, Philadelphia, Pa.

It must be a shallow book that people are obliged to wade through.

TEA

Don't you know our tea yet?

You have missed a good deal of comfort and lost some money.

Your grocer returns your money if you don't like Schilling's Best.

Visitor—What causes your sister to limp, Bessie? Bessie (aged four)—He's dot a onion on her foot.

TEA

"How can an everyday drink be so bad?"
"Oh, they're used to it!"

Every woman takes it as a great compliment to herself to have her daughter engaged.

No chromos or cheap premiums, but a better quality and one-third more of Defiance Starch for the same price of other starches.

A TRULY IDEAL WIFE

HER HUSBAND'S BEST HELPER

Vigorous Health Is the Great Source of the Power to Inspire and Encourage—All Women Should Seek It.

One of the most noted, successful and richest men of this century, in a recent article, has said, "Whatever I am and whatever success I have attained in this world I owe all to my wife. From the day I first knew her she has been an inspiration, and the greatest helpmate of my life."

Mrs. Bessie Ainsley

To be such a successful wife, to retain the love and admiration of her husband, to inspire him to make the most of himself, should be a woman's constant study.

If a woman finds that her energies are flagging, that she gets easily tired, dark shadows appear under her eyes, she has backache, headaches, bearing-down pains, nervousness, whites, irregularities or the blues, she should start at once to build up her system by a tonic with specific powers, such as Lydia E. Pinkham's Vegetable Compound.

Following we publish by request a letter from a young wife:

Dear Mrs. Pinkham:
"Ever since my child was born I have suffered, as I hope few women ever have, with inflammation, female weakness, bearing-down pains, backache and wretched headaches. It affected my stomach so I could not enjoy my meals, and half my time was spent in bed.

"Lydia E. Pinkham's Vegetable Compound made me a well woman, and I feel so grateful that I am glad to write and tell you of my marvelous recovery. It brought me health, new life and vitality."—Mrs. Bessie Ainsley, 611 South 10th Street, Tacoma, Wash.

What Lydia E. Pinkham's Vegetable Compound did for Mrs. Ainsley it will do for every sick and ailing woman.

If you have symptoms you don't understand write to Mrs. Pinkham, at Lynn, Mass. Her advice is free and always helpful.

Around the World

"I have used your Fish Brand Slickers for years in the Hawaiian Islands and found them the only article that suited. I am now in this country (Africa) and think a great deal of your coats."
