A Trip to the Vera Cruz Mines

The writer had the pleasure of visiting the Vera Cruz mines this week and was shown through the entire workings.

As most of our readers know, this mine is located 11 miles from Carrizozo at an elevation of 7550 feet, and the beautiful cool air was a revelation after the warm weather we have been having in the valley for the past few days.

When we first arrived we were met by Mr. Ben Horner, the manager, and conducted into his office, where we were shown maps, blue prints, etc., of the entire workings, both present and proposed. We were also shown through the general offices, the office of the mine and mill foreman, and the assay office and furnace room where all the tests are made and where the gold is prepared for market.

These offices are all under one roof and it is here that the plans are laid and all the details figured out, it being the motto of the present management throughout the different departments to be sure you are right and then go ahead.

At present the mine is being worked night and day under the foremanship of Mr. Robert Irving, who for the past twenty years has been associated with the famous Homestake mine of the Black Hills, and he has the reputation of being one of the most practical miners in the entire country.

After partaking of a drink of their famous water which is noted through the entire country for its purity, we went for an inspection of the mine.

The drift they are now working starts just back of the mill and runs back into the main ore body 700 feet, and is laid with a double track for economy of working, thus allowing the ore trains to pass without danger of collisions.

This tunnel will be run 100 feet further, which will tap the richest ore, and a raise of 125 feet will be put in which will come out in the old workings known as the upper cut, and from which assays were taken averaging \$4.96 in gold and \$1.44 in silver. We were shown assays from the new workings taken within the last week at \$5.20 in gold, and they are not yet back to the richest ore. This all goes to again prove the old rule that the deeper the richer.

It has certainly never been the lot of the writer to meet a more enthusiastic bunch of people over any proposition than that of the expert help with which the Vera Cruz company have surrounded themselves, for the bright prospects of this great property.

Mr. Irving assures us that by the system he is employing not a pound of this ore has to be raised but will be worked from beneath by stoping, and it will all be dropped through ore chutes into the cars and run directly into the mill, thus saving an enormous expense over mines that have to use shovels and hoists.

After spending a pleasant hour watching the miners at work and otherwise inspecting the workings beneath the ground, we were invited to ride on car loads of ore which run themselves out, the trammers riding, there being just the proper grade to allow this at a safe speed.

After getting out again into the open air we were taken through the mill and introduced to Mr. Godfried Dietz, the mill foreman and amalgamator, who also came from the Homestake and who enjoys the reputation of being among the best amalgamators in the world, and he assured us that he positively knows from tests he has made that he can save the values with the Vera Cruz equipment when he has the plant ready to start.

It is indeed a busy place around the mill with a force of mechanics remodeling and putting everything in first class shape for the starting, and Mr. Dietz tells us that when they do start to mill they will be in shape to handle its capacity night and day without interruption.

We next called again at the offices, which give one the idea of being in Chicago, the equipment there being like every other department around the Vera Cruz mines, complete in every detail, and it is a very busy place, for besides the regular routine of business connected with the mine, Mr. Horner informs us that he has adopted the system of sending monthly letters of report to each of the stockholders that they may know just how everything is progressing.

In answer to the question of how soon dividends are likely to be paid, Mr. Horner answered us that without a doubt they will declare a dividend at the end of the first quarter after starting the mill, which he expects will be about August 1st.

After we had enjoyed a half hour visit in the office, we next went to the power house and were rewarded by the sight of what is without doubt the finest steam and electric plant of its size in the entire Southwest, being equipped with a 350 H. P. Lane and Bodley compound engine and General Electric Co. Generator. Besides this the company have at their power house a heavy compressor, a water purifier, powerful twin boilers, and last but by no means least, a well and pump with a capacity to supply their works with a continuous 6-inch stream of water.

The same as in other departments, everything speaks of wonderful care, every part shining as only good attention can make it.

What struck us as being one of the greatest advantages this company enjoys is the fact that the power house and its commodious coal bunkers are directly on the railroad, thus offering them the minimum of freight rates.

The history of the Vera Cruz is very well known to most people in this locality, and we think we are safe in saying that there is not a person in Lincoln county who does not believe in this property, and we believe that only from the fact that it was badly handled in the past and was in the hands of inexperienced, expensive management it would today be one of the greatest, if not the greatest, gold mines in America.

All this is changed now. The present officers and directors being men who have made a reputation and fortune for themselves by their business qualifications and honest dealings.

Mr. Ben Horner, the present manager, is a financier of no mean ability and has before proven himself to be able to cope with affairs of large magnitude. He is plain, unassuming, attends closely to business and above all is inexpensive in his management. We have by making inquiries convinced ourselves that he enjoys the entire confidence of the board of directors.

Taking all these facts into consideration it is no wonder that there is considerable excitement over the success of this mine, and when we know that all the employees are on a par with those we have mentioned, as Mr. Horner assures us they are, not a miner or in fact an employe in any department but what is as good as there is in his particular line in this or any other country, together with the fact that they have an enormous body of ore which under the present system can be handled at the smallest possible expense, it is very plain to see that the present stockholders have just cause to be proud of their investment and that it is going to put new life into the other mines of this locality and make the locality of Carrizozo what it should be with all of its wonderful mineral resources, one of the greatest mining centers of the world.

CONTRACT LET

The school board received bids for the construction of the new school house on the 16th inst., and let the contract to John A. Laughlin, of Trinidad, Colorado.

Owing to the high price of material the board found it was not practical to carry out the original plans of the architects, Messrs. Rapp & Rapp, of Trinidad, for a brick building, but substituted concrete instead. The building is to be two stories high, and have two class rooms on each floor 25x32 feet in the clear besides cloak rooms, corridors, etc. The building will be similar to the Territorial Reform school completed at El Rito by Mr. Laughlin, and will be a credit to the town and do more towards attracting people to come here to settle permanently than any other one move that has been done for some time. Work on the new building will begin at an early date, and it is hoped that the two rooms on the first floor will be completed by Nov. 1 or sooner, so as to open school by that time.

Mr. Laughlin's bid comes within the \$10,000 of bonds voted for the erection of the building. The other bidders were M. M. Sundt of Las Vegas, S. E. Pelfrey of Cimarron, whose bid arrived too late, and Jackson McRae of Orogrande, the latter firm declining to bid owing to the limited amount available for construction purposes.

Accident List For the Week

The past seven days have been particularly subject to accident on the eastern division of the El Paso and Southwestern. Beginning with last Saturday there have been three serious accidents. The first of them being Switchman Lee Noa, who stumbled while cutting off some of the cars from the switch engine and fell by the track throwing his foot under the engine in the effort to save himself from under the wheels. A special train was fitted up with all possible speed and the unfortunate man was taken to the hospital at Alamogordo.

On Sunday a Mexican boy about 17 years old was attempting to pass under a car in the yard with a bucket of water when the train was started, the train crew not knowing there was any one near the train, catching him and cutting one foot off at the ankle.

Wednesday afternoon a train of dump cars was being pushed past the rock crusher at the quarry at Tecolote, when a Mexican laborer by the name of Trinidad Carrillo was discovered under the train. The train was stopped at once but the man was literally ground to pieces, and killed almost instantly. No one saw how Carrillo got under the cars, but from all indications it seems that he most have attempted to cross the track and was caught by the head car and knocked down in front of the wheels. The coroner's jury summoned to hold an inquest brought in a verdict of accidental death by being run over by the cars.

ARE YOU READING

"The Yellow Holly," the thrilling detective story now running in the El Paso Herald? If you are not, you are missing one of the great stories of the year.

REACH CARRIZOZO

The surveying party which for the past few weeks has been locating the big pipe line from the Bonito to Carrizozo, and surveying reservoir sites, has finished the preliminary work as far as this place and started on the line up and down the line of the road.

The party arrived here the forepart of the week and started at once on the supplementary line, which will by no means be the smaller part of the work, as there will be a pipe line from this place each way along the line of the road, one reaching a point some miles below Alamogordo and the other terminating at Duran, and supplying stand pipes at convenient points over the entire division.

It is well to remember in this connection that this project will give Carrizozo the best city water works system of any town in the territory, and probably in the entire west.

DEVELOPMENT COMPANY.

Among the latest moves for the advancement of this region is the formation of a company to be known as the Carrizozo Development company. The incorporators are C. H. Brown, Allen Lane and M. L. Goodin. The objects of the company are to own, erect, operate and deal in telephone lines, electric light and power plants, ice factories and for other purposes. The company is incorporated for the sum of \$50,000, which is divided into shares of \$10 each. As soon as the preliminary work of organizing are completed the company will be ready for active business along the lines indicated.

S. Chenault and daughter Hattie, of Orange, Texas, arrived the first of the week and have taken up their abode in our town. Mr. Chenault is an attorney of over forty years experience, but has been out of the practice the past few years on account of poor health. He is so much improved in this bracing climate, however, that he talks some of going into the practice here. Miss Chenault is official stenographer for Trainmaster Roe.

A fine new soda fountain has been installed by Rolland Brothers at their drug store, where cold drinks will be furnished to the thirsty.

Mrs. H. B. Tompkins is visiting friends at White Oaks this week.

A NIGHT TRAGEDY.

Hitherto Unpublished History of Kansas Federal Captain's Duel.

The death of W. J. Pevehouse at Mansfield, Ark., recently, recalls to those who were companions in arms with him during the late civil war a heretofore unpublished account of the killing of Captain Beeler, of the Thirteenth Kansas cavalry.

This battle-scarred veteran, while in Yan Buren, Ark., a few months ago, gave to Mr. George R. Wood, cashier of the Citizen's bank, his version of that midnight duel to the death in the dark at a deserted cabin high up in the Ozark mountains in the northern part of Crawford county, the contents of which are vouched for by Captain J. C. Wright, who now lives at Chester, near the scene where it occurred.

"On the night of August 8, 1864, Captain J. C. Wright, Bill Black, Jim Marlar, Lum Basham, Jack Cottrell and myself went to the old Rankin place, northwest of Chester, hoping to be able to spend the night without molestation. No one lived at the place at that time. The house was a double-room log house with a wide, open entry between the rooms. We turned our horses out in an old field to graze

I Dragged Myself Off Into the Bushes.

while we slept. The night was warm and a drizzling rain was falling. Wright and Black laid down in the entry, while the rest of the boys stretched out on the floor in the rooms. About nine o'clock Wright heard someone say in a low tone: 'Oh, John; oh, John!' He aroused the other boys and we awoke to find ourselves and the house surrounded by about 65 men under command of Captain Beeler.

"We knew that our capture meant death, for our hides were at a premium in those days. So each set himself about to fight his way out. Wright, Marlar and Basham went out on the east side of the house, and the others on the west side. We went out under full fire from the enemy. I ran into about 25 of them at the corner of an old smokehouse; they fired, but overshot me. I wheeled and was thrown in front of the blazing pistols of Captain Beeler, who had one in each hand and was using them very skillfully. It was raining and the caps of my shotgun got wet; I snapped both barrels at him, but they failed to fire. By that time he had hit me twice, once in each thigh, pretty high up. I was knocked down by the impact of the balls and from loss of blood, and fell down into a little draw.

"I tried to pull myself up by a little sapling, in which I partially succeeded. Beeler was within six feet of me, using both pistols and cursing me with every breath. I steadied myself

THE REUNION.

You ask me, if I am going. Well, now, I'd like to go
Up to the big reunion, but really I don't know
Whether I'll feel just like it when the day comes round.
I ain't so very spry now, but when I hear the sound
Of fife and drum come floating down from the hilltop grove,
I shouldn't be surprised if that would just make me move!
I ain't so great on music, but when I hear a fife
A squealin' I can't keep still, couldn't—
to save my life.
And drums, well now I tell you, I do believe a drum
Would toll me on to marchin' right up to Kingdom Come!

You see, my two boys, Abram and Jim, they both went out
And 'listed at the first gun. I didn't sit and pout
As many a woman did, but I turned to and worked,
Packed and filled their knapsacks, and never even shirked.
When the day of parting came, and my boys marched away
Out of my sight and hearin', but, oh! my hair turned gray
Before a year was over of that weary,

by the little bush and turned my old Remington six-shooter loose. I was so close to him that I saw the fire strike his stomach. He changed his tune and said 'Oh, Lord!' and fell.

I dragged myself off into the bushes and laid there the rest of the night. I thought I would perish for water. I put my hat out that I might catch a little from the light rain that was falling, but my hopes were all in vain. I was bleeding freely. A short time previous one of our men was shot and bled to death from a severed artery. Fearing that would be my fate I tore my handkerchief into shreds and stuffed it into the wounds, hoping to check the flow of blood.

"Occasionally I heard horse feet, but could not tell whether they were ridden by friend or foe. By Saturday morning I was very sore and my limbs were swollen and black. I realized that without assistance I would surely die, so made a desperate effort to reach Captain Wright's house. I dragged myself to the roadside, where I saw the tracks made by the horses I had heard passing. I knew they were made by our horses, because the shoes had but six nails, while the Yankees used eight, but I did not know who was riding them.

"I found about a pint of water in a hog wallow. It did not have ice in it but it was good. I got hold of some old dead limbs and improvised a kind of a pair of crutches, with the aid of which I managed to make my way to Wright's home Saturday evening. The boys were all there, not one of them hurt, and they gave me a hearty welcome. They washed and dressed my wounds the best they could, put me on a piece of ladder used as a litter and carried me to a spring back in the mountains, where I stayed for three weeks without shelter, at the end of which I was able to mount my horse and go at it again. I rejoined my command and surrendered with it down in Texas."

POLITICS WERE ESCHEWED.

A Feature of Life at West Point in the Civil War.

It may sound strange to civilians, and especially to students of the history of that period, to be told that national affairs even at that time were not discussed at West Point. The discussion by officers or cadets of the politics dividing the nation into parties would have struck the average man as crude, and totally unbecoming young men or old men whose lives were consecrated to the services of the country, regardless of which party might be in control, says Gen. Morris Schaff, in Atlantic Monthly. I fully agree that there is nothing more amusing to the silent and observant bystander than a discussion over politics between two old fellows or two young ones. But during that critical period we offered no such diversion. The nearest we came to it was habitually, morning, noon and night, to damn every politician in the country, save the one who had appointed us. Moreover, the tension was too great, and inasmuch as we professed to be gentlemen, we naturally refrained from touching on disagreeable subjects. Representing, however, as we did, every congressional district, we were in miniature the country itself. The letters and local papers from home kept us acquainted with the state of public feeling, and, since the consciousness of a national crisis is always contagious, it was not long till it was felt at West Point.

Wrong Keys Returned.

"It is true that many guests who go away with the keys of their rooms attempt to repair their deeds of forgetfulness by sending back their plunder," said a hotel clerk. "The trouble is that in sending back the keys they usually send the wrong ones. I have in the safe a box full of keys that have been returned by absent-minded travelers who, in trying to square themselves with this house, made a mistake and sent us the keys that they had carried away from some other hotel."

worryin' time
That's never half been told of in story or in rhyme.
They never, either of them, came home to me again.
One died at Libby, thankful for death's relief from pain;
And one fell dead in battle—the field was stoutly fought.
I was never reconciled, I can't feel as I ought.
My daughter Ruth was reading out loud the other day
About a Roman mother who lost her sons, but say,
I can't feel just as she did. Them Romans ain't like folks,
Never was—sometimes I think they're tough as old black oaks!

Oh, yes, the war is over, and young Fred Payne tells me
I ought to get some new ideas, and not forever be
A-harpin' and a-twangin' upon the same old string
About the war, and such things; but I can't learn to sing
New songs at my time of life. My days are almost done,
And I don't know as I care. I'm kind o' tired, for one.
No, you can count me out this time, but in a little while
I'm going to a reunion that'll make the angels smile!
—Ada C. Sweet, in Chicago Journal.

HORTICULTURE

THE APPLE APHIS.

Approved Remedies for Spring and Summer Treatment.

The presence of aphides is indicated by the curled, distorted condition of the more terminal leaves, and if a plant showing these symptoms be closely examined small oval or pear shaped soft bodied aphides, greenish or pink in color, according to species, will be found on the undersurface of the leaves along the tender stem or

Aphis Mali.

Terminal shoot of apple infested with the apple aphid—Aphis mali—showing condition of leaves.

elsewhere, often practically covering these parts. See cut.

A. L. Quaintance further says in regard to spring and summer treatment that effective work in controlling these insects may be done in the spring just after they have hatched from eggs and have collected on the expanding foliage. Trees seen to be badly infested at this time should be thoroughly sprayed, taking pains to wet as completely as possible all parts of the leaves, twigs and branches. However thoroughly the work may be done, some of the lice are almost sure to escape destruction owing to the difficulty of forcing the spray between the unfolding leaves, more or less covered with hairs, where some of the insects will have penetrated. A subsequent treatment in the course of a week should be made, especially if the first application is seen to have been unsatisfactory.

After the foliage is well out and more or less distorted from the presence of the aphides effective spraying is quite difficult, since many of the insects on the lower surface of the curled leaves will not be hit by the spray. Repeated applications must be made, therefore, as necessary to keep the insects under control. It will often be found practicable to bend over and immerse the terminal shoots of badly infested young trees in a bucket of this spray solution, and this treatment will be very effective. For spraying after the trees are in foliage a strong tobacco decoction, 15 or 20 per cent, kerosene emulsion, 15 per cent, crude petroleum emulsion or whale oil soap at the rate of one pound for each four gallons of water are approved remedies. Since aphides secure their food by sucking up sap from within the plant, none of the arsenical poisons would be effective.

IMPORTANCE OF UNIFORMITY.

Prof. L. C. Corbett, of Department of Agriculture, on Fruit Shipment.

The fact that the eastern fruit growers and truck growers are not as well organized as are the western and more distant producers is very largely due to the fact that they have the advantage of lower express rates and that the merchants will handle their goods in small consignments. By this method of small individual shipments, the product upon the market is less uniform in character, both as regards grade and method and type of package, than is the case when the product is marketed through the exchange and in carload lots. In order to handle carload shipments successfully, vegetables must be uniform in character and size and the product well graded. These are advantages which have been learned by distant shippers and which have, in a great measure, been forced upon them by the necessity of shipping in carload lots.

The codling moth gets in its work both early and late. Spraying in June will not protect from new broods in August.

FIGHTING PESTS.

A Word of Explanation About Fungicides and Insecticides.

There are two general classes of insecticides, says a communication from the Oklahoma station. The first class of mixtures contains some poisonous substance that kills the insects when it is eaten with the foliage or fruit on which it is lodged. Paris green, London purple, and white hellebore are the poisonous materials most commonly used in these mixtures. These mixtures are effectual in destroying only those insects that eat the foliage or fruit of the plants, and are harmless to the insects that suck the juice of the plant.

The other class of insecticides kills the insect by coming in contact with the body. Kerosene emulsion, whale oil soap, and pyrethrum powder are the most common materials used in these mixtures. Mixtures of this class are used chiefly to destroy those insects that suck the juice of the plant and cannot be destroyed with poisons. The poisonous insecticides may be mixed with fungicides and applied all in one spraying, but other insecticides must be applied separately.

The fungicides and insecticides, if properly prepared and applied, have no effect upon the plants. If the mixtures are not properly prepared and applied they do not form the desired protection to the plants and may damage the foliage and fruit. There is never enough poison on the well-sprayed fruits and plants to alter their value for food. Most fruits are pared before eating and all sediment of the spraying material removed. In the case of fruits that are not pared before eating, as grapes, a person would have to eat from 300 to 500 pounds to get a small dose of poison. It will always injure the sale of such fruits, however, if there are any signs of a spraying material on them when placed on the market.

SIMPLE TEST FOR SMALL SEEDS.

Gravity Method Which Will Give Very Satisfactory Results.

The gravity method of seed separation here illustrated is the old-time practice of "brining" wheat, barley,

Seed Separation.

oats, etc., before sowing, but applied to seeds of much smaller size, such as tomato and eggplant seeds. As used at the New Jersey experiment station, the bottle at A in the cut contains pure water, upon which many seeds are seen as floating and a larger number at the bottom. These light, floating seeds are to be rejected. In the bottle at B is a 20 per cent. solution of common salt (a very thin sirup would have done as well), in which eggplant seeds that sank in pure water were placed, with the result that many remain at the top and thereby may be easily separated and thrown away.

Use of Black Walnut.

Much has been said as to the vast possibilities of commercial black walnut culture, but the profits from such projects often have been prospective rather than real. The fact remains, however, that the black walnut is a most valuable tree, and possesses many characteristics which commend it for general planting. For roadside planting it is often a desirable tree, but its habit of coming into full leaf late and dropping its leaves early, and by the fact that in the east it is often disfigured by the fall web worm. As a forest tree in commercial plantations its use is to be encouraged wherever conditions of soil and site are adapted to its needs.—United States Bureau of Forestry.

Frequent Cultivation for Sorghum. Sorghum makes a light, small growth at the start and unless the field is kept clean, it is quickly smothered out by weeds. Frequent and shallow cultivation is necessary to keep the weeds in check. The first cultivation should be given with a harrow lengthwise of the roots, in order not to cover the young plants. The harrow may be used until the plants are six to 12 inches high, when the ordinary walking or riding cultivator should be used. On sod land, good crops are frequently grown with one or two cultivations, but on fields that have been cropped for some years, frequent cultivation is essential.

TABLE DELICACIES

ALL SORTS OF GOOD THINGS TO TEMPT THE APPETITE.

Beef Tea as It Should Be Made—Hot Water Sponge Cake—Apricot Sherbet Makes a Delicious Dessert.

Beef Tea.—Take a pound of good steak, remove all the fat, wipe the meat with a damp cloth, and cut it in pieces about one inch square. Put this in a glass fruit jar, pour over it two cups of cold water, and salt, and let it stand for half an hour. Into a deep saucepan put several thicknesses of newspaper and set the jar on this. Pour water into the saucepan so that it will rise to the same height as the liquid inside the jar. Let the water reach the simmering point, and let it stand for two hours, then increase the heat a very little, and cook a little longer. Pour off the liquid, strain, add more salt if necessary, and serve very hot.

Hot Water Sponge Cake.—Beat the yolks of three eggs until very light. Add one cup of sugar, beating constantly. Stir in a little at a time half a cup of boiling water. Add one and one-fourth cups of flour in which a teaspoonful of baking powder has been sifted, and a little salt. Lastly add the whites of two eggs beaten stiff and a teaspoonful of any preferred extract for flavoring. Bake in a rather quick oven and do not open the oven door until the cake has been baked nearly 20 minutes.

Creamed Macaroni with Cheese.—Break up enough macaroni into inch pieces to fill a cup. Put it into boiling salted water, and let it cook until tender, which should take about 20 minutes. Turn into a colander and let the cold water from the faucet run through it until the pieces do not stick together. Make a white sauce, using three tablespoons of butter, one and one-half tablespoonfuls of flour, one and one-fourth cups of milk, and salt to taste. When nearly cooked stir in half a cupful of grated cheese. When the cheese is melted turn the sauce over the macaroni, mixing it carefully. Turn into a buttered baking dish, cover with cracker crumbs, and dot the crumbs with butter. Cook in a hot oven until the crumbs are brown.

Fruit Filling for Cake.—Cook together in boiling water half a cup of seeded raisins and half as many candied cherries, until the fruit plumps out nicely. Turn out all the water, chop the fruit, season with lemon juice, and then return to the liquid in which the fruit was boiled and add enough powdered sugar to make the mixture spread easily and keep stiff.

Apricot Sherbet.—Select a good brand of canned apricots and remove the fruit from the sirup. With a sharp knife remove all the skin from the fruit and cut the apricots in small pieces. Return the fruit to the sirup, add two cups of sugar and a little less than a quart of water. Stir well together and freeze. Serve in sherbet glasses and pass sponge cake with it, unless it is used between the meat and salad or game course.

Crabapple Jelly.—To change the sometimes insipid taste of crabapple jelly, cook a small bag of mixed spice in the juice. It will give a fine flavor and is a delightful change to serve with meat.

Jelly Roll.

Take three eggs, well beaten, one cup of sugar, one cup of flour, one teaspoonful of baking powder, one tablespoonful of melted butter, one cup of sweet milk. Spread with jelly while warm and roll.

Blackberry Jam.

Many people object to the seeds. There will be no cause for complaint if one-half the seeds are strained out. This impairs neither the quality nor quantity.

Easy Cakemaking.

It is best to mix a cake in an earthenware dish, and by following this rule its texture is improved. Have your butter warm enough to be about the consistency of vaseline. Warm your mixing dish by rinsing in scalding water just before using. Your butter and sugar will now cream perfectly. Add the milk and nearly all the flour. Beat the eggs separately; add first yolks and then the whites. Sift the balance of flour and baking powder and fold into the mixture.

Bed Covering.

A pretty covering for an iron bed can be made from silkoline and is less expensive than the bedspreads. Sew two lengths together for the top and make a flounce for each side and the end, leaving openings at the corners. Make a ruffle of the same material and put on a brass extension rod to cover the pillows. The rod may be tied at each end to the head posts with ribbon matching the silkoline.

It is a kindly act to help the fallen.—Ovid.

ROMANCE OF SERVANT

FORMER HOUSEKEEPER WEDS WESTERN MILLIONAIRE.

Was Once Companion of His First Wife—Successfully Invests Savings, Then Educates Himself and Travels.

Spokane, Wash.—Anna Larsen-Peterson, born of humble parents in Sweden, has become the wife of D. C. Corbin, millionaire railroad builder and sugar manufacturer, president of the Spokane International Railway company, whose line he built after selling the Spokane Falls & Northern railway to the Great Northern Railroad company. The wedding took place at Mt. Vernon, N. Y., May 22, and was not made public until the couple arrived in Spokane a few days ago. Mrs. Corbin is 35 years of age, while her husband is 70. Close friends say it was a love match.

Mrs. Corbin's romance reads more like one of Hans Christian Anderson's fairy tales than a story of modern life in the active and virile northwest. The daughter of a small farmer in rural Sweden, as a little girl she dreamed of the future, and before she attained her majority she came to America, like many of her countrymen and women, to improve her station in life.

After working in various households in New England and the middle western states, she came to Spokane 12 years ago and entered the home of D. C. Corbin as a housekeeper and companion to Mrs. Corbin. She gained the friendship of Mrs. Corbin, who assisted the girl with her education. Shortly before Mrs. Corbin died, six years ago, Anna married Antone Peterson, at that time identified with a local hardware firm, but they lived together only a few weeks, and two years afterward the young woman obtained a divorce at Tacoma.

Before her marriage she invested her savings in realty, which she sold profitably, and with the proceeds went to Chicago and placed herself under instructors, afterward going to Boston and New York, whence she went abroad with a teacher and three other pupils on an educational tour.

She traveled extensively a year, and in the meantime entered into correspondence with her former employer, who asked her hand in marriage three years ago. She gave her consent several weeks ago, when Mr. Corbin started eastward on a business trip, and they were married at the home of a friend, the bride being given away by her brother, Hjalmer Larson, who is chief draftsman for the Spokane international system.

Mrs. Corbin is of the Swedish type of beauty and has light hair and blue eyes. She is a brilliant conversationalist and speaks English with scarcely a trace of accent. She is also conversant with the French and German languages. She is a member of the Swedish Lutheran church, and it is said by intimate friends that she will use considerable of the fortune placed at her disposal by her husband in assisting her countrywomen and in works of charity.

Through her marriage she becomes the mother-in-law of the earl of Oxford, whose wife is Mr. Corbin's daughter.

DOCTOR IS CABIN BOY.

Milwaukee Physician Quits Large Practice for \$10 Job at Sea.

New York.—It was the fascination of the Pacific, the undeniable attraction of endless blue skies and rolling seas that caught Daniel Wylie, a Milwaukee physician, and caused him, as so many others have done, to secure employment that would keep him in the Sandwich islands. Less than a year ago Wylie, about 35 years old, shipped out of this port for Honolulu as "cabin boy" aboard the American bark Nuuanu, Capt. Joselyn. Now he is purser of an island steamer plying between Honolulu, Maui, Hawaii and other islands.

The Nuuanu has come back. Capt. Joselyn, an elderly skipper, who lives at Duxbury, Mass., told of his physician cabin boy. He said: "He made a good cabin boy; never saw a better one to clean brasses than Wylie. He was a good doctor, too, by all accounts. A man about 35 years old, I should imagine. He got \$10 a month as cabin boy and said he left a practice of \$10,000 a year to make the sea trip. He was shattered in health, you see; nerves gone; worked too hard. Well, naturally, you can see what it led to. His health gave way and he was advised to go east and take a long sea trip.

"Seems his wife was dead and he had left two children out west there. Wylie stood the test well. When we were out a few days he was very bad and could hardly get about. After that he braced up, however, and steadily recovered his health."

But, They Had Not.
At a political meeting the chairman asked at the end of the candidate's speech whether "anny gentleman has anny question to ask?"
Some one rose and propounded an inquiry mildly critical of the prevailing political belief. A politician behind raised a club and struck him to the floor. The chairman looked round and asked quietly: "Anny other gentleman a question to ask?"

With a smooth iron and Defiance Starch, you can launder your shirt-waist just as well at home as the steam laundry can; it will have the proper stiffness and finish, there will be less wear and tear of the goods, and it will be a positive pleasure to use a Starch that does not stick to the iron.

We gain strength of the temptations we resist.—Emerson.

NERVOUS COLLAPSE

IS OFTEN PREVENTED BY DR. WILLIAMS' PINK PILLS.

Taken When the First Warning Symptoms Are Noticed Much Needless Suffering May Be Saved.

Are you troubled with pallor, loss of spirits, waves of heat passing over the body, shortness of breath after slight exertion, a peculiar skipping of the heart beat, poor digestion, cold extremities or a feeling of weight and fullness? Do not make the mistake of thinking that these are diseases in themselves and be satisfied with temporary relief.

This is the way the nerves give warning that they are breaking down. It simply means that the blood has become impure and cannot carry enough nourishment to the nerves to keep them healthy and able to do their work.

Rest, alone, will sometimes give the needed relief. The tonic treatment by Dr. Williams' Pink Pills, however, prevents the final breakdown of the nerves and the more serious diseases which follow, because the pills act directly upon the impure blood, making it rich, red and pure.

Mrs. E. O. Bradley, of 103 Parsell avenue, Rochester, N. Y., says:

"I was never very healthy and some years ago, when in a run-down condition, I suffered a nervous shock, caused by a misfortune to a friend. It was so great that I was unfitted for work. I was just weak, low-spirited and nervous. I could hardly walk and could not bear the least noise. My appetite was poor and I did not care for food. I couldn't sleep well and once for two weeks got scarcely an hour's sleep. I had severe headaches most of the time and pains in the back and spine.

"I was treated by two doctors, being under the care of one of them for six months. I got no relief and then decided to try Dr. Williams' Pink Pills. I soon began to feel better and the improvement was general. My appetite became hearty and my sleep better. The headaches all left and also the pains in my back. A few more boxes entirely cured me and I was able to go back to work. I felt splendid and as though I had never been sick."

Dr. Williams' Pink Pills are invaluable in such diseases as rheumatism, after-effects of the grip and fevers, neuralgia, St. Vitus' dance and even partial paralysis and locomotor ataxia.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

SICK HEADACHE

Positively cured by these Little Pills. They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Prowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable.

SMALL PILL. SMALL DOSE. SMALL PRICE.

CARTER'S LITTLE LIVER PILLS. Genuine Must Bear Fac-Simile Signature. REFUSE SUBSTITUTES.

Heiskell's
The most obstinate case of Eczema can be quickly and completely cured by the application of Heiskell's Ointment. It also cures Itch, Eczema, and Pimples, Skin, Erysipelas, Tetter, Ulcers, and all other skin diseases. Before applying the ointment, bathe the parts affected, using Heiskell's Medicated Soap. Heiskell's Blood and Liver Pills tone up the liver and purify the blood. Your druggist sells these preparations. Ointment, 60c a box; Soap, 50c a cake; Pills, 50c a bottle. Send for book of testimonials and learn what these wonderful remedies have done for others.

THE POWER OF ENTHUSIASM

When a fellow throws off his coat and goes to work with enthusiasm, results come quickly, and if his enthusiasm doesn't give out, he can achieve most anything.—Ambition.

The above applies to communities as well as individuals and is especially to the point in connection with the Carrizozo Valley Fair this fall. If our people are enthusiastic in regard to it and make the effort the benefits to be derived will warrant, we will have the best fair in this part of the territory, and the Carrizozo Valley fair will go down in history as one of the important happenings of the year. On the other hand, if we each leave it for some one else to do there will be no fair and we will be following along behind the other places that have less resources but more enterprise. Let us get busy. Do it now.

The action of the railroad company in the matter of building the big water works system into Carrizozo, and the protests brought in certain quarters, reminds us of a story we once heard of a controversy between two members of congress. One of them was an able man of mature years who had served several terms and was looked upon as an adviser by his companions, the other a young upstart of a boy who had just reached the position of fame, and he took delight in interrupting and annoying the older man. One day while debating a question the youngster became so offensive that the old gentleman halted and remarked. "This member reminds me of a dog my father owned when I was a boy, he was not a very large dog, but he would bark at the moon; every clear pleasant night he would go out in the yard and bark at the moon." The young man spoke up and asked, "well, what of it?" "Oh, nothing, the moon went right on as if the dog had not barked," and the old gentleman continued his debate without further interruption.

There may be trouble over territorial land entries, but everything seems to be going smoothly as far as homestead and desert land entries on public lands in the Sunshine Territory are concerned. Over 20,000 of these have been made mostly in the eastern half of the territory during the fiscal year ending June 30 last. Right satisfactory showing this.

One of the peculiarities of the square deal is that it never looks the same to the fellow on one side as it does to the one on the other side. It is human nature to see a thing from your own viewpoint, even if you do not purposely distort them.

Despite the fact that Count Tolstoi's prophecy that the United States is going to smash, the surplus in the United States treasury keeps up and the business of the country is constantly increasing.

The new ambassador to Japan will visit Phoenix soon, before going to his new post. Probably his intention is to lay in a supply of hot air. Or perhaps he seeks to prepare himself for a warm reception.

Ambition values a man from the neck down at \$2.00. Perhaps if it had to get a profit out of the accomplishment of the general run of laborers at that price, its estimates would be lower.

W. R. Hearst will establish a morning paper in Fort Worth, according to the Fort Worth Telegram. How we should like to hear Senator Bailey's opinion of such effrontery.

W. R. Hearst has bought the Mexico City Daily Record, it is reported. Does the Yellow Kid expect to recruit the Independence league down there?

It is difficult to account for pessimism during these prosperous times, except on the theory that the pessimist is blind.

U. S. Court Commissioner,
Notary Public

Carizozo Pub. Co., CORONA, NEW MEXICO

Corona a Promising Town.

Many people believe in the controlling influence of first impressions to such an extent that they would scarcely embark in an enterprise, or settle in a region when their first impression is unpleasant; and we must admit that we never like to attempt overcoming the adverse influence of a first impression. In this the Carrizozo Valley certainly has the advantage of most places in the Southwest, as we may be said to be putting our best foot forward in this respect.

One can hardly conceive of anything more beautiful than the entrance to the valley from the north. It may well be likened to the gate of enchantment. The traveler, after passing through the barren regions further to the north is suddenly whirled into the beautiful wooded canon which extends four miles from the little station of Vaney, and before he has recovered from the surprise at the sudden transition from the desert to paradise, the train bears him out into a charming valley surrounded with timber covered hills, a fit place for the gods to dwell, and before him stands the live, active, enterprising town of Corona, although this is not strictly speaking in the Carrizozo Valley, it is so closely allied to it that one cannot be considered without the other.

At the first glance one is inclined to think of the pictures he has seen of the Alpine villages, or of some picturesque mountain town of the mountain regions of the east, but a half hour watching the business of the place will be sufficient to convince him that this is only the nucleus around which a city is rapidly being built. Small as it is this village is the trading point for a large rich region which is just beginning to develop into a marvel of business enterprise. Perhaps no town of its size in the west can boast of the volume of business than is handled by Corona. Here is loaded each year thousands of pounds of wool and many trainloads of sheep, white cattle, agriculture, mining and mineral productions all contribute to her prosperity.

The first of the enterprises of the town to note are the merchandise establishments, two in number, are among the best, and we may say the largest in the territory, the Holzman Mercantile Company being the larger of the two, and carries a stock of over sixty thousand dollars, handling all staples in carload lots, and keeping an assortment equal to the best city store. H. K. Roundtree, while not having such an extensive establishment as the other, yet keeps a stock that would seem sufficient of itself to supply all demands in a town of this size.

Of other enterprises there is a blacksmith shop and steel tank works under the ownership of A. J. Atkinson, which provides for the repairs of all vehicles and implements and furnishes a supply of tanks, engines, pumps and everything in the iron or lumber line the community demands. Two livery stables provide means of transportation to all parts of the country, and a similar number of hotels furnish resting places for the weary and drive away the pangs of hunger. The town also has a barber shop, a land office for filing on government land, under the management of Nabor Ortiz,

U. S. Court Commissioner, a real estate office owned by Beaty and Tipton, the former being county surveyor also, three wet goods establishments with amusement rooms attached, and a planing mill, which finishes the lumber brought in from the mill in the Gallina mountains about seven miles to the westward.

In religious and educational matters the town is not behind the business development, a good school is maintained nine months in the year and a new building is to be built this summer to accommodate the constantly growing demand. Several church societies, including the Methodist, Baptist and Christians, have organizations and hold services in the school house, and buildings will soon be erected. So much for the present of this gem of the mountains, we will now endeavor to give a slight prospective view as seen by us on a recent visit to the town and vicinity.

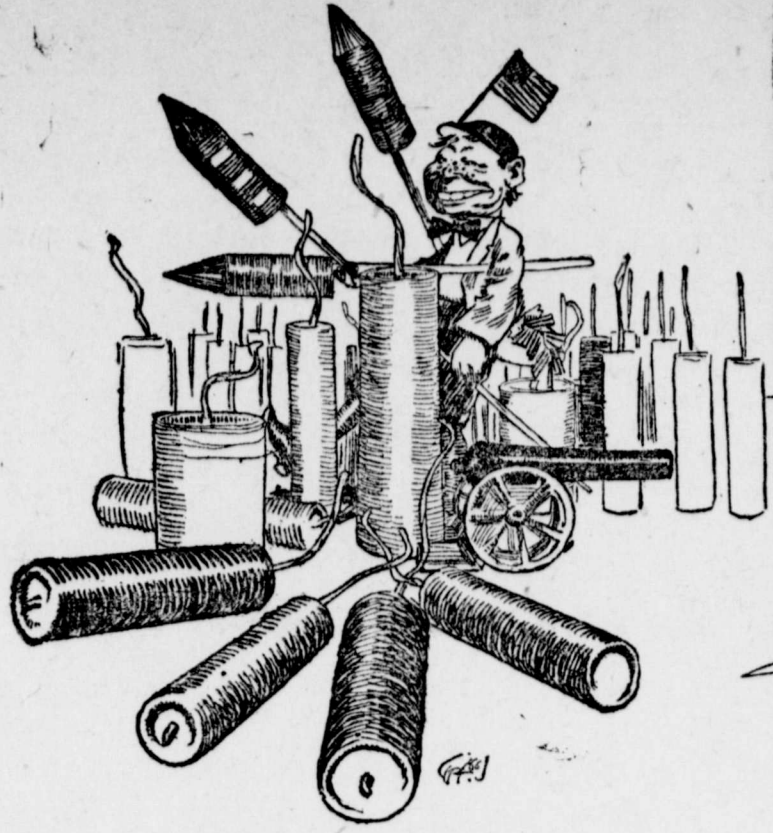

To begin with, the town of Corona, is situated in the midst of a valley containing thousand of acres of good agricultural and grazing land which in a few years will give her a support sufficient for a town of two or three thousand. Again on the Gallinas mountains some seven miles to the west of the town is a tract of fine pine timber containing millions of feet of lumber which is just being opened up. Messrs. Perry & Slack have one mill in operation in this district now, and another, a larger one, will be completed in a short time, supplying lumber for home use and a heavy shipping trade in both rough and finished lumber, by means of the planing mill in the town.

By far the largest and most important of all the undeveloped resources of this region, however, is the mineral deposits. The Red Cloud district, only seven miles west of town, is one of the old districts of the territory which was known in years gone by to be heavily mineralized, but like others, was only worked in a superficial way for a short time and then for years was practically forgotten, except by a few who always had faith in the golden future and hung unto their holdings until there should be a dawn of a brighter day. A few years ago, however, as capital began again to turn toward New Mexico with some degree of confidence, Mr. T. M. DuBois and others who had practical knowledge of mining matters as well as influence with eastern people who controlled capital, became interested in the camp, and seeing at once the wonderful promise of the district began to exploit it with a view to permanent development, with the result that a number of large companies are operating in the district at present with very flattering prospects.

The first of these companies to mention is the Corona Queen. Some large English capitalists are interested in this company and the work is under the direction of T. M. DuBois, superintendent. The property consists of 41 claims, all of which show mineralization, and the development work on them has reached the aggregate of over 1,000 feet, and is now to such a depth that heavy machinery is to be in-

Continued on page eight

ALL READY

Mickey Finn's Big Fire Cracker

The explosion that wound up the Fourth of July Celebration on Cooney Island.

Two mammoth firecrackers stood in the window of Casey's grocery. They were 12 inches long and proportionately thick.

For a month before the Fourth of July these gigantic indicators of enthusiasm had stood in the window like British soldiers on dress parade, while a predatory spider hung a filmy hammock between them and calmly killed his buzzing victims over two powder mines.

The firecrackers were the admiration and the envy of all the boys in Cooney Island. It was seldom that a youthful nose was not flattened against the window pane in ardent covetousness.

But the price demanded by Casey for the thunderers was prohibitive, so far as the boys were concerned, and there was not one of them patriotic or courageous enough to invest 25 cents in a single ecstatic explosion.

Said Mickey Finn timidly one evening when he had been sent by his mother to get a quarter of a pound of tea and half a pound of pork:

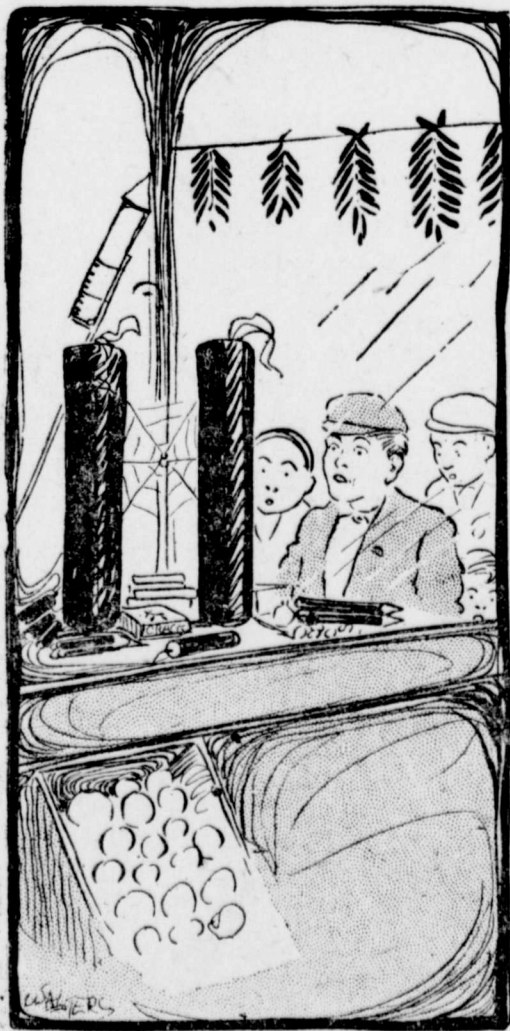

"Mr. Casey, I suppose now, that whin wan o' thim big fellows wint off it would blow the stars out of the sky?" his mind filled with blissful thoughts of mighty explosions.

Casey stopped measuring out a half pint of New Orleans molasses, raised a monitor finger, and replied:

"Micky, my boy, I'd be afeerd to tell you what would happen if I stood wan o' thim big fellows out on the sidewalk and touched the stem wid the lighted end of a five cent cigar. The noise would be terrible, terrible, my son. 'Twould make your head ring like an anvil, and you would see sparks like fireflies.

"Would it blow the house down?" asked the boy in an awed whisper.

"No, I don't think it would," said Casey. "It might shake the chimly down and break all the glass in the

In Ardent Covetousness.

windows in small pieces, and there would be paper in the streets as would fill an empty barrel o' flour. Oh, but thim big fellows is mighty powerful, Micky, mighty powerful. They

use them in China to kill murderers and robbers. They put wan o' thim big firecrackers bechune the teeth of a murderer and make him light the fuse wid his own hand and blow his own head off. Thim Chinese is mighty cool, Micky, mighty cool."

This vivid description inflamed Mickey's desire, which was Casey's motive in telling it, for the incident occurred on the eve of the Fourth, and Casey was afraid that the big firecrackers would be carried over the national holiday and remain a loss on his hands. In order to deepen the impression already made upon the boy Casey permitted him to handle one of the twins.

The boy's eyes had widened to their utmost capacity when he was outside the window, but now that he could feel the red jacket his hands trembled with the eagerness of possession and he would have given ten years of his life to own it.

"Take it along wid you, Micky," said Casey, cajolingly. "Thim crackers were made in Chow Chow, in China, for the Cooney Island trade, and I want to get rid of thim I have on hand before I send another order to Wan Lung, the haythin."

"But I have no money," said Mickey sorrowfully. "My father is goin' to give me three bunches of little firecrackers and a pinwheel, but I know he wouldn't buy wan o' thim big firecrackers for me."

"Well," continued Casey, "you come down here to-morrow mornin' and carry in a half ton of coal for me and I'll give you the big cracker."

The next morning Mickey was busy for two hours carrying chestnut coal in a nail keg and dumping it in Casey's cellar. Just after noon, with a smile covered with coal dust and a bosom full of chuckles, he received his prize.

No grass grew under his bare feet as he ran homeward, the precious powder mine clasped to his bosom. Holding the big firecracker aloft as he darted through the kitchen door, he exclaimed:

"Mother, I have it! Ain't it a beauty?"

"Well, I don't see anything about it to be makin' a fuss over," said Mrs. Finn, who, like most mothers, had no love for fireworks. "Now, don't be bringin' it nearer to me, as Micky ran toward her. "I don't want to be blown into the middle o' next week. Throw the dirty thing away! I'm afeerd o' me life while you have it in your hands! Now, don't be goin' near the stove wid it! Arrah, ye little spalpeen, will ye take it off the stove? Take it off afore ye blow the roof off the house!" and the frightened woman ran into the bedroom and peered through the keyhole.

With the recklessness of boyhood, Mickey exclaimed, as he lit a match and reduced his mother to hysterics by pretending to light the firecracker stem:

"You needn't be afeerd, mother. I'll nip it out afore it goes off."

In this simple fashion the afternoon of the Fourth passed away in the Finn household varied by the boy with occasional visits to the neighbors, whom he threw into a panic of fear by pretending to light the big explosive.

Mrs. Murphy and her three children were gathered around the kitchen table when Mickey placed the lighted mammoth in the middle of the table. Two of the boys went head first through the window, while Mrs. Murphy tried to crawl under the kitchen stove.

All this excitement afforded the boy a good deal of delight, but he reserved for the evening the culmination of his joy. He intended to blow his father up as he sat in his chair on the back stoop.

Mickey thought it would be an inspiring sight to witness his father flying across the back yard and plowing up the ground with his nose. In order that he might have an audience appropriate to so great an occasion, Mickey had spread the news among all the boys of the neighborhood, and at nine o'clock 50 boys sat on the fence surrounding the back yard. Mr. Finn, tired of the excitement of the

day, had fallen asleep in his rocking chair on the back stoop, when Mickey lit the stem of the big cracker and placed it carefully under his father's chair.

The moon shone brightly, illuminating the grin on every boyish face. Every ear was strained to catch the faint hissing of the fuse and every eye intent upon the sleeping man.

The fuse burned itself out, and the silence and suspense was deepening.

Had Fallen Asleep.

A minute passed and another, until Mickey could stand the strain no longer. He reached down and lifted the firecracker from beneath the chair.

As he held it up in the moonlight to examine it, a mosquito lit upon his father's nose and the old gentleman awoke. Grabbing the firecracker from his son's hand he arose and holding it aloft, he said:

"Boys, there will be no explosion to-night. I'm sorry to disappoint you. I was afeerd that Mickey might do some harrum wid that big cracker, so whin he wasn't lookin' this afternoon I took the powder out of it and filled it wid clay. So, you see that the show is over, and ye may as well go home and go to bed. There'll be no more explosions only what I give Mickey wid a shingle afore I turn in. Good night to ye all. Come around some other night whin there is somethin' doin'."

FOURTH OF JULY DON'TS.

Don't allow the children to bend over fireworks which will not "go off." They sometimes do it unexpectedly with unfortunate results to the little meddler.

Don't neglect to send for a physician at once in the case of a serious burn, to prevent a possible scar or worse still, blood poisoning, from ignorant or improper treatment of the wound.

Don't forget to have some remedies for burns at hand. When the skin is not broken by a burn scrape a raw potato, place on a piece of soft linen and use as a poultice. Bicarbonate of soda—the ordinary baking soda—is excellent for burns whether the skin is broken or not. If broken apply the dry soda, if unbroken dampen the soda with water to make a paste and apply to the spot. The pain will be instantly relieved.

Don't leave the windows of a town house open if it is to be left for the day. Stray rockets and sparks may find an entrance.

Good Advice.

Keep the wound open and send for the doctor.

ARE EASY TO COPY

SEASON'S HATS A BOON TO AMATEUR MILLINERS.

Fashionable Headgear Can Be Made and Trimmed at Home and Look as Well as the High Priced Productions.

So many and varied are the shapes and styles of the fashionable headgear of the season that it is often a perplexing problem to determine which is most becoming, and, although most of the model hats on view at the exclusive milliners are extremely high in price, a great many of the smartest shapes could be easily copied at home if one has any skill as an amateur milliner.

For instance, one of the most desirable shapes is on the wide-brimmed

Mushroom Hat for General Wear.

sailor order, except that the brim of this new model is not even all around, but is quite short in front and rather wider at the left side than on the right, the brim thus being quite broad across the front, but shorter from front to back. This shape has a wide, rather low crown and presents very few difficulties to the home milliner, as the trimming is very simple. Most of the model hats in this shape were in rough straw, either in black, natural straw color or the darker "burnt" or "onion" shades, and were generally smoothly faced to within a half inch or so of the edge with taffeta silk.

Few women realize how last season's hats can be brought up to date by being reblocked and reshaped. Very often expensive straw hats become very limp and shapeless after being subjected to a few weeks' wear, and are then discarded as quite useless. However, if sent to an establishment where such work is done, these discarded hats can be stiffened and reshaped to look like new at an expenditure of 75 cents or a dollar.

As the majority of the new hats show a short brim in front, some of these made-over shapes are simply turned hind-part before, as it were, and the short-back sailor of a season or so ago is now reblocked to show the drooping or mushroom brim, with the wide part across the back and the short brim in front.

The illustration shows one of these mushroom hats, this model being rather small and designed for street wear. It was in "onion" color, which is a yellowish shade of light brown. The inside of the brim showed an inch-wide band facing of black moire. The crown also being folded about with black moire ribbon, which crossed in the back and was slipped through slits in the straw tying in a bow over the hair. Two large gilt ball hat pins were thrust through the black ribbon in front, and on each side was placed a large white coque feather plume backed by a black wing. Such a hat would be smart-looking with almost any kind of a street gown or suit, and would be much more durable for general wear than a flower-trimmed hat.

FOR THE SUNDAY AFTERNOON.

Easy to Make Day the Children Will Look Forward To

Much depends upon how Sunday is observed whether a child looks forward with pleasure or dread to the seventh day. It should be such a dear, happy time that the little ones welcome its advent with delight.

In the first place, after the usual duties are attended to and church services over, there should be an hour in the afternoon—more, if the time can be given—that belongs to the children alone. It may mean giving up a nap, a walk, or a call, but do it faithfully. Then use a part of this time for holding a little "court of appeals;" encourage each child to tell all the troubles and grievances of the week, condole

when necessary and smooth out knotty problems in the fairest manner possible. After things have been satisfactorily adjusted, have a chapter in some interesting book known as the "Sunday book" and never used on any other day.

To induce Bible reading, let each child spell his name with verses from this holy book, making acrostics and memorizing those especial verses. Illuminating favorite texts with a box of water colors is another Sunday pleasure.

A never failing source of amusement for young children is a good-sized Noah's ark. Tell the story of the flood and give a little history of the animals, their homes and habits. Then at the end pair the animals and put them away in the ark.

It is the exceptional child who does not enjoy music, and the earlier the singing habit is cultivated the better. Teach the good old hymns which will never be forgotten. The melodies learned on Sunday afternoon will echo through the busiest day and soothe the darkest hour in the years to come.

So few parents stop to think that it is in the earliest years that the memories are being made which will be most vivid in the later days of their children's lives.

ANSWER TO CORRESPONDENTS.

For the Bride-Elect.

I am soon to be married and the serving of refreshments is one thing that bothers me. This is a small town and too far away from the cities to obtain any extras.

I should prefer a morning wedding, but there is not room enough to seat all the guests for a "breakfast." Is there any other form of serving suitable for a morning affair? If so, what would it be called, what served and how? "SUNNY SOUTH."

Certainly you can have the morning ceremony and refreshments all right, too. Do not try to seat the guests at the table. Have coffee, sandwiches, omelets, salted nuts, chicken patties or croquettes, a salad, ice cream and wedding cake.

Giving a Dinner.

When giving a dinner for about ten guests, should the menu be served on individual dishes or on the large dinner plate? Should platters be used for meats and carving done at the table, or should all be served from the kitchen? Is the salad a separate course? ABBIE.

The correct way to serve a dinner is to begin with a soup, then if an informal affair, the host may carve the roast, chicken or turkey. The potatoes and other vegetables are passed, each one serving himself. The plates are removed and the salad is a separate course with wafers or cheese straws. The dessert follows with coffee. Salad is often served at evening parties accompanied by sandwiches. MADAME MERRI.

PELISSE IN SIMPLE DESIGN.

Garment for Baby Girl to Be Made of Washing Material.

The pelisse illustrated in this number is intended for making up in washing materials such as cottons, piques, muslins and silk, but the pattern is equally suitable for woolsens, if preferred. Our model is in pique and, of course, is unlined; the pelisse itself has sleeves, and fastens down the center front. The capes are made

up separately from the pelisse; the edges are piped and trimmed with a frill of embroidery; the two capes are joined at the neck and fasten in front with a hook and eye.

Bonnet of white silk, trimmed with lace, ribbon, and a small ostrich tip; if liked, the bonnet might be in pique to match the pelisse.

Material required: Three yards 28 inches wide, and about eight yards trimming.

CHEAP AND GOOD FILTERS.

Easy to Make at Home and Will Insure Pure Water.

As efficient a filter as can possibly be secured may be made in a few minutes by anyone at the cost of a few cents.

Take a new flower pot, close the opening in the bottom with a piece of sponge, on top of which place a layer of small stones, previously well cleaned. The layer should be about two inches deep; the upper stones should be smaller.

Next procure some freshly burnt charcoal, which has not been kept in a damp or ill-aired place. Reduce this to a powder and mix it with twice its bulk of sharp, cleanly-washed sand.

With this mixture fill the pot to within a few inches from the top, cover it with another layer of small stones and place a piece of flannel around the rim. The flannel should be large enough to tie around the pot and also to leave a little hollow in the center.

The charcoal should be renewed about twice a month.

IN THE CANNING SEASON.

Cardinal Points for the Housewife to Remember.

The destruction of germs and the exclusion of air are the principles upon which the canning of fruit are based.

If these things are properly done the fruit will keep indefinitely.

Some substances require longer exposure to heat than others before all the germs are destroyed.

Others need only be heated to the boiling point, and then to be boiled for a minute or two.

Nearly all small fruits are preserved by being thoroughly heated, then canned. The larger kind require more time for the heat to penetrate every part.

Some vegetables, such as peas and corn, require a long exposure to heat.

Orange Pudding.

Soak one cup of bread crumbs in one-half cup milk, beat to a pulp; mix with it the grated rind of one-half orange, and the juice of one or two, if needed; add yolks of two eggs beaten with one-half cup sugar; beat the whites to a stiff froth and stir in lightly with a knife; butter six custard or earthen cups and fill half full. Bake in a moderate oven, standing in water until custard is set. For a sauce, beat one-third cup butter to a cream and gradually beat in one cup powdered sugar; add yolks of two eggs, one at a time; beat until light; add one teaspoon of vanilla extract or four tablespoons of orange juice. Warm one-third cup cream or milk and beat in slowly; put in double boiler and boil three minutes. Heating the cream prevents it from curdling.

Welsh Rarebit.

While this is a favorite preparation for the chafing dish, it can be prepared just as well in an ordinary saucepan or a double boiler. Melt one tablespoonful of butter. Stir into it a teaspoonful of cornstarch, and when they are thoroughly blended stir in slowly one-half of a cupful of thin cream. Cook two minutes after the cream is all in, then add half a pound of mild cheese, which has been cut in small pieces. Season with salt, paprika and mustard. Serve as soon as the cheese is melted on rounds of toasted bread or crisp small crackers.

Rich White Sauce.

In a small saucepan put three tablespoonfuls of butter, and as it melts work in smoothly an equal quantity of flour. Mix together one cup of cream and half a cup of milk, and stir into the flour and butter. Add only a little of the liquid at a time, so as to keep the mixture perfectly smooth. Add salt and pepper to taste.

When Flies Come.

To prevent flies from settling on picture frames and chandeliers, boil three or four onions in a pint of water and apply the water with a soft brush. In many city homes or where houses are to be closed for the summer common unbleached cheesecloth is used to protect pictures and frames from flies. Cut a piece of cloth large enough to go all around the picture. Let the picture face down on this, put the cloth around and baste up at the back. A glazed tarlatan that is transparent makes a still better covering.

Corn Oysters.

To the contents of a can of corn add a cup of flour sifted with a teaspoonful of baking powder. Add a little salt and the beaten yolks of two eggs. Beat the whites stiff and add them to the mixture last. Drop and cook on a griddle the same as griddle cakes. Serve with melted butter or tartare sauce.

Fruit stains can easily be removed from the hands by holding the hands in the fumes of a sulphur match or over burning sulphur.

LOCAL MENTION

Violet Face Cream for sunburn. Barrett & Co.

Henry Lacey has been laying off a few trips on account of a sprained ankle.

P. G. Paters, of Capitan, was a business visitor in our town a few days this week.

M. L. Goodin came in from Oscura the first of the week transacting business.

F. A. English spent a few days this week visiting at Alamogordo and Tularosa.

Don't fail to read the Corona page this week. It is a story of progress and enterprise.

Kerns Liquid Shampoo, for home use, is the best for cleaning the scalp. Barrett & Co.

I. M. Harkey was going on crutches last week, the result of letting a mule step on his foot.

William Fergusson was down from Nogal one day this week looking after business interests.

J. M. Rice was a visitor in our town Wednesday and went to White Oaks that evening on business.

Miles May, a leading fruit grower from Nogal, was in town a day or two the first of the week on business.

Mr. Thompson, of Ancho, has purchased the shoe shop of D. C. Morris and will take charge the first of August.

Engineer McGovern, who has been on passenger between here and Santa Rosa, has taken a run on the Dawson branch.

Our town gave the Kit Carson show an audience of nearly 500 Monday evening. That is not so bad for a town eight months old.

Miss Jennie Brockway arrived Wednesday for a few days visit with her father, who is helping to build up the town into a greater Carrizozo.

John A. Laughlin, a contractor from Trinidad Colorado, spent a day or two in our town this week figuring on the building of the new school house.

Arthur P. Green, a mining man of White Oaks and the Jicarilla district, was a business visitor in town Monday and made a pleasant call at this office.

Among the new residences being erected in Carrizozo are those of J. B. Cavender and John Kahler on White Oaks avenue, which have been started during the present week.

Mrs. S. G. Anderson and family returned from Lincoln the first of the week after an extended visit at the home of her father, Don Scipio Salazar, who has been seriously ill but is now slowly recovering.

Messrs Holister and Chandler, of the Continental Oil company, were in town a day or two this week looking after the installation of the big storage tank which is to be located here for the purpose of supplying the surrounding country.

SOCIAL ENTERTAINMENT

The entertainment given last Friday evening at the school house by the X-Ray Club was a very pretty affair and reflects great credit on the young people who planned and executed it.

Owing to the absence of some who had prepared to take part in the program the exercises were shorter than was intended, but every number was well gotten up and the audience was well pleased with the entertainment furnished.

Those who took part in the program were Misses Nettie Lee, Ruth Tompkins and Lena Boyd, Messrs. English, Dawson, Tompkins, Chase and Rev. Roberts.

The young people deserve great credit for the effort they are making to furnish good, wholesome amusement of an elevating character for the people of the town, and it is to be regretted that they do not receive better support from the public.

Alcoholada for the complexion. Ask Barrett & Co.

GOT COLD FEET

Some time ago the ball team at Santa Rosa challenged the Carrizozo team for a game on the Carrizozo diamond, and the challenge was accepted. All arrangements were made for the game, the time agreed upon and advertising matter gotten out announcing the game for tomorrow on the home diamond. After all this trouble and expense to the local team, the Santa Rosa boys, for they must be boys, got cold feet, which icy feeling travelled rapidly upward until their brain was affected, they wired that they could not come.

The managers of the home team are equal to the emergency, however, and have taken the matter up with the White Oaks team, and we feel confident that a good game will be pulled off at the time advertised.

There will also be a grand ball in the Bank building for the benefit of the ball team. Good music has been provided and a good time is assured.

The Sewing Circle will meet at the home of Mrs. Humphreys next Tuesday afternoon at 3 o'clock. Everybody invited.

Quinine Hair Tonic prevents falling hair. For sale by Barrett & Co.

New Firm

William S. Bourne of Capitan, and Clark Hust of Nogal, have arranged to open up a real estate office in Carrizozo. They have secured rooms in the bank building and will conduct a general real estate and mining exchange, and are agents for the McDonald addition to the town of Carrizozo. These men are old timers in Lincoln county and have many friends throughout this region who will wish them success in their new field.

CORONA A PROMISING TOWN

Continued from page five stalled for further work. Other companies are the New Mexico Iron and Copper company, composed of Denver capitalists under the direction of Lon Jenkins; the Columbia Copper company, Martin Fishback, superintendent; the A. B. McDonald Development company, under the management of C. M. Bryan. These companies are all working in good mineral and are getting in shape to begin producing and shipping regularly in the near future; several shipments have been made to the smelters at El Paso, and have proven very

profitable, but the need of a reduction plant near at hand is felt keenly. The Corona Queen company has planned as part of its work to build a smelter to supply this demand. One of the best evidences of the grade of the ore from this camp is the fact that it was the highest of any exhibited at the mining congress at El Paso, in competition with the entire southwest and Mexico.

The climate is one of the things Corona bases her future development on, and a move is already on foot to erect a large summer resort hotel on the side of the hill overlooking the town. Gen. B. F. Adams, of Boston, having purchased 8 lots for that purpose.

Persons wishing to secure property in this favored spot will find the townsite in the hands of Col. F. A. DuBois, president of the townsite company, who is practically the founder of the town and has done much toward its development, and will extend every courtesy to home-seekers who come to the town.
