### MICHIGAN AND NEW MEXICO MINING COMPANY HAS PROMISING TRACT

Plans are fast maturing for active work in the development of the Mildon group of claims, named in honor of A. A. Mildon, of this city, owned by the Michigan and New Mexico Mining Company and situated at Nogal, Lincoln county, New Mexico. Before the deal for the claims was negotiated, Mr. Mildon and others interested, inspected the property, and they were well pleased with the showing of mineral and are satisfied that paying properties will be developed. The claims have the advantage of good railroad service, being only one mile from the station on the El Paso and Southwestern line, a branch operated by the Chicago & Rock Island system.

The location of the Michigan & New Mexico Mining company's properties is considered favorable by mining experts who have inspected the mineral land in that section during the past year or two.

The advancement made in mining during the last year has been noticeable everywhere throughout the commonwealth. There has been unusual activity in all branches of mining industries in New Mexico, and the coming year promises even a greater rate of expansion. The remarkable immigration to the Southwest the past year, the great increase in transportation facilities, the consummation of plans for the erection of additional smelters, the introduction of many new methods of handling ore and a very general lowering of freight rates on mine products, have been important factors contributing to the advancement of the industry in the Southwest.

Mines already operated are being worked on a much larger scale than before. Many old mines are being reopened in the territory near the Michigan & New Mexico company's group, and the view of the satisfactory results of development work carried on in that vicinity during the past year it is thought that the claims will develop ore of a rich character.

The investigations of the past few years have clearly shown New Mexico to be far richer in minerals than has been generally supposed.

There are few mountain ranges in which important exploratory or mining work is not now being done. With the recent discovery that plenty of water is easily accessible instead of being totally absent as long believed, mines will henceforth develop much more rapidly than in the past. Nowhere in the world are more promising or greater variety of mineral displayed than have been found in New Mexico.

The deeper mines of Lincoln county, where the Michigan & New Mexico company's group is located are to be operated more extensively than ever before, and from present indications it will not be many years before some valuable properties will be working on a large scale. The claims of the company contain copper, gold and silver, the former metal predominating. All three minerals occur in workable deposits, and on some of the claims good placers are to be found.

Milford News.

### A PLEASANT PARTY

A pleasant social event was the party given at the home of Mr. and Mrs. A. H. Harvey on Monday evening. Music and games formed the amusement for the evening, and dainty luncheon was served.

Those present were: Misses Abby Meek, Tinnon, Bourne, Silma, Long, Lee, Burleson, Mary Meek, Simms and Herbert. Messrs. Geo. White, Tom Crow, H. B. Dawson, S. Blackham, John Gallacher, F. English, S. M. Parker, John Wright, Cecil Long, Mrs. Tinnon.

### FOR MORALITY

An effort is being made by some of our citizens to guard the morals and reputation of our little city which should receive the hearty support and cooperation of all law abiding citizens. Up to the present time Carrizozo has been free from anything of a troublesome or immoral nature, to a greater extent than most new towns, but recently a place has been started just outside of the town which is a disgrace to the town and a menace and no time should be lost in getting it under the ban of the law. We have reference to the Redlight Saloon and bawdy house which is located just at the entrance of the town on the road to White Oaks. This institution in one of the most public places in the community is running in open violation of morality and decency and of law as well, and should be closed at once.

A petition is being circulated for the purpose of having the liquor license of the place, if it has one, revoked by the County Commissioners, and every citizen who is interested in the moral welfare of the town should sign it. Copies of this petition can be seen at this office or other public places in town by persons wishing to help the good work along.

### SMELTING PLANT RESUMES

The East Helena plant of the American Smelting & Refining Co. has announced that it will now resume buying all custom ores. This will cause a resumption of the many mines in Montana which have been closed since this smelter refused any ores except those from contract shippers.

### NEW COMPANY

The National Mining & Smelting company is the name of a new company which has taken over the big Victoria lead mines at Gage, Luna county, on the Southern Pacific, from the Hearst-Haggin estate. Over \$1,500,000 in lead, silver and gold values have been taken from these mines in the past. The new company intends to open up the mines on a large scale and the output will probably be shipped to the local smelter. P. R. Smith of Deming, promoted the deal.

### SETTLE OUT OF COURT

The suits brought by the United States against the Pennsylvania Development company, Gross Kelly & Company, the Alamogordo Lumber company, and Clark M. Carr to recover territorial timber lands alleged to have been fraudulently acquired, will be settled out of court, according to reports from Santa Fe, and the assistant United States attorneys general, who were sent here by the department of justice to investigate these frauds are preparing to return to Washington.

This is said to be the result of the recent visit to the territory of here of United States solicitor general Henry M. Hoyt, who had been directed by the president to make a personal investigation of the alleged timber and coal land frauds in New Mexico and who found that mere technical violations with no criminal intent were the utmost that there was to the so-called frauds, while in some instances there was not even this to them.

### STONY GROUND FOR FRUIT

The time is coming when the rough stony, high lying lands will be most highly prized for fruit raising. The high, gravelly mesa lands—where ever the rainfall is sufficient by applying the Campell process, to enable the trees to make their growth—will be favored fruit lands. Many growers say that the stony field holds water better than the smooth soil, evaporation being retarded. The time is coming when farmers will seek to adapt each crop to its soil and environment, its climate and water supply. The successful farmer of the future will be the one who studies the details of his profession as thoroughly as any engineer or scientific expert. The day is past when farming was to be regarded as the occupation of galumphs.

A trained farmer today ranks as high professionally as a trained expert and organizer in any line of business or human activity.

And the farmer of the future will learn how to adapt his crops to conditions that nature creates.

Men are now living will be here to see the southwest verdant with orchards and fields, and teeming with prosperous tillers of the soil over vast stretches that until recently have been regarded as only one short step removed from desert.

### SALE OF LIQUOR TO INDIANS

Santa Fe, N. M. Dec. 12.  
In order to put a stop to the sale of liquor to the Pueblo Indians at Toas, judge John R. McFie issued a bench warrant upon the information of A. G. Pollack, special agent of the indian office, for the arrest of Robert C. Poller, a saloon keeper at Toas, and his bar keeper, Samuel Rising. The men were given a preliminary hearing tonight under a statute passed by the legislative assembly prohibiting the sale of liquor to the Pueblo Indians.

### BIG CROPS ON RIO GRANDE

More than 60,000 bales of fine fall hay and thousands of pounds of fall wheat have been shipped in the last two weeks from Los Lunas, Los Lentos, Peralta and other places in that portion of the Rio Grande valley. Simon Neustadt and Fred Huning of Los Lunas, and Max Kempenich of Peralta, are the biggest shippers, their teams bringing in hundreds of bales and hundreds of sacks of wheat every day. Simon Neustadt, who is also postmaster at Los Lunas, said the outlook for bumper wheat and hay crops next year is very good at present. The facilities for properly irrigating the farming lands in this part of the valley have never been better. I expect with good luck to ship twice as much next year as I have this.

Despite the heavy frost which killed practically all the fruit in New Mexico last summer, Mr. Pedro Salazar, of Los Lunas, who owns a fine fruit farm at Peralta, secured over two hundred barrels of fine eating apples from the trees which he planted several years ago.

According to Mr. Salazar, he expects to secure a large quantity of peaches, pears, apricots and grapes this coming summer, provided the frost does not kill the buds. He says that the proper use of irrigation facilities almost any old fruit can be raised in the eastern portion of the Rio Grande valley, where his property is situated.

Besides owning the fruit orchard Mr. Salazar has several thousand acres of land available for sheep and cattle grazing and for farming purposes. On the latter, crops of fine corn were raised this year, and three crops of wheat and alfalfa hay.

Mr. Salazar's farm is only one example of what can be done with the large tracts of fertile farming land in all portions of New Mexico, either with or without irrigation.

The Outlook for Job Printing.

### QUIET WEDDING.

One of the prettiest home weddings which has taken place in Carrizozo was that of Miss Hathe Chemuit and Yancy Wendell Holms, at the residence of Superintendent S. G. Anderson last Sunday evening. Rev. Joseph A. Land of the First Baptist church conducted the ceremony using the regular form of that church.

Only a few personal friends of the contracting parties were present and a dainty luncheon was served after the ceremony. The bride is one of the prettiest and most accomplished young ladies in Carrizozo, and the esteem in which she was held was evidenced by the beautiful and costly presents she received.

The groom is a prominent young lawyer of Amarillo, Texas, and a young man of character and ability.

The happy young couple left on the Sunday night train for Amarillo, where they will make their home.

The OUTLOOK joins their many friends here in wishing them long life, success and happiness.

### A NEW RAILROAD COMING FOR CARRIZOZO.

A proposed new railroad for Carrizozo is in contemplation for the near future. The road will commence at Albuquerque and will run southeast to Carrizozo, and from here east to Capitan and Lincoln and from there to Roswell, which will be the terminal for the present. This road will open up the vast mineral and coal region along the Capitan and White mountains the rich Red Cloud district in the Gallinas and a vast area of undeveloped agricultural land all along the line, and will give Carrizozo access to a much greater region of country than she now has.

Engineer Kendrick has been employed to make the preliminary survey and to do the work of surveying.

### NEW LAW FIRM FOR CARRIZOZO.

George B. Barber of Lincoln and Wm. F. A. Girke of Beggs, Indian Territory, spent several days in our town this week arranging for rooms and making other preparations for opening up in the practice of law in our town.

Mr. Barber is too well known in this county to require any introduction at our hands and he has a young man associated with him who comes recommended as being a man of ability, enterprise and ability, which should be a guarantee of success to the firm.

### OSCURO NOTES.

E. G. Raffety, who just returned from Chicago, has been appointed postmaster, his daughter Margarette will be assistant.

Robert Young arrived on the excursion and is building on his homestead preparatory to moving his family here from Chicago.

Among the recent arrivals is Dr. Ranger of Chicago, who is also building on his land.

Mrs. Roberts, who is the teacher engaged for the school, is here and will open school Monday.

M. I. Jackson recently purchased the Thomas hardware outfit of Alamogordo and is installing it here.

The Olson Brothers boarding house is completed and open for business and is helping to feed the incoming people. Capt. W. D. Roberts was over from his mines in Mockingbird Gap one day this week.

Dr. McCallum is working on his house west of town.

S. C. Hall is back from his visit to North Carolina.

Victor Lucier is driving mail between here and Estey.

H. C. Hanley is branding cattle with Ben Nabours outfit.

Harry Shriver with the First National Bank of Chicago, is in town.

The Foxworth-Galbraith Co. is unable to supply enough lumber for the demand here, so many buildings are going up.

### COAL MINERS IN DEMAND

George E. Kaseman, manager of the coal mines at Madrid, in the Cerrillos district in southern Santa Fe county, is advertising for more miners, as he is unable to keep a force large enough to meet the demand for coal which is used for domestic purposes in the surrounding towns.

### GALVESTON LEADS

The annual report of the secretary of the treasury shows that the port of Galveston has so far distanced all competitors for second place second place that there is slight chance of any rival overtaking her. Last the port of Galveston sent out \$237,000,000 worth of goods, largely cotton and wheat. During the same year the port of New York exported \$627,000,000 worth.

El Paso ranks 20th in number of separate entries of imported merchandise, and 21st in value of exports. But she ranks much higher in value of imports, on account of the great importation of precious metals.

### RANCH SOLD

Dr. R. A. Morley has purchased the Lord-Rushton ranch of 9,000 acres, lying near Dawson, in Colfax county, and is planning eventually to cut it up in smaller tracts and place it on the market. The ranch is a fine one, with large residence and the best herd of short horn cattle in the territory. A great portion of the ranch is fine farming land.

## WHAT IMMIGRATION ACDS TO OUR NATIONAL ASSETS

The immigration of the fiscal year 1907 exceeded all previous records. It was 17 per cent higher than that of 1906 and 25 per cent higher than that of 1905. In each of the three years the number of immigrants exceeded 1,000,000.

Out of the total number admitted this year, over 1,100,000 were between the ages of 14 and 24. There were 138,000 under 14 years of age, but only 46,000 aged 45 or more.

The United States is draining the young blood of the old world. To take away, within three years, more than 3,000,000 young men and women from the industries of the older nations is equivalent to seizing \$3,000,000,000 of their wealth, or stripping the machinery from 100,000 factories and mills.

Are we making the best use of such a tremendous accretion to our national assets? Far from it. Waste, waste, waste, is what our immigration policy spells. We assimilate the newcomers, in a way, but we do not train them to useful employment; we do not try to place them where they are best fitted to work; we make little effort to save the power of this stream and divert it to economic use. We rather incline to resent the coming of this "horde", and to make it as hard as possible for these people to become useful and productive members of society.

A newly created division of the department of commerce and labor will strive to direct immigrants to the most promising regions and channels of employment. The work may be effective if it can command the active cooperation of communities, industries, and employers throughout the country. One object of secretary Straus's plan for organizing the commercial bodies of the country into a sort of central advisory board, is to assist in this tremendous movement of distributing the immigrants. —El Paso Herald.

## GOOD ARGUMENT

The New Mexican gives the following as a strong statehood argument:

According to the figures compiled by Traveling Auditor, Charles V. Safford, the assessment of taxable property in New Mexico for the present year amounts to over \$51,000,000, a gain of over \$5,000,000, or an increase of eleven per cent over 1906. This, it must be understood, by no means represents the actual value of the property subject to taxation which is estimated by competent persons to be at least four times more than the assessed valuation. An eleven per cent increase in one year is certainly a very creditable showing. No doubt at this time the actual value is much greater as the figures above given were compiled from the tax schedules dated March 1, 1907, and as it is well established that thousands of immigrants bringing much money and property into the territory have come into it since that date and have settled within its limits. The figures given in the statement are certainly a strong basis for a good argument in the present statehood movement. Under a state government the increase immediately after statehood is attained may be estimated as double and trebled yearly. The territory of New Mexico is now in the public eye and is attracting many immigrants and much capital. The state of New Mexico would be more so and will be sought for homes by many more immigrants than is the case now.

Harriman has changed his coat and is now on the bull side of the market. It is much more becoming to him.

The next exposition that applies to congress for assistance will have to fight the Jamestown ghost, and 20 years will not hear the last of it.

Market reports are assuming a tone of hilarious enthusiasm; they have reached the point where they feel safe in saying that the "patient" has not suffered any serious relapses today.

There is no reason why the presidential election should have the slightest depressing effect on industry and business and it will not have, if people refrain from talking about it. The Republicans are sure to win, and that will insure continuing prosperity. —El Paso Herald.

Says the Clovis News: "Clovis will have a grist mill, the material for which is now enroute here from Dallas. The mill is a high-grade one and will enable farmers to dispose of their grain and forage crops." And this is on what was the barren desert a few years ago. These are truly the last days of the last frontier.

The C. & A. smelter at Douglas has started another copper furnace, to take care of the surplus ores. The big producers do not want to scare the market into another slump but it is safe to say that they will quietly slip back into something like normal production, selling some copper and holding some against the increase in demand.

One international marriage which is to come off soon is said to be a mercenary one. The French Duc de Cuaines, who is to become the husband of Miss Shonts, daughter of Theodore Shonts, a many times millionaire, and a great financial operator, is said to be pretty well off in his own right and a gentleman. There are, evidently exceptions to all rules.

The first National Bank of Clayton was destroyed by fire on the morning of the 9th. The fire started in a saloon that was in the building next to the bank.

## OREGON STOCK GROWERS WAR ON WOLVES AND COYOTES.

The offering of bounties for the scalps of predatory animals has so often failed to accomplish the good hoped for that the bounty plan has lost favor in many localities. The Wool Growers' Association of Oregon has just gone on record at its recent meeting at the Dalles as favoring the abandonment of the bounty system and substituting the system of killing the animals by private effort and employment of professional hunters. The Association will take up the work and ask assistance from the National Association.

J. N. Burgess, President of the Association, estimates that Oregon sheep owners lost the past year \$250,000 predatory animals, and that the loss of other farm stock, including poultry, would increase the loss to half a million dollars.

The United States Forestry Service has demonstrated that efficient work can be done by trained hunters who are sent to the ranges to make a special business of killing wolves, and such other denizens of the forests as prey on flocks of sheep. A number of such hunters are now at work and they are ridding some of the ranges very rapidly of the animals which do so much damage each year. Wolves are tracked to their dens, the pick and shovel as well as the rifle are brought into play, and the young are found and destroyed. A campaign of that kind strikes at the root of the evil.

So vast, however, is the western country that the work of a few hunters can give only local relief; but if state stock growers associations go at it as Oregon organizations propose to do the war will soon grow decidedly interesting for four-footed skulkers that have grown fat on mutton, veal, pork and poultry.

### Mineral Application No. 25.

United States Land Office, Roswell, Chaves County, Territory of New Mexico, October 22, 1907.

Notice is hereby given that A. R. Byrd, claiming the Old Abe Mining Lode, covering about 1500 linear feet, bearing north 86 deg. 9 min. east on the Old Abe vein, lode or mineral deposit, and on adjoining or branch lodes or veins, all bearing gold, silver, lead, copper and other valuable minerals, with surface ground about 600 feet in total width, the length and width of said location being fully shown below, and on the official plat of said lode, said lode lying, being and situate in the north-west quarter of Section 3 T. 10 S. R. 11 E., N. M. P. M., unsurveyed, in the Bonito Mining District, Lincoln County, New Mexico.

The said claimant is about to make application to the United States for patent for Old Abe Lode or Mining Claim, which is more fully described as to metes and bounds by the official plat, and by the field notes of survey thereof, now filed in the office of the Register of the District of Land subject to sale at Roswell, New Mexico, which field notes of survey describe the boundaries and extent of said claim on the surface.

This claim is adjoined on the east by survey No. 649, renowned O. K. lode; and on the west by the Continuation lode, unsurveyed, A. R. Byrd, claimant. There are no other adjoining or conflicting claims known. This claim being more particularly described as follows:

Beginning at Cor. No. 1, identical with the N. E. location cor. and with cor. No. 2, Survey No. 649, renowned O. K. lode.

A porphyry stone 24x14x9 ins. set 12 ins. in the ground, with a mound of stone 1 1/2 ft. high, 2 ft. base, along side chiseled X 1-1307 on W., and 2-649 on E. face; whence a pine 10 ins. diam. bears S. 46 deg. 10 min. W. 5.6 ft. dist.; and

A pine 4 ins. diam. bears S. 87 deg. W. 25.1 ft. dist., each blazed and scribed X B T 1-1307.

An oak 8 ins. diam. bears N. 37 deg. 46 min. E. 30.9 ft. dist. blazed and scribed X B T 1-1307.

Thence N. 85 deg. 8 min. W. Va. 12 deg. 25 min. E. 1345.06 ft. to cor. No. 2, identical with the N. W. location cor. ## WONDERFUL GROWTH

The Kansas City Star in a recent issue publishes the following interview with C. J. Gavin, a Denver capitalist and a former resident of the thriving city on the Kaw: Judge C. J. Gavin, of Denver, formerly of Kansas City, one of the pioneer in the irrigation movement in the Southwest is in Kansas City in connection with a sugar beet project he has under way, at Raton, New Mexico. A few years ago he entertained the Kansas City Commercial club in a way that assured the men of Kansas City of the loyalty of the Southwest to this city.

There is no letup to the wonderful development that is going on in New Mexico and the Southwest, he said. Between Liberal Kansas and Alamogordo, New Mexico, there are twenty-five or thirty new towns—and all are prosperous. Two years ago when I passed through that region I scarcely could see the semblance of a town.

Kansas City capital and Kansas City influence is encouraging the development of this country. They are now putting in a dam to store the waters of the Sacramento valley for the irrigation of 1,000,000 acres of land. All this country is tributary to Kansas City. The valley is particularly adapted to fruit and alfalfa, and the climatic conditions are the best in the United States for pulmonary troubles. During the present stringency thirty former Kansas and Iowa men have gone down there and bought farms. They paid cash at the rate of \$30. an acre for water rights, Mr. Gavin said. In a year or two, he declared, the same property would be worth \$100. an acre.

Every possible place where it is possible to store water for irrigation it is being stored, he said.

Don't forget to leave your order for a Christmas turkey with The Carrizozo Trading Co.

We only have a limited quantity of apples left which we will still sell at the old price of \$2.85 per box.
