## THE HEART OF TEXAS WANTS TEXAS TECH

### CHAMBER OF COMMERCE SPONSORS \$750,000 COTTON MILL PROJECT

**CITIZENS PLEDGE SUPPORT OF MOVE TO GIVE BRADY GREAT AND NEEDED INSTITUTION—ASK AID OF INDUSTRIAL ENGINEERS IN MAKING LOCAL SURVEY**

At a meeting of representatives of both local banks and leading business men of Brady held Wednesday afternoon, the proposition to secure a cotton mill received enthusiastic endorsement. Estimated costs of the mill, according to data submitted at this meeting was \$750,000, the exact amount depending upon the recommendation of engineers. Secretary Wm. D. Cargill, of the Brady Chamber of Commerce, was instructed to get in touch immediately with industrial engineers for the purpose of making a thorough survey of local conditions, advising as to the kind of mill best suited for this section, and other requirements.

Brady, the heart of Texas, is ideally located for a cotton mill, or industrial enterprises of similar nature. In addition to excellent transportation facilities, her natural resources, such as an unlimited supply of artesian water, gas, coal and oil, together with an abundance of cheap labor and the possibilities of cheap water power, offer a great inducement to the location here of a textile mill. Five points on the San Saba and Colorado river, bordering McCulloch county, have been marked as possible water power project, and will be investigated by the board of water engineers, under the Flood Control act, in the immediate future. It is planned to finance the cotton mill project entirely with local capital and a considerable amount of the \$750,000 capital has already been pledged.

The proposition of securing a cotton mill for Brady was laid before the meeting by Secretary Cargill, who read statistics showing that Texas cotton mills have proven a wonderfully profitable undertaking, several paying an annual dividend of 25 per cent, and one in particular having a twenty-year average annual dividend of 25 per cent. One mill, in operation three years, had returned 300 per cent on the investment. Stock in these mills is quoted at two-and-a-half to three times par.

and none offered for sale or purchasable even at these figures. Mr. Cargill also called attention to the fact that a cotton mill would enable the paying of farmers in this section around 2c above regular market quotations for their cotton, which would make a mill an attractive proposition for all raisers of the fleecy staple. Much interest has been manifested by the merchants and planters of all neighboring counties in the project of a mill for Brady and assurance is given of hearty cooperation in the project.

#### ARRANGEMENTS COMPLETED TOEPPERWEIN EXHIBITION OF FANCY SHOOTING MON.

Broad Mercantile Company in this issue announce the completion of plans for the exhibition of fancy shooting by Adolph Toepperwein, world's champion fancy shot, and special representative of the Winchester Arms Co., who will be in Brady next Monday. The exhibition will be given at the Brady Tourist park, and will be open to the public. Much interest has been aroused in the event, and a large attendance is already assured.

Mr. Toepperwein's exhibition is a most remarkable one, and his unerring shots are certain to win merited approval, while his feats with the rifle in puncturing heavy blocks of steel tossed into the air, and various other feats of fancy and difficult shooting, will amaze everyone.

The local gun club has arranged for a trap-shooting event at the tourist park at 2:30, at which Mr. Toepperwein will be present and take a leading part. Following this, at 4:30, he will give his exhibition of fancy shooting.

Mr. Toepperwein comes here from Paint Rock where he will shoot on Saturday. He will spend the morning at the Broad store, where he will be pleased to meet the citizens and to give information and pointers to everyone interesting in guns.

**COUNTRY CLUB POSTED!**  
The Brady Country Club has been posted. No one has the right to enter the club grounds.

### HALF HOLIDAY DECLARED FOR "TECH" COMMITTEE MONDAY BY MAYOR JONES

**EVERY CITIZEN OF BRADY AND McCULLOCH COUNTY WANTED IN BRADY NEXT MONDAY MORNING—ROUSING WELCOME TO DISTINGUISHED VISITORS**

Brady and McCulloch county citizens are invited and urged to be in Brady next Monday morning upon the occasion of the Texas "Tech" Locating board. Mayor E. L. Jones has declared a half holiday in honor of the momentous occasion, and the entire Brady section is expected to join in paying honor to our visitors upon this day. The autos are to be parked in double row all around the courthouse plaza, and a complete circuit of the square will be made by the autos escorting the members of the Locating board from the depot to the Queen hotel, where breakfast will be served.

At 8:00 a. m. the electric siren will be sounded as a signal for the citizens to drive down and assemble on the square, where the cars will be uniformly parked. Upon the arrival of the morning Frisco train, the siren will again be sounded as a welcome to the visitors. In order to avoid congestion and confusion, it is especially requested that the citizens do not assemble at the union station, but that they gather about the court square and on the streets of the business section instead.

Dr. J. B. Granville, chairman of the local "Tech" Locating committee, will head a delegation of members of the executive committee, who will go to Rochelle and board the train there in order to meet the members of the Locating Board, and for the purpose of going over the preliminaries. Other members of the local "Tech" board will meet the delegates and visitors and join in escorting them from the depot to town.

On account of the extremely short

stay of the visitors in Brady, every minute must be made to count, and so Chairman Granville has carefully planned the itinerary on the inspection trip so as to cover the greatest possible number of objectives in the designated time. Following the various visits, as generally outlined in last Friday's Standard, the party will return to Brady and take dinner at the Tourist park, where they will be met by a delegation of Menard citizens and carried to that place for an inspection of Menard's "Tech" site.

**Curious Methods of Native Anglers.**  
The most curious method of fishing is that employed by the natives who inhabit the upper reaches of the rivers of the Malay Peninsula.

When they decide to go fishing they send messengers to the other villages down the river to warn them that the water is going to be poisoned. Then two kinds of trees are "tapped" for their sap. Although the saps are quite harmless apart, when the two are mixed with the waters of the river they become a strong stupefying drug.

This drug is thrown into the river, turning it milky white, and immediately all the fish come to the surface—doped. Canoes are used to collect the fish, for in a few hours the stream has cleared and the fish have revived.

### ANOTHER GREAT FIGHT PROGRAM SATURDAY NIGHT

Another big fight program under auspices of the local post of the American Legion is announced for Saturday night by Jas. Hobbs. As usual, the bouts will be staged at Dutton City park, and with the growing interest in these events, the offerings are expected to draw a record crowd.

First on the program will be a wrestling match between Rabie Smith and some local wrestler of the same class.

The preliminary events will include a bout between "Jack Dempsey" Womack and "Bill Brennan" Womack, which is certain to win the applause of the audience for these miniature pugilists.

Shorty Malone of Rochelle will also be matched against John Hartsell of Brady, in the preliminaries. Slim Bagley and Slim Baird will furnish the main event and can be counted on for an interesting go.

Two bouts have been arranged between colored boxers, John Parker and Sam Jackson furnishing the first event and Ben Bullett and Doolie White the second.

The events will begin promptly at 8:00 o'clock, and prices of admission will be 25c and 50c.

**BRADY "TECH" COMMITTEE OFFERS FOUR SITES ADJOINING THE CITY**

**EACH OF THE SITES LOCATED ON EMINENCE OVERLOOKING CITY PROPER—ABUNDANT WATER SUPPLY AND SOIL ADAPTED TO VARIOUS PURPOSES**

Nowhere in Texas, possibly, could be found more beautiful sites than are offered by the Brady "Tech" committee to the Texas Technological College Locating board. Each of the four sites are to be found a wide variety of soils and land, eminence overlooking the town of Brady, making not only for a most beautiful and unobstructed view, but assuring cooling breezes, the greatest possible sanitation and health facilities, and incidentally transportation facilities and general accessibility such as mark them as particularly desirable. In these four sites are to be found a wide variety of soils and land, ranging from a large percentage of the finest of agricultural lands to grazing lands, and including such invaluable assets as pecan orchards, large reservoirs, quarries of the finest building stone, and innumerable other resources.

**Brady Offers Four Sites** Beginning almost at the City limits this land gradually slopes upward for about one-half mile to an eminence overlooking the entire town, making for it a most beautiful site for the administration buildings.

This location situated on an elevation above the town, its magnificent water supply, fine pecan orchard, 500 acres bottom land, balance first-class grazing land, its close proximity to town of Brady and residence portion, and its exceptional railroad facilities, is presented for consideration.

**Site 2** **BELL-SESSIONS SITE** offered for location of the Texas Technological College at Brady, McCulloch County, Texas: This tract, containing 1820.92 acres located just southeast of and adjoining the town of Brady is exceptionally well situated for the site of the college. Beginning at the City limits and extending back for about one mile is a tract of smooth, level land, making ideal site for the administration buildings. Two deep wells having been drilled, one on this land and one within 500 feet of same, show that the same artesian water found in Brady's wonderful water well is to be found under this tract at a depth of about 1600 feet or less. Brady Creek, with an abundance of water for all livestock and agricultural purposes, runs thru this land.

The joint track of Santa Fe and Frisco railroad runs along West side of the tract, giving special advantage of switch or spur for unloading of freight, etc., on college grounds. The Puget Sound-to-Gulf Highway No. 9 runs along West side of this tract.

**Site 3** **THE CROTHERS-GRAHAM SITE**. This tract of land comprising about 1915.5 acres of land is situated on the North side of Brady, McCulloch County, Texas, about one-half mile from the corporate limits of the city. The elevation is a little over 1700 feet above sea level. Some of it broken and wooded with liveoak and mesquite and other kinds of timber.

It is watered by Live Oak creek, which traverses the full length of the tract near the center; some water can be obtained by boring wells at a depth of 40 to 50 feet and a plentiful supply of good, pure water may be had at a depth of 230 feet. The Brady and Santa Anna road is on the East side of this tract and the Puget Sound-to-Gulf Highway No. 9 on the West side, with rural free mail delivery and many beautiful building sites.

There are eight houses with barns and other improvements, the land being cut into small tracts; over 1000 acres in cultivation and the rest is good pasture land, with a large portion capable of cultivation.

**Site 4** **GLENN ESTATE SITE**, City of Brady, for Texas Technological College. The above site contains a total of 3771 acres, with agreement to select therefrom 2000 acres or more located South and adjoining the City of Brady. It has an elevation of 1750 feet. This site on the North is supplied with city water, coming from the regular City water system, which is the purest artesian water that can be had. The remainder of the eastern tanks and shallow wells. block of land is now supplied with water likely can be secured, the same as furnished by the city from its artesian well, at about the same depth on any portion of this site.

This site is located above the elevation of the city of Brady, and is generally rolling, with level valleys of very rich dark soil which is very productive. About 900 acres are now in a good state of cultivation in numerous tracts over the entire block. Of the entire block about 60 per cent is tillable land, the remainder being timbered with liveoak and mesquite timber, and a good coat of Mesquite grass.

This site is bounded on the East by the Puget Sound-to-Gulf Highway No. 9, and on the West by State Highway No. 10, on the North by the Crothers & White Addition to the City of Brady the Spiller Addition to the City of Brady, and by the Rutherford-Trigg Addition to City of Brady. The Fort Worth & Rio Grande Railway right-of-way extends into this block from the East, giving a location for a station for convenience of College.

An excellent location for administration and other buildings of the college would be on a high elevation near the North side of the block and near the city limits of Brady, and close to one of the fine residential sections of the city.

Options covering the whole of the block have been executed by respective owners, conditioned that any portion thereof may be selected by board as a site for said college.

**ROBS CALOMEL OF NAUSEA & DANGER**

Medicinal Virtues Retained and Improved—Dangerous and Sickening Qualities Removed. Perfected Tablet Called "Calotabs."

The latest triumph of modern science is a "de-nauseated" calomel tablet known to the drug trade as "Calotabs." Calomel, the most generally useful of all medicines thus enters upon a wider field of popularity, purified and refined from those objectionable qualities which have heretofore limited its use.

In biliousness, constipation, headaches and indigestion, and in a great variety of liver, stomach and kidney troubles calomel was the most successful remedy, but its use was often neglected on account of its sickening qualities. Now it is the easiest and most pleasant of medicines to take. One Calotab at bedtime with a swallow of water,—that's all. No taste, no griping, no nausea, no salts. A good night's sleep and the next morning you are feeling fine, with a clean liver, a purified system and a big appetite. Eat what you please. No danger.

Calotabs are sold only in original sealed packages, price thirty-five cents for the large, family package; ten cents for the small, trial size. Your druggist is authorized to refund the price as a guarantee that you will be thoroughly delighted with Calotabs.—(Adv.)

**Thursday Bridge Club**  
Mrs. W. D. Crothers entertained the Thursday Bridge club on Thursday morning of last week, with members present as follows: Mesdames D. J. Wood, Bailey Jones, Edwin Broad, Sam McCollum, J. G. McCall, H. B. Ogden, and guests; Mesdames J. S. Anderson, Wm. R. Davidson, M. C. Wolfe, H. M. Brannum; Misses Carmen Anderson, Marjorie McCall.

In the series of "Bridge," Mrs. Broad received club prize and Mrs. Davidson received guest prize. The hostess served a salad course.

**Five Hundred Club**  
Mrs. Clyde Hall was hostess on last Friday afternoon at her ranch home to members and guests of the Friday Five Hundred club, a most delightful time being reported by those attending. Members present included Mesdames J. B. Granville, B. L. Hughes, S. J. Striegler, Ed A. Burrows, N. A. Collier, Tom Jones; Miss Mozelle Glenn. Guests were Mrs. F. M. Richards; Miss Lucille Barnes.

Refreshments consisting of a delicious salad course were served. Mrs. Striegler entertains for the club this afternoon.

**Thursday Bridge Club**  
Mrs. Bailey Jones entertained yesterday morning for the Thursday Bridge club, three tables being set for the series of "Bridge." Club prize for high score was received by Mrs. Sam McCollum and Miss Margaret McGhee received guest prize. The hostess served a salad course.

Club members present were Mesdames Sam McCollum, J. G. McCall, J. W. Ragsdale, H. B. Ogden, Edwin Broad, D. J. Wood, B. L. Malone. Guests were Mrs. H. M. Brannum; Misses Margaret McGhee, Jack Melton of Cabot, Ark., Marjorie McCall, Carmen Anderson.

Mrs. Malone entertains the club on Thursday morning of next week.

**Friday Bridge Club**  
Mrs. P. B. Melton was hostess for the Friday Bridge club on last Friday afternoon, club members present including Mesdames J. S. Wall, J. S. Anderson, Ed Campbell, G. C. Kirk, C. T. White, Harry F. Schwenker, Burl T. Wiley. Guests included Mesdames Sam McCollum, S. S. Graham, Bailey Jones, Dimmitt J. Wood, Howard B. Ogden, H. M. Brannum, Marion Rice; Miss Jack Melton of Cabot, Ark.

Club prize for high score was awarded Mrs. Anderson, and Mrs. McCollum received guest prize. Both prizes were graciously presented by the recipients to Miss Melton as guest of honor.

The hostess served an ice course. Mrs. Wall entertains for the club this afternoon.

**Stand By Your Town.**  
If you think your town's the best,  
If you'd have her lead the rest,  
Help her grow.  
When there's anything to do,  
Let the fellows count on you.  
You'll feel bully when it's through;  
Don't you know?

If you want to make a hit,  
Get a name.  
If the other fellow's it,  
Who's to blame?  
Spend your money in your town,  
Thusly keep your prices down,  
Give the mail concerns a frown—  
That's the game!

If you're used to giving knocks,  
Change your style;  
Throw bouquets instead of rocks,  
For a while;  
Let the other fellow roast,  
Shun him as you would a ghost,  
Meet his hammer with a boast  
And a smile.

When a stranger from afar  
Comes along,  
Tell him who and what you are—  
Make it strong;  
Needn't flatter, never bluff,  
Tell the truth, for that's enough;  
Join the boosters—that's the stuff,  
We belong. —Exchange.

LOST CREEK ECHOES

**Leaf Blister on Pecans Not Extensive—School Tax Increase Defeated.**  
Voca, Texas, July 10, 1923  
Editor Brady Standard:  
It has been raining somewhere in sight every day for a week. It keeps us in hope, thinking well we will surely get a rain tomorrow, but it hasn't come yet.

The leaf blister, or what ever it is that I spoke of sometime back that affects the pecan timber, did not extend so widely as it sometimes does. Only a very small per cent of the pecans was lost, and it looks now like a good pecan crop is in sight.

A school tax election was held at Lost Creek last Saturday in which the tax was defeated by five votes. Strange, indeed, it is to me that men will refuse to help their school. When they refuse to help their school, they refuse to help their children and neighbor's children secure the advantages of an education that they so much need—and all on account of a few paltry dollars. Shame on any people that will refuse to aid their school. But if the theory of some be true, that man evolved from the monkey then no wonder, no wonder.

Last Friday Clarence Woodford and wife of Rochelle came over to join in a big community fish fry on the river, when he was called by long distance announcing the death of his mother, who lived in Grayson county. He left at once to be at the funeral. The whole community sympathizes with Mr. Woodford greatly in the loss of his mother.

W. W. Henderson went to the sanitarium at Brady Monday, where he had a tumor removed which had been growing on his shoulder for several years.

The fish fry mentioned above was a glowing success. Fish had been caught in abundance and after sixty or seventy people had eaten all the fish they wanted, there was fish and a plenty left to feed nearly that many more people.

World's Champion Fancy Shot

\*\*\*\*\*  
LOCAL BRIEFS  
\*\*\*\*\*

A party of thirty-two Boy Scouts from Ranger, Texas, were in Brady Wednesday, enroute in trucks and cars on a hike to San Antonio, where they will camp out for two weeks. Their plans included spending Wednesday night on the Llano river.

**Lonnie, 16-year old son of Mr. and Mrs. A. J. Kinney of Fairview community, is in the local sanitarium nursing a broken right shoulder, and bruises and lacerations about the face and body, as a result of being thrown from his horse Sunday afternoon while riding at break-neck speed. The young man was engaged in attempting to pen a bunch of horses, and the accident occurred when his horse stepped into a hole. At last reports, the patient was getting along as nicely as could be expected.**

**J. F. Green was in Brady from Rochelle Monday. Mr. Green has been farming on the J. E. White and Carroll Gray place south of town, but says the grasshoppers ate up most of his crop, and the hail storm got most of what was left, so he decided to leave the balance in charge of a man, while he himself found something to do. His decision rested upon the meat market and restaurant of Bill Earp at Rochelle, which he purchased last week and of which he took charge last Saturday. Mr. Green states he is well pleased with business prospects in his new location.**

**Otis Turney Returned Sunday from Jacksonville, Texas, where he had been called by the sad news of the accidental drowning of his sister, Mrs. Frank Inge. He states that the tragedy occurred while several families were enjoying a Fourth of July picnic on a river bank. The children waded in the comparatively shallow water, and Mrs. Inge joined them in the sport. A misstep and the unfortunate woman, who could not swim, was swept away in the swift current. Her 14-year old daughter went to her rescue, and succeeded in pulling the apparently lifeless body to within four feet of the bank, when her strength gave out, and she was forced to relax her hold, allowing the body to again drift out into deep water. By this time, the men, who were at quite a distance up on the bank, were summoned, and gave first attention to the brave girl, who was all but exhausted by her struggle for both her own life and that of her mother. It was some thirty minutes before Mrs. Inge's body was found and taken from the water, and by that time the spark of life had fled. Besides the husband, four children survive, two boys being about grown. Mr. Turney unfortunately arrived too late for the funeral of his sister, on account of being unable to make train connection.**

**The Family Law Firm**

By PETER DURANT

(©, 1923, Western Newspaper Union.)

"You're thinking of getting married!" Old Bower, the lawyer, glared sardonically at his son Dick. "You—whippersnapper! Here I take you into my law office out of charity, after you made a rank failure at college, and you come to me and talk of getting married on twenty-five per! Has she got money?"

"No, dad, but—"

"No 'buts,' Dick. No, I don't want to know who she is. I refuse absolutely. I'll never do a thing for you. And I'll give you a word of advice. I don't know whether your college career ever brought you into touch with a poet named Tennyson, but he says somewhere, 'Don't marry for money but go where money is.' Now get back to that filing, and open my non-personal mail and lay it out for me."

Dick turned to his work, and his father put on his hat to go to the courts. Nevertheless, he sighed as he walked down the street. Since his wife's death, five years before, the boy had been everything to him.

And Dick was a ne'er-do-well; the boy would never come to anything. And now he wanted to marry some penniless girl!

When he got back Dick had gone out to lunch. He looked at the correspondence that he had opened and gave a start. John Higgins had died!

And Mary Hale, the waitress at the Royal hotel, was to inherit the bulk of his property, valued at twenty thousand dollars.

He whistled. Mary was a sort of protegee of his; he always had a pleasant word for her when he took his lunch there. What would she do with twenty thousand? It was a fortune to her. And how he needed money!

His affairs were going to ruin; he was threatened with bankruptcy... the vision of Mary, sweet and gentle, came before him.

Suddenly a desperate resolve came to him. Why shouldn't he marry Mary Hale? Of course she suspected nothing, she thought it a great honor when he smiled at her; and he was only fifty-three.

It was true he had seen her walking out with one of the waiters, a fellow named Jasper; but what weight would a waiter have against himself?

Under this inspiration he clasped on his hat and sallied out to luncheon.

He had a shock when he saw Dick seated at the little table and Mary fluttering around him. He read flirtation in Dick's attitude. And suddenly the awful realization came to him.

Dick, having read the letter, had got in ahead with youth and an hour's start to his advantage.

Dick saw him and rose sheepishly. "Hello, dad! Guess I'll be getting back to the office."

"I guess you'd better," old Bower mumbled, and quietly took the vacant place, prepared for the whirlwind courtship of his life. Before he rose he meant to have Mary's promise to become his wife.

Over the soup he said: "Mary, you're looking uncommonly blooming today."

Mary blushed and looked flustered.

Over the meat and potatoes he took Mary's hand.

"Mary, do you know you can do anything you like with me?" he asked.

Mary got as red as a rose and nearly dropped the cauliflower.

Over the dessert he whispered: "Mary, how would you like to become my wife?"

Mary did drop the cover with a clang. "Oh, lord, that's just what Dick was saying!" she exclaimed.

"What?" shouted Bower. "That scoundrel! I—I'll cut him off without a penny if he marries you, Mary. Mary, be reasonable! Think of the position I can give you. I'm not an old man yet, either, and I love you—oh, God, how I love you!"

"Oh, Mr. Bower, I'm so sorry," faltered Mary. "You see I—I'm going to marry Mr. Jasper next week."

Bower rose and stamped out of the restaurant and made his way back to the office in a fury.

"You young scoundrel," he belated, "so you've been trying to get that poor, innocent girl to marry you, have you! She was complaining to me about it. Been reading my correspondence, have you?"

"Why, you told me to file it, dad."

"I didn't tell you to be so infernal, too, Dick."

Dick whistled.

"Who's the girl you had in mind, Dick?"

"That's her, dad. I—I knew about old Higgins' death. You see, Jasper's the old man's stepson and Mary's cousin, and—"

There was a long, long pause.

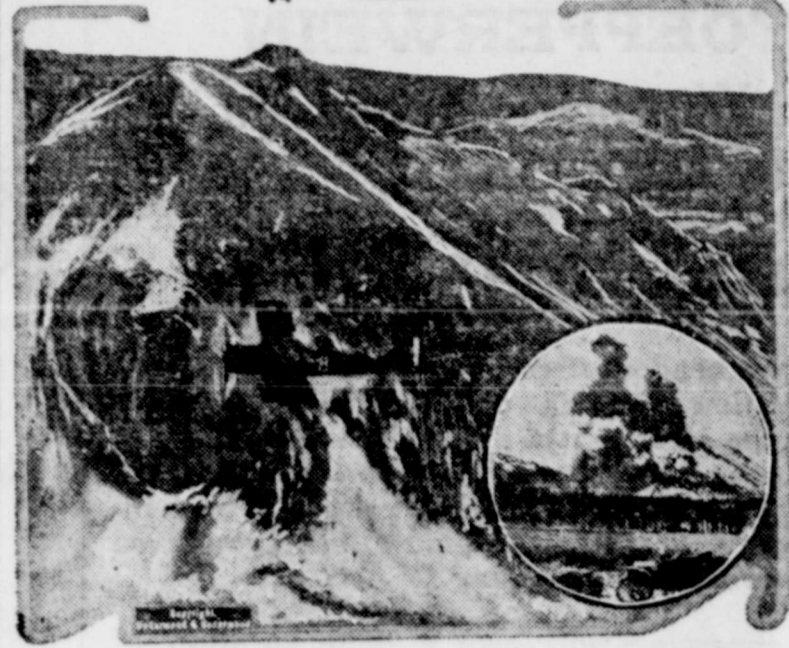

"Dick, my son," said old Bower, "come into the firm as full partner at the end of the month. I need a head like yours, even if you did get left. I guess there's no good trying to take in Jasper too, is there?"

Driven From Home.

"I understand High-heel Jim has left Crimson Gulch never to return."

"Yes," replied Cactus Joe. "He had a mighty sunny disposition at first. But he got a job as a Wild West hero in motion pictures, and his quarrels with the directors made him so cautious we simply couldn't stand his company."—Washington Star.

**Peeping Into Lassen's Crater**

Lassen Peak's Crater.

Lassen in Eruption.

**T**HE possibilities of the airplane in preventing and fighting forest fires are very clearly shown in a picture of an airplane flying over the crater of the sleeping volcano Lassen, in California, taken by another airplane photographing the one below."

said Senator George E. Chamberlain of Oregon, the other day in a debate in the senate over an appropriation item in the sundry civil bill.

Well, the picture to which he referred is given herewith. And it is lucky for the aviators from Mather Field, California, that they were not doing their peeping act a week or so later. Lassen Peak, which had been sleeping for months, suddenly waked, sent up columns of smoke and steam for thirty minutes and then settled down for another nap.

Lassen Peak is the crowning touch of Lassen Volcanic National park. It rises 10,437 feet and its chief claim to fame is that it is the only active volcano in the United States proper. Our national park system contains five volcanic parks: Lassen Volcanic, Crater Lake, Mount Rainier, Yellowstone and Hawaii. Crater Lake National park in Oregon contains the most wonderful lake in all the world—that in the crater of Mount Mazama, a 16,000-foot volcano that sank within itself in the prehistoric past. Mount Rainier, 14,150 feet in altitude, is a dormant volcano, with steam jets issuing from vents in its icy crown. Yellowstone's volcanic origin is shown by its geysers, the finest in the world, and its boiling springs, pools and palat pots. Hawaii, in the Hawaiian Islands, has three of the most impressive volcanoes in the world—Mauna Loa, which erupts every ten years and has just finished a spectacular performance; Kilauea, with its everlasting lake of molten lava, and Haleakala, which has not erupted for 200 years and has a crater eight miles across and 3,000 feet deep.

Lassen Peak until recently has been quiet for 200 years. It is, however, so interesting and important scientifically and so scenic that President Taft made it a national monument in 1906. Then, in the spring of 1914 it waked up from its long sleep and broke out in a series of eruptions that were practically continuous. In August, 1915, congress created the park and 124 square miles of its environment the Lassen Volcanic National park. Four months later Lassen ceased activity with its 212th eruption. The crater gradually cooled off and scientists predicted that it would not resume operations for a long time.

The activity of Lassen aroused great interest all over the nation; it was the first thing of the kind in our history. The spectacle was magnificent because of the heavy columns of smoke. By March of 1915, lava had filled the crater and had overflowed the west slope for a thousand feet. May 22 was the climax of the many eruptions. A great mass of smoke, mushroom-shaped, rose four miles into the air. At night, with this mass of smoke and vapor lighted by the crater fires, the spectacle was impressive.

An exceedingly interesting phenomenon was a blast of superheated gas that swept down the valleys of Lost and Hot creeks. This blast destroyed every living thing in its path for ten miles. Forests were scorched to cinders. Snow fields were instantly turned to water and the lower valleys were flooded.

Lassen Peak, the scientists seem to think, is the last exhibit of activity in the volcanism of the Cascade range. They say that in ancient days the mighty peaks of the Cascades that are now crowned with snow and ice were monster volcanoes. Mount Rainier, Mount Baker, Mount Adams, Mount St. Helens, Mount Shasta, and vanished Mount Mazama.

Lassen Volcanic, whether it sleeps or wakes, is an attractive national park, with great possibilities as a people's playground. It contains several other fair-sized mountains and a 7,000-foot symmetrical heap of volcanic material called Cinder Cone. It has large forests and fine lakes and streams. There are hot springs, which

have a local reputation as baths. Congress, with its usual lack of policy created this park without appropriating money for its improvement. The Californians have tired waiting for an appropriation through the regular channels, and one of their representatives recently introduced a bill for a special appropriation for the improvement and development of the park.

The two airplanes which co-operated in the taking of this striking picture were patrolling National park and the national forests on the lookout for forest fires. There are forests, public and private, in this part of the West valued at many hundreds of millions of dollars. Last year, 6,800 fires were started in the national forests. Approximately 2,000,000 acres were burned over, with a loss of about \$4,000,000. In addition, it cost the federal government about \$3,000,000 to fight these fires. Senator Chamberlain argues that airplane patrol is a necessity, as moving observers can discover fires which would be long hidden from stationary observers.

**ONCE GREAT PORT MORIBUND**

American Consul Describes Hamburg, Former Pride of Germany, as a "Graveyard."

Hamburg today may be described as an imposing monument to the dead glories of the German merchant marine, according to Consul General Francis R. Stewart, who was detailed by the American commission in Berlin to investigate conditions at the former premier German port for that body. A report from Mr. Stewart detailing the results of his inquiry has just reached the department of commerce.

"A short trip through the harbor quickly discloses what a graveyard the port has become," the consul reported. "Tugs and lighters are tied up here and there, apparently forgotten. One small cruiser, deserted, along a pier; electric cranes are motionless on unused docks, floating elevators and docks are moored in rows, probably in readiness for delivery to the allies."

"The giant Bismarck (56,000-ton Hamburg-American liner) floats at a fitting pier without a sign on board and from a launch no new work could be seen in any of the big shipyards. Tied up to another pier in the outer harbor is the former Atlantic record-holder, the steamship Deutschland, relic of the war, painted a deep black overall, with spots of passing craft have scraped her sides, a grim reminder of the glories once held by the German merchant fleets."

Regular service is being maintained with Holland, England and North America, and lines were about to start service for Spain and South America, but the "free port" is apparently dead, Mr. Stewart reported.

**Political Shirkers in China.**

An object lesson in the practical interest which the Chinese (or some of them) do not take in municipal affairs is provided by a correspondent to the Canton Times. The writer describes progress which has been made in a southern village, solely through the enterprise of a few leading men. Among other new projects, this committee is desirous of establishing a fire brigade, laying out a public park and playground, and appointing a "paid clerk" of public works. But the village community is not enthusiastic. Many are indifferent and will not attend the meetings. "It is enough to make the earnest cold-hearted," declares the scribe quoted.

**Aiming to Please.**

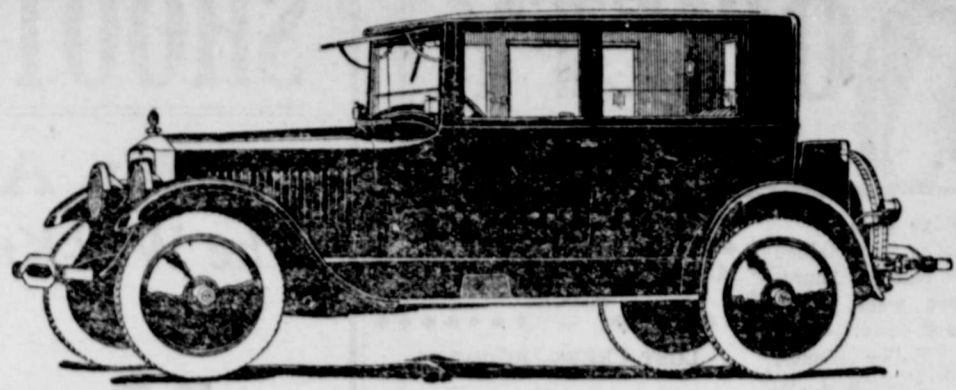

"Some people are playing the stock market on suggestions culled from the ouija board."

"Good enough," said the broker. "No trouble to put in a few ouija boards."

**Is It All-Wool?**

Anybody can tell whether material is all-wool or not, says the Little Journal, by boiling a sample of it in a solution of caustic soda. Whatever portions do not dissolve are not wool.

**STUDEBAKER BIG-SIX FIVE-PASSENGER COUPE \$2550**

**The Big-Six Coupe Offers a Rare Combination of Elegance and Utility**

Into the Studebaker Big-Six five-passenger Coupe have gone, without compromise, the finest design, materials, workmanship and the best of Studebaker's 71 years' experience.

Nothing has been left undone to make this big, roomy coupe as fine an enclosed car as can be built.

Certainly no car performs more brilliantly or is more reliable. None possesses greater beauty or is more luxuriously comfortable. None is more enjoyable to drive—and no other make of car is more completely equipped.

You will appreciate the generous roominess of this Big-Six Coupe, its sterling quality of body and chassis and its wealth of refinements—including the large trunk; extra disc wheel complete with tire, tube and tire cover; handsome nickel-plated bumpers front and rear; courtesy light; motometer; flower vase; clock; aluminum-bound running boards with corrugated rubber mats and step pads; rear-view mirror, automatic windshield cleaner, glare-proof visor, and many others.

Its low price is due to large volume and to the fact that Studebaker overhead is shared by three models—all sixes. Then, too, only one manufacturing profit is included in the Big-Six price because all vital parts are manufactured in Studebaker plants.

Studebaker has been building quality vehicles for more than two generations.

Power in surplus measure to satisfy the most exacting owner

THE RED EAR

By CLARISSA MACKIE

"If you go to the husking bee, Ruth, you must let me go with you," declared Ruth's aunt. "I don't approve of your running around to parties with strange young men."

WISDOM'S WHISPER

Talent repeats—genius creates. Learn the luxury of doing good. Great ships require great waters. Conduct hath the loudest tongue.

ECHOES OF WORLD WAR

The World war lasted 1,623 days. There are 215 members of the American Legion in Turkey. The money cost of the World war, according to Lloyd George, was \$223,471,000,000.

ABOUT PEOPLE

Edward Jenner, who introduced smallpox vaccination, was a poet of merit. The duke of York, second son of King George, has an official allowance of \$50,000 a year.

LOVE DARTS

The course of true love never troubles lovers. Absence makes the heart grow fonder of absence. The Only Girl, after all, is only one in a Big Push.

FROM THE PENCIL'S POINT

Borrowed umbrellas cast the shadow of suspicion. The stay-at-home doesn't have to worry over vacations. Positive, bet; comparative, better; superlative, better not.

AND AFTER THAT, FRIGIDITY

Arctic Cold Followed on Somewhat Pointed Comment Made by Mrs. Watson. Mrs. Watson was what many people might describe as a "bridge fiend."

RESTING PLACE FOR THE ARK

Tradition That Has for Centuries Pointed Out Mount Ararat Is Not Recognized Locally. The identification of Mount Ararat, with the mountain upon which the Ark rested, is at least as early as the adoption of Christianity by the Armenians.

Kitchener's Choice of Title

When Sir Herbert Kitchener was elevated to the peerage, the new peer had the greatest difficulty in selecting his title. He hated the name Kitchener, and kicked strongly against the pricks in eternalizing it in his title.

Pilot-Fish Sometimes Betrays Shark

In olden times people believed that the pilot-fish used to guide and protect ships. The fish would swim before the ship when all was well, but would disappear, they said, if rocks or land were near, so as to warn sailors. It is a fact that the pilot-fish swims with ships and sharks, but it is not with any intent to guide or protect.

Oxford

Passing through the long, small, oblique streets in which the long, gray, battered public face of the colleges seems to watch jealously for sounds that may break upon the stillness of study, you feel it the most dignified and studious of cities. My friend and I wandered forth in the luminous early dusk. We reached the bridge that underpans the walls of Magdalen and saw the eight-spired tower, delicately fluted and embossed rise in temperate beauty—the perfect pose of Gothic—wooling the eyes to the sky that was slowly drained of day.—Henry James.

Bluefish Ocean Glutton

The bluefish is a rough and ready fighter, but he is a ravenous rascal, as well, and probably more destructive to other fishes than any creature which inhabits the sea. A school of bluefish will cut through a shoal of haddock or weakfish with chopping knives, leaving the water thickly strewn with the remains of their quarry, and then turn round and do it all over again. It is said that he will follow the custom in vogue among ancient Romans, discharge the contents of his stomach to make room for more.

The Widow's "Might"

Home of Mrs. Wright at Gough, Ga.

A True Story

In 1922, Mrs. Mittie L. Wright, of Gough, Burke County, Ga., raised 16 bales of cotton on 15 acres of land, with the sole assistance of her children, under most unfavorable weather conditions and the worst boll weevil year that Burke County has known.

In a year when many white farmers were abandoning their farms, and thousands of negro farmers were leaving the South on account of inability to successfully combat the boll weevil, this widow raised more than a bale of cotton to the acre.

She was enabled to do this because she protected her cotton with HILL'S MIXTURE at minimum cost and trouble. The boll weevil didn't get her cotton. Hill's Mixture was put on in the day-time, by her children, without any machinery.

Most Effective and Least Trouble of Any Poison!

Hill's Mixture is a liquid poison, composed of calcium arsenate, molasses, water and secret ingredients which form a combination that we are convinced, from results obtained, attracts the boll weevil. Hill's Mixture is manufactured in the South's largest boll weevil poison plant.

lasses. Every mix is chemically analyzed before shipping. Hill's Mixture is approved by the Georgia State Board of Entomology as a boll weevil poison. It can be put on the plant in the day-time, by inexperienced labor without machinery. It is only necessary to touch the bud of each plant, about every 10 days till six applications have been made, and only the very heaviest rain will wash it off.

Protection For Your Cotton.

The price of Hill's Mixture is 82c per gallon in 50-gallon barrels, freight prepaid to any Ark., La., Okla., or Texas point; slight freight charge for other states. \$3.00 charge for barrel, which will be refunded when barrel is returned in good condition.

Place your order with my agent whose name is shown below. Hill's Mixture is economical, efficient and easy to apply.

A. H. RICHARDSON, Brownwood, Texas Agent for Brown, Mills, San Saba, McCulloch, Mason, Concho, Menard, Runnels, Coke, Tom Green, Coleman, Taylor and Callahan Counties. FOR THE HILL'S MIXTURE CORPORATION AUGUSTA, GEORGIA
