GOOD ADVICE.

Every patriotic citizen should give his personal effort and influence to increase the circulation of his home paper which teaches the American policy of Protection. It is his duty to aid in this respect in every way possible. After the home paper is taken care of, why not subecribe for the AMERICAN ECONOMIST, published by the American Protective Tariff League? One of its correspondents says: "No true American can get along without it. I consider it the greatest and truest political teacher in the United States."

The Presbyterian church in Paris has emerged victorious from a pro-tracted legal conflict with the city authorities. The French law gives Christian sects a grant from the state in proportion to their numbers, and, in view of the high cost of living at the capital, an extra sum is allowed to ministers of religion residing in l'aris for their lodging expenses. The prefect of the Seine refused to honor the draft of the Presbyterian consist-ory on the ground that their balance sheet did not prove its necessity. The church contended that such a condition was never contemplated by the law, and after exhausting every legal process the city has been com-pelled to pay the sum of 178,000 frances a year, together with arrears Beaty Clarke, as the girls trooped out of the schoolroom at a o'clock.
