SUDAN, LAMB COUNTY, TEXAS, JULY 15, 1927

NO. 3

Merchants of Sudan Are Offering Extra Special Inducements

Trades Day Saturday July 16.
\$150.00 in Merchandise
Coupons. Free Stock
Judging, Races
Ball Games.

Music by Tahoka's 20 Piece Band

Trades day here Saturday, July 16th, will be a big day. The indications are, it will be a fine day filled with varied interest, from judging poultry to horse racing. There will be plenty of music, Tahoka 20 Piece Band to make the day interesting throughout. There will be free auctioneering for farmers and citizens of Sudan. All are encouraged to bring any thing they may have for sale. There will be \$150 given away in merchandise coupons as prizes. These will be good at any business house in Sudan, and all

merchants will have special bargains on that day, or some article selling at cost.

The program in the morning from 10:00 to 12:00 O'clock will consist of livestock judging, lecturing on classes as follows: Dairy cows, Brood sows, Pigs under 6 months of age, Leghorn hens, General purpose hens, as Plymouth rock, R. I. Reds etc. Yearling horse colt. Best team of horses and mules. There will be usually three prizes given for each class. See one of the big posters for detail information on livestock.

Big Chicken Dinner Served by Ladies

The Methodist Ladies will serve a big chicken and vegetable dinner, in the Morgan building, on Trades day, Saturday, July 16th. The ladies are preparing a big feed, and earnestly solicit you to take dinner with them on that day. Adults will be charged 50 cents for all they can eat. Children proportionally. Eat, drink and have a good time on July 16th.

Five Inch Rain, Some Hail

A five inch rain is reported to have fallen about 8 miles west of Sudan, on Monday afternoon. The rain was accompanied by considerable hail and a heavy wind, which damaged several hundred acres of corn. J. E. Garner had some sheds damaged. Lee Crosby was also in the strip that was damaged by the heavy rain.

Sudan and trade territory received something like two inches of rain on Sunday and Monday, but was not in the section where the rain and hail did the damage.

With the rain, Sunday, this territory has been put in good condition for another bumper crop, and with anything like the average Fall, this territory will harvest a big crop of cotton and feed.

J. H. Paul, President of the Amarillo State Bank at Amarillo was looking after business interest in Sudan Sunday and while here was a guest of V. C. Nelson.

Mr. and Mrs. Clyde Robinson were in Olton Monday.

Producing and Storing Quality Eggs

At the present season of the year it is difficult to produce eggs that are of the highest quality, due to them being exposed to the daily temperature especially if they are fertile. There are two reasons why the roosters should be sold or cooped at this time of year: First is producing infertile eggs which have a higher quality, and market value. Second is the loss of feed fed them. Often these things have been done, there should be an effort to hold some of the eggs off the market until later in the year.

There are two methods of preserving eggs that are practical for any one who are interested in getting more out of their summer egg production, water glass, or sodium silicate method. 9 quarts of water boiled, add 1 quart of water-glass, and stir well. This will preserve fifteen dozen of eggs, with two inches of solution top. Crock containers are the best to use with either method.

Lime water method: 2 or 3 lbs. of unslacked lime and five gallons of boiled water, cooled. Allow to stand until clear. Place clean, fresh eggs in solution and place in cool place.

V. C. Nelson reports the sale of two labors of the Janes land south of town, recently. Mr. W. G. Lenderson purchased one and Mr. Welch of Quanah, purchased the other.

Whitehead Bros. Picture Show will be in Sudan over the week end. This show has made Sudan for sometime and you know that it is a good show.

Bank Statement Show Good Conditions

The financial statement which appears in this issue of the News, shows that institution in a healthy condition, and also, shows that the entire community is by far better off than it was 12 months ago. Deposits at the close of business on June 30th., 1926, were, \$87,762.17, while the deposits at the close of business on June 30, 1927 were \$125,019.08 or a gain of \$37,257.21. The increased prosperity may be contributed to the fact that many farmers have been diversifying since the cotton took a slump last fall and now have a steady income which helps to pay the living expenses.

Big Sale On at Everybody's Store

The News printed several thousand double page circulars for Everybody's Cash Store announcing their great bargains in Dry Goods, Ready to Wear, Shoes and Men's Clothing. See their large ad in this issue of the News and read it carefully. Everybody's Cash Store is enjoying a large business, and manager, Harry Wilson, says, that the firm certainly appreciates the liberal support, which it has received since locating here.

Attention Poultry Raisers

Now is the time to caponize your young roosters. Capons grow large and bring a good price. The large breeds sold as high as \$3.00 a piece this year. Those having small or large flocks that they would like to have caponized, may call and make arrangements with me. I will do the work at a small charge. For reference as to my ability see Mr. J. G. Bishop, Vocational Agriculture Teacher of the Sudan High School. — Forrest H. Weimhold, at the Sudan News.

E. T. Knight, Manager of Higginbotham & Bartlet Co., left Wednesday for Bolder, Colorado, to spend a week or so with his mother.

Miss Dixie McMeans is spending her vacation in Colorado, and Miss Opal Carter is visiting with her uncle in Snyder. Miss Dixie is employed in the Post Office and Miss Opal is clerking in Sudan Mercantile.

Miss Murlie Duke of Chillicathe is visiting her aunt, Mrs. J. C. Cooper and family.

R. L. Cooner who is connected with Higginbotham-Bartlet Co. Gorman is improving his place near Sudan.

I. H. Shaffer of Hamilton County is visiting his daughter, Mrs. M. F. Boatwright north of town.

Why Farm Boys Succeed

A business man who looks after the employment of about twelve hundred workers tells us that in his experience those brought up in the country are the most dependable and the most likely to be advanced to positions of trust. He could offer no explanation for it, though he himself was raised on a farm. "We think it is very easy explained in the training that farm boys receive and in their environment," says the Chicago Dover Journal. Every farm boy worth his salt is a worker. At an early age he is given a definite responsibility. He has certain tasks to perform regularly, and the farm machinery slips a cog if they are neglected. Thus he early develops a sense of responsibility, which is essential to success as well as future happiness and others. He learns industry. It comes to him naturally because he grows up with work. He also discovers for himself what a dollar costs in honest toil which is the foundation of thrift. And as important as all this is the environment in which he lives. That environment is made up of growing, developing, constructive things, whereas in

Mr. and Mrs. Walter Grissom, Mrs. L. C. Grissom and little daughter are visiting in Central Texas.

C. J. Poor who lives near Sudan has accepted the position as manager of the Sudan Produce.

C. A. Harris and little sister Lena Ruth of Amarillo were guest in the F. E. Miller home Saturday and Sunday. Mr. and Mrs. Miller accompanied them home.

the city what man builds is no sooner finished than it starts to deteriorate. There is a fundamental difference here, far reaching in its influence. Of course, this man is not the first to learn that farm-bred boys are likely to make a pretty good showing in work harness. It is still true that country boys run the business of this country, and we think it will be so for a long time to come. Boys and girls whose parents live on the farm are fortunate in a very definite way. And if there is a little hardship on that farm while they are growing up, it won't hurt them any, no matter if it does make the going rather rough for the grown-ups."

EVERYBODY'S CASH STORE

FAMOUS FOR BARGAINS

WHAT'S DOING IN WEST TEXAS

Lockney--Work on the gas distribution lines over Lockney and Floydada will be underway here soon. It is expected that gas will be ready for use by fall.

Shamrock--An expenditure of \$16,000 for improvements in the Shamrock yards has been authorized by officials of the Rock Island Rail roads. Included in the improvement program will be three additional spur tracks, two north of the depot and one south.

Rule--Contract for the bridge over the Double Mountain Fork of the Brazos west of here has been awarded. The contract price was given as \$13,727.

San Antonio--Traffic experts of the West Texas Chamber of Commerce have completed an analysis of the recent decision handed down by the Interstate Commerce Commission with reference to what is known as the Common Point Freight Case after six weeks of intensive study.

U. S. Pawkett, traffic manager, states that the total of West Texas freight charges on traffic to and from the Southwest will be very considerably reduced under the new rates, and that distributory, excepting for more or less considerable increases that are made to and from points in Arkansas and Louisiana. The new order is to become effective December 5 next.

San Saba--San Saba's new hostelry, Hotel San Saba, will be erected at a cost of \$96,000 and will contain 35 rooms. The building as suggest would have space on the first floor for a drug store, barber shop, and a telegraph station.

Lamesa--Approximately 400 acres of cavor Ranch, west of Lamesa, is being planted in sunflower seed, the Mammoth Russian variety being sown. The average yield expected is about a ton to the acre, and during the past ten years, the average price per ton for this seed has been \$90. It is thought a new industry will receive impetus from the cavor Ranch project.

Fort Worth--An All-Texas exhibit, to be a part of the Dairying in Dixie Exhibit of the South, will be collected and sent to Memphis, Tennessee, in October for the fall session of the National Dairy Show which will be held south of the Mason and Dixon line this year for the first time in history. The exhibit will be sent through cooperation of the East, West, and South Texas Chamber of Commerce. B. M. Whitekor, exhibit Agricultural Manager of the

West Texas Chamber of Commerce who arrange the prize winning Sesqui-Centennial exhibit last year, will arrange the All-Texas display, working in conjunction with J. E. Stanford, exhibit-manager of the East Texas Chamber of Commerce, and with other members of the special Texas committee.

Petersburg--Contract has been let and work is underway on a light and power plant for this place. A Throckmotor contractor has charge of the work.

Big Spring--Farmers of Howard County are milking more cows, feeding more chickens, and hoeing more gardens than at any previous time. Neither the acreage usually sown in cotton nor that of feed is as large in this section for 1927 as it was for 1926, due to the lateness on rains.

\$800. Paid To The Lamb CO. Farmers By Farm Bureau

About \$800 was paid to farmers of Lamb county, at the Palace theatre, in Littlefield, last Tuesday, when members of the Farm Bureau gathered here to receive refund of the one per cent reserve fund retained by the Bureau on the 1921-22 cotton shipments. Since cotton sold that year for an average of 19 cents, the refund amounted to about \$1.00 per bale.

Some farmers having check due them were not present at the meeting, and it is thought by county representative J. W. Hammock, that on account of the lateness of the announced date through the columns of the Farm Bureau News, they did not receive the notice in time to appear. Mr. Hammock has all the undelivered checks and will be glad to turn them over to the proper parties upon their application for same.

Mr. Hammock states that the Farm Bureau will start this year with more than 500 members in Lamb county and that conditions look favorable for a good financial year is concluded by the fact that already the Farm Bureau is advancing \$60. per bale on cotton consigned to the organization.

Mrs. G. A. Foote and daughter Faye returned Saturday from Amarillo.

Little Miss Virginia Vereen of Amherst is spending the week with her sister Bertha Vereen.

Rev. J. W. Saffer filled his regular appointment here Sunday.

Numerous Oil Tests Made Throughout South Plain

With the discovery of a shallow pool on Keagan No. 1 Mullican, 25 miles east of Littlefield, and with several major companies leasing heavily throughout the South Plains country, the attention of oil money is being turned in this direction.

The Mullican test down 423 feet with oil standing 200 feet in the hole, is located northwest of the old Bledsoe test which went to a dry hole at 4,500 feet several years ago. A showing of oil at 400, 940 and 1,360 feet was found in the Bledsoe test, was spudded in last week before a large crowd.

The Humble, Gulf, Sun, Texas-Phillips, Southern Crude, Vacuum and Llano oil companies have geologists studying formations in the northern part of the South Plains. Scouts from these companies and several others are now visiting the tests in the various South Plains counties.

The Gulf, Southern Crude, Pure, Llano oil companies and many individuals have been leasing thousands of acres in Yoakum county during the past two weeks. The Marland oil company has recently took a 7,000 acre lease in Carza county and the Miller Brothers signed up a 3,500 acre lease near Post, recently.

Floyd county has two new tests just getting started by the Exploration company.

Boles No. 1, sec., 1, Block G in Lubbock county is drilling now at around 1,000 feet in red bed a making a rapid progress.

Ellwood No. 1, on Wilbarger county school lands in Hockley is now spudded in. The Myrick well No. 1, in Hockley county is down 1,410 feet. Brownfield No. 1 in Terry county, is down close to 2,000 feet and reported making good progress. W. I. Elwood is planning for several tests to soon be made in the sand hills north of Littlefield.

No definite progress has been made at the Mullican well during the past week. Latest information obtainable is to the effect that the pump has not yet been put on the discovery hole, so it is still conjecture as to the amount it will eventually leave yield. There is some talk of drilling it a little deeper and giving it a shot of nitro-glycerine before putting on the pump. Another report states, on account of the location, it will probably be capped and nothing further done with it.

Location have been made for two other wells, work on which will begin as soon as rigs and machinery arrive. Leasing in that section has been quit active during the past week, much new land coming under lease, and other land changing hands at advanced prices.--Lamb County Leader.

G. G. Shirley and family left Monday to spend their vacation their daughter in Tyler Texas.

Another commission has been formed to study crime. Investigating the criminal is fast taking rank as one of the most popular of our indoor sports.

A New Jersey school girl found a dime coined in 1783. It is worth \$300. The next time you get a dime examine it.
