FAT STOCK SHOW HERE SATURDAY

Castro County club boys will have on exhibit 60 calves at the first Castro County Fat Stock Show here Saturday. The show will be held at the stock pens one mile north of the square and will be sold at 3 o'clock at the conclusion of the show.

The cattle will be judged promptly at 1 o'clock by Mr. Homer Brumley of Hereford. Mr. Brumley is considered one of the best judges of calves in the Panhandle and everyone will want to see him place the top calves in the show.

There will be two classes in the show. Each boy will be allowed to show two calves in the single class and two groups of five steers in the class for a group of five steers fed by one boy. There will be twelve entries in the single class and ten entries in the group of five class.

The original plans were for the boys to sell their calves on the Fort Worth market but due to OPA restrictions the plans had to be changed so the boys could sell their calves here where they can realize more from them. The boys who have fed the calves had planned to make the trip to Fort Worth to see their calves sold in order that they might learn the selling end of the cattle business.

The following boys will exhibit calves here Saturday:

Buddy Hill, Billy Hill, Dudley Aven, Wesley Sharp, of Hart, Dennis, Anthony, and David Acker of Nazareth; Oren Eubanks, Junior Cluck and Jimmy Cluck of Dimmitt.

Pvt. W. Hutcheson Is Member of "Century" Div.

WITH THE 100TH DIVISION OF SEVENTH ARMY IN FRANCE — Pvt. Wenford E. Hutcheson of Route 1, Dimmitt, Texas, has recently been assigned to the 398th Infantry of the 100th Infantry Division and is now serving with that organization on the Seventh Army front in eastern France.

With his new assignment he has become a member of the famous "Century" Division, commanded by Major General Withers A. Burrell of Richmond, Va., which played a major role in the high Seventh Army winter offensive on the Western Front.

Entering combat in early November, the 100th cracked the proposed German defensive line in the Vosges Mountains at Raon l'Etape. Driving the Nazis out of their eight-foot entrenchments in dense woods, mud, and rain, the 100th opened the way for the remainder of the U. S. VI Corps to cross the Meurthe River. It then led the American drive up the Sales Pass toward Strasbourg by capturing such towns as Moyenvic, St. Blaise, Schirmeck and Urmatt.

Dimmitt Soldier Is Propeller Specialist

AT AN AIR DEPOT OF THE AAF SERVICE COMMAND IN ITALY — Private First Class James K. Birdwell, son of Mr. and Mrs. J. M. Birdwell, Box 1, Dimmitt, Texas, is one of a select group of propeller specialists whose work has contributed importantly to the reputation this Prop Shop enjoys.

Pfc. Birdwell's job is to center the spider in the hub of the propeller. He is allowed a tolerance of .003 of an inch; a fraction of an inch more and the concentricity is unsatisfactory. It is an important job since the chief source of engine vibration is poor concentricity of the propeller. For the slightest vibration of a propeller during flight may cause a serious crash.

Pfc. Birdwell graduated from Dimmitt High School in 1941. Before entering military service he

Club Boys Will Show Livestock At Plainview

Kenneth and Floyd Acker will exhibit three Chester White barrows, Marvin Hoelting, two Poland Chinas and Alphonse and Carl Dean Klemon, three Poland China barrows. All of these boys are members of the Nazareth 4-H Club. Raymond Powell will exhibit two Poland China barrows and Joe Percy Hart will show five mutton lambs. Both of these boys are members of the Hart 4-H club.

Castro county 4-H boys hope to hold up the good record at the Plainview show again this year, stated County Agent, M. U. May, Castro County 4-H boys have established one of the best service records in Texas and they hope to add more awards to their record at this year's Plainview show.

Ceiling Price on Hogs Is Pegged

The new support price on hogs of \$13 per hundredweight, Chicago basis, and OPA's pledge current ceiling prices will not be lowered between now and September, 1946 should make heavier fall pig farrowing possible, according to Dan L. Boyd, District Representative, WFA's Office of Supply.

Chicago ceiling price on live butchers now is \$14.75 and 14 for sows, remaining effective until September 1, 1946 while the support price, recently upped from \$12.50 to \$13, continues through September.

War Food Administrator Marvin Jones calling on the nation's hog producers this week to meet the new fall pig goal of 37,000,000 head, an increase of 18 percent over the number farrowed last fall, said producers have an assured market, adding "This, together with prospects for adequate feed supplies in major hog producing areas, places the hog producers in a very strong position."

Saying that "for some time to come there will be demand for every pound of meat that can be produced," Jones explained "increasing pork production is the quickest way to increase the nation's meat supply."

In the present war Texas has a higher proportion of her population in the Armed forces than any other state.

Retailers Warned To Get Reports In

On April 20, filing date for clothing and house furnishings retailers covered by MPR 580, only 38 per cent of the retailers had sent their pricing charts to the District Office of Price Administration, according to Price Executive J. B. Mooney.

"It is essential that retailers who have not sent in their pricing charts do so immediately, for they will be required to stop selling May 4 if they have not received an acknowledgment of their chart by that time," Mooney urged.

In addition, he said, 90 per cent of the charts received have been incorrect and have been returned for correction. The principal error is in form. "Careful study of the small booklet containing the regulation and an explanation of it will eliminate the necessity for re-doing the charts."

All retailers who have not filed by May 4 will be referred to the enforcement division where immediate action will be taken to bring about compliance, Mooney said.

COMMISSIONERS COURT BREAKS OLD PRECEDENT

Another precedent has been broken, a record has been set, the un-heard-of has happened—the County Judge and Commissioners of Castro County have worked, not much but a little, for their pay checks. The guardians of the county funds rolled up their sleeves, and with other available laborers, poured concrete for new walks around the court house Wednesday. The original walks had sunken in the ground from about one to six inches and would, if it ever rained, cause water to run down the outside of the foundation. Enough concrete was poured by the County Judge, Commissioners and their helpers, to bring the walks back to their original levels.

Aside from the fact that this much needed improvement was accomplished with very little additional expense to the county, it was a treat to the citizens of the county—who do work—to have an opportunity to see Judge Ivey take a shovel in hand, and with an expression of exasperating pain on his face, heave one-half shovelful of cement after another into the cement mixer. He carried on however, until the job was finished, in a manner that should justify the trust placed in him by the voters of Castro County.

Many were the expressions of sympathy as the onlookers watched the little man from Precinct 2, Andy Thompson, as he, with determination far beyond his strength, burrowed his way through a pile of gravel with a very small shovel, to at last, late in the afternoon, emerge half-conscious and triumphant.

One of the most realistic dramas ever witnessed in Castro County was embodied in the plight and posture of John Stork—keeper of the bar-pits in Precinct 4—and T. R. Davis—guardian of the lanes in Precinct 1—as they painfully bent their pampered frames to a comical position in order to manure the concrete with a board as it gently flowed between their legs.

Mr. J. O. Ayers, representative of the county, who was present at the time, managed to lug a heavy string around all day. The string was used to indicate the thickness of the walk and to let the other commissioners know when enough concrete had been poured in any particular section. Truly we believe that Commissioner Ayers should receive a bonus at the end of the year.

The Judge and Commissioners are to be commended for their work and enterprise in accomplishing this much needed improvement—but until Wednesday their constituents had failed to fully realize just how seriously the labor condition had really grown.

Lt. Robert Estes Gets Air Medal

AIR TRANSPORT COMMAND BASE, INDIA—1st Lt. Robert E. Estes, pilot, of Dimmitt, Texas, has been awarded the Air Medal, it was announced by Brig. Gen. William H. Tunner, commanding general of the India China Division, Air Transport Command.

The award was made upon completion of 150 hours of operational flight in transport aircraft over the dangerous and difficult India-China air routes, where enemy interception and attack was probable and expected.

The air trail over the Hump, famed route through the towering peaks of the Himalaya Mountains, blazed by the Air Transport Command, is recognized by airmen as the world's toughest. Today the Hump route is the lifeline of military supplies for the Allied forces fighting the Japanese in China.

The citation accompanying the award adds:

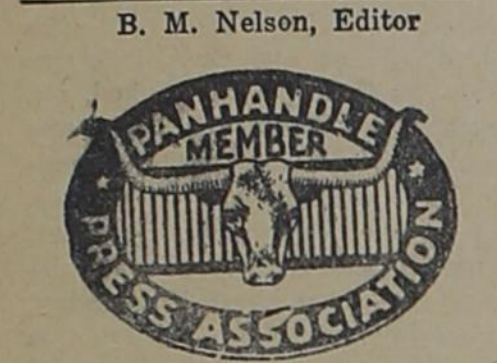

"Flying at night as well as by day, at high altitudes over impassable, mountainous terrain through areas characterized by extremely treacherous weather conditions necessitating long periods of operation on instruments—requiring courage and superior performance of his duties to overcome, he accomplished his mission with distinction."

The award was made for the period of service from October 1, 1944 to December 30, 1944.

CLASS HISTORY

In 1934 a group of small children dressed all spick and span trooped to school to begin their school days under the supervision of Mrs. Stringer, Miss Garrison, Mr. Clemons, Miss Ewing, Mr. Farley, Miss Hill, Mr. Reeves, Miss Whitford and Miss Barnett. It was with genuine regret that they bade goodbye to grade school and moved to high school to enter the seventh grade. With the seventh grade, came a new schedule of work and a taste of high school just ahead. Graduation turned out a wiser group of students well prepared for high school life, which had lost some of its glamour. In 1941 the Freshman class organized, thrilled to the utmost at the prospect of really being a part of high school. As freshmen the first real parties were experienced and what grand new experience they proved to be! Through the sophomore year they looked forward to being jun-

SENIOR CLASS PROPHECY

Ten years ago, 1945, seventeen unexperienced kids were graduated from DHS. I returned to my Alma Mater the other day and was looking at the beautiful trophies in the case. The Bobbies had won them, it seems. I asked to be introduced to the coach of that famous team. I was not really surprised when I met coach Sue Watson again. While I was at Dimmitt I ran into Mrs. Billy Carthel, nee Dorothy Clingsmith. She had just returned to Dimmitt for a visit. I also got acquainted with the little four year old twin boys who are already wizards at Math. I flew down to Austin last week to see the former Dorothy Ziegler when I learned that she was Superintendent of Nurses in her husband's hospital. While there I attended a concert presented by a famous pianist. Lo and behold when the tall, slender woman walked out onto the stage it was none other than Mrs. Ray Aldredge, nee, Marilyn Gollehon. When I went out to the State University to see a friend of mine I ran into Professor Billy Jones. He hasn't changed at all. He'll

THANKS

To the faculty and student body the Seniors '45 take this method to say "Thanks." Thanks for our most unforgettable year. Our Senior year is the one we will remember more than any of our school days. Ad without the student body and faculty and their cooperation, it would not have been so enjoyable. Thanks for honoring us above the other classes. Thanks to the teachers for being so kind and understanding when we were inclined to have a good time. There are many other things we could mention, but for now we'll just say "Thanks." THE CLASS OF '45 still do anything to get out of class. Who do you suppose is the head bookkeeper at the University? That's right. It is that sweet little girl Genevia Collins Ayers. Barbara Hunter finally decided to settle down and enjoy life to its fullest. She and her handsome husband and adorable daughter are living in Dallas. Her next door neighbor is Mrs. John Curtis. You'll remember her as Mary Autry. During the time Mary isn't tending her four year old son she nurses at the Dallas General Hospital. I went out to California a few weeks after I arrived in the states. I ran into Norma Hunter in San Francisco. She, too, has changed her name and she and Marvin Cryer have triplets. In Hollywood I went out to the MGM studios. I had watched the filming of a picture before I recognized the main star. It was our own Dorothy Mobley. She's one of the best comedienne of the day. The class of '45 has two comedians. The other is Virgil (Turtle) Lamb. He has a radio show which can be heard over the NBC network every Tuesday night after Bob Hope. Turtle's show would not be such a success were it not for the man

BACCALAUREATE SERMON

The Seniors are planning their commencement exercises. The baccalaureate sermon will be May 6, 1945, in the High School auditorium at 11 o'clock. Rev. Sherrill will be the speaker for the baccalaureate sermon. LIBRARY NOTICE All Seniors must have their library books clear May 2. All other students must have theirs clear May 4. This means the students had better start digging in their lockers and looking around home for books that they have failed to return. Unless these books are returned, the students who have them checked out will not be allowed to take their final tests until all records are clear. DID YOU KNOW The Seniors are editing the paper this week? Seniors take examinations the 3rd, and 4th of May. Commencement will be May 11. Baccalaureate will be Sunday, May 6. Five members of the Senior class started school in Dimmitt in the first grade. All members of the class are really working toward examinations. Barbara Hunter's boy friend isn't going to come home May 1. The majority of the Senior class acquired his million dollars already. Just as I was entering my hotel in New York a tall grey-haired gentleman bumped into me, nearly knocking me over. I looked up and who should I see but J. O. Strother. He has retired and is living with his wife and Patsy Ann in a penthouse in the city. Me— I'm returning to Europe in the morning. I'm a foreign correspondent for one of New York's leading newspapers. HOW and WHY CHIROPRACTIC METHODS ARE DIFFERENT

Chiropractors use the word "adjustment" instead of "treatment", because the word "adjust" exactly expresses what they do. It means "to make accurate; to bring into a true relative position." As Chiropractors employ it, it means to correct the position of a vertebra which is out of alignment, so that it assumes its proper relation with the vertebra above and below.

To "treat" means: "The application or giving of remedies for the cure of diseases; medical or surgical care of a patient."

Explanation may further clarify the distinction between the words.

To soften hard water you treat it with borax or some other chemical; you do not adjust it. Soil is treated by adding to it the chemical which lacks, but it is not adjusted. However, if your sewing machine takes too long or too short a stitch, you adjust it; you do not treat it.

The Chiropractor applies no remedy, medicine, liniment, lotion or operation to act upon the disease or the diseased organ. He merely corrects the mechanical obstruction, which has acted as a hindrance to Nature's efforts to "treat the disease". That is why Chiropractic results are real and permanent.

Thus, it is evident, that the Chiropractor cannot be said to "treat" for the fundamental fact upon which the science of Chiropractic is based is that there is an intelligence which builds controls, repairs and adapts the body to the requirements of life through the nervous system.

Not a muscle moves, not a gland secretes, not one function of the acts of nutrition, breathing, circulation, etc., is carried on except through nerve stimulus. It is the Chiropractic premise that the power which heals the body wounds, mends its broken bones and adapts it perfectly to its environment is self-sufficient - capable beyond all wisdom of man. All that is necessary in the restoration of health to diseased organs is to open the lines of communication and allow the normal power to flow through. This requires an adjustment, and the fact that Chiropractic succeeds where other methods have failed should commend it to thoughtful, intelligent people.

The word "adjust" indicates the difference between finding the primary cause and correcting it, and "treating" effects of that cause for temporary relief or for the suppression of symptoms.

Chiropractic teaches that disease is not a substantial thing which lies in wait just around the corner to pounce upon and invade the unsuspecting victim. Disease does not invade our bodies. It does not attack us from without. Disease is merely a condition within the body which prevents a normal expression of function.

Are these functions within our bodies a mere happenstance? Does the stomach digest our foods without intelligent direction? Does the heart beat seventy-two times each minute by mere chance? Is it only an accident that maintains the bodily temperature at 98.6 degrees? We need but a cursory thought to realize that all these must be in response to immutable law.

Cut the nerves leading to the stomach, and it can no longer digest the foods. Cut those leading to the heart, and it ceases to beat. Destroy the thermal center in the brain and death results. In brief, the Chiropractor recognizes that all function within the human body results from an intelligent control exercised through the nervous system must be free from interference, or function will be deranged.

It is the province of the Chiropractor to discover where nerve transmission is interfered with and to remove such interference.

It should be remembered that nerve interference develops gradually. It is also true that relief must be brought about gradually. Don't come to the Chiropractor expecting instant freedom from a condition which has existed perhaps for years. Be as reasonable in your conception of Chiropractic as you are in other matters.
