WOOL GROWERS URGED TO KEEP PROPER RECORDS

Sales documents are required in support of applications filed by producers for payments under the wool program, according to Roy Deaton, chairman of the Terrell County Agricultural Stabilization and Conservation Committee.

Mr. Deaton reminds wool producers that the best time to obtain adequate sales documents is at the time shorn wool or unshorn lambs are sold.

Sales documents must show: (1) The name and address of the producer; (2) date of sale; (3) net weight of wool sold or, in the case of unshorn lambs, the number and liveweight of the unshorn lambs sold; (4) the name, address, and signature of the buyer; and (5) in the case of shorn wool, the net amount paid the producer where the sale was at his farm, ranch, or local shipping point, or the marketing deductions and net sales proceeds where the wool is sold on consignment through a pool cooperative or other marketing agency.

Considerable inconvenience was encountered by producers who did not obtain proper sales documents for their sales in the 1955 marketing year. Many applications consequently had to be returned for additional information.

The National Wool Act became effective for the sale of shorn wool and lambs sold with the wool on it the beginning of the 1955 marketing year. The legislation provides for payments to producers to bring the national average return for wool up to the incentive level. The announced incentive price level for wool sold in the 1956 marketing year, starting April 1, 1956, is 62 cents a pound, the same as the level for the 1955 marketing year.

The ASC office is not yet ready to accept 1956 sales documents, according to F. M. Wood, local office manager, but they expect to be ready to accept the documents in the near future and wool producers will be notified.

The tax rolls of the county, the appraisals by the citizens' committee and other information pertaining to the tax structure of the county are open any time to any taxpaying citizen and the interest of all taxpayers is urged in the understanding of the financing and tax-levying practices of the county.

Game department officials are recommending a season for javelina this fall from November 1 to December 31, both days inclusive. The bag limit and seasonal limit are two javelinas, according to the recommendation report.

Braves Win 18-0 Over Pecos Team

The Sanderson Braves swamped the Pecos baseball team by an 18-0 score here last Sunday afternoon.

The Braves will play the Barstow Panthers here next Sunday.

THOUGHT FOR THE WEEK

"By strength shall no man prevail." I Samuel 2:9.

It took something above the human level to lift us above the human weakness. When you try to carry your burden without God, you not only fail but you disappoint God. — H. B. Dean.

IT SAYS HERE:— Taxes are what you pay into a pot in Washington so it can be divided by different bureaus to be spent in buying services which are passed on to the taxpayers free.

Rendition Notices Mailed This Week To County Taxpayers

Rendition notices were mailed to all property-owning taxpayers in Terrell County this week. The purpose of the notices was to advise property owners, both real and personal, of the re-evaluation of their property and the change of the rendered amount on the tax rolls of the county.

In most cases all real estate in Sanderson had its value raised, either by the citizens' appraisal committee, or by the elevation of the value of all real estate in Sanderson by 20 per cent.

In many cases local real estate values were raised in equalization efforts and then got an increase of 20 per cent in the blanket raise which was assessed all real estate in Sanderson.

All automobile owners not otherwise taxpayers were mailed rendition notices with an assessment in local taxes for their automobiles. This assessment was based on the age of the car rather than the condition or purchase or resale value. The assessment of all motor vehicles was made upon the recommendations of the commissioners and not by the citizens' committee.

The equalization of the ranch land in the county by the commissioners consisted of a raise of 20 per cent in the valuation of all land north of a certain east-west line across the southern part of the county and leaving all land south of that line the same; the raising of the valuation of goats 50c per head and leaving the value of sheep the same, \$2.50 per head.

The board of equalization, as noted on the rendition notice, will meet on June 11 at the courthouse at 10 a. m. Any person who wishes may appear before the board in defense of his belief or reason to believe that his taxes are not comparable to those of a taxpayer who owns similar property. The board of equalization or commissioners court will consider any and all complaints or opinions of taxpayers.

Civil recovery suits may yet be filed against the salesmen of the Certified Drafts of the defunct US Trust and Guaranty Co.

At the request of the Insurance Departments liquidation division, the attorney general is preparing a ruling on the legality of such suits.

Testimony from buyers would be on the basis of charges.

Insurance Deadline Nears Some 120 insurance companies have yet to meet the legal requirements in annual permits to do business in Texas.

The Insurance Commission has indicated that it will take prompt action toward closing the firms that fail to make the June 1 deadline. The firms include 20 stock life insurance companies and 100 mutuals of various sorts. Most are small concerns.

Procedure calls for a show-cause order and a hearing in each case. This will require some 30 to 60 days.

Land Board Gets Refund

A refund of \$3,060 has been made by Robert Lee Richey of Harrisburg, Pa., to the Veterans Land Board. He also promised an additional \$10,000. The two sums represent commissions made by him for selling Zavala County land under Texas GI program. His father, H. Lee Richey, made the appraisals on the land.

In forwarding the money, Richey wrote that "A serious question has arisen as to the propriety of my commission on these sales to the land board," hence the refund.

Atty. Gen. John Ben Sheppard said as to the commissions, "There is no allegation of fraud involved."

Anti-TB War Launched

A 10-year "total war" against tuberculosis is under way in Texas.

tuberculosis is under way in Texas. There are 20,000 active cases in the state, not including an estimated three per cent of the wet-backs who enter the state illegally.

Strategy was mapped in Austin by some 300 health experts and laymen. They met under auspices of the Texas Tuberculosis Association.

Out of the discussions came 20 recommendations for "killing the killer". Included were (1) intensified efforts to find and treat tuberculars, (2) increased aid to dependents of TB victims and (3) more incentive to medical personnel to work in TB hospitals.

More Vaccinations Urged

Widespread inoculation to prevent a major polio epidemic is being urged by the State Department of Health. Polio cases for 1956 already total 257. This is an increase of 62 over this time last year. Peak outbreak usually hits Texas in July and August. Only one third of those eligible for Salk shots have received them.

Short Shorts

Charles K. Devall, publisher of the Kilgore News-Herald, was elected president of the Texas Good Roads Association at its annual meeting in Austin. He succeeds Fred A. Wimple of Midland.

A survey of highway needs and problems is under way by the Texas Research League. One phase of the study is the future role of counties and cities in providing adequate highway facilities.

Herbert O. Paul of the Brotherhood of Locomotive Engineers is the new chairman of the Texas Joint Railway Labor Legislative Board. He succeeds veteran Joe T.

Steadham, Brotherhood of Railway Trainmen.

Allowable oil reduction in Texas for the month of June has been cut by the Railroad Commission to 3,261,799 barrels a day. This is a reduction of 74,456 barrels under May allowables. It is the fourth straight month that reductions have been authorized.

Pleas for a water conservation program that would give farmers and ranchers first call on impoundment of the rain which falls on Texas were made before the Water Resources Committee. Spokesmen from 11 agricultural groups urged the formation of a workable water conservation program for Texas.

Pres. Dwight D. Eisenhower's visit to his native state, planned long ago, by chance came three days after the Democratic State Convention. There, Sen. Lyndon B. Johnson was endorsed as favorite son candidate for the Presidency.

Thus, Texas has two native sons in the race for Chief Executive of the United States.

Gov. Allan Shivers, who has said he will support the presidential nominee whom he considers best for the nation, regardless of party, didn't attend the Dallas convention at which Johnson was the main figure.

As Texas Chief Executive he did welcome President Eisenhower at Waco, where he received an honorary degree from Baylor University.

Johnson's Goals

Senator Johnson gained his personal goals at the Democratic convention. But his control of the convention was shaky all the way through.

New Tax Suggested

When the 55th Legislature convenes next January, the biggest bugaboo will be a familiar one - the need for more money. Budget estimates indicate at

least \$25 million more a year will be needed for 1957-59 appropriations.

Campaign platforms of legislative candidates show that many think existing tax sources are paying as much as they can. Many suggest that new revenue sources should be found to equalize the load. Few are very specific.

"Business activities" tax was proposed by Carey C. Thompson. Such a tax, said Thompson, would be based on value added to a product by manufacture and hence would hit "only newly-created wealth hitherto untaxed."

Michigan, he said, collects about \$30 million a year by this means.

Alternate proposals, such as income or sales taxes, widely used in other states, have always met strong opposition in Texas.

IT'S SWITCHCRAFT

- that's what it is!

You'll see when you try Buick's new Variable Pitch Dynaflo!

IT TAKES a new word to describe the magic at your command when you drive a '56 Buick - with the newest transmission of them all.

It's full power go-ahead on the instant. You can get where you were just looking in a shaved second's time - with the most modern and most thrilling surge of safety acceleration in the land today.

It's smoothness, too. Complete freedom from the "bump" and lag of gears shifting. Only with Dynaflo can you go winging away with so smooth a sweep.

And only with a '56 Buick can you enjoy Dynaflo's newest marvel. It's something the engineers call "double regeneration." Lets you start off like an Olympic sprinter, with the pedal pressed just an inch or less. (And driving that way, you get better gas mileage.)

There's more big news, too, that goes with this new Buick magic. And that covers a lot more than styling.

Sure - you'll like the graceful new beauty of the V-shaped prow and sweep-ahead look. And you'll like the extra room inside.

But as you drive you'll find that this Buick responds with the new might of a big, record-powered V8 engine of 322-cubic-inch left.

It handles easy as butter to a warm knife. Tracks the curves like a plane on the beam. Makes any road seem paved with pillows.

And what's responsible for all this are more new engineering advances than Buick has ever made in one model year.

So why not come in and see - and feel - the difference they make? You'll soon know why owners find it's the best Buick yet - and the best buy yet, by far.

**New Advanced Variable Pitch Dynaflo is the only Dynaflo Buick builds today. It is standard on Roadmaster, Super and Century - optional at modest extra cost on the Special.*

SUN POWER

Probably all of us can remember flashing messages on a bright, sunny day. Or maybe you burned your dry leaves.

Well, we were all using "sun power". A simple form of energy. But it was still power from the greatest source of energy man has ever known — the sun.

For years, we've been reading about how men have been trying to capture and put to work the sun's energy. And telephone scientists, just in the past few months, have come up with the first workable device to do the job. It's called the Solar Battery.

Believe it or not, the heart of the Bell Solar Battery is common, ordinary sand. From this sand, silicon disks are made which can convert sunlight into electrical power.

How will the Bell Solar Battery affect your telephone service? Really, we don't know yet. But right now, an experimental installation of solar batteries is supplying power on rural telephone lines in another part of the country. This experiment may give us some answers.

Regardless of the future of the Bell Solar Battery, already proof of one thing. Telephone scientists will go to great lengths to find ways of improving your service.

This time they've even brought the sun into the act.

THE MILES FLASH BY

When you pick up the receiver of your telephone to make a Long Distance call, you're turning hours or days into seconds.

That's because a Long Distance call puts you in touch most instantly with friends or relatives in a distant city.

As well as being the best way to keep in touch any time a Long Distance call is also a happy thought for a special occasion — such as a birthday, anniversary, wedding, or just a friendly get-together. You can talk as long as you like because Long Distance rates are low, especially if you call station-to-station. Remember, also, to call by number. Your calls will go through twice as fast.

WELCOME MAT IS OUT

From time to time, individuals or groups stop in at telephone building to learn how we do things — and to get what's behind their telephone service.

If you'd like to do the same with friends or a business or social group, just call me. I'll be happy to plan a visit for you.

More Than She "Bargained" For

Dad Baker retired from active dairying—seven or eight years ago—but still keeps a half-dozen pure-breds more or less as a hobby.

Dad goes all-out for these six. Temperature-controlled barn, expensive feed... the works. As a result his milk has a low bacteria count, a high butterfat content. And as a favor to neighbors, he sells it just two cents above the ordinary price.

Recently, a neighbor complained—asked if she couldn't get the milk "at cost." Dad agreed.
